

NAPTOSA WESTERN CAPE

Running a workshop

Your workbook for the workshop creator training, 8 October 2026.

Your name

Your work email

Your personal email

Orientation: the map and the rules

In this first part you learn where everything lives and which jobs are yours. Nothing here can break anything. You look, you write and you talk. You never press a money button, and you never touch your facilitator's screen.

Write your two email addresses here first. You use them for every booking you make today.

- **Trainee work email:** _____
- **Trainee personal email:** _____

You will ask yourself one question all day:

- **The question:** Is this mine to do, or do I recognise it and hand it to Finance?

Exercise 1: The four practice rules

What you will learn: You will learn that some clicks on the live system can never be taken back. You will also learn the four rules that keep today's practice safe.

What is happening: Your facilitator welcomes you and talks you through a one-page brief. On your desk you have the brief, a printed cheat sheet open at Stage 1, this workbook and a pen.

Your steps:

1. Read the title of the brief. - **Brief title:** Run a workshop from first draft to certificate today
2. Write the question at the top of this workbook. - **Write:** Is this mine to do, or do I recognise it and hand it to Finance?
3. Read your role. Your account has the "Workshop creator" tick. It does NOT have the "Finance" tick. So some buttons will simply not be on your screen. That is on purpose. It is not a fault.
4. Read what each tick lets a person do. A tick is a permission that a super admin switches on for a staff account. - **"Workshop creator" tick (yours):** create, edit, publish and close workshops. Upload and remove files. Open check-in early. It is why you see the "Create Workshop" tab. You can also delete a workshop for good with "Delete workshop", but only while nobody has paid. It does not let you change the reminder settings. - **"Finance" tick (not yours):** the money jobs. Mark a booking paid. Create, edit or switch off coupons. Cancel or remove a booking. Send a payment reminder by hand. Correct a payer's email. Pull the export that has money in it. - **In the Western Cape today:** nobody has the "Finance" tick and there is no auditor. So Finance here means the super admins.
5. Read what you will have done by 13:10. You will have created, published and shared a TRAINING workshop, followed a booking, handed a payment to Finance, run check-in, marked attendance, sent a certificate and pulled an export.
6. Read the order of the day. You follow one workshop's life in this order:
7. Create it yourself, from your own printed planning sheet.
8. Publish.
9. Share.
10. Follow bookings.
11. Chase payment, and hand the money to Finance.
12. Handle changes.
13. Run the day.
14. Attendance.
15. Certificates.
16. Exports.

17. Learn the four practice rules. - **Rule 1, which workshop:** only touch workshops titled "TRAINING - - delete after". Nothing else. - **Rule 2, which email:** every booking you make uses your own email. Never a real member's email.
- **Your bookings:** <Trainee work email> or <Trainee personal email>
 - **Your facilitator's bookings:** loxly@lbtec.co.za
 - **When an exercise asks for a wrong address on purpose:** wrong.address@example.com
 - **Rule 3, how they pay:** EFT only. EFT is a plain bank transfer into NAPTOSA's account. The bank details on the EFT instructions are for training only. Never pay them.
 - **Rule 4, cards:** never type a real card number anywhere. Not even on the "Card (demonstration)" option.
18. Read why the rules matter. These are the exact warnings you will meet later today: - **On the "Mark EFT paid" box:** "A receipt is emailed immediately and this cannot be undone." - **On certificates:** "This cannot be undone." - Every email the system sends is a real email.
19. Turn the brief over and say the four rules back to your facilitator in your own words.

Why your own email matters: the system emails the address on the booking. Because you use your own address, you receive and read every email your bookings send. You see exactly what a member sees, and no real member gets anything.

If you book the same workshop twice with the same email: you see "Possible existing registration" with the reason "same email, same telephone". Click "Save as additional entry".

How role-plays work today: sometimes your facilitator plays a caller, such as a member, a school asking about a booking or payment, or a colleague. When he says "Narrator", he is telling you what happens on screen. When he says "Coach", he is himself again. Hint slips lie face down beside you. Turn one over whenever you want.

What you should see:

- The question written at the top of this workbook.
- Your cheat sheet beside your keyboard, open at Stage 1.
- You can say all four rules without looking.

Notes:

Exercise 2: Your first version on paper

What you will learn: You will learn that you already know more than you think. At the end of the day you compare this page with what you can actually do.

What is happening: Before anyone shows you a screen, you write down how you think a workshop goes from idea to certificate. There is no wrong answer.

Your steps:

1. Turn to a blank page.
2. Write the steps of a workshop's life in your own words, in the order you think they happen.
3. Circle every step you think involves money.
4. At the bottom of the page, write one question you hope today answers.
5. Write the label at the top of the page. - **Label on the page:** My first version
6. Fold the page and put it in the back of this workbook. Nobody corrects it now.

If you get stuck: ask yourself, "What is the very first thing that happens when the office decides to run a workshop?"

What you should see:

- A list of steps in your own handwriting.
- Some steps circled as money steps.
- One open question at the bottom.
- The page folded away.

Exercise 3: The six tabs on your screen

What you will learn: You will learn what each of the six Workshops tabs is for. You will also learn that a missing money button is not a fault. It tells you who to call.

What is happening: You sign in on your own staff login and click through the Workshops page. You only look. You type nothing and save nothing.

Your steps:

1. Open the staff login page and sign in with your own staff login. - **Web address:**
<https://naptosawc.co.za/staff>
2. Open the Workshops page. - **Web address:** <https://naptosawc.co.za/staff/operations/workshops>
3. Click "Create Workshop". Say what it is for: building a new workshop. You only see this tab because of your Workshop creator tick. Do not type in it yet. - **Watch out:** if you press Enter in a one-line box on this form, it creates or saves the workshop. Never use Enter to move between boxes.
4. Click "Published Links". Say what it is for: every workshop, with its links, QR codes, check-in, files and coupons. Workshops sit in four groups: - **"Current & upcoming"**: workshops still to happen. - **"Closed archive"**: workshops where registrations were closed. - **"Drafts"**: workshops never published. - **"Needs closure"**: workshops whose date has passed but which are still open. From the night of 8 to 9 October 2026, a nightly run at 00:05 closes them by itself, so a workshop only waits here until that night's run. Today's ended workshops still show here until tonight's run. You can close one sooner yourself.
5. Select the practice workshop. - **Workshop:** TRAINING - Chasing the money - delete after
6. Open "Registrations, coupons and documents" on that workshop.
7. Look at "Coupons" and read the line on screen aloud. A coupon is a discount code a person types when they book. Making one is a Finance job.
8. Click "All Registrations". Say what it is for: every booking, grouped by what needs doing.
9. Look at any booking row. Notice what is NOT there: "Mark EFT paid", "Remind" and "Cancel booking". "Mark EFT paid" is what Finance presses once a member's bank transfer shows on the statement. It emails a receipt straight away.
10. Click "Analytics". Say what it is for: reporting you can read but not change, such as "Payment completion", "Revenue collected" and "Attendance".
11. Click "Reminders". Say what it is for: the schedule of automatic reminder emails. You land on "Reminder settings". Look only. Press no "Save" here. The button for sending a payment reminder by hand is Finance only, so it is not on your screen.
12. Click "CPTD points". Say what it is for: the points each attendee earned, with their SACE number and certificate number, for the Western Cape. CPTD points are the professional development points

13. Click "Refresh" at the end of the tab bar. On a smaller screen it shows only as a circular arrows icon. It reloads the workshop list only. Nothing else.
14. Look at your facilitator's screen on the second monitor. His workshop cards carry a province label and show every province. Yours show the Western Cape only, with no label. Anything you create is always a Western Cape workshop.

- Each tab swaps the content below it. The web address changes to name the tab, so refreshing the browser keeps you on the same tab.
- "Create Workshop" is on your screen.
- **Coupon line:** "Only a super admin, an auditor or a Finance user can create coupons."
- No money buttons on any booking row in "All Registrations".
- "Reminders" opens at "Reminder settings". You may also see: "You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor."

Exercise 4: Sort the 12 action cards

Exercise 5: Who is Finance?

Page 5 of 14

What is happening: Your facilitator opens the staff roles page on his own screen. You read it. You do not open this page yourself, and nobody ticks or unticks anything.

The rule: Finance is the "Finance" tick, OR the auditor role, OR a super admin. Nothing else, however senior the person is.

Your steps:

1. Read the section text on your facilitator's screen aloud. It says: "Add workshop rights on top of a person's role. Workshop creator can create, edit and publish workshops. Finance can mark bookings paid, send payment reminders and manage coupons. Only super admins and Finance can mark paid. Marking attendance needs neither tick: every staff member of the province can do it. Each person works in their own province and sees a change after reloading the page."
2. Point at the "Finance" column. Nobody in the Western Cape has it ticked.
3. Learn the auditor rule. If someone had the auditor role, their row would say "The Auditor role is always Finance." The Western Cape has no auditor, so there is no such row to see.
4. Notice that super admins are not in the list at all. They always have both ticks.
5. Find your own row. - **Your row:** "Workshop creator" ticked. "Finance" not ticked.
6. Find the other Western Cape Workshop creators. - **Workshop creators:** the other Western Cape workshop creators. Read their names off the screen.
7. Write your Finance people on your cheat sheet and below. In the Western Cape that is the super admins only. - **Finance person 1:** ____ *How to reach them:* ____ - **Finance person 2:** ____ *How to reach them:* ____ - **Finance person 3:** ____ *How to reach them:* ____

What you should see:

- The "Provincial Roles" section text on your facilitator's screen.
- A "Finance" column with no Western Cape row ticked.
- Your own row with Workshop creator on and Finance off.

Exercise 6: A helpful colleague offers to sort everything out

What you will learn: You will learn that being senior does not bring money rights, and how to hand a money job to the right person.

What is happening: You are the Workshop creator for the Western Cape. You have the Workshop creator tick and not the Finance tick. It is mid-morning in the office. A teacher's EFT has shown on the bank statement for a booking on the TRAINING workshop. A friendly colleague, Mariam, stops at your desk with a mug of tea and a list of offers from herself and two colleagues, Riaan and Thabo. For each offer, decide whose job it really is.

Your steps:

1. Put your own screen on "All Registrations".
2. Listen to Mariam's first offer.
3. Before you answer, ask questions. Find out the person's role and what their account can do.
4. Answer the offer. Say whose job it is and why.
5. Repeat for each offer Mariam makes.
6. Close with your own hand-off sentence (see "When to hand it to Finance" below).

Good to know: you will not find the teacher's booking on your list. That is expected. This scene is about who presses the button, not about finding the row.

If you get stuck: turn over the next hint slip. One at a time.

Notes:

When to hand it to Finance

Hand it over whenever the job is one of these:

- Marking a booking paid ("Mark EFT paid").
- Creating, editing or switching off a coupon.
- Cancelling a booking, or removing a cancelled one.
- Sending one person a payment reminder by hand ("Remind").
- Correcting a payer's email ("Correct payer email").
- Pulling the export with money in it.

A missing button is your cue. Reloading or "Refresh" will not make it appear.

When you hand it over, pass on three things: the booking name, the workshop, and what is needed.

What you say: "This is a Finance job. [Finance person], please [what is needed] for [booking name] on [workshop]. [Any fact you checked, such as the payment date]."

Example: "This is a Finance job. [Finance person], please mark Kagiso's booking on the TRAINING workshop as EFT paid. His transfer shows on yesterday's statement."

Write your own hand-off sentence here:

- **My hand-off sentence:** _____

What the system cannot do yet, and what to do instead

- **Registration closes by itself overnight, not the moment a workshop ends.** From the night of 8 to 9 October 2026, a nightly run at 00:05 closes every published workshop whose end time was before midnight. Once a workshop's end time passes, the website Events page drops it on its own. But until the 00:05 run that night, the booking link and its QR code keep taking bookings. After the run the workshop sits in "Closed archive". It refuses new bookings, an unpaid booking on it can no longer get EFT details or pay by card, and its payment reminders stop.
- **What to do instead:** to stop bookings sooner, open "Published Links", click the group "Needs closure", select the ended workshop and click "Close registrations". The workshop moves to "Closed archive" and the link stops taking bookings at once.
- **If the event moved:** edit the dates. Do not press "Reopen registrations" on a workshop whose dates have passed, because the next 00:05 run closes it again.
- **The line you will see on an ended, open workshop:** "This link is still open, but the workshop dates have passed. Edit the dates or close registrations before sharing it."
- **"Delete workshop" only works while nobody has paid.** Once a booking on your TRAINING workshop is marked paid, it cannot be deleted. The box then says: "A payment has been recorded for this workshop, so it cannot be deleted. Payment records are always kept. Cancel the workshop instead. To stop new bookings now, use Close registrations."
- **What to do instead:** "delete after" in the title means you click "Close registrations" when the day ends.
- **A paid mark, a sent email or an issued certificate cannot be undone.** Receipts cannot be deleted either.

- **What to do instead:** prevent it. Use the TRAINING workshop, your own email on every booking, EFT only and never a real card. If something real goes wrong, stop and tell your facilitator.
- **You cannot do money jobs.** The buttons are not on your screen, and the system refuses them even if you reach them another way.
- **What to do instead:** find the booking, check the facts and hand it to a named Finance person. You can still pull "Export Excel" without money.
- **You see the Western Cape only.** You cannot help with another province's workshop.
- **What to do instead:** send the colleague to the super admin, or to their own province's staff.
- **Reminder settings are one list for every province.** Changing them for one booking changes them for everyone.
- **What to do instead:** look only and save nothing. If it really needs changing, raise it with the super admin.
- **Bank details belong to the super admin.** Every save on "Payment details" emails a change alert to real staff, and "Confirm these details" changes the bank account real payers see.
- **What to do instead:** look only, never save, and pass the question to the super admin.
- **"Refresh" reloads workshops only.** A coupon change will not show after it.
- **What to do instead:** click away and back, or reload the browser.

Check yourself

Answer without looking.

1. Name the ten steps of a workshop's life in order.
2. Who counts as Finance, and why is a case admin colleague not Finance?
3. What are the four practice rules, and why do they matter on this system?
4. The workshop title says "delete after". What will you actually do at the end of the day, and why?
5. A teacher phones. She paid her EFT yesterday and wants confirmation. Her booking row has no "Mark EFT paid" button. What do you do?

Notes:

Answers

- **Check yourself 1:** Create (from your own planning sheet), publish, share, follow bookings, chase payment and hand it to Finance, handle changes, run the day, attendance, certificates, exports.
- **Check yourself 2:** Anyone with the Finance tick, anyone with the auditor role, and a super admin. A case admin only becomes Finance if a super admin ticks Finance on their row. In the Western Cape today Finance is the super admins only.
- **Check yourself 3:** Only TRAINING workshops. Your own email on your bookings. EFT only, and never pay the training bank details. Never a real card. They matter because a paid mark, a sent email or a certificate cannot be undone.
- **Check yourself 4:** Click "Close registrations" on "Published Links". A workshop with a paid booking cannot be deleted. Closing it yourself stops bookings at once, instead of waiting for the 00:05 run that night.
- **Check yourself 5:** Hand it to a Finance person with her name, the workshop and the payment date. Tell the teacher Finance will confirm it.

- **Card sort:** Mine is "Publish workshop", "Close registrations", "Present", "Send certificate" and "Export Excel" (no money). Finance is "Mark EFT paid", "Create coupon", "Cancel booking", "Remove", "Remind", "Correct payer email" and "Export Excel" (full, with money).

Set up and publish a workshop

In this part you plan a workshop from your own planning sheet. You set it up, make it public and share the link. Everything else you do today hangs off this workshop: the bookings, the payments, the day itself and the certificates.

Words you will see

- **Workshop creator tick:** a setting on your staff login. It lets you create, edit and publish workshops. You have it today.
- **Finance tick:** a setting that turns on the money actions, like marking a payment as received or making a discount code. You do not have it. In the Western Cape nobody has it, and there is no auditor. Finance here means the super admins.
- **Toast:** the small message that pops up after you click a button. It tells you what just happened.
- **Pill:** the small coloured label on a workshop card. Gold "Draft" means private. Green "Published" means live.

Before you start: four rules to remember

You will learn that a new workshop is always private until you publish it.

1. Every new workshop starts as a draft. A draft is private. Nobody outside the office can see it or book it.
2. The order is always the same. Draft first. Then check the preview. Then publish.
3. Do not press Enter in a one-line box, like the title or a price. Enter saves the whole form. Move from box to box with Tab or the mouse. Only the Description, the Venue and address, and the Terms boxes take Enter as a new line.
4. The public link is built from the title on the day you create the workshop. It never changes, even if you edit the title later. So get the title right the first time.

Notes:

Exercise 1: Create the workshop from your planning sheet

You will learn that your planning sheet only becomes a saved draft when every date, price, venue and certificate fact is in the form, and that a venue that is not booked yet is not a fact.

What is happening: this is the next workshop in the annual programme, and you are planning it yourself. Your printed "Workshop planning sheet" is in front of you. At the end, a colleague phones you for the link.

Your planning sheet says:

- **Topic:** Classroom discipline for Foundation Phase
- **Date and time:** Saturday 14 Nov 2026, 08:30 to 12:30
- **Venue:** Parow Teachers' Centre (NOT confirmed yet. The booking only comes back on Monday.)
- **Non-member price:** R 450
- **Member price:** R 350

- **Seats:** 40
- **CPTD points:** 5
- **SACE endorsement number:** PD-20461
- **Facilitator:** Dr Lindiwe Khumalo

The details

1. Read your planning sheet once, top to bottom, before you touch the form.
2. Click the "Create Workshop" tab in the top tab bar.
3. In section "1. Details & Scheduling", type the title: - **Title:** TRAINING - Classroom Discipline - delete after
4. Read the line under "Short code". The short code goes into EFT payment references and receipt numbers, so wait until it says it is available.
5. If the code is already taken, click the "Use TCDDA2" button. - **Short code:** TCDDA2
6. Type the description. Enter makes a new line in this box. - **Description:** Classroom discipline for Foundation Phase teachers
7. Pick the start with the calendar and clock picker. - **Start:** 14 Nov 2026, 08:30
8. Pick the end the same way. - **End:** 14 Nov 2026, 12:30

What you should see:

- Under "Short code", first "Suggested from the title. Checking...", then "Already used by another active workshop. Try TCDDA2."
- After you click "Use TCDDA2": "Available (6/6)".

Price, seats and the venue

9. Read the price, seats and venue lines on your sheet.
10. Go to section "2. Delivery & Pricing". The non-member price box starts at 0.00. Type over it.
 - **Non-member price in ZAR:** 450
11. Type the member price.
 - **Member price in ZAR:** 350
12. Check the venue line on your sheet. Is the venue booked yet?
13. Under "How it runs", click the dashed "To be confirmed" chip. Do not choose "In person" with a guessed venue.
 - **How it runs:** To be confirmed
 - **Venue and address:** leave it empty
14. Type the number of seats.
 - **Capacity:** 40
 - **Buffer above capacity:** leave it empty
 - **Unlimited capacity:** not ticked

What you should see: the hint beside the chip reads "Pages and emails say the venue is still being arranged."

The certificate facts

15. Read the certificate lines on your sheet.
16. In section "3. Certificate & SACE Accreditation", type:

- **Facilitator:** Dr Lindiwe Khumalo
- **CPTD points:** 5
- **SACE endorsement number:** PD-20461
- **No CPTD points for this workshop:** not ticked
- **Terms:** leave it as it is

17. Skip section "4. Documents & Media". The poster and agenda go on in Exercise 2.

18. Click "Preview" at the top right.

19. Read the workshop card under "Live preview · What members will see · Updates as you type". Check the picture, title, date, description and price.

20. Scroll to "Certificate preview". Read the facilitator, the points and the SACE number out loud.

21. Close the preview with the X or the Escape key.

What you should see: the card has no venue line. That is normal. The points you type are printed on each teacher's certificate.

Save it, then take a call

22. Read the note at the bottom of the form: "This workshop starts as a draft. Publish it from Published Links when you are ready for registrations."

23. Click "Create workshop".

24. Your phone rings. A colleague wants the link for his circular. Answer him truthfully from what is on your screen.

25. Tell him it is a draft and it is not public yet.

26. Agree with him when it will be published. Either Monday, once the venue is confirmed, or now, with "To be confirmed" clearly agreed.

What you should see after "Create workshop":

- The toast "Workshop created."
- The screen jumps to the "Published Links" tab, with your workshop selected under "Drafts".
- A gold "Draft" pill on the card.
- The price "R 450,00" with the line "Members R 350,00".
- The date line "14 Nov 2026, 08:30 to 14 Nov 2026, 12:30 SAST".
- The header "0 seats paid · 0 bookings incomplete · 0 bookings total", and "Capacity 0/40".
- The "Application link" box reads "Publish this workshop to activate the application link."
- No email is sent.

If the venue is not confirmed: the booking page will say "Venue to be confirmed - we will email you as soon as it is arranged". That is the true answer to give anyone who asks.

Check your saved code

27. Click "Edit details" on your new workshop.

28. Look at the "Short code" box. This is the only place the saved code shows.

29. Click "Cancel edit". Do not save.

30. Write these down:

- **Line you saw under Short code:**
- **Short code saved:**
- **Toast after Create workshop:**

- **Group the workshop landed in:**

If something goes wrong:

- "Workshop could not be created. Title and description are required. Your entries are still here; review them and retry." You probably pressed Enter in a one-line box. Fill the missing box and click "Create workshop" again.
- "Enter the CPTD points, or tick No CPTD points for this workshop." Type the points from your sheet.
- "Use a valid date range where the end is after the start." Fix the end time.
- "Member price cannot be more than the standard (non-member) price." The two prices are the wrong way round.
- "Capacity is required. Every workshop needs a maximum number of attendees, or tick Unlimited below." Type the number of seats.

Careful: once you click "Create workshop", the workshop exists. Its link and its short code are fixed. You can only remove it with "Delete workshop" while nobody has paid, and that cannot be undone.

Notes:

Exercise 2: The venue is confirmed. Update, publish, share and add the poster

You will learn that a workshop only goes public when you click "Publish workshop", that the link is for WhatsApp and the booking QR code is for a poster, and that removing a file cannot be undone.

What is happening: it is now Monday. The Parow Teachers' Centre booking is confirmed. The same colleague phones again. He wants to put the workshop on the principals' WhatsApp group and print an A3 poster for the district office.

Update the details

1. Click "Edit details" in the header of your workshop. The heading reads "Edit Workshop".
2. Under "How it runs", click "In person". - **How it runs:** In person
3. Type the venue on two lines. Enter makes a new line here. - **Venue and address:** Parow Teachers' Centre (on two lines)
4. Change the seats. - **Capacity:** 60
5. Leave the title alone. - **Title:** TRAINING - Classroom Discipline - delete after (do not change it)
6. Click "Save changes".

What you should see: the toast "Workshop updated." The workshop is still under "Drafts".

Get it live

7. Look at the "Application link" box. "Copy link", "Open link" and "Booking link QR" are greyed out while it is a draft.
8. Click "Publish workshop" in the header. There is no confirm box for a draft.
9. Read the toast out loud.
10. Find your card under "Current & upcoming".

What you should see:

- Before publishing: "Publish this workshop to activate the application link." and "Publish first to get a booking QR."
- After publishing: the toast "Workshop link is active. Registrations are open."
- The card sits under "Current & upcoming" with a green "Published" pill.

Share the link and the poster QR

11. Click once in the "Application link" box. One click selects the whole link.
12. Click "Copy link".
13. Click "Open link". Read the booking page the way a member would. Then close the tab.
14. Click "Booking link QR" and read the box.
15. Click "Download QR (PNG)".
16. Tell your colleague: the link is for WhatsApp, the QR code is for the poster.
17. Read the header out loud.
 - **Header line:** 0 seats paid · 0 bookings incomplete · 0 bookings total
 - **Capacity:** 0/60
18. Open the Events page on the NAPTOSA WC website. Find your workshop and click "Register".

What you should see:

- After "Copy link": the toast "Application link copied."
- The booking page: "NAPTOSA Workshop", the heading "Register for this workshop", the venue, the fee and "NAPTOSA members R...".
- In the QR box: "Put this QR code in an email or on a poster for
