

Facilitator guide: workshop creator training

Thursday 8 October 2026, 09:00 to 13:10. By ten past one she will have run a whole workshop on the live system on her own login. She will have created, published and shared a TRAINING workshop, followed a booking, handed a payment to Finance, run check-in, marked attendance, sent a certificate and pulled an export. She will also know the one question that runs the whole day: "Is this mine to do, or do I recognise it and hand it to Finance?"

Her two email addresses

Write these in before the day. Every booking she makes uses one of them, so she receives and sees every email her own bookings send.

- **Trainee work email:** _____
- **Trainee personal email:** _____

Wherever this guide says <Trainee work email> or <Trainee personal email>, it means the address written here.

How to use this guide

- Every block starts with its time and a **Goal**. Read the goal first. That is what she should walk away knowing, and it is how you judge the block.
- Anything she types, picks or reads on screen sits on its own line with a bold label, like **Title:** or **Short code:**. Button and screen names are in double quotes, exactly as they show in the app.
- Read the **Cannot be undone** line before the block starts. When a block has one, stop before that click and say it out loud with her.

Words you will see

Short code. A code of up to 6 letters or digits that the system builds from the workshop title. It goes into EFT payment references and receipt numbers, so you wait for the word "Available" under it before you save. If you change it later, only new numbers use the new code.

EFT reference. The code the payer must type exactly into their bank's reference box. It is built from the short code, a number the system picks, and up to 5 letters of the surname. For a school or a company it uses letters of its name instead. For example, Jaco van der Merwe on "TRAINING - Chasing the money - delete after" gets EFT-TRC-(number)-VANDE. It is the same on the success page, in the email and on the staff row. Finance uses it to match the bank statement. Always copy it from 'Payment reference' in "View details".

Workshop creator tick. A tick a super admin puts on a staff account. It lets her create, edit, publish and close workshops, upload and remove workshop files and open check-in early. It is why she can see the "Create Workshop" tab. It also gives her a "Delete workshop" button, but that only works while nobody has paid on the workshop. Once any payment exists, the system refuses and she uses "Close registrations" instead. It does not let her change the reminder rules. In the Western Cape five staff members have this tick.

Finance tick. Finance means anyone with the "Finance" tick, anyone with the auditor role (an auditor always counts as Finance, no tick needed) and a super admin. Only Finance can mark a booking paid, create, edit or switch off coupons, cancel or remove a booking, send a manual payment reminder, correct a

payer's email and pull the export with money in it. She does not have this tick, so those buttons are simply not on her screen. That is on purpose, not a fault. In the Western Cape nobody has the "Finance" tick and there is no auditor, so Finance here means the super admins only.

The groups in "All Registrations". This tab sorts a workshop's people into groups:

- **"Owes money"**: the booking exists but is not paid yet. An EFT booking stays here until Finance marks it paid. The row says "Attendance opens once the EFT is marked paid".
- **"Check in"**: paid, and waiting to be marked present on the day.
- **"Certificate to send"**: marked present, certificate not sent yet. Staff can send one at once with "Issue now". If nobody does, it goes out by itself at 08:00 the morning after the workshop's last day.
- **"Done"**: the certificate has been sent, or the person was marked absent. A paid school row also sits here.
- **"Cancelled"**: cancelled bookings. A normal "Cancel booking" deletes the row completely, so you cannot set up a row here on purpose. Finance clears a row from this group with "Remove", either on the row in "Cancelled" or in the Attendee ledger. "Remove" only shows when the booking has no payment history. A row with payment history stays and reads 'Kept for the money record: this booking has a payment history.'

The groups in "Published Links". This tab lists every workshop with its links, QR codes, check-in, files and coupons, sorted into groups:

- **"Current & upcoming"**: published workshops that have not ended. Their booking link works for anyone.
- **"Needs closure"**: the dates have passed but registrations are still open. The count reads "N past dates still open" and "Copy" and "Open" are switched off. The website Events page drops a workshop as soon as its end time passes. The booking link and its QR code still take bookings until someone clicks "Close registrations", or until the nightly run closes the workshop at 00:05. Only a Workshop creator or a super admin can click it.
- **"Drafts"**: created but never published. Nobody outside the office can see or book them. The group reads "Drafts", then how many are awaiting publication.
- **"Closed archive"**: workshops ended with "Close registrations". Every booking, payment, attendance mark, certificate and file stays with them.

Attendee ledger. The full list of bookings inside one workshop. Find it at "Published Links", select the workshop, open 'Registrations, coupons and documents', then 'Attendee ledger'. Staff use it to fix a wrong attendance mark after the "Undo" button has gone. Finance can "Remove" a cancelled row here too.

School code. When a school pays once for several places, Finance marks that payment paid. Only then does the school's receipt email carry a school code and a "Register a teacher" button. Each teacher uses it to register on a place at R 0,00. A member may take a non-member place. A non-member can never take a member place. In the school booking's details, each teacher who used the code is listed under "Used the school's code:".

CPTD points. Continuing Professional Teacher Development points, the points a teacher earns for attending. They are printed on the certificate and frozen there. In the "CPTD points" tab she searches a surname and clicks the row to read the date, points, SACE number and certificate number. The tab groups people by the member number they booked with.

TRAINING workshop. A practice workshop with a title like "TRAINING - Classroom Discipline - delete after". 'Delete after' means we clean it up when the day is over. A Workshop creator or a super admin can press "Delete workshop", but only while nobody has paid on it. It asks for a reason and cannot be undone.

Once any payment exists, delete is refused, so we press "Close registrations" and the workshop moves to "Closed archive" with everything kept.

Automatic certificates. A certificate goes out by itself at 08:00 the morning after a workshop's last day. It goes to everyone who paid and was marked present, once only. Nobody who is unpaid, absent or not marked gets one. It covers workshops that end after 03:24 on 08 Oct 2026, when a super admin switched it on, so today's training workshops are covered. Staff can still send one person's certificate straight away with "Issue now".

Automatic registration close. Live since 04:35 on 08 Oct 2026. Every night at 00:05 SAST the system closes every published workshop whose end time was before midnight. The first run is the night of 8 to 9 October. A closed workshop refuses new bookings. An unpaid booking on it can no longer get EFT details or pay by card, and its payment reminders stop. Until that night's run, an ended workshop still sits in "Needs closure" and its link still takes bookings, so today's "Needs closure" example still works and she can close a workshop herself as soon as it is over. Pressing "Reopen registrations" on a workshop whose dates have passed is undone at the next 00:05 run. If the event moved, edit the dates instead.

Training email addresses. Every booking she makes uses her own address, <Trainee work email> or <Trainee personal email>, so she receives and sees every email it sends. Every booking you make uses loxly@lbtec.co.za. The one deliberately wrong address is wrong.address@example.com. The system emails only the address on the booking, so a stranger's address would send real receipts and reminders to a real person. When an address is used again on the same workshop, the system shows "Possible existing registration" with the reason "same email, same telephone". Click "Save as additional entry".

The people you play

You are the only other person in the room. You play every caller, and on your second screen you are Finance all day. Each person below is given with when they appear.

People you play out loud

Mariam Isaacs

- **Who she is:** a case admin at the NAPTOSA Western Cape office with no Finance tick. Warm, quick and a bit proud of being senior. She comes in passing on offers of help from two colleagues.
- **Email:** none, she never books
- **When:** 09:08, the "Who is Finance?" role-play

Mr Deon Pretorius

- **Who he is:** the NAPTOSA WC Professional Development manager. Practical, a little impatient, talks in short sentences. He wants the link, the poster QR, a discount and a bulk send.
- **Email:** none, he never books
- **When:** 09:33, publish and share

Sipho Ndlovu

- **Who he is:** a Foundation Phase teacher at Bellville South Primary, not a member. Polite but anxious about money and about losing his place.
- **Email:** <Trainee work email>
- **When:** she books him at 09:47, then you play him on the phone. She finds his booking again at 10:40, and at 11:10 she checks his amount did not change.

Mrs Elmarie Pienaar

- **Who she is:** the admin clerk at Bergrivier Primary School in Wellington. Efficient, friendly, busy, books for the whole staffroom.
- **Email:** the trainee makes this booking, so it uses her own <Trainee work email>
- **When:** 10:10, the school booking for three teachers

Jaco van der Merwe

- **Who he is:** a non-member teacher at Kraaifontein High, mid-forties. Polite but clipped, busy between classes, a little defensive about money.
- **Email:** loxly@lbtec.co.za
- **When:** 10:48, "I paid on Monday"

Nomvula Dlamini

- **Who she is:** a NAPTOSA member and senior teacher at Rondebosch Primary. Formal, firm and a little offended.
- **Email:** loxly@lbtec.co.za
- **When:** 11:00, "Stop reminding me"

Mrs Fatima Salie

- **Who she is:** the bursar at Rietvlei Primary School in Athlone. Organised, polite, a little rushed. She handles the school's payments.
- **Email:** you made the school's booking tonight, so it uses loxly@lbtec.co.za
- **When:** 11:12, the school that booked before the venue moved

You, at the NAPTOSA Western Cape office

- **Who:** yourself, as the office staff member who answers the phone and holds Finance rights. Friendly and exact.
- **Email:** your main inbox, loxly@lbtec.co.za, where every booking you make lands. Her own bookings land in her own inbox.
- **When:** 11:25, when she books as Busisiwe Nkosi with the wrong email

Mrs Charmaine Adonis

- **Who she is:** an experienced facilitator at the hall door with a queue. Warm but rushed, short sentences.
- **Email:** none, she never books
- **When:** 11:59, at the door. She is also the facilitator named on "TRAINING - Classroom Management Essentials - delete after".

Thandi Mokoena

- **Who she is:** a member and primary school teacher. Friendly, chatty, a little anxious about her SACE points, and persistent about her name.
- **Email:** loxly@lbtec.co.za
- **When:** 11:59 she is marked present, and at 12:11 you play her asking for her certificate

The Provincial CEO

- **Who he is:** her senior manager. Warm but rushed, speaks in short bursts between meetings, wants numbers, not explanations.
- **Email:** none, he never books
- **When:** 12:27, the capstone.

People she books as, or who book live

Refilwe Moloi

- **Member:** yes
- **Email:** <Trainee personal email>
- **When:** she books her at 09:59 at the member rate

Carmen Februarie

- **Member:** no
- **Email:** <Trainee work email>
- **When:** she books her with a coupon at 10:05

Bongani Mabaso

- **Member:** yes
- **Email:** <Trainee work email>
- **When:** the optional free booking at 10:05

Anita Fourie

- **Who she is:** a non-member teacher at Bergrivier Primary School
- **Email:** <Trainee personal email>
- **When:** she registers Anita on a school place at 10:10

Johan Lategan

- **Who he is:** an extra non-member teacher at Bergrivier Primary School who was not in the headcount
- **Email:** <Trainee work email>
- **When:** 10:10, optional. The system refuses him and no booking is made.

Busisiwe Nkosi

- **Member:** yes
- **Email:** first the wrong address wrong.address@example.com, then corrected to <Trainee personal email>
- **When:** 11:25. The trainee plays Busisiwe herself.

Lungile Mkhize

- **Member:** yes, booked on "TRAINING - Conflict Resolution Skills - delete after"
- **Email:** loxly@lbtec.co.za
- **When:** booked tonight, and talked about at 11:12

Palesa Khoza

- **Member:** yes
- **Email:** loxly@lbtec.co.za
- **When:** you check her in on the phone at 11:59 and send her certificate just before 12:11

Hennie Steyn

- **Member:** no
- **Email:** loxly@lbtec.co.za
- **When:** marked present at 11:59, certificate at 12:11

Naledi Shabalala

- **Member:** yes
- **Email:** loxly@lbtec.co.za
- **When:** booked tonight. She stays in "Check in" all day because she is not in the room.

Xolani Ngcobo

- **Who he is:** a teacher on a Silvertree Primary School place
- **Email:** <Trainee work email>, because loxly@lbtec.co.za already has paid bookings on this workshop and a school place refuses it
- **When:** he does not arrive and she marks him absent at 11:59

Lerato Jantjies

- **Who she is:** a non-member teacher at Silvertree Primary School
- **Email:** <Trainee personal email>, because loxly@lbtec.co.za already has paid bookings on this workshop and a school place refuses it
- **When:** 11:59, optional. You register her at the door on the phone.

Aisha Abrahams

- **Who she is:** a booking that has not been paid
- **Email:** loxly@lbtec.co.za
- **When:** 11:59 and 12:11. She says she paid last night. She cannot be marked present and gets no certificate.

Sizwe Dube

- **Member:** yes
- **Email:** loxly@lbtec.co.za, because you make this booking
- **When:** you book him on your second screen during the capstone at 12:27

The schools

- **Bergrivier Primary School:** <Trainee work email>, at 10:10
- **Rietvlei Primary School:** loxly@lbtec.co.za, at 11:12
- **Silvertree Primary School:** loxly@lbtec.co.za, at 11:59

People who are only talked about

- **Riaan Botha:** a made-up colleague with the auditor role and no Finance tick. Mariam says he will mark a booking paid. 09:08. No real Western Cape account has the auditor role, so there is no auditor row to show. Point at the "Finance" column and say it in words: an auditor always counts as Finance.
- **Thabo Mahlangu:** a colleague with a read-only account. Mariam says he will tick the register. 09:08.
- **Kagiso Molefe:** the teacher whose EFT "is on the statement" in Mariam's opening line. No booking is made. 09:08.
- **Dr Lindiwe Khumalo:** the facilitator named on "TRAINING - Classroom Discipline - delete after". She is on the trainee's planning sheet and typed into the form at 09:18.
- **Zanele Ntuli:** Nomvula Dlamini's colleague, who should book her own place. 11:00.
- **Mpho Radebe:** the person in a quiz question at 11:35 who "booked at R 300 last week". Not a real booking.

The training workshops

Every training title starts with 'TRAINING - ' and ends with ' - delete after'. Seven are made tonight. Two more are made by her on the day.

"TRAINING - Short Code Clash - delete after"

- **Title:** TRAINING - Short Code Clash - delete after
- **Short code:** TCDDA, typed by hand
- **Start:** 30 Nov 2026, 09:00
- **End:** 30 Nov 2026, 10:00. It is never published, so the date does not matter.
- **How it runs:** "To be confirmed"
- **Venue and address:** none
- **Non-member price:** R 100
- **Member price:** R 80
- **Capacity:** 10
- **CPTD points:** none ("No CPTD points for this workshop" ticked)
- **State at 09:00:** a draft in "Drafts". Never published, so never public. Nobody ever pays on it, so after the day a Workshop creator or a super admin removes it with "Delete workshop". Add it to the clean-up list.
- **Used for:** 09:18. It holds the code TCDDA, so when she types "TRAINING - Classroom Discipline - delete after" the system says 'Already used by another active workshop. Try TCDDA2.' and shows a "Use TCDDA2" button.

"TRAINING - Chasing the money - delete after"

- **Title:** TRAINING - Chasing the money - delete after
- **Short code:** TRC
- **Start:** Sat 10 Oct 2026, 09:00
- **End:** Sat 10 Oct 2026, 12:30. That is 2 days after the training day, so the automatic 'Final EFT reminder, 2 days before' goes out on 8 Oct.
- **How it runs:** "In person"
- **Venue and address:** TRAINING ONLY, not a real event (Training Room 1)
- **Non-member price:** R 450
- **Member price:** R 350
- **Capacity:** 10
- **CPTD points:** none
- **State at 09:00:** published, in "Current & upcoming". Two unpaid EFT bookings made on 7 Oct: Jaco van der Merwe and Nomvula Dlamini. Jaco also had one manual "Remind" on 7 Oct. After the 09:00 reminder run both rows should read 'Reminded 08 Oct'. Check this at the 10:25 break.
- **Used for:** 09:08 when she finds the screens, and 10:40 to 11:06 when she chases money.

"TRAINING - Conflict Resolution Skills - delete after"

- **Title:** TRAINING - Conflict Resolution Skills - delete after

- **Short code:** the one the system suggests, expected TCRSDA. Write the saved code on your card.
- **Start:** 14 Nov 2026, 08:30. At 11:12 she moves it to 21 Nov 2026, 09:00.
- **End:** 14 Nov 2026, 12:30. At 11:12 she moves it to 13:00.
- **How it runs:** "In person"
- **Venue and address:** TRAINING ONLY, not a real event (Training Room 1). At 11:12 she moves it to Bellville Teachers' Centre.
- **Non-member price:** R 350. At 11:12 she raises it to R 400.
- **Member price:** R 250
- **Capacity:** 30
- **CPTD points:** 5
- **State at 09:00:** published, in "Current & upcoming". Rietvlei Primary School owes R 1 450,00 by EFT and Lungile Mkhize owes R 250,00 by EFT. Both had their EFT instructions sent. The original poster is tagged "Public poster".
- **Used for:** 11:12, the call from Mrs Fatima Salie at Rietvlei Primary School.

"TRAINING - Positive Discipline Follow-up - delete after"

- **Title:** TRAINING - Positive Discipline Follow-up - delete after
- **Short code:** DISC21
- **Start:** 21 Nov 2026, 09:00
- **End:** 21 Nov 2026, 13:00. More than 3 days ahead, so "Remind" still shows.
- **How it runs:** "In person"
- **Venue and address:** the training venue line (see the test values below)
- **Non-member price:** R 450
- **Member price:** R 350
- **Capacity:** 60
- **CPTD points:** 5
- **State at 09:00:** published, in "Current & upcoming", no bookings.
- **Used for:** 11:25. She books it live as Busisiwe Nkosi with the wrong email.

"TRAINING - Classroom Management Essentials - delete after"

- **Title:** TRAINING - Classroom Management Essentials - delete after
- **Short code:** the one the system suggests
- **Start:** today, Thu 08 Oct 2026, 08:00
- **End:** today, Thu 08 Oct 2026, 16:30
- **How it runs:** "In person"
- **Venue and address:** line 1 Silvertree Primary School hall, line 2 the training venue line
- **Non-member price:** R 250. Silvertree Primary School paid for 2 non-member places, R 500.
- **Member price:** R 200
- **Capacity:** 10
- **CPTD points:** 5
- **SACE endorsement number:** the made-up SACE value (see the test values below)

- **Facilitator:** Mrs Charmaine Adonis
- **State at 09:00:** published, dated today, in "Current & upcoming". Check-in is open because it is the workshop day, and the screen reads 'Check-in is open now (workshop day).' Thandi Mokoena, Hennie Steyn, Palesa Khoza, Naledi Shabalala and Xolani Ngcobo (on a school place) are paid and in "Check in". The Silvertree Primary School row is in "Done" with 1 of 2 places used. Aisha Abrahams is in "Owes money". The check-in email has NOT been sent, nobody is marked present and no certificate has been issued.
- **Used for:** 11:50 to 12:23, the workshop day itself.
- **After the day:** it ends at 16:30 today, after automatic certificates were switched on. So anyone on it who is paid, marked present and still without a certificate gets one by email from 08:00 tomorrow, at loxly@lbtec.co.za. Naledi is never marked, so she gets none. Its registration also closes by itself at 00:05 tonight, like every workshop that ended before midnight.

"TRAINING - Reading Recovery - delete after"

- **Title:** TRAINING - Reading Recovery - delete after
- **Short code:** the one the system suggests
- **Start:** tomorrow, Fri 09 Oct 2026, 09:00
- **End:** tomorrow, Fri 09 Oct 2026, 12:00
- **How it runs:** "In person"
- **Venue and address:** the training venue line
- **Non-member price:** R 250
- **Member price:** R 200
- **Capacity:** 10
- **CPTD points:** none
- **State at 09:00:** published, in "Current & upcoming", no bookings, check-in not opened early.
- **Used for:** 11:52. She opens check-in a day early, you scan the door QR on the phone, and she closes check-in again.

"TRAINING - Term 3 Curriculum Planning - delete after"

- **Title:** TRAINING - Term 3 Curriculum Planning - delete after
- **Short code:** the one the system suggests
- **Start:** 01 Oct 2026, 09:00. If the form refuses past dates, use 08 Oct 2026, 07:00.
- **End:** 01 Oct 2026, 12:00. If the form refuses past dates, use 08 Oct 2026, 08:00.
- **How it runs:** "In person"
- **Venue and address:** the training venue line
- **Non-member price:** R 250
- **Member price:** R 200
- **Capacity:** 10
- **CPTD points:** none
- **State at 09:00:** published with past dates, in "Needs closure" ("1 past dates still open"), no bookings. It is gone from the website Events page because its end time has passed, but its booking link still takes

bookings. The nightly close first runs tonight at 00:05, so the workshop stays open all day today until someone clicks "Close registrations".

- **Used for:** 12:25 she sees it in "Needs closure", and in the capstone she closes it.

"TRAINING - Classroom Discipline - delete after"

- **Title:** TRAINING - Classroom Discipline - delete after
- **Short code:** TCDDA2. TCDDA is already taken by "TRAINING - Short Code Clash - delete after", so the system offers TCDDA2.
- **Start:** 14 Nov 2026, 08:30
- **End:** 14 Nov 2026, 12:30
- **How it runs:** "To be confirmed" when she creates it, then "In person" when she edits it at 09:33
- **Venue and address:** Parow Teachers' Centre, added at 09:33
- **Non-member price:** R 450. At 11:10 she raises it by R 50.
- **Member price:** R 350
- **Capacity:** 40 when she creates it, 60 after "Edit details" at 09:33
- **CPTD points:** 5
- **SACE endorsement number:** PD-20461
- **Facilitator:** Dr Lindiwe Khumalo
- **State at 09:00:** does not exist yet. She creates it at 09:18 from her own workshop planning sheet and publishes it at 09:33.
- **Used for:** the main workshop of the morning. Every booking from 09:47 to 10:10 goes on it, she finds it again at 10:40 and edits it at 11:10. It stays open until she closes it in the capstone.

"TRAINING - Capstone Run - delete after"

- **Title:** TRAINING - Capstone Run - delete after
- **Short code:** the one the system suggests
- **Start:** today, 08 Oct 2026, 13:00
- **End:** today, 08 Oct 2026, 16:00
- **How it runs:** "In person"
- **Venue and address:** the training venue line
- **Non-member price:** R 400
- **Member price:** R 250
- **Capacity:** 5
- **CPTD points:** 2
- **SACE endorsement number:** none
- **State at 09:00:** does not exist yet.
- **Used for:** 12:27 to 12:52. She creates, publishes and closes it during the capstone.

Two more titles show up in older notes: "TRAINING - Booking Practice - delete after" and "TRAINING - Full House Test - delete after". Do not create them. Nothing today uses them.

The day at a glance

1. 09:00 · Opening briefing: the one-page brief, the anchor question, her role and the four safety rules (4 min)
2. 09:04 · Before she looks: she writes how a workshop goes from idea to certificate and circles the money steps (4 min)
3. 09:08 · She finds her way around the six tabs, then the "Who is Finance?" role-play with Mariam (7 min)
4. 09:15 · Short brief: create, publish, share (3 min)
5. 09:18 · She plans it herself. From her workshop planning sheet she creates "TRAINING - Classroom Discipline - delete after" (15 min)
6. 09:33 · She finishes the details, publishes and shares with Mr Deon Pretorius, then uploads the poster and agenda (9 min)
7. 09:42 · Quick quiz on setting up a workshop (3 min)
8. 09:45 · She opens the workshop's booking link in a private window (2 min)
9. 09:47 · She books Sipho Ndlovu as a non-member, then takes his worried phone call (12 min)
10. 09:59 · She books Refilwe Moloi at the member rate (6 min)
11. 10:05 · Coupons: you create two as Finance, she uses them (5 min)
12. 10:10 · Role-play: Mrs Elmarie Pienaar books three places for Bergrivier Primary School (13 min)
13. 10:23 · Quick quiz on bookings (2 min)
14. 10:25 · Break (15 min)
15. 10:40 · She finds Sipho's unpaid booking (2 min)
16. 10:42 · She reads who owes money, the reminder schedule and the bank details, look only (6 min)
17. 10:48 · Role-play: Jaco van der Merwe says "I paid on Monday" (12 min)
18. 11:00 · Role-play: Nomvula Dlamini says "Stop reminding me" (6 min)
19. 11:06 · Go or stop check: do it, hand it to Finance, or stop and escalate (4 min)
20. 11:10 · She raises a price, checks Sipho's amount did not change, then closes and reopens (2 min)
21. 11:12 · Role-play: Mrs Fatima Salie and the workshop that moved (13 min)
22. 11:25 · She books as Busisiwe Nkosi with a wrong email, and you fix, remind and cancel it as Finance (10 min)
23. 11:35 · Go or stop check: problems that belong to Finance (5 min)
24. 11:40 · Break (10 min)
25. 11:50 · She opens today's workshop in "All Registrations" and reads the summary line (2 min)
26. 11:52 · The door QR and check-in, then the morning email to attendees (7 min)
27. 11:59 · Role-play: Mrs Charmaine Adonis at the door, keeping the register (12 min)
28. 12:11 · Role-play: Thandi Mokoena wants her certificate (10 min)
29. 12:21 · She exports the register and reads one person's CPTD points (2 min)
30. 12:23 · Quick quiz on the workshop day (2 min)
31. 12:25 · Capstone brief and checklist (2 min)
32. 12:27 · Capstone: she runs the CEO's workshop from first click to closed record (25 min)
33. 12:52 · Go or stop check: three last questions (3 min)
34. 12:55 · Debrief and learning record (15 min)

Before she arrives

Wednesday 7 October, evening (about 2 hours 30 minutes)

Do every step as super admin at <https://naptosawc.co.za/staff> unless the step says private window. Make every booking from the workshop's public booking link in a private browser window, and always pick EFT. Never type a card number. Every booking you make uses loxly@lbtec.co.za. From the second booking with that address on the same workshop, the system shows "Possible existing registration" with the reason "same email, same telephone". Click "Save as additional entry".

Read the plan (5 min)

1. Read "The day at a glance" once, from 09:00 to 13:10.
2. On your copy, mark what you drop first if you run late, in this order:
 - 11:25, the wrong-email booking as Busisiwe Nkosi
 - 10:05, the coupons
 - 11:00, the "Stop reminding me" call from Nomvula Dlamini
 - 09:59, the member booking for Refilwe Moloi
 - 12:21, the export
 - 12:52, the last go or stop check
3. Mark what you never drop: the 09:18 workshop she creates from her planning sheet, the 09:47 booking with Sipho's call, the 10:10 school booking, the 10:48 "I paid on Monday" call, the 11:59 door scene, the 12:11 certificate call, the capstone and the learning record.

Check her account (5 min)

4. Go to Settings > "Roles & Permissions" > "Staff Access Management" > "Provincial Roles".
5. Find her row. Check that "Workshop creator" is ticked, "Finance" is not ticked and the province is Western Cape. Change nothing. Five Western Cape rows have "Workshop creator" ticked. Note on your card whose rows they are, so you recognise them tomorrow.
6. Look down the "Finance" column. When this guide was checked, nobody in the Western Cape had the "Finance" tick and there was no auditor row. If that is still true, write on your card:
 - **Finance in the Western Cape:** the super admins only She copies this onto her cheat sheet at 09:08.
7. There is no auditor row to show in the "Who is Finance?" role-play. Point at the "Finance" column and say it in words: an auditor always counts as Finance, no tick needed.

Look at the payment settings, save nothing (3 min)

8. Open Settings > "Payment details". The card heading reads "What members see now" and shows a bank account. On the live site it is a training placeholder: ABSA, account 12345678910, branch 123456. Nobody pays it. When she sees it tomorrow, say: "The bank details are for training only. Never pay them."
9. Open Workshops > "Reminders" > "Reminder settings". Check that 'Final EFT reminder, 2 days before' is On. Also note whether "Workshop starting soon", "Thank you for attending" and "Sorry we missed you" are On. They are Off unless a super admin switched them on. When they are On, a present or absent mark tomorrow sends that person an email roughly 10 to 25 minutes later.
10. If the bank card says 'No bank account is saved yet' or 'Saved, not confirmed yet', stop. Fix it with the owner before any booking, or every EFT page will show 'Bank details needed'.

Set up the mail (5 min)

11. Open loxly@lbtec.co.za in one mail client on your second screen.
12. Send a test email to this address and check it lands:
 - **Email:** loxly@lbtec.co.za
13. Write her two addresses from the first page onto your card, and message her to check both inboxes open on her laptop:
 - **Trainee work email:** <Trainee work email>
 - **Trainee personal email:** <Trainee personal email>

Prepare the test values (15 min)

14. Fill in every test value on YOUR copies only. The full list is under "Test values to prepare" below.
15. Search CRM contacts for every cell number and every made-up ID number. Each search must return zero contacts. If one returns a hit, pick another value. A booking whose cell number or ID matches a contact fills in that contact's empty fields.

Prepare the files (10 min)

16. Make the files in "Files to print or prepare" below. Every picture must carry the words 'TRAINING - delete after', because an uploaded poster shows on the public booking page until someone clicks "Remove" next to it.
17. Copy them to her laptop desktop.

Create "TRAINING - Short Code Clash - delete after" (5 min)

Why: the short code is a code of up to 6 letters the system builds from the title. This draft takes TCDDA, the code that "TRAINING - Classroom Discipline - delete after" would get. So tomorrow at 09:18 the system tells her the code is taken and offers TCDDA2.

18. Open "Create Workshop".
19. Type the title:
 - **Title:** TRAINING - Short Code Clash - delete after
20. Replace the short code, then wait for the line under it to read "Available":
 - **Short code:** TCDDA
21. Type any description.
22. Set the dates:
 - **Start:** 30 Nov 2026, 09:00
 - **End:** 30 Nov 2026, 10:00
23. Set the prices:
 - **Non-member price in ZAR:** 100
 - **Member price in ZAR:** 80
24. Click the "To be confirmed" chip.
25. Set the capacity:
 - **Capacity:** 10
26. Tick "No CPTD points for this workshop".
27. Press "Create workshop". You should see "Workshop created." and the page jumps to "Published Links", group "Drafts", with the new draft selected. Do NOT publish it.
28. Open "Create Workshop" again and type only the title:
 - **Title:** TRAINING - Classroom Discipline - delete after

29. Check that the line under "Short code" reads 'Already used by another active workshop. Try TCDDA2.' and that a "Use TCDDA2" button shows. Do not press it.
30. Clear the Title box and leave the tab. Never press Enter or "Create workshop" on this test. Enter in a one-line box submits the form.

Create "TRAINING - Chasing the money - delete after" and book two people (15 min)

31. Open "Create Workshop" and fill in:
- **Title:** TRAINING - Chasing the money - delete after
 - **Short code:** TRC, typed by hand
 - **Start:** 10 Oct 2026, 09:00
 - **End:** 10 Oct 2026, 12:30
 - **How it runs:** "In person"
 - **Venue:** TRAINING ONLY, not a real event (Training Room 1)
 - **Non-member price in ZAR:** 450
 - **Member price in ZAR:** 350
 - **Capacity:** 10
 - **CPTD points:** tick "No CPTD points for this workshop"
32. Press "Create workshop". The page jumps to "Published Links" > "Drafts" with the draft selected.
33. Press "Publish workshop". You should see "Workshop link is active. Registrations are open." and the workshop moves to "Current & upcoming". Every workshop you publish below does the same.
34. Open its booking link in a private window and book Jaco van der Merwe:
- **Booking for:** "Individual"
 - **Member rate:** "No, standard rate"
 - **Name:** Jaco
 - **Surname:** van der Merwe
 - **Email address:** loxly@lbtec.co.za
 - **Cell phone number:** test cell number 5
 - **PERSAL number:** leave empty
35. Press "Save details and continue". You should see "Invoice and receipt details saved. Continue to payment." On the payment step you see "Coupon code", "Card (demonstration)" and "EFT". Pick "EFT", then press "Send EFT instructions". The success page reads "EFT INSTRUCTIONS SENT", "PAYMENT STATUS Awaiting EFT" and "EMAIL STATUS Sent", with the reference under "REFERENCE (USE THIS EXACTLY)", for example EFT-TRC-001-VANDE.
36. In a private window, book Nomvula Dlamini. After "Yes, member rate" the form asks for "NAP number (preferred) or SA ID number". An unknown test number still books at the member rate.
- **Booking for:** "Individual"
 - **Member rate:** "Yes, member rate"
 - **Name:** Nomvula
 - **Surname:** Dlamini
 - **NAP number (preferred) or SA ID number:** test member number 03
 - **Email address:** loxly@lbtec.co.za
 - **Cell phone number:** test cell number 6

37. Press "Save details and continue", then "EFT", then "Send EFT instructions". The same address is already on this workshop, so click "Save as additional entry" when the system asks.
38. Before midnight South African time, as Finance, open "All Registrations", pick this workshop, open "Owes money" and find Jaco's row. It reads "Owes R 450,00 · EFT ref EFT-TRC-(number)-VANDE · Not reminded yet". Press "Remind". The box asks "Send an EFT reminder to Jaco van der Merwe?" and says each person can get at most one manual reminder per day. Press "Send reminder". You should see "Reminder sent to Jaco van der Merwe.". Jaco tells her tomorrow that he had one manual reminder on 7 Oct.
39. Mark neither of them paid.

Create "TRAINING - Conflict Resolution Skills - delete after" and book two payers (15 min)

40. Open "Create Workshop" and fill in:
- **Title:** TRAINING - Conflict Resolution Skills - delete after
 - **Short code:** accept the one the system suggests
 - **Start:** 14 Nov 2026, 08:30
 - **End:** 14 Nov 2026, 12:30
 - **How it runs:** "In person"
 - **Venue:** TRAINING ONLY, not a real event (Training Room 1)
 - **Non-member price in ZAR:** 350
 - **Member price in ZAR:** 250
 - **Capacity:** 30
 - **CPTD points:** 5
41. In "4. Documents & Media", add the poster:
- **File:** TRAINING-poster-conflict-resolution.png
42. Press "Create workshop".
43. Press "Publish workshop".
44. Write the saved short code on your card. It should be TCRSDA. You can read it later in "Edit details" > "Short code".
45. In a private window, book Rietvlei Primary School by EFT:
- **Booking for:** "School"
 - **Members:** 3
 - **Non-members:** 2
 - **Address:** the training venue line
 - **VAT number:** leave empty
 - **Email:** loxly@lbtec.co.za
46. In a private window, book Lungile Mkhize by EFT:
- **Booking for:** "Individual"
 - **Member rate:** "Yes, member rate"
 - **Name:** Lungile
 - **Surname:** Mkhize
 - **NAP number (preferred) or SA ID number:** test member number 04
 - **Email address:** loxly@lbtec.co.za
 - **Cell phone number:** test cell number 8

47. Check that the rows start 'Owes R 1 450,00 · EFT ref' (ending RIETV) and 'Owes R 250,00 · EFT ref' (ending MKHIZ). Mark neither paid.

Create "TRAINING - Positive Discipline Follow-up - delete after" (5 min)

48. Open "Create Workshop" and fill in:

- **Title:** TRAINING - Positive Discipline Follow-up - delete after
- **Short code:** DISC21, typed by hand
- **Start:** 21 Nov 2026, 09:00
- **End:** 21 Nov 2026, 13:00
- **How it runs:** "In person"
- **Venue:** the training venue line
- **Non-member price in ZAR:** 450
- **Member price in ZAR:** 350
- **Capacity:** 60
- **CPTD points:** 5

49. Press "Create workshop", then "Publish workshop".

50. Make no bookings. She books it live as Busisiwe Nkosi at 11:25.

Create "TRAINING - Classroom Management Essentials - delete after" and book six payers (30 min)

51. Open "Create Workshop" and fill in:

- **Title:** TRAINING - Classroom Management Essentials - delete after
- **Start:** 08 Oct 2026, 08:00
- **End:** 08 Oct 2026, 16:30
- **How it runs:** "In person"
- **Venue line 1:** Silvertree Primary School hall
- **Venue line 2:** the training venue line
- **Non-member price in ZAR:** 250
- **Member price in ZAR:** 200
- **Capacity:** 10
- **CPTD points:** 5
- **SACE endorsement number:** the made-up SACE value, for example PD-TRAIN-01
- **Facilitator:** Mrs Charmaine Adonis

52. Press "Create workshop", then "Publish workshop".

53. In a private window, book these six, all by EFT. Every one uses loxly@lbtec.co.za, so from the second booking on click "Save as additional entry" when the system asks.

- Thandi Mokoena
 - **Member:** yes, test member number 06
 - **Email:** loxly@lbtec.co.za
 - **Cell:** test cell number 10
- Hennie Steyn
 - **Member:** no
 - **Email:** loxly@lbtec.co.za
 - **Cell:** test cell number 11

- **PERSAL:** leave empty
- Palesa Khoza
 - **Member:** yes, test member number 07
 - **Email:** loxly@lbtec.co.za
 - **Cell:** test cell number 12
- Naledi Shabalala
 - **Member:** yes, test member number 08
 - **Email:** loxly@lbtec.co.za
 - **Cell:** test cell number 13
- Silvertree Primary School
 - **Booking for:** "School"
 - **Members:** 0
 - **Non-members:** 2
 - **Email:** loxly@lbtec.co.za
- Aisha Abrahams
 - **Member:** no
 - **Email:** loxly@lbtec.co.za
 - **Cell:** test cell number 14

54. As Finance, on every row except Aisha's, say out loud first: 'A receipt is emailed immediately and this cannot be undone.' Then press "Mark EFT paid", then "Mark paid and send receipt".

55. Write each invoice number (INV) and receipt number (RCT) on the training receipts list.

56. Open the Silvertree receipt email in loxly@lbtec.co.za and click "Register a teacher".

57. Pick "No, I am not a member" and register Xolani Ngcobo:

- **Name:** Xolani
- **Surname:** Ngcobo
- **Email:** <Trainee work email>. Not loxly@lbtec.co.za: that address already has paid bookings on this workshop, and the page refuses a teacher whose email does with "This email already has a paid booking for this workshop."
- **SA ID number:** made-up valid ID 3
- **Cell:** leave empty
- **PERSAL:** leave empty

58. Press "Register my place (R 0,00)".

59. Do NOT open check-in early, do NOT press "Email check-in details to attendees" and do NOT issue any certificate on this workshop.

Create "TRAINING - Reading Recovery - delete after" (5 min)

60. Open "Create Workshop" and fill in:

- **Title:** TRAINING - Reading Recovery - delete after
- **Start:** 09 Oct 2026, 09:00
- **End:** 09 Oct 2026, 12:00
- **How it runs:** "In person"
- **Venue:** the training venue line

- **Non-member price in ZAR:** 250
- **Member price in ZAR:** 200
- **Capacity:** 10
- **CPTD points:** tick "No CPTD points for this workshop"

61. Press "Create workshop", then "Publish workshop".

62. Make no bookings. Leave check-in closed.

Create "TRAINING - Term 3 Curriculum Planning - delete after" (5 min)

63. Open "Create Workshop" and fill in:

- **Title:** TRAINING - Term 3 Curriculum Planning - delete after
- **Start:** 01 Oct 2026, 09:00
- **End:** 01 Oct 2026, 12:00
- **How it runs:** "In person"
- **Venue:** the training venue line
- **Non-member price in ZAR:** 250
- **Member price in ZAR:** 200
- **Capacity:** 10
- **CPTD points:** tick "No CPTD points for this workshop"

64. Press "Create workshop", then "Publish workshop".

65. You should see the message 'The workshop dates have passed. Review the dates or close registrations before sharing its link.' and the workshop under "Needs closure".

66. If the form refuses past dates, use 08 Oct 2026, 07:00 to 08:00 instead. It then lands in "Needs closure" on its own before 09:00. Note the changed dates on your capstone card.

67. Make no bookings.

Check the phone (3 min)

68. On the phone, open the booking link of "TRAINING - Classroom Management Essentials - delete after" once.

69. Open its door QR once ("Check-in link & QR" > "Download QR"). Check both pages load. Do not check anyone in.

Print and start the receipts list (5 min)

70. Print the papers in "Files to print or prepare" below, for her and for you.

71. Start the training receipts list with three columns: payer, workshop, invoice and receipt numbers. Fill in the 5 rows from tonight (Thandi, Hennie, Palesa, Naledi, Silvertree). Leave space for tomorrow's rows: Bergrivier, Jaco, Bongani if you run it, and Sizwe.

Tell Finance and the trainee (5 min)

72. Tell Finance in writing that training "Mark EFT paid" clicks write real invoice and receipt numbers, and those count in 'Revenue collected'. Say the full list follows after the day.

73. Message the trainee to check she can sign in at <https://naptosawc.co.za/staff> tonight. Never ask for her password.

Thursday 8 October, before she arrives

74. From 08:30 (15 min), set up the room:

- Her laptop, signed in with her own staff account (Workshop creator, no Finance).

- Your laptop or second monitor, signed in as super admin, turned towards you and out of her reach. She never touches it. One click on "Mark EFT paid" there is real.
- Your screen also shows the mail client with loxly@lbtec.co.za open, so you both see the emails from your bookings land.
- Her laptop has her own work and personal inboxes open, so she sees every email from her own bookings land.
- The phone on the table, charged and on Wi-Fi, for the booking QR and Palesa's self check-in at 11:59.
- The anchor question taped up in large letters: 'Is this mine to do, or do I recognise it and hand it to Finance?'
- On her side: the cheat sheet, the hand-off sentence card, a pen, the prediction sheet and the learning record sheet.
- On your side: your facilitator cards, the hint slips face down, the scoring sheet, the training receipts list, the drop-first list and a timer.
- Tabs open on her laptop: the staff workshops page, the public website Events page and her two inboxes.
- Tabs open on yours: "Published Links", "All Registrations" and the mail client.
- Chargers plugged in and notifications muted on both laptops and the phone.

75. Run every item in "Last checks before 09:00" below, top to bottom.

76. At 08:50 (5 min), she signs in and reloads the page.

77. She checks that her tab bar shows "Create Workshop", "Published Links", "All Registrations", "Analytics", "Reminders" and "CPTD points", and that no booking row on her screen shows "Mark EFT paid".

Bookings to make tonight

Jaco van der Merwe

- **Workshop:** "TRAINING - Chasing the money - delete after"
- **Person:** Jaco van der Merwe
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** no
- **State at 09:00:** unpaid EFT, owes R 450,00. Reference ends VANDE. He got the EFT instructions email and one manual reminder on 7 Oct. The automatic 2-day reminder goes out at 09:00, so afterwards his row reads 'Reminded 08 Oct'. NOT paid.
- **Made by:** you in a private window (the booking), and you as Finance ("Remind")

Nomvula Dlamini

- **Workshop:** "TRAINING - Chasing the money - delete after"
- **Person:** Nomvula Dlamini
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** yes, test member number 03

- **State at 09:00:** unpaid EFT, owes R 350,00. Reference ends DLAMI. EFT instructions sent. She also gets the automatic 2-day reminder at 09:00. NOT paid.
- **Made by:** you in a private window

Rietvlei Primary School

- **Workshop:** "TRAINING - Conflict Resolution Skills - delete after"
- **Person:** Rietvlei Primary School, bursar Mrs Fatima Salie
- **Email:** loxly@lbtec.co.za
- **Books as:** a school, 3 member places and 2 non-member places
- **Member:** not asked for a school
- **State at 09:00:** unpaid EFT, owes R 1 450,00. Reference is EFT, then the conflict short code, then a number, then RIETV. EFT instructions sent. NOT paid.
- **Made by:** you in a private window

Lungile Mkhize

- **Workshop:** "TRAINING - Conflict Resolution Skills - delete after"
- **Person:** Lungile Mkhize
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** yes, test member number 04
- **State at 09:00:** unpaid EFT, owes R 250,00. Reference ends MKHIZ. EFT instructions sent. NOT paid.
- **Made by:** you in a private window

Thandi Mokoena

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Thandi Mokoena
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** yes, test member number 06
- **State at 09:00:** paid R 200,00 by EFT, receipt sent. In "Check in", not marked present, no certificate.
- **Made by:** you in a private window, then you as Finance press "Mark EFT paid"

Hennie Steyn

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Hennie Steyn
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** no
- **State at 09:00:** paid R 250,00 by EFT. In "Check in", not marked present, no certificate.
- **Made by:** you in a private window, then you as Finance press "Mark EFT paid"

Palesa Khoza

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Palesa Khoza
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** yes, test member number 07. She has a NAP number but no PERSAL, so self check-in needs her full email.
- **State at 09:00:** paid R 200,00 by EFT, in "Check in". You check her in yourself on the phone at 11:59 and send her certificate before 12:11.
- **Made by:** you in a private window, then you as Finance press "Mark EFT paid"

Naledi Shabalala

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Naledi Shabalala
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** yes, test member number 08
- **State at 09:00:** paid R 200,00 by EFT, in "Check in". She stays there all day because she is not in the room.
- **Made by:** you in a private window, then you as Finance press "Mark EFT paid"

Silvertree Primary School

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Silvertree Primary School
- **Email:** loxly@lbtec.co.za
- **Books as:** a school, 0 member places and 2 non-member places
- **Member:** not asked for a school
- **State at 09:00:** paid R 500,00 by EFT. Its receipt carries the school code and the "Register a teacher" link. The row is in "Done" and reads 'Teachers check in on their own places · 1 registered' (1 of 2 places used).
- **Made by:** you in a private window, then you as Finance press "Mark EFT paid"

Xolani Ngcobo

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Xolani Ngcobo, a teacher on a Silvertree place
- **Email:** <Trainee work email>, never loxly@lbtec.co.za, which already has paid bookings on this workshop
- **Books as:** a teacher on a school place, through "Register a teacher"
- **Member:** no, a non-member place. SA ID is made-up valid ID 3.
- **State at 09:00:** registered at R 0,00, 'Paid by school', in "Check in". She marks him absent at 11:59.
- **Made by:** you, with the "Register a teacher" link in the Silvertree receipt, after Silvertree is marked paid

Aisha Abrahams

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after"
- **Person:** Aisha Abrahams
- **Email:** loxly@lbtec.co.za
- **Books as:** an individual
- **Member:** no
- **State at 09:00:** unpaid EFT, owes R 250,00. Reference ends ABRAH. In "Owes money". NOT paid, and never marked paid on the day.
- **Made by:** you in a private window

Bookings that happen live tomorrow (do not make these tonight)

All of these go on "TRAINING - Classroom Discipline - delete after" unless the entry says otherwise. She uses her two addresses again and again on the same workshop. Each time, the system shows "Possible existing registration" with the reason "same email, same telephone", and she clicks "Save as additional entry".

09:47 · Sipho Ndlovu

- **Member:** no
- **Pays by:** EFT
- **Email:** <Trainee work email>
- **Reference ends:** NDLOV
- **Made by:** she books him

09:59 · Refilwe Moloi

- **Member:** yes, test member number 01
- **Pays by:** EFT, R 350,00
- **Email:** <Trainee personal email>
- **Reference ends:** MOLOI
- **Made by:** she books her

10:05 · Carmen Februarie

- **Member:** no
- **Pays by:** EFT, with the coupon code TRAINFIX
- **Email:** <Trainee work email>
- **Made by:** she books her, after you create the coupon as Finance

10:05 · Bongani Mabaso (optional)

- **Member:** yes, test member number 02
- **Pays by:** nothing. Free with the coupon code TRAINFREE and the "Confirm free booking" button. It becomes a paid R 0,00 booking with a receipt.
- **Email:** <Trainee work email>. Not her personal email: Anita uses that one on a school place at 10:10, and a teacher on a school place is refused if the email already has a paid booking on the workshop.
- **Made by:** she books him

10:10 · Bergrivier Primary School

- **Who books:** the clerk, Mrs Elmarie Pienaar

- **Books as:** a school, 2 member places and 1 non-member place
- **Pays by:** EFT
- **Email:** <Trainee work email>
- **Reference ends:** BERGR
- **Made by:** she books it, and you mark it paid once as Finance

10:10 · Anita Fourie

- **Member:** no, on a Bergrivier place
- **SA ID number:** made-up valid ID 1
- **Pays:** R 0,00
- **Email:** <Trainee personal email>
- **Made by:** she registers Anita with the "Register a teacher" link

10:10 · Johan Lategan (optional)

- **Member:** no
- **Email:** <Trainee work email>
- **What happens:** the school link refuses him. No booking is ever created.

11:25 · Busisiwe Nkosi

- **Workshop:** "TRAINING - Positive Discipline Follow-up - delete after"
- **Member:** yes, test member number 05
- **Email:** wrong.address@example.com, corrected to <Trainee personal email>
- **Made by:** she books as Busisiwe. You correct the email, remind and cancel it as Finance.

11:59 · Lerato Jantjies (optional)

- **Workshop:** "TRAINING - Classroom Management Essentials - delete after", on the second Silvertree place
- **Member:** no
- **SA ID number:** made-up valid ID 2
- **Email:** <Trainee personal email>, never loxly@lbtec.co.za, which already has paid bookings on this workshop
- **Made by:** you register her on the phone

12:27 · Sizwe Dube

- **Workshop:** "TRAINING - Capstone Run - delete after"
- **Member:** yes, test member number 09
- **Pays by:** EFT, R 250,00
- **Email:** loxly@lbtec.co.za
- **Reference ends:** DUBE
- **Made by:** you book him on your second screen and mark him paid as Finance. She marks him present and sends his certificate.

Do not create bookings for Petersen, Sithebe, Mitchells Plain Primary School or Fortuin. They come from older notes and nothing today uses them.

Test values to prepare

Write all of these on YOUR copies only. Her handouts carry no ID, PERSAL, NAP or cell number.

Email addresses. Three kinds, no others:

- **Bookings she makes:** <Trainee work email> or <Trainee personal email>, as listed per booking above. She receives and sees every email they send.
- **Bookings you make:** loxly@lbtec.co.za
- **The deliberately wrong address:** wrong.address@example.com, for Busisiwe Nkosi at 11:25 only

One exception on school places: a teacher registering on a school's paid place cannot use an email that already has a paid booking on that workshop. The page refuses it with "This email already has a paid booking for this workshop." So Anita Fourie uses <Trainee personal email>, Xolani Ngcobo uses <Trainee work email> and Lerato Jantjies uses <Trainee personal email>. Bongani Mabaso's free booking uses <Trainee work email>, so Anita's address carries no paid booking on that workshop.

Reusing an address on the same workshop shows "Possible existing registration" with the reason "same email, same telephone". Click "Save as additional entry".

Finance names. From step 6. Nobody in the Western Cape has the "Finance" tick and there is no auditor, so:

- **Finance in the Western Cape:** the super admins only

She writes this on her cheat sheet at 09:08.

Test member numbers. One per member booking, numbered 01 to 09:

- **01:** Refilwe Moloi
- **02:** Bongani Mabaso
- **03:** Nomvula Dlamini
- **04:** Lungile Mkhize
- **05:** Busisiwe Nkosi
- **06:** Thandi Mokoena
- **07:** Palesa Khoza
- **08:** Naledi Shabalala
- **09:** Sizwe Dube

Start from the NAP number on a test member record that you control, never a real member's. Add -T01 to -T09 on the end. If you have no such record, use TRN-NAP-01 to TRN-NAP-09. The letters mean it can never be a real NAP number. Check that no value has exactly 13 digits once the letters are taken out, because 13 digits trigger the SA ID check. Keep them all different, because the "CPTD points" tab groups people by the number they booked with.

Made-up SA ID numbers. Three valid ones and one invalid one:

- **Valid ID 1:** Anita Fourie, 10:10
- **Valid ID 2:** Lerato Jantjies, 11:59
- **Valid ID 3:** Xolani Ngcobo, tonight only
- **Invalid ID:** typed into Refilwe Moloi's booking at 09:59 to show the error, never saved

Build each valid number from 13 digits: 000101 (a birth date of 1 January 2000), then 4 sequence digits (different for each of the three), then 0, then 8, then one check digit. Pick the check digit with the Luhn rule, the same rule the app uses: try each digit from 0 to 9 until the whole 13-digit number passes the Luhn check. A short Python loop does this. For the invalid one, take valid ID 1 and change only the last digit (add 1, and 9 becomes 0). The app must answer 'That looks like an SA ID number but the check digit does not match...'. Search CRM contacts for each number first and expect zero hits.

Test cell numbers. A South African mobile number in the right format (10 digits starting with 06, 07 or 08) for each individual booking. Use numbers you control where you can.

- **1:** Sipho
- **2:** Refilwe
- **3:** Carmen
- **4:** Bongani
- **5:** Jaco
- **6:** Nomvula
- **7:** not used
- **8:** Lungile
- **9:** Busisiwe
- **10:** Thandi
- **11:** Hennie
- **12:** Palesa
- **13:** Naledi
- **14:** Aisha
- **15:** Sizwe

All 14 must be different, because the duplicate check also matches on cell number. Search CRM contacts for each one and expect zero hits, because the booking sync matches contacts by cell number first. School bookings and teachers on school places need none.

PERSAL. Leave the optional PERSAL box empty. It is never needed today. Never type a real one.

The two coupons. A coupon is a discount code that only Finance can create, edit or switch off. You create both live at 10:05 on "TRAINING - Classroom Discipline - delete after", so neither exists at 09:00. After the day, switch both off as Finance with "Switch off". Only the number of people and the note can be edited. The code, price and "Applies to" cannot. Switch off is refused while an unpaid booking still holds the code, for example Carmen's until it is paid or cancelled. Add both to the clean-up list.

- Fixed-price coupon:
 - **Code:** TRAINFIX
 - **Applies to:** "All bookings"
 - **Fixed price:** R 200
 - **How many people:** 3
 - **Why (optional):** training
- Free members-only coupon:
 - **Code:** TRAINFREE
 - **Applies to:** "Members only"
 - **Type:** the "Comp" option
 - **How many people:** 2

Booking she looks for at 10:40.

- **Surname:** Ndlovu (Sipho's booking)
- **Workshop:** "TRAINING - Classroom Discipline - delete after"

Conflict short code. The short code saved on "TRAINING - Conflict Resolution Skills - delete after", read from "Edit details" > "Short code". Write it on your card for 11:12.

- **Expected short code:** TCRSDA

Reference numbers. The number in the middle of every EFT, INV and RCT reference is picked by the system. Read it from the row's 'ref' line or from "View details" > 'Payment reference' during the scene.

SACE endorsement number. A plainly made-up value for "TRAINING - Classroom Management Essentials - delete after":

- **SACE endorsement number:** PD-TRAIN-01, for example

It is printed on every certificate for that workshop and frozen there.

SACE number for Thandi. Only if the trainee presses Thandi for her SACE number at 12:11. It is never typed into the app.

- **Say:** SACE-TRAIN-00

Training venue line. A plain line that makes the workshop clearly not a real event, because it shows on the public booking page and the Events page. Use the same text on Positive Discipline Follow-up, line 2 of Classroom Management Essentials, Reading Recovery, Term 3 Curriculum Planning and the capstone workshop:

- **Line 1:** TRAINING ONLY - no event
- **Line 2:** the suburb of the training room

Capstone time. For "TRAINING - Capstone Run - delete after":

- **Start:** today, 13:00
- **End:** today, 16:00

It must be today so that "Email check-in details to attendees" works. It must still be in the future at 12:30 so the workshop lands in "Current & upcoming", not "Needs closure".

Files to print or prepare

On her laptop desktop. Every picture is portrait, under 25 MB and carries 'TRAINING - delete after'.

- **File:** TRAINING-poster-classroom-discipline.png. The poster for "TRAINING - Classroom Discipline - delete after". She uploads it with the agenda at 09:33 through "Workshop files" > "Add workshop files" > "Upload 2 documents". It becomes the public poster on the booking page. The poster shows on the booking page only, never on the Events page. It stays until someone clicks "Remove" next to it in "Workshop files". That cannot be undone, and the booking page then shows the standard NAPTOSA picture.
- **File:** TRAINING-agenda-classroom-discipline.pdf. One page, harmless content, 'TRAINING - delete after' in the header. Uploaded with the poster. It becomes a staff reference and is never emailed to attendees. A Workshop creator or a super admin can "Remove" it later.
- **File:** TRAINING-poster-classroom-discipline-v2.png. The second poster, for the optional poster swap at 09:33 ("Edit details" > "4. Documents & Media" > "Save changes").
- **File:** TRAINING-poster-conflict-resolution-bellville.png. The new poster she picks with "Browse files" at 11:12.

Uploaded by you tonight.

- **File:** TRAINING-poster-conflict-resolution.png. The original poster for "TRAINING - Conflict Resolution Skills - delete after", added in step 41, so that at 11:12 the screen can read 'Public poster · replaced when you save changes'.

Printed for her.

- The "Workshop planning sheet" for "TRAINING - Classroom Discipline - delete after". She plans the workshop herself from this sheet at 09:18. Nobody phones her to ask for it. It carries these values:
 - **Title:** TRAINING - Classroom Discipline - delete after
 - **Start:** 14 Nov 2026, 08:30
 - **End:** 14 Nov 2026, 12:30
 - **How it runs:** "To be confirmed"
 - **Non-member price in ZAR:** 450
 - **Member price in ZAR:** 350
 - **Capacity:** 40
 - **CPTD points:** 5
 - **SACE endorsement number:** PD-20461
 - **Facilitator:** Dr Lindiwe Khumalo
 - **Short code:** not on the sheet. The system builds it.
 - **Venue:** not on the sheet yet. The venue and the capacity of 60 come in at 09:33.
- The one-page brief "Run a workshop from first draft to certificate today"
- The cheat sheet (where to look)
- The 12 action cards for sorting into 'Mine' and 'Finance'
- The hand-off sentence card
- A blank prediction sheet
- A blank learning record sheet
- The capstone brief
- The 12-line completion checklist
- Her workbook: her practice log and the scenario quiz on paper
- Her desk card, to keep next to the screen

Do NOT hand over the older 'Role legend' sheet. It wrongly says a creator can set reminder rules, and it leaves out the catch on deleting: "Delete workshop" only works while nobody has paid.

Printed for you.

- Facilitator cards with the hidden facts and test values filled in
- Learner cards, with the hint slips kept face down
- The quizzes with answers
- The scoring sheet
- The training receipts list
- The drop-first list

Last checks before 09:00

- **Her account:** in Settings > "Roles & Permissions" > "Staff Access Management" > "Provincial Roles" her row has "Workshop creator" ticked and "Finance" NOT ticked, province Western Cape. She has reloaded since any change. Her tab bar shows "Create Workshop", and no row in "All Registrations" shows "Mark EFT paid", "Remind" or "Cancel booking" on her screen.
- **Who is Finance:** nobody in the Western Cape has the "Finance" tick and there is no auditor, so Finance is the super admins only. For the "Who is Finance?" role-play you point at the "Finance"

column and describe the auditor in words.

- **No real workshop touched:** every workshop you created tonight starts with 'TRAINING - ' and ends with '- delete after'. In "All Registrations" with "All current workshops", search 'lbtec'. Every hit sits on a TRAINING workshop, and no row on any other workshop carries loxly@lbtec.co.za. No real workshop was opened in "Edit details", published, closed or given a coupon or a file.
- **Published Links at 08:45:** "Drafts" holds "TRAINING - Short Code Clash - delete after" (plus any real drafts, untouched). "Current & upcoming" holds Classroom Management Essentials, Reading Recovery, Chasing the money, Conflict Resolution Skills and Positive Discipline Follow-up. "Needs closure" holds Term 3 Curriculum Planning. Classroom Discipline and Capstone Run do not exist yet.
- **Short code clash:** typing 'TRAINING - Classroom Discipline - delete after' in "Create Workshop" shows 'Already used by another active workshop. Try TCDDA2.' and a "Use TCDDA2" button. The test was cleared without saving.
- **Classroom Management Essentials:** reads 'Check-in is open now (workshop day).' "Check in" holds Thandi, Hennie, Palesa, Naledi and Xolani. "Owes money" holds Aisha (reference ends ABRAH). "Done" holds the Silvertree row with 1 of 2 places used. The check-in email has not been sent, nobody is marked, no certificate has been issued, and "CPTD points" shows nobody for this workshop.
- **Reading Recovery:** check-in not opened early (no 'Opened early by' line).
- **Positive Discipline Follow-up:** published, 21 Nov, short code DISC21, no bookings.
- **Chasing the money:** Jaco's row starts 'Owes R 450,00 · EFT ref' (ending VANDE) and Nomvula's starts 'Owes R 350,00 · EFT ref' (ending DLAMI), both unpaid. At the 10:25 break, check that both rows read 'Reminded 08 Oct'. If not, tell her at 10:42 that the row will read 'Not reminded yet'.
- **Conflict Resolution Skills:** Rietvlei's row starts 'Owes R 1 450,00 · EFT ref', Lungile's starts 'Owes R 250,00 · EFT ref', and "Workshop files" shows the original poster as 'Public poster · shown on the booking page'. The saved short code is on your card.
- **Payment settings, look only:** 'What members see now' shows a confirmed bank account. It is the training placeholder (ABSA, account 12345678910, branch 123456) that nobody pays. 'Final EFT reminder, 2 days before' is On. You know whether the starting-soon and attendance emails are On or Off. Nothing was saved on either page.
- **Card safety:** on every TRAINING booking page the card option reads 'Card (demonstration)', and nobody uses it. No real card number is written or typed anywhere.
- **Test values:** every value is filled in on your copies only. Each made-up valid ID passes the Luhn check and the invalid one fails it. CRM contact searches for every cell number and made-up ID returned zero hits. Her handouts carry no ID, PERSAL, NAP or cell number.
- **Files:** the four pictures and the agenda PDF are on her desktop, each marked 'TRAINING - delete after' and under 25 MB.
- **Receipts list:** 5 rows from Classroom Management Essentials (Thandi, Hennie, Palesa, Naledi, Silvertree) with their invoice and receipt numbers. Finance has been told in writing that more will follow.
- **"Remove" is taught in words only:** at the 11:35 go or stop check. A normal "Cancel booking" deletes the row, so you cannot set up a row in "Cancelled" on purpose. Finance's "Remove" sits on rows in the "Cancelled" group and in the Attendee ledger, and only for bookings with no payment history.
- **Not seeded on purpose:** no bookings for Petersen, Sithebe, Mitchells Plain Primary School or Fortuin, and no "Booking Practice" or "Full House Test" workshop.
- **The room:** your super admin screen is out of her reach, the mail client shows loxly@lbtec.co.za, her laptop shows her own two inboxes, the phone is charged and on Wi-Fi, notifications are muted and the anchor question is taped up.

- **The Events page:** every published Western Cape workshop shows on the public Events page with a Register button, TRAINING ones included. Publish TRAINING workshops as late as you can and close them straight after the session. A workshop drops off the Events page by itself once its end time passes, and its registration closes by itself at 00:05 that night. Until then the booking link and its QR code keep taking bookings, unless someone clicks "Close registrations".
- **The Silvertree link:** open the Silvertree receipt email (loxly@lbtec.co.za) on your phone and keep its "Register a teacher" link ready. Do not submit it.

Your first five minutes

Say these in your own words. The times are rough.

1. **Welcome (30 seconds).** "Good morning, and thank you for taking this on. By ten past one you will have run a whole workshop on the real system, from the first click to the closed record. Today is about doing, not listening, so your hands will be on the keyboard most of the morning."
2. **Why it matters (30 seconds).** "Members book, pay and get CPTD certificates through this module. When you run it well, a teacher books in two minutes and gets her certificate the same day. When a step is missed, someone gets chased for money they already paid."
3. **Where she starts (30 seconds).** "Before I show you anything: have you used the Workshops page before, or booked a workshop on our website yourself?" Listen. Use her words for things from now on.
4. **The anchor question (30 seconds).** Point to the board. "This is the question for the whole day: is this mine to do, or do I recognise it and hand it to Finance? Your account has the Workshop creator tick and not the Finance tick, so some buttons will simply not be on your screen. That is by design, not a fault."
5. **Safety (1 minute).** "We are on the live system. Four rules. We only use workshops called TRAINING, dash, topic, dash, delete after. Every booking you make uses your own work or personal email, so you see every email it sends. Every booking I make uses my address. We pay by EFT only, never with a real card. And nothing that is marked paid, emailed or certified can be taken back, so before those clicks we stop and say it out loud."
6. **What she will do (30 seconds).** "We follow one workshop's life in order: create, publish, share, follow bookings, chase payment, handle changes, run the day, attendance, certificates, exports. At the end you run one on your own while I play the CEO."
7. **How the role-plays work (30 seconds).** "Sometimes I will play a caller. When I play a character, I stay in character. When I say Narrator, I am telling you what happens on screen. When I say Coach, I am me again. The hint slips stay face down. Turn one over whenever you want."
8. **Predict before she sees (hand over at 09:04).** "Before we open anything, write on this sheet how you think a workshop goes from idea to certificate, in your own words. Then circle the steps you think are money steps. There is no wrong answer. We will compare it at the end." Then stop talking and let her write for 4 minutes.

How to run a role-play

Prep (1 to 2 minutes, as Coach)

- Read her learner card out loud: the situation, who the caller is, her role ("you are the Workshop creator, you do not have the Finance tick") and which screen she starts on.
- Say any "this cannot be undone" warning here, never inside the scene.
- Ask: "Ready?"
- Prep has no task and no tactics. Tactics live on the hint slips.

Play (2 to 4 parts)

- Open each part with its narrator line if it has one ("Narrator: the phone rings."), then say the character's opening line.
- She answers in her own words or does it in the app.
- Watch for the "done well when" sign on your card. It is something concrete she says or does, like "she says she cannot mark it paid herself and names who can".
- If the slot is under 12 minutes, run 2 parts, not 4. Pick the part with the hand-off decision and the part with the screen action.

Staying in character

- Speak only as the person, in the first person, with short replies a real person would give.
- Chase the character's own goal. A worried member wants her seat. A busy CEO wants a number.
- Never praise, grade, explain or hint while in character.
- If she gets something wrong, live the result: "So my booking is just gone?"
- Give away a hidden fact only when she asks the right question, for example the EFT reference the member used. Never put it in your opening line.
- Never invent a button, email or automatic step. If she asks the character something you are not sure the app does, the character says "I don't know, you tell me". Check the cheat sheet after the scene.
- If she asks "is this the real system?", answer as the character would: "It's what I see on my side, yes."

The Narrator hat

- Say "Narrator:" for anything that happens off-stage, like "Narrator: the member has just booked" or "Narrator: Finance has marked it paid."
- Then do the Finance click on YOUR screen and let her see the result on hers after she presses "Refresh".
- Keep narration to 1 or 2 neutral sentences. Never sum up what the character said.

The Coach hat

- Say "Coach:" before you step out of the scene.
- Use it only in prep, in the wrap-up, or to stop for safety, for example when she is about to type a member's real email address.

When to give a hint

- Wait for a real stall, not a pause. She says she is stuck, asks for help, or sits for about a minute without moving.
- Then go one step at a time:
 1. Point her to the face-down hint slip.
 2. Give a partial explanation as Coach.
 3. Work through the first half with her, then say "now you try the next bit".
- Hints say how to think ("decide whose job this is before you answer"), never what to say.
- If she says "can you just do it?", the answer is no. Offer a smaller first step or read the screen with her. Her hands stay on her keyboard.

Catch me out, once a morning

- Before a Finance-only moment, act out the wrong move once so she can stop you: "So I just press 'Cancel booking' myself, right?"

Wrap-up (1 to 2 minutes, as Coach)

- Name one good moment tied to something she did, and ONE thing to improve.
- The full review per goal waits for the 12:55 debrief.
- Write achieved, partly or missed for each part on your scoring sheet straight away.

Between scenes and tight slots

- Reset the screens before you start the next scene.
- Three slots are tight: 09:08, 09:33 and 11:52. Expect to use the "If you are running late" line in those blocks.

Part 1: Orientation, the map and the rules (09:00 to 09:15)

In these 15 minutes she learns where everything lives and which jobs are hers. Nothing in this part can break anything. She looks, writes and talks. She never presses a money button and never touches your screen.

09:00 • Welcome, the one-page brief and the four practice rules (4 min)

Goal: She learns the one question she will ask all day: "Is this mine to do, or do I recognise it and hand it to Finance?" She now knows the four practice rules and why they matter: on the live system a payment mark, an email or a certificate cannot be taken back.

Who drives: Nobody touches a screen. You talk from this page. She listens, reads along and writes in her workbook.

Before you start:

- The one-page brief is on her desk, face up.
 - **Brief title:** Run a workshop from first draft to certificate today
- The printed cheat sheet is beside her keyboard, open at Stage 1.
- Her workbook and a pen are ready.
- Her printed "Workshop planning sheet" is in her pile, face down. She uses it later, when she creates her own workshop.
- Her two email addresses are written on the first page of this guide:
 - **Her work email:** <Trainee work email>
 - **Her personal email:** <Trainee personal email>
- The anchor question is written on the board: "Is this mine to do, or do I recognise it and hand it to Finance?"

What happens:

1. You say: "Good morning, and thank you for taking this on. By ten past one you will have run a whole workshop on the real system, from the first click to the closed record. Today is about doing, not listening, so your hands will be on the keyboard most of the morning."
2. You say: "Members book, pay and get CPTD certificates through this module. When you run it well, a teacher books in two minutes and has her certificate in her inbox the next morning. When a step is missed, someone gets chased for money they already paid."
 - CPTD points are the professional development points teachers earn by attending workshops like these. The certificate is their proof of attendance.
3. You ask: "Before I show you anything: have you used the Workshops page before, or booked a workshop on our website yourself?"
4. You listen. From now on, use her words for things.
5. You hand her the brief and point at the cheat sheet.
6. You point to the board and read the anchor question aloud: "Is this mine to do, or do I recognise it and hand it to Finance?"
7. She writes the anchor question at the top of her workbook.

8. You read her role line: "Your account has the 'Workshop creator' tick and does NOT have the 'Finance' tick. So some buttons will simply not be on your screen. That is by design, not a fault."
 - A tick is a permission a super admin switches on for a staff account. You (Loxly) are the super admin today.
 - **"Workshop creator" tick:** she can create, edit, publish and close workshops, upload and remove files and open check-in early. It is why she sees the "Create Workshop" tab. She can also delete a workshop for good with "Delete workshop", but only while nobody has paid. It does not let her edit the reminder rules.
 - **"Finance" tick:** the money jobs. Mark a booking paid, create, edit or switch off coupons, cancel or remove a booking, send a payment reminder by hand, correct a payer's email and pull the export that has money in it.
 - In the Western Cape nobody has the "Finance" tick today and there is no auditor. So Finance here means the super admins.
9. You read the end task: "By 13:10 you will have created, published and shared a TRAINING workshop, followed a booking, handed a payment to Finance, run check-in, marked attendance, sent a certificate and pulled an export."
10. You say the order of the day: "We follow one workshop's life in order. You create it yourself from your own planning sheet, then publish, share, follow bookings, chase payment, handle changes, run the day, attendance, certificates, exports. At the end you run one on your own while I play the CEO."
11. You read the four practice rules:
 - **Rule 1, which workshop:** only touch workshops titled "TRAINING - <topic> - delete after". Nothing else.
 - **Rule 2, which email:** every booking she makes uses her own email. Every booking you make uses yours. Never a real member's email.
 - **Her bookings:** <Trainee work email> or <Trainee personal email>
 - **Your bookings:** loxly@lbtec.co.za
 - **When a block asks for a wrong address on purpose:** wrong.address@example.com
 - She receives and reads every email her own bookings send, so she sees exactly what a member sees. No real member gets anything.
 - If she books the same workshop twice with the same email, the system shows "Possible existing registration" with the reason "same email, same telephone". She clicks "Save as additional entry".
 - **Rule 3, how they pay:** EFT only. EFT is a plain bank transfer into NAPTOSA's account.
 - The bank details on the EFT instructions are for training only. Never pay them.
 - **Rule 4, cards:** never type a real card number anywhere, not even on the "Card (demonstration)" option.
12. You read why the rules exist. These are the exact warnings she will meet later:
 - **On the "Mark EFT paid" box:** "A receipt is emailed immediately and this cannot be undone."
 - **On certificates:** "This cannot be undone."
 - Every email the system sends is a real email.
13. You say: "So before any of those clicks, we stop and say it out loud."
14. You say: "One thing that catches people. There is a 'Delete workshop' button, but it only works while nobody has paid. Once a booking on your TRAINING workshop is marked paid today, it can't be

deleted. 'Delete after' in the title means we press 'Close registrations' when the day ends."

- "Close registrations" stops the booking link working, takes the workshop off the website Events page and moves it to the "Closed archive" list.
- Registration now closes by itself, but not straight away. Once the workshop's end time passes, the Events page drops it on its own. The booking link, and its QR code, keeps taking bookings until 00:05 that night, when the nightly run closes every workshop that ended before midnight. Until then the workshop waits in the "Needs closure" group, and she can close it sooner with "Close registrations".

15. You explain the role-plays: "Sometimes I will play a caller, like a member or a school asking about a booking or a payment, or a colleague. When I play a character, I stay in character. When I say Narrator, I am telling you what happens on screen. When I say Coach, I am me again. The hint slips stay face down. Turn one over whenever you want."

16. She says the four practice rules back to you in her own words, without looking.

She should see:

- The anchor question written at the top of her workbook.
- The cheat sheet beside her keyboard, open at Stage 1.
- She can say all four practice rules without looking.

If it goes wrong:

- She wants to use a real member's email to "make it realistic": no. The system emails the booking's own address only. A real address means a real person gets receipts and reminders. Her own bookings use her own email, so she sees every email herself:
 - **Her bookings:** <Trainee work email> or <Trainee personal email>
 - **Your bookings:** loxly@lbtec.co.za
- She asks how to delete the practice workshop afterwards: once anyone has paid, she cannot. "Delete workshop" only works while nobody has paid. After a payment the box says: "A payment has been recorded for this workshop, so it cannot be deleted. Payment records are always kept. Cancel the workshop instead. To stop new bookings now, use Close registrations." Teach "Close registrations". The other status buttons are "Publish workshop", "Reopen registrations" and "Reopen cancelled workshop".
- She asks whether the workshop closes by itself the day after: yes, since today. At 00:05 every night the system closes every published workshop whose end time was before midnight, and the first run is tonight, the night of 8 to 9 October. A closed workshop refuses new bookings, an unpaid booking on it can no longer get EFT details or pay by card, and its payment reminders stop. Until that run the booking link still takes bookings, so she can close it herself as soon as it is over. If she presses "Reopen registrations" on a workshop whose dates have passed, the next 00:05 run closes it again, so if the event moved she edits the dates instead.
- She asks what happens if she presses a money button by accident: she cannot, because those buttons are not on her screen. The risk sits on your super admin screen. That is why she never drives your screen.
- She asks if a paid mark, a sent email or a certificate can be undone: no. None of that is built, and receipts cannot be deleted either. The only protection is prevention: the TRAINING workshop, her own email or yours on every booking, EFT only, never a real card. If something real goes wrong, she stops and tells you.

Cannot be undone: Nothing in this block.

If you are running late: Read only the anchor question and the four practice rules. The "why" is in the brief she keeps.

09:04 • Try it before you look: her first version on paper (4 min)

Goal: She learns that she already knows more than she thinks, by putting her own first version of a workshop's life on paper before you show her anything. At the end of the day she compares it with what she can actually do and sees how far she came.

Who drives: She does, on paper. No screens. You stay quiet.

Before you start:

- A blank page in her workbook.
- A pen.

What happens:

1. You say: "Before we open anything: on this sheet, write how you think a workshop goes from idea to certificate, in your own words. Then circle the steps you think are money steps. There is no wrong answer. We will compare it at the end."
2. You stop talking.
3. She writes the steps in her own words, in the order she thinks they happen. Give her about 3 to 4 minutes and say nothing.
4. She circles every step she thinks involves money.
5. She writes one question she hopes today answers, at the bottom of the page.
6. She folds the page and puts it in the back of the workbook.
 - **Label on the page:** My first version
7. You do not correct it. You put it away until the end-of-day debrief.

She should see:

- A list of steps in her own handwriting.
- Some steps circled as money steps.
- One open question at the bottom.
- The page folded away, uncorrected.

If she gets stuck:

- She freezes on a blank page: ask only "What is the very first thing that happens when the office decides to run a workshop?" Then step back.

If it goes wrong:

- She asks "Is this right?": say "We will check it together at 13:00. Your version is the point."
- She writes a very short list: that is fine. A short first version makes the comparison at the end clearer.

Cannot be undone: Nothing in this block.

If you are running late: Cut the writing to 3 minutes. Never skip it. The debrief at 12:55 compares against this page.

09:08 • Find the screen, then "Who is Finance?" (7 min)

This block has three parts, back to back:

1. She clicks through the six tabs on her own screen and notices what is missing (about 3 minutes).
2. You show her who counts as Finance on your screen (the first minute of the role-play).
3. The role-play: a helpful colleague offers to sort everything out (about 4 minutes in total, including part 2).

Goal: She learns what each of the six tabs is for, and she realises the money buttons are missing from her screen on purpose: a missing button is not a fault, it tells her who to call. She now knows exactly who counts as Finance (the "Finance" tick, the auditor role or a super admin, nobody else, however senior) and she knows the names of the people she hands money jobs to.

Who drives:

- Part 1: her screen. She clicks.
- Parts 2 and 3: your screen on the second monitor. Only you click. She reads and talks. She never touches your screen.

Before you start:

- She is signed in on her own staff login.
- This practice workshop is already created and published. You did this the night before:
 - **Workshop:** "TRAINING - Chasing the money - delete after"
 - Her own TRAINING workshop does not exist yet. She creates it in the next part of the day, from her own printed "Workshop planning sheet".
- The 12 action cards are on the table.
- Your super admin screen is on the second monitor. Have this page ready to open:
 - **Path:** Settings > "Roles & Permissions" > "Staff Access Management" > "Provincial Roles"
- Your facilitator card with the hidden facts for the role-play (below).
- The names of the super admins, written down ready. Fill these in before the day. In the Western Cape nobody has the "Finance" tick and there is no auditor, so Finance here is the super admins only.
- The Western Cape staff with the "Workshop creator" tick, so you recognise the rows:
 - **Workshop creators:** the five Western Cape rows you noted on your card the night before
- The hint slips for the role-play, face down beside her.

You play: Mariam, a case admin in the Western Cape office. She has been at NAPTOSA several years longer than the trainee. Warm, quick and a bit proud of her seniority. She wants to save everyone time. She speaks in short, friendly, slightly hurried sentences. She genuinely wants to help and assumes a senior role can do anything. She arrives with a mug of tea and a list of offers from herself and two colleagues, Riaan and Thabo, and she wants a quick yes so she can tell them.

- A case admin is a staff role. It is not a Finance role.

Open with: "Morning! Good news, Kagiso's EFT is on the statement. Riaan says he'll mark him paid himself, he's allowed to, isn't he?"

Keep these to yourself until she asks:

- Riaan's role is auditor, and nobody has ticked Finance on his row. Say it only if she asks what Riaan's role is or how he is set up.
- Mariam herself is a case admin with no Finance tick. Say it only if she asks whether Mariam has the Finance tick. Then Mariam says: "No, but I'm a case admin."
- Mariam wants to change the first EFT reminder to 10 days, just because of this one booking. Say it only if she asks what exactly Mariam wants to change, or why.

- Thabo's account is read-only. That means he can look at everything but change nothing. Say it only if she asks what Thabo's role or access is.

What happens:

Part 1. The six tabs, on her screen

1. She opens the staff login page and signs in with her own staff login.
 - **Web address:** <https://naptosawc.co.za/staff>
2. She opens the Workshops page.
 - **Web address:** <https://naptosawc.co.za/staff/operations/workshops>
3. She clicks "Create Workshop".
4. She says what it is for: building a new workshop.
5. You tell her: "You only see this tab because of your Workshop creator tick. Don't type in it yet."
6. You warn her: "One thing that catches people. If you press Enter in a one-line box on this form, it creates or saves the workshop. So never use Enter to move between boxes."
7. She clicks "Published Links".
8. She says what it is for: every workshop, with its links, QR codes, check-in, files and coupons. The workshops sit in four groups:
 - **"Current & upcoming"**: workshops still to happen.
 - **"Closed archive"**: workshops where registrations were closed.
 - **"Drafts"**: workshops never published.
 - **"Needs closure"**: workshops whose date has passed but which are still open. The nightly run closes them at 00:05, or someone closes them sooner with "Close registrations".
9. She selects the practice workshop.
 - **Workshop:** "TRAINING - Chasing the money - delete after"
10. She opens "Registrations, coupons and documents" on that workshop.
11. She looks at "Coupons" and reads the line on screen aloud.
 - **On screen:** "Only a super admin, an auditor or a Finance user can create coupons."
 - A coupon is a discount code a person types when they book. Making one is a Finance job.
12. She clicks "All Registrations".
13. She says what it is for: every booking, grouped by what needs doing.
14. She looks at any booking row and notices what is not there:
 - **Missing on her screen:** "Mark EFT paid", "Remind" and "Cancel booking".
 - "Mark EFT paid" is what Finance presses once a member's bank transfer shows on the statement. It emails a receipt straight away.
15. She clicks "Analytics".
16. She says what it is for: reporting she can read but not change.
 - **Examples on screen:** "Payment completion", "Revenue collected" and "Attendance".
17. She clicks "Reminders".
18. She says what it is for: the schedule of automatic reminder emails.
 - She lands on "Reminder settings". The button for sending a payment reminder by hand ("Send an EFT payment reminder now") is Finance-only, so it is not on her screen.
 - She looks only. She presses no "Save" here.

19. She clicks "CPTD points".
20. She says what it is for: the points each attendee earned, with their SACE number and certificate number, for the Western Cape. SACE is the South African Council for Educators, the body every teacher is registered with.
21. She clicks "Refresh" at the end of the tab bar. On a smaller screen it shows only as a circular arrows icon.
 - It reloads the workshop list only. Nothing else.
22. She looks at your super admin screen on the second monitor.
 - Your workshop cards carry a province label and show every province.
 - Hers show the Western Cape only, with no province label.
 - Everyone except a super admin sees one province only. Anything she creates is always a Western Cape workshop.
23. (Optional. Skip it if time is short. She then does it later from her workbook.) She sorts the 12 action cards into two piles, "Mine" and "Finance".
 - **Mine (5 cards):**
 - "Publish workshop": puts the workshop live so people can book.
 - "Close registrations": stops bookings and moves the workshop to "Closed archive". The nightly run also does it at 00:05 the night after the workshop ends, but she can do it sooner.
 - "Present": marks a person as having attended.
 - "Send certificate": emails the person their CPTD certificate. Certificates also go out by themselves at 08:00 the morning after the workshop, to everyone who paid and was marked present.
 - "Export Excel" (no money): downloads a spreadsheet of the bookings without amounts.
 - **Finance (7 cards):**
 - "Mark EFT paid": confirms a bank transfer arrived and emails a receipt.
 - "Create coupon": makes a discount code. Editing or switching off a coupon is Finance too.
 - "Cancel booking": cancels someone's booking.
 - "Remove": takes away a booking that is already cancelled, only when it has no payment history.
 - "Remind": sends one person a payment reminder by hand.
 - "Correct payer email": fixes the email address on a booking.
 - "Export Excel" (full, with money): the same spreadsheet, with amounts.
 - The two "Export Excel" cards are the same button on screen. On her account the file has no money in it, and its file name says no-financial-data. Finance gets the full file with amounts.

Part 2. Who is Finance, on your screen (the first minute of the role-play)

24. You say the rule once: "Finance is the Finance tick, OR the auditor role, OR a super admin. Nothing else."
25. You open this page on your own screen. She does not open it herself.
 - **Path:** Settings > "Roles & Permissions" > "Staff Access Management" > "Provincial Roles"
26. She reads the section text on your screen aloud:
 - **On screen:** "Add workshop rights on top of a person's role. Workshop creator can create, edit and publish workshops. Finance can mark bookings paid, send payment reminders and manage coupons. Only super admins and Finance can mark paid. Marking attendance needs neither tick:

every staff member of the province can do it. Each person works in their own province and sees a change after reloading the page."

27. You point at the "Finance" column and say: "Nobody in the Western Cape has this ticked."

28. You say the auditor line in words, because there is no auditor row to show: "If someone here had the auditor role, their row would carry the line 'The Auditor role is always Finance.' We have no auditor in the Western Cape, so there is nobody like that to show you."

29. You point out that super admins are not in the list at all, because they always have both ticks.

30. She finds her own row.

- **Her row:** "Workshop creator" ticked. "Finance" not ticked.
- The other Western Cape rows with "Workshop creator" ticked belong to her fellow Western Cape workshop creators.

31. She writes on her cheat sheet who does Finance in the Western Cape: the super admins only (you, Loxly, and the other names you give her). These are the people she hands money jobs to.

- Nobody ticks or unticks anything. Not now, not in the role-play.

Part 3. The role-play: a helpful colleague offers to sort everything out

32. You say "Coach:" and read her brief: "You are the Workshop creator for the Western Cape. You have the Workshop creator tick and not the Finance tick. A friendly colleague from the office comes to help with a teacher's payment and some arrangements for the day. Decide, for each offer, whose job it really is."

33. You set the scene: "It's the Western Cape office, mid-morning. A teacher's EFT has shown on the bank statement for a booking on the TRAINING workshop. Mariam stops at your desk with a mug of tea and a list of offers."

34. She puts her own screen on "All Registrations".

35. You (as Mariam) say the opening line: "Morning! Good news, Kagiso's EFT is on the statement. Riaan says he'll mark him paid himself, he's allowed to, isn't he?"

36. She asks what Riaan's role is.

37. You (as Mariam) answer: "He's an auditor." If she asks, add that nobody ticked Finance on his row.

38. She answers Mariam.

- **She does well when:** she says Riaan can mark it paid from his own login, because the auditor role is always Finance. No tick needed.
- While she thinks, Mariam stays cheerful and waits.
- If she says "No, only I can" or "Only people with the Finance tick", Mariam looks puzzled: "Oh? He thought he could." Move on and pick it up in the debrief. Do not confirm or correct her while you are Mariam.

39. You say: "Narrator: On the second screen, Loxly points at the Finance column. Nobody in the Western Cape has it ticked and there is no auditor here, so there is no auditor row to show. In this scene Riaan is an auditor, and an auditor's row always carries this line."

- **Said in words:** "The Auditor role is always Finance."

40. You (as Mariam) say: "Actually, just send me the row. I'm a case admin, that's higher than you. I'll mark it paid and I'll change the reminder to 10 days while I'm in there."

41. She answers Mariam.

- **She does well when:** she says Mariam cannot mark it paid, because a case admin is not Finance unless a super admin ticked it. And she asks Mariam not to change the reminder days for one

booking, because "Reminder settings" are one list for every province.

- Careful: a case admin CAN edit reminder settings. So the right answer is not "you're not allowed". It is "please don't, it changes reminders for every province".
- If she only deals with the "paid" part, Mariam pushes: "And the reminder, shall I just do it?"

42. (Optional. Skip if time is short.) You (as Mariam) say: "And Thabo will be at the door on the day. He says he'll tick everyone present on the register for you, so that's one less thing."

43. She answers Mariam.

- **She does well when:** she asks what Thabo's access is, says a read-only account cannot mark attendance, and names who can: any other staff member of the province (Mariam included, or herself), and only on paid bookings.
- Thabo can still read the register. He just cannot mark it.
- If she says "Only Creators can mark attendance", Mariam says "Oh, so I can't either?" and lets her correct herself.
- Do not quote any error message from the system here. There is no exact on-screen wording for this refusal.

44. (Optional. Skip if time is short.) You (as Mariam) say: "Honestly, why don't they just give YOU Finance? Then we'd stop passing things around."

45. She answers Mariam.

- **She does well when:** she says only the super admin can give someone the Finance tick, and that it is a decision for the super admin and management, not hers. Until then every money job goes to a super admin, or in this scene to Riaan, because he is an auditor. And she says her own version of the hand-off sentence.

46. You say "Coach:" to step out of the scene, and go to the debrief.

47. You tell her what you skipped: normally you would now tick Finance on her row so she watches "Mark EFT paid" appear after she reloads, then untick it so it vanishes again. That demo is not run in this part (no time). Name it as skipped.

- If you ever run it later: only you tick, she must reload to see the change, and she must not click any money button. They are real and cannot be undone.

She should see:

- Each tab swaps the content below it. The web address changes to name the tab, so refreshing the browser keeps her on the same tab.
- "Create Workshop" is visible on her screen.
- The coupon line: "Only a super admin, an auditor or a Finance user can create coupons."
- No money buttons on any booking row in "All Registrations".
- "Reminders" opens at "Reminder settings". If her role cannot edit it, she also sees: "You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor."
- If the card sort was run: 5 cards in her "Mine" pile and 7 in "Finance".
- On your screen: the "Provincial Roles" section text, a "Finance" column with no Western Cape row ticked, and her own row with Workshop creator on and Finance off.
- There is no auditor row to see. She heard the line "The Auditor role is always Finance." from you, in words.
- Her cheat sheet now names who she hands money jobs to.

If she gets stuck: Wait for a real stall: she says she is stuck, asks for help, or sits for about a minute without a move. Then point at the next face-down hint slip. One at a time.

- Riaan's offer:
 - "Before you answer, find out what Riaan's role is."
 - "Which three kinds of people count as Finance?"
- Mariam's own offer:
 - "Does a senior role automatically include money rights?"
 - "Ask what exactly she wants to change and who else that change would reach."
- Thabo's offer:
 - "Attendance needs neither tick, but is there any account that still cannot do it?"
 - "What does the person at the door need to be able to do on the system?"
- "Why not give you Finance?":
 - "Who decides what ticks a person has, and where is that done?"
 - "Until that changes, who do you send money jobs to?"

If it goes wrong:

- There is no "Create Workshop" tab, or she gets sent to "Published Links" when she tries to open it: her Workshop creator tick is missing, or she has not reloaded since it was set. You check Settings > "Roles & Permissions" > "Staff Access Management" > "Provincial Roles" on your screen. Then she reloads the page.
- She thinks "Reminders" is broken because there is no send button: it is not broken. Sending a reminder by hand is Finance-only. That missing button is her cue to hand off.
- The read-only line is missing on "Reminder settings" and the "Save" buttons work: her role (case admin, admin or supervisor) is allowed to edit the schedule. She still looks only and saves nothing, because the schedule applies to every province.
- She clicks "Refresh" and a coupon change does not show: "Refresh" reloads workshops only, not coupons. Click away and back, or reload the browser.
- She asks "Where is Mark paid?": that question is the cue for a hand-off, not a fault. Ask her: "Whose job is that?"
- She puts "Present" or "Send certificate" in the Finance pile: attendance and certificates need neither tick. Any staff member of the province, except a read-only account, can do them on paid bookings.
- She reaches Settings > Roles herself, for example by typing the address: she gets "Super-admin access required". That is correct. Only a super admin sees that page. Whether she ever gets Finance is a decision for the super admin and NAPTOSA management. Until then every money job is a hand-off.
- She looks for an auditor row or a Finance tick in the Western Cape list and finds none: that is correct today. Finance in the Western Cape is the super admins only. Every money job goes to a super admin until management gives someone Finance. She writes that down.
- She says "A case admin is senior, so they can mark paid": no. Case admin, admin and supervisor are not Finance unless ticked. They can edit reminder settings and mark attendance. They cannot do money.
- The page shows "Workshop roles are not switched on in this database yet. Ask the developer to apply the role add-on update.": stop. Do not carry on with the role questions until the setup is fixed.
- She searches "All Registrations" for Kagiso during the role-play and finds nothing: that is expected. No booking for Kagiso exists. Say: the booking is on Finance's list, and this scene is about who presses the

button, not about finding the row.

- She asks to do a money job herself ("Mark EFT paid", "Create coupon", "Cancel booking", "Remove", "Remind", "Correct payer email" or the export with amounts): she cannot. The buttons are not on her screen, and the system refuses them even if she reached them another way. She finds the booking, checks the facts, and hands it to a named Finance person from her cheat sheet with the booking name, the workshop and what is needed. She can still pull "Export Excel" or "Export <N> (CSV)" without money. The file name says no-financial-data.
- She wants to save something on Settings > "Payment details" (or "Province details") just to "check how it works": she looks only and never saves. On most staff accounts the page says "Only a super admin can change these details." Where a save button does show, every save emails a change alert to real staff, and "Confirm these details" changes the bank account real EFT payers are shown. Bank detail questions go to the super admin.
- She wants to help a colleague in another province, for example with a KwaZulu-Natal workshop's bookings: she cannot see it. She sees the Western Cape only. She sends the colleague to the super admin, or to that province's own Finance or creator.

Cannot be undone: Nothing in this block. It is look only: she presses no "Save" in "Reminders", nobody ticks or unticks a role, and she never touches your screen.

If you are running late: Skip the 12-card sort (she does it later from her workbook) and skip Thabo's offer and the "why not give you Finance?" offer. Name them at the debrief as skipped. For those two, use the last two rows of "How did she do?" below, and have her answer this workbook question instead: "Who counts as Finance, and why is a case admin colleague not Finance?"

Debrief:

1. "For each offer (Riaan, Mariam, Thabo, 'give you Finance'), what did you decide, and which fact made you decide it? Which question did you ask that unlocked the answer? Was there one where you answered before you asked?"
2. "Say it in your own words: who counts as Finance, and why is a case admin not Finance?"
3. "Do you really know this, or does it just feel like you know it? Who exactly will you call tomorrow for 'Mark EFT paid'?"

Keep this model hand-off sentence for the debrief. Do not read it out during the scene:

- **Model hand-off:** "Only the super admin can give Finance, and only super admins, auditors and people with the Finance tick can mark a booking paid. Riaan, please do it from your login. Mariam, please leave the reminder days as they are, they apply to every province."

How did she do?

- **Goal: an auditor is Finance without a tick.**
 - Done well when she asked Riaan's role and said he can mark it paid from his own login, because the auditor role is always Finance.
 - Partly when she said Riaan can do it but could not say why, or said yes without asking his role.
 - Missed when she said Riaan cannot mark it paid because he has no Finance tick, or offered to do it herself.
- **Goal: a case admin is not Finance, and reminder settings are shared.**
 - Done well when she refused Mariam's offer to mark it paid (not Finance unless ticked) and warned that reminder days apply to every province, so they must not change for one booking.

- Partly when she got only one of the two right, or refused the reminder change for the wrong reason ("you are not allowed").
- Missed when she agreed Mariam can mark it paid because she is senior, or agreed to the 10-day change.
- **Goal: a read-only account cannot mark attendance.**
 - Done well when she asked about Thabo's access, said a read-only account cannot mark attendance, and named who can (any other staff member of the province, paid bookings only).
 - Partly when she said Thabo cannot but did not name who can, or left out "paid bookings only".
 - Missed when she accepted Thabo's offer, or said only Creators or only Finance can mark attendance.
- **Goal: who changes roles, and the hand-off.**
 - Done well when she said only the super admin can give a Finance tick (a management decision) and gave a clear hand-off sentence naming a Finance person.
 - Partly when she said it is not her decision but did not name who to hand money jobs to.
 - Missed when she said she would just ask for Finance, or tried to open Settings > Roles herself.

Her workbook questions for Part 1 (no time slot: she answers these on her own, or you use them when a role-play offer was skipped)

Check yourself. Answer without looking:

1. **Name the 10 steps of a workshop's life in order.**
 - **Answer:** Create (from her own planning sheet), publish, share, follow bookings, chase payment (and hand the money to Finance), handle changes, run the day, attendance, certificates, exports.
 - **Look for:** all 10 steps. Publish comes before share. Attendance comes before certificates. She mentions the hand-off to Finance at the payment step. Compare with her folded first version at the end of the day, not now.
2. **Who counts as Finance, and why is a case admin colleague not Finance?**
 - **Answer:** Anyone with the Finance tick, anyone in the auditor role, and a super admin. In the Western Cape today that is the super admins only. Case admin, admin and supervisor are different roles. They only become Finance if a super admin ticks Finance on their row in Settings > Roles. They can edit reminder settings and mark attendance, but not do money.
 - **Look for:** all three (tick, auditor, super admin). The auditor needs no tick. Being senior does not bring money rights. Only the super admin sets ticks.
3. **What are the four practice rules, and why do they matter on this system?**
 - **Answer:** Only touch workshops titled "TRAINING - <topic> - delete after". Every booking she makes uses her own work or personal email, and every booking Loxly makes uses loxly@lbtec.co.za. Never a real member's email. EFT only, and the bank details are for training only, so never pay them. Never type a real card. They matter because we practise on the live system, where a booking marked paid, a sent email or an issued certificate cannot be undone.
 - **Look for:** all four rules. The words "cannot be undone" or the same idea. She links "the email goes to the booking's own address" with the risk to real members, and with seeing her own booking emails herself.
4. **The workshop title says "delete after". What will you actually do at the end of the day, and why?**

- **Answer:** Press "Close registrations" on "Published Links". "Delete workshop" only works while nobody has paid, and the TRAINING workshop has a paid booking, so it cannot be deleted. Closing is what stops bookings. The nightly run only closes a workshop at 00:05 after its own end time, and this one is dated in November, so its booking link would keep taking bookings until then. The workshop then moves to "Closed archive".
- **Look for:** "Close registrations", not delete. She knows "Delete workshop" is refused once anyone has paid. She knows the link only closes by itself at 00:05 after the workshop's own end time. It moves to "Closed archive".

Practice situations (one right answer each):

1. A teacher phones. She paid her EFT yesterday and wants confirmation. You find her booking in "All Registrations". There is no "Mark EFT paid" button on her row. What do you do?
 - **Right answer:** Hand it to a Finance person with her name, the workshop and the payment date, and tell the teacher Finance will confirm it.
 - **Why:** Only Finance can mark a booking paid. A missing button is her cue to hand off. It is not a bug, reloading or "Refresh" will not make it appear, and a case admin is not Finance just because they are senior.
2. Riaan offers to mark a booking paid. His role is auditor. Nobody ticked Finance on his row. Can he?
 - **Right answer:** Yes. The auditor role is always Finance, so he does it from his own login.
 - **Why:** His row on Settings > Roles says "The Auditor role is always Finance." And never share logins. Hers cannot mark paid anyway.
3. At the end of the training day, the practice workshop "TRAINING - Classroom Discipline - delete after" is finished and Loxly asks you to tidy it away. What do you do?
 - **Right answer:** Select it on "Published Links" and press "Close registrations", so it moves to "Closed archive".
 - **Why:** "Delete workshop" is refused once any payment is recorded, and this workshop has a paid booking. Closing is a Workshop creator job, so it is hers. Do not wait for it to close by itself: the nightly run only closes it at 00:05 after its end date in November, and until then the booking link keeps taking bookings. Never change the dates to hide it. "Close registrations" is the proper status change and keeps the history.
4. A member says she typed her email wrong when booking and never got the EFT instructions. She gives you the right address. What do you do?
 - **Right answer:** Hand it to Finance to use "Correct payer email", with the booking and the right address.
 - **Why:** It is a Finance action, and there is no email box for her to edit. A second booking would leave two bookings for one person, and only Finance can cancel the extra one.
5. A colleague says the bank details on an EFT email look odd. You open Settings > "Payment details" to check. What do you do?
 - **Right answer:** Look only, do not save, and pass the question to the super admin.
 - **Why:** Bank details belong to the super admin. Every save emails a change alert to real staff, and "Confirm these details" changes the bank account real payers see. A case admin cannot change them either. Their page says "Only a super admin can change these details."
6. A colleague in KwaZulu-Natal messages: "Can you check who has booked on our workshop? I can't find it." What do you do?

- **Right answer:** Tell her you see the Western Cape only, and send her to the super admin or her own province's staff.
 - **Why:** Only a super admin sees every province. Making a copy of her workshop would only create a new, empty Western Cape workshop.
7. During practice you want to make a test booking on the TRAINING workshop to see what members see. Which details do you use?
- **Right answer:** Her own email, EFT only, and no card details at all.
 - **Email:** <Trainee work email> or <Trainee personal email>
 - **How they pay:** EFT
 - **Why:** She should receive and read every email her booking sends, so she sees what a member sees. A real member's email sends them real emails that cannot be recalled. A made-up email might belong to a real person. If she books the same workshop again with the same email, she sees "Possible existing registration" with the reason "same email, same telephone" and clicks "Save as additional entry". The bank details on the EFT instructions are for training only, so she never pays them. And never a real card, not even on "Card (demonstration)".
8. Your supervisor, who has no Finance tick, says: "The reminder for this one teacher is too soon. I'll just change the first EFT reminder to 10 days." What do you do?
- **Right answer:** Ask them not to change it for one booking, because the schedule applies to every province. Raise it with the super admin if it really needs changing.
 - **Why:** A supervisor is allowed to edit reminder settings, but it is the wrong fix. The schedule is one list for every province. She should not change it herself either.

Her practice log for Part 1 (she writes these down):

- **My first version:** her steps, the circled money steps and one question. Folded away until the end of the day.
- **Tab map:** for each of the six tabs, one line on what it is for and one thing she noticed on it.
- **Card sort:** two columns, "Mine" and "Finance", with any card she first put in the wrong pile marked. (She does this here if you skipped it at 09:08.)
- **My Finance people:** in the Western Cape that is the super admins only, because nobody has the Finance tick and there is no auditor. Their names and how to reach them.
- **My hand-off sentence:** one or two sentences she will use when a money job comes to her, naming the Finance person and what she passes on (booking name, workshop, what is needed).
- **Practice rules:** the four rules from memory, and one line on why nothing marked paid, emailed or certified can be undone.

Part 2: Set up and publish a workshop (09:15 to 09:45)

This part is about one job. She plans a workshop from her own planning sheet. She sets it up, makes it public and shares the link. Every later step of the day hangs off the workshop she creates here: the bookings, the payments, the day itself and the certificates.

A few words you will use all through this part:

- **Workshop creator tick:** a setting on a staff login that lets that person create, edit and publish workshops. She has it today.
- **Finance tick:** a setting on a staff login that turns on the money actions, such as marking a payment as received or making a discount code. She does not have it today. In the Western Cape nobody has it, and there is no auditor. Finance here means the super admins. You are one, on your second screen.
- **Toast:** the small message that pops up on the screen after she clicks a button. It tells her what just happened.
- **Pill:** the small coloured label on a workshop card. Gold "Draft" means private. Green "Published" means live.

09:15 · The short talk before she starts (3 min)

Goal: She learns that every new workshop starts as a private draft, and that she checks the preview before she publishes. She now knows that pressing Enter in a one-line box saves the whole form.

Who drives: Your second screen. She listens. Nobody clicks anything yet.

What happens:

1. You say: "In the next half hour you set up a workshop from your own planning sheet, make it public and share it."
2. You say: "Every new workshop starts as a draft. A draft is private. Nobody outside the office can see it or book it."
3. You say: "The order is always the same. Draft first, then check the preview, then publish."
4. You say: "One thing catches people. If you press Enter in a one-line box, like the title or a price, the whole form saves. Move from box to box with Tab or the mouse. Only the Description, the Venue and address, and the Terms boxes take Enter as a new line."
5. You say: "The public link is built from the title on the day you create the workshop. It never changes, even if you edit the title later. A mistake on a published link can be in a circular or a WhatsApp group within the hour."
6. You say: "Know these limits, so you never promise anyone something you cannot deliver."
 - **Delete a workshop:** "Delete workshop" only works while nobody has paid. It asks for a reason and cannot be undone. Nobody who booked is emailed. Once any payment exists, it refuses. Then press "Close registrations". The workshop moves to "Closed archive" with every record kept, and the link stops taking bookings.
 - **Remove a file:** each file in "Workshop files" has a "Remove" button, for the Workshop creator and the super admin. It cannot be undone. Removing the poster takes it off the booking page, which then shows the standard NAPTOSA picture.

- **Show a poster on the website Events page:** the Events page never shows a workshop poster. The poster shows on the booking page, which opens from "Register", the link and the QR code.
- **Share the link of a draft, or of a workshop whose date has passed:** "Copy link", "Open link" and "Booking link QR" only work for a published workshop whose end date has not passed. Publish first. If the date has passed, fix the dates in "Edit details" if the event moved, or press "Close registrations" if it is over.
- **Close registration by itself:** registration closes by itself at 00:05 the night after a workshop ends, from tonight on. The Events page drops a workshop after its end time, but until that night's run the booking link stays open and anyone holding the link or the QR code can still book. When a workshop is over, find it under "Needs closure" and close it. Never press "Reopen registrations" on a workshop whose dates have passed: the next 00:05 run closes it again. If the event moved, edit the dates instead.

She should see: Nothing on her screen yet. This block is talk only.

Cannot be undone: Nothing in this block.

If you are running late: Say only the Enter warning and "draft first, publish later".

09:18 · From her planning sheet: she creates the workshop (15 min)

Goal: She learns that her planning sheet becomes a saved draft only when she gets the right dates, prices, venue status and certificate facts into the form. She realises that a venue her sheet marks as not confirmed is not a fact yet, and that she must check every line of the sheet before she saves. She now knows that a newly created workshop is a draft and is not public yet.

Who drives: Her screen. She works in the real system from her own planning sheet. You play a colleague on the phone only in the last part.

Before you start:

- Check that this practice draft is still in the "Drafts" group:
 - **Title:** TRAINING - Short Code Clash - delete after
 - **Short code:** TCDDA

You made it before the day. It is there on purpose, so that her title clashes with it and the system offers her a different code.

- She is signed in with her own staff login. The Workshop creator tick (the setting that lets her create, edit and publish workshops) is on. The Finance tick (the setting that turns on money actions such as discount codes) is off. She is on the staff workshops page and can see the "Create Workshop" tab.
- Your super admin login stays on your second screen.
- Give her the printed "Workshop planning sheet". Keep a copy for yourself. It holds these facts:
 - **Topic:** Classroom discipline for Foundation Phase
 - **Date and time:** Saturday 14 Nov 2026, 08:30 to 12:30
 - **Venue:** Parow Teachers' Centre (NOT confirmed yet. The booking only comes back on Monday.)
 - **Non-member price:** R 450
 - **Member price:** R 350
 - **Seats:** 40
 - **CPTD points:** 5
 - **SACE endorsement number:** PD-20461

- **Facilitator:** Dr Lindiwe Khumalo
- She has a pen and her workbook.
- Before she starts, read her the learner card in your coach voice: "This is the next workshop in the annual programme, and you are planning it yourself. Your sheet is in front of you. Your job is to get it into the system correctly, check every line of the sheet, and be honest about what is settled and what is not. You are the Workshop creator. You do not have the Finance tick."
- Tell her which title to use:
 - **Title:** TRAINING - Classroom Discipline - delete after
- Say the "cannot be undone" warning below now, never inside the phone call at the end. Then ask: "Ready?"

You play (last part only): Mr Deon Pretorius, NAPTOSA WC Professional Development manager. A colleague. Practical, a little impatient. He saw the workshop on the annual programme and wants the link for a circular this afternoon.

Open with: "Hi, Deon here. I see the discipline workshop is on the programme. Can you send me the link? I want it in my circular this afternoon."

Keep these to yourself until she asks:

- Deon would like a discount for principals. Say this only if she asks whether there is anything else he needs.

How Deon behaves:

- He never gives a real phone number, ID, PERSAL or NAP number.
- He never asks for a card payment and never mentions bank details.
- He never claims the system can do something that is not on the screen. No bulk send.
- If she offers a discount code, it is only so she practises handing it to Finance. He accepts that answer.
- He stays on this one workshop. No other bookings or members come up in this call.

What happens:

First part: the details from her sheet

1. She reads her planning sheet once, top to bottom, before she touches the form.
2. She clicks the "Create Workshop" tab in the top tab bar.
3. In section "1. Details & Scheduling", she types the title:
 - **Title:** TRAINING - Classroom Discipline - delete after
4. She reads the line under "Short code". It first reads "Suggested from the title. Checking...", then "Already used by another active workshop. Try TCDDA2." The short code is a code of up to 6 letters or digits that the system builds from the title. It goes into EFT (bank transfer) payment references and receipt numbers, so she waits for "Available" before she saves. TCDDA is already taken by the practice draft, so the system offers TCDDA2.
5. She clicks the "Use TCDDA2" button. The line changes to "Available (6/6)".
 - **Short code:** TCDDA2
6. She types a description. Enter makes a new line in this box, so nothing saves by accident here.
 - **Description:** a short line in her own words from the sheet, for example: Classroom discipline for Foundation Phase teachers
7. She picks the start with the calendar and clock picker:

- **Start:** 14 Nov 2026, 08:30

8. She picks the end the same way:

- **End:** 14 Nov 2026, 12:30

Watch for this: if she presses Enter in a one-line box, say as the narrator: "The form flashes red at the top." Let the red banner "Workshop could not be created. Title and description are required. Your entries are still here; review them and retry." play out. She fixes it and carries on. Do not explain it.

Second part: price, seats and the venue

9. She reads the price, seats and venue lines on her sheet.

10. She goes to section "2. Delivery & Pricing". The non-member price box starts at 0.00, so she types over it:

- **Non-member price in ZAR:** 450

11. She types the member price:

- **Member price in ZAR:** 350

12. She checks the venue line on her sheet. Is the venue confirmed or booked?

13. She finds the note on her sheet: the Parow Teachers' Centre booking only comes back on Monday.

14. Under "How it runs" she clicks the dashed "To be confirmed" chip, not "In person" with a guessed venue. The hint beside it now reads "Pages and emails say the venue is still being arranged."

- **How it runs:** To be confirmed
- **Venue and address:** left empty for now

15. She types the number of seats:

- **Capacity:** 40
- **Buffer above capacity:** left empty
- **Unlimited capacity:** not ticked

Watch for this: if she types "Parow Teachers' Centre (TBC)" as the venue with "In person", let it stand. The debrief picks it up. The preview does not show the venue, so it will not catch this for her.

Third part: the certificate facts

16. She reads the certificate lines on her sheet: the CPTD points, the SACE number and who is presenting.

17. In section "3. Certificate & SACE Accreditation" she types:

- **Facilitator:** Dr Lindiwe Khumalo
- **CPTD points:** 5 (these are printed on each teacher's certificate. The box takes 1 to 100.)
- **SACE endorsement number:** PD-20461
- **No CPTD points for this workshop:** not ticked
- **Terms:** nothing on the sheet, so she leaves it as it is

18. She skips section "4. Documents & Media". The poster and agenda go on in the next block.

19. She clicks "Preview" at the top right.

20. Under "Live preview · What members will see · Updates as you type" she reads the workshop card: picture, title, date, description and price. The card has no venue line.

21. She scrolls to "Certificate preview" and reads the facilitator, the points and the SACE number out loud.

22. She closes the preview with the X ("Close preview") or the Escape key.

Watch for this: if she skips the certificate lines and tries to save, the message "Enter the CPTD points, or tick No CPTD points for this workshop." appears under the points box. Ask only: "What is the screen asking

for? Where is that on your sheet?"

Last part: a colleague phones for the link

23. She reads the note at the bottom of the form: "This workshop starts as a draft. Publish it from Published Links when you are ready for registrations."
24. She clicks "Create workshop".
25. The phone rings. You say the opening line above, as Deon.
26. She tells Deon it is a draft and is not public yet.
27. She agrees with Deon when it will be published. Either Monday, once the venue is confirmed, or now, with "To be confirmed" clearly agreed.
28. If she pushes back, you say: "Fine, a draft is fine, but I need to know what the link will say about the venue while it is not confirmed." The right answer is that the booking page will say "Venue to be confirmed - we will email you as soon as it is arranged".
29. If she asks whether he needs anything else, you ask for a discount for principals. The right line is that Finance sets those up.
30. You end the call and switch to your coach voice. Give one thing she did well and one thing to improve. Only one of each.

Quick check after the call

31. She clicks "Edit details" on the new workshop and sees TCDDA2 in the "Short code" box. This is the only place the saved short code shows.
32. She clicks "Cancel edit" without saving.
33. She writes in her workbook:
 - **Clash line:** the line she saw under "Short code"
 - **Short code saved:** TCDDA2
 - **Toast:** the exact text of the message that popped up after "Create workshop"
 - **Group:** the group in the list where the workshop landed

She should see:

- The toast "Workshop created." A toast is the small message that pops up after she clicks a button.
- The screen switches to the "Published Links" tab, with the new workshop selected under "Drafts · N awaiting publication". The count includes the practice clash draft.
- The workshop card has a gold "Draft" pill. The pill is the small coloured label on the card, and gold means private. The card also shows the price "R 450,00" with a line "Members R 350,00", and the date line "14 Nov 2026, 08:30 to 14 Nov 2026, 12:30 SAST".
- The header reads "0 seats paid · 0 bookings incomplete · 0 bookings total". Below it: "Seats paid 0", "Bookings incomplete 0", "Capacity 0/40" and "Price".
- The "Application link" box, which will hold the public booking link, reads "Publish this workshop to activate the application link."
- No email is sent at this step.

If she gets stuck (give one hint at a time):

- While she types the first details: "Before you leave the first section, look at the line under the short code." Then: "Think about how you move from one box to the next."
- At the price and venue: "Is every line on your sheet a fact yet, or still a plan?" Then: "Think about what a member reading the booking page would believe."

- At the certificate: "What will be printed on each teacher's certificate?" Then: "Check the screen a member will see before you save."
- When Deon asks for the link: "Before you answer, look at what the screen says about the link." Then: "Decide what you can promise today, and say when."

If it goes wrong:

- The line under "Short code" reads "Suggested from the title. Available" instead of the clash message: the practice draft "TRAINING - Short Code Clash - delete after" is missing. Let her save, and cover the clash message in the debrief.
- Red banner "Workshop could not be created. Title and description are required. Your entries are still here; review them and retry.": usually Enter was pressed in the title box. Her entries are kept. She fills the missing box and clicks "Create workshop" again.
- "Enter the CPTD points, or tick No CPTD points for this workshop.": the points choice is required. She takes the points from her sheet, or ticks the no-points box.
- "Use a valid date range where the end is after the start.": she fixes the end time.
- "Member price cannot be more than the standard (non-member) price.": the two prices are the wrong way round.
- "Capacity is required. Every workshop needs a maximum number of attendees, or tick Unlimited below.": she types the number of seats or ticks Unlimited.
- "A in person workshop needs a venue - say where people should go, or set the mode to Venue to be confirmed." (it says "hybrid (in person and online)" for a hybrid workshop): she types the venue or clicks "To be confirmed".
- "Could not check now. You can still save; we check again when you save." under "Short code": she may save. If the save is refused, she sees the toast "Workshop not saved. Short code: ..." and red text under the box. She picks another code or clicks the "Use ..." button.
- "Workshop created, but some documents did not save. Open this workshop's Documents section to upload the remaining files.": the workshop is saved. She uploads the files again from "Workshop files".

Cannot be undone: The workshop "TRAINING - Classroom Discipline - delete after" now exists. It can only be removed with "Delete workshop" while nobody has paid for it, and that cannot be undone either. Its public link is built from the title and never changes. The short code TCDDA2 is now taken. No email is sent.

If you are running late: Never drop this block. Shorten the certificate part by letting the points message under the box teach it, and keep the "Preview" check brief.

Debrief:

1. "Which line on your planning sheet changed what you typed into the form? What would the booking page have said if you had missed it?"
2. "Where did the form surprise you, and what did you do next?"
3. "What exactly did you tell Deon about the link, and what on the screen backed it up? In your own words: when is a workshop live, and how can you tell from the screen?"

How did she do?

- **Draft created with the sheet's facts.** Done well when she sees the toast "Workshop created." and a gold "Draft" card under "Drafts" with the right title, date line, "R 450,00" plus "Members R 350,00" and "Capacity 0/40". Partly when the draft saved but one fact was wrong or missing (for example capacity, member price or end time) and she noticed only when prompted. Missed when no draft saved, or it saved with a title other than "TRAINING - Classroom Discipline - delete after".

- **Venue status checked and shown honestly.** Done well when she read the venue note on her sheet and chose "To be confirmed", the hint read "Pages and emails say the venue is still being arranged.", and she could say the booking page will show "Venue to be confirmed - we will email you as soon as it is arranged". Partly when she saw the note but typed a guessed venue with "(TBC)", or chose the chip without being able to say why. Missed when she never checked and the workshop shows an unbooked venue as fact.
- **Certificate facts entered from the sheet.** Done well when she entered the points, SACE number and facilitator from her sheet before saving, and checked the "Certificate preview". Partly when she entered them only after the system refused to save, or skipped the preview. Missed when she ticked "No CPTD points for this workshop" or left facts out.
- **Told the colleague the truth about draft versus live.** Done well when she said plainly it is a draft and not public yet, and agreed a clear publish moment with Deon. Partly when she said it is a draft but left the next step vague. Missed when she promised a live link today without publishing, or said the link was already live.

09:33 • The venue is confirmed: she updates the details, publishes, shares the link and adds the poster (9 min)

Goal: She learns that a workshop only becomes public when she clicks "Publish workshop", and that she can change the details of a draft without touching its title. She realises that the link is for WhatsApp and email, and the booking QR code is for a printed poster. She now knows that the system cannot email a link to all schools, that she cannot make a discount code herself, and that removing a file cannot be undone.

Who drives: Her screen. You play a colleague on the phone for the middle part (steps 9 to 33).

Before you start:

- The workshop "TRAINING - Classroom Discipline - delete after" is selected in the "Published Links" tab, under "Drafts". The practice clash draft sits in "Drafts" too, so check she has the right card.
- She is still signed in as the Workshop creator (she can create, edit and publish workshops). She still has no Finance tick, so she cannot do money actions such as discount codes.
- On her desktop:
 - **Poster:** the prepared TRAINING poster picture
 - **Agenda:** the prepared TRAINING agenda PDF
 - **Second poster:** the second prepared TRAINING poster (only for the optional poster swap)
- A phone to scan the downloaded QR code (optional).
- Her workbook, to write down the toast text, the group the workshop moves to and the name of the QR file.
- Say the "cannot be undone" warning below now, before the scene starts.
- Read her the learner card in your coach voice: "The workshop you set up is now confirmed, and a manager needs something to share today. Your job is to make it bookable, give him the right things to share, and be clear about what the system will and will not do for him. You are the Workshop creator. You do not have the Finance tick."

You play: Mr Deon Pretorius, NAPTOSA WC Professional Development manager. Practical, a little impatient, used to doing things himself. He talks in short sentences and thinks about what he can print and send. He phoned on Friday for the link and heard it was a draft. Now he wants to send it on the principals'

WhatsApp group and print an A3 poster for the district office tomorrow. The call starts at step 9, after she has updated the details.

Open with: "Hi, Deon here again. I hear the venue is confirmed. I want to send the discipline workshop on the principals' WhatsApp group now and I am printing an A3 poster for the district office tomorrow. Can you send me the link, and something I can stick on the poster so they can scan it?"

Keep these to yourself until she asks:

- Deon would like a discount for principals. Say this only if she asks whether there is anything else he needs for the circular or the poster.
- Deon assumes the system holds the Metro North school addresses and can email them. You raise this yourself, as a request.
- Deon plans to print the check-in QR code on the same poster to save a trip. You raise this yourself, last.

How Deon behaves:

- He never gives a real phone number, ID, PERSAL or NAP number.
- He never asks anyone to pay, and never mentions card or bank details.
- He accepts "there is no bulk send" and the hand-off to Finance once she says it clearly. He pushes back once at most.
- He never claims a button or email exists that is not on the screen.

What happens:

First: the venue is confirmed, so she updates the details

1. You say: "It is now Monday. The Parow Teachers' Centre booking is confirmed."
2. She clicks "Edit details" in the header of the selected workshop. The form opens with the heading "Edit Workshop" and a "Cancel edit" chip.
3. Under "How it runs" she clicks "In person".
 - **How it runs:** changes from To be confirmed to In person
4. She types the venue on two lines. Enter makes a new line in this box.
 - **Venue and address:** changes from empty to Parow Teachers' Centre, on two lines
5. She changes the number of seats:
 - **Capacity:** changes from 40 to 60
6. Everything else stays the same.
 - **Title:** stays "TRAINING - Classroom Discipline - delete after". She does not touch it.
7. She clicks "Save changes".
8. She sees the toast "Workshop updated." A toast is the small message that pops up after she clicks a button. The workshop is still under "Drafts" and still selected.

Part one of the call: get it live

9. You say the opening line above.
10. She looks at the link box. The "Application link" box holds the public booking link. It reads "Publish this workshop to activate the application link." "Copy link", "Open link" and "Booking link QR" are all greyed out. The booking QR is a picture of a code. Anyone who scans it with a phone lands on the same booking page as the link. For now it says "Publish first to get a booking QR."
11. If she tries "Copy link" while it is still a draft, let her find out it does not work. Say as the narrator: "Deon waits on the line."

12. She clicks "Publish workshop" in the header of the selected workshop. A draft has no confirm box, so it publishes straight away.
13. She reads the toast out loud: "Workshop link is active. Registrations are open."
14. She shows that the card has moved to "Current & upcoming" and has a green "Published" pill. The pill is the small coloured label on the card, and green means live.

Part two of the call: the link and the poster QR

15. You say: "Right. So what do I put on WhatsApp, and what goes on the poster?"
16. She clicks once in the "Application link" box. One click selects the whole link. She cannot type in this box.
17. She clicks "Copy link". The toast reads "Application link copied."
18. She clicks "Open link". The public booking page opens in a new tab with the heading "Register for this workshop". She reads it the way a member would, then closes the tab.
19. She clicks "Booking link QR" and reads the box that opens.
20. She clicks "Download QR (PNG)". A picture file whose name starts with booking-qr- lands in her Downloads folder.
21. She tells Deon the link is for WhatsApp and the QR is for the poster.
22. She reads the header out loud:
 - **Header line:** 0 seats paid · 0 bookings incomplete · 0 bookings total
 - **Capacity:** 0/60

23. She opens the Events page on the NAPTOSA WC website, finds the workshop card and clicks "Register". The same booking page opens in a new tab.

Watch for this: the booking page shows her poster if she has uploaded one, or the default NAPTOSA poster if not. Both are correct. Do not let her paste the link into a real WhatsApp group.

Part three of the call: "can the system send it for me?"

24. You say: "Actually, do not bother with the link. Just email it from the system to all the Metro North schools, you have their addresses on the member list, right?"
25. She tells Deon the system has no button to send to all schools. It only emails people after they book.
26. She offers him the copied link or the QR code to send himself.
27. She asks Deon whether there is anything else he needs.
28. You tell her, only if she asked, that you would like a discount for the principals.
29. She tells Deon that discount codes are set up by Finance and that she will pass the details on. She does not promise a code or an amount.

Watch for this: a good hand-off names Finance. In the Western Cape that means the super admins. Nobody in the province has the Finance tick, and there is no auditor. Say it to her in words in the debrief: if she looked down the Finance column on the staff list, she would find no tick for anyone in the Western Cape. There is no auditor row to show her. If she says she will create the coupon herself, stay in character and accept it. The debrief catches it.

Part four of the call (optional if time is short): two QR codes on one poster

30. You say: "Okay, then also give me the check-in QR now so I can print both on the same poster. Saves me a trip."
31. She says no to putting the check-in QR on the public poster.

32. She explains why. The check-in QR ("Check-in link & QR") is for the venue door on the day. Before the day, the check-in page says "Check-in isn't open today". The booking QR is the one for the poster. She may open "Check-in link & QR" to show it exists. That is fine. Check-in is taught properly later in the day, so a plain explanation is enough here.

33. You end the call and switch to your coach voice. Give one thing she did well and one thing to improve.

Last: the poster and the agenda

34. In "Published Links", with the workshop selected, she opens "Registrations, coupons and documents" and finds "Workshop files". "Workshop files" is a staff shelf for agendas and notes. Staff can download from it. The creator can upload to it and remove from it. Nothing on it is ever emailed to attendees.

35. She reads its notes. The first picture uploaded is the public poster while the workshop is published. Other files are not sent to attendees. A second note reads: "The poster shows on the booking page only. To take a workshop off the website's Events page, use Close registrations."

36. You say: "Each file here has a Remove button, but a removal cannot be undone. So upload only the prepared TRAINING poster and agenda. Never a test picture."

37. Under "Add workshop files" she chooses two files:

- **Poster:** the prepared TRAINING poster picture (PNG, JPG or WebP)
- **Agenda:** the prepared TRAINING agenda PDF

38. She clicks "Upload 2 documents". She uploads them once only. She does not add a second picture here. It would only become a staff reference.

39. She reads the list and clicks "Download" on the agenda, to prove staff can fetch it. She sees "Remove" next to each file and does not click it.

40. (Optional if time is short) To swap the poster, she clicks "Edit details" in the header, opens "4. Documents & Media" and reads "Saved with this workshop".

41. (Optional) She drops the second prepared TRAINING poster on the box marked "Upload a workshop picture", or clicks "Browse files". The old poster now reads "Public poster · replaced when you save changes".

42. (Optional) She can click "Preview" to see the card with the new picture. Then she clicks "Save changes".

43. (Optional) Back in "Published Links" she opens "Workshop files" and checks that her new picture is the one tagged "Public poster · shown on the booking page".

44. She reads the header:

- **Header line:** N seats paid · N bookings incomplete · N bookings total
- **Capacity:** for example 0/60
- **Price:** the price box next to it

45. She clicks "Open link" to see the poster on the booking page.

46. You say: "Keep this workshop open. The bookings in the next part go on it. It would only close by itself at 00:05 the night after its date in November, so we close it ourselves in the last clean-up block of the day."

She should see:

- After "Save changes" on the details: the toast "Workshop updated."
- After "Publish workshop": the toast "Workshop link is active. Registrations are open." The card moves to "Current & upcoming" with a green "Published" pill, and the pill in the header also reads "Published".
- After "Copy link": the toast "Application link copied."

- The booking page in a new tab: the caption "NAPTOSA Workshop", the heading "Register for this workshop", the place line, the fee, and "NAPTOSA members R..." because there is a member rate. The place line shows the venue. (While a venue is still "To be confirmed" it shows "Venue to be confirmed - we will email you as soon as it is arranged".) The picture is her poster, or the default NAPTOSA poster if none is uploaded yet.
- In the "Booking link QR" box: "Put this QR code in an email or on a poster for <title>. Scanning it opens the public booking page, the same page as the link below."
- After "Download QR (PNG)": a picture file whose name starts with booking-qr- in Downloads. If she clicks "Copy QR image" instead, the toast reads "QR code copied. Paste it straight into your email."
- On the website Events page: the workshop card with a "Register" button and no poster picture. If the paid seats run out, it shows the word "Full" with no link instead.
- After "Upload 2 documents": the toast "Documents added to the workshop." The poster is listed as "Public poster · shown on the booking page" and the agenda as "Staff reference · download here", each with its size in KB, and a "Remove" button beside "Download".
- After the optional poster swap and "Save changes": the toast "Workshop updated." and she is back in "Published Links" on the same workshop. The new poster shows on the booking page whole, never cropped.
- At the end of the block the workshop is still under "Current & upcoming" with a green "Published" pill.

If she gets stuck (give one hint at a time):

- At "get it live": "Look at the link box first. Can anything be shared yet?" Then: "Check where the workshop sits in the list after you act."
- At the link and the poster: "Two different things to share, for two different places." Then: "Before you send it, look at it the way a principal would."
- At "can the system send it?": "Before you answer, picture the screen. Is there a button for this?" Then: "Decide whose job each part of his request is."
- At the two QR codes: "Think about who scans a poster, and when." Then: "What would a teacher see if she scanned it next week?"

If it goes wrong:

- "Workshop changes could not be saved. ...": her entries are still on screen. She reads the reason, fixes that box and clicks "Save changes" again.
- Toast "The workshop dates have passed. Review the dates or close registrations before sharing its link.": the workshop lands in "Needs closure", the group for published workshops whose dates have passed, and Copy and Open are greyed out. She clicks "Edit details", fixes the dates, clicks "Save changes", then shares.
- A red toast that stays on the screen, for example "Status update failed.": she clicks Refresh (the circular arrow, "Refresh workshops") and tries "Publish workshop" once more. If it fails again, she tells the super admin and reads them the toast.
- "Clipboard access was blocked. Open the workshop, select its Application link field and copy it manually.": she clicks the link box, then copies with Ctrl+C.
- "This browser can't copy images, so the QR code was downloaded instead. Attach the file to your email.": she uses the downloaded picture as an attachment.
- "Copy failed. Select the link and copy it by hand." in the QR box: she selects the link text and copies it with Ctrl+C.

- The workshop is not on the Events page: check that it is a Western Cape workshop, published, not closed and not yet ended. Workshops from other provinces are only reachable by link.
- "Will not upload: larger than 25 MB." or "Will not upload: not a supported file type." on a file in the Edit upload box: she clicks the X ("Remove <file>") and chooses a smaller or supported file.
- "Documents could not be added. <reason>" under "Workshop files": "Add workshop files" does not check the size before uploading, so a file that is too big fails here. She shrinks it and uploads again.
- "Workshop updated and the new picture saved, but the previous poster could not be removed, so it is still the public poster. Check Workshop files under Published Links.": she does not upload again blindly. She opens "Workshop files", sees which picture is tagged "Public poster", and tries "Edit details" once more.
- After "Save changes", an older picture is tagged "Public poster" instead of the new one: a second picture was uploaded earlier through "Workshop files". The poster is always the earliest picture still on file. She stops re-uploading. She clicks "Remove" on the older picture. The box reads "Remove the public poster "{file name}"?" and names the picture that becomes the poster next. She clicks "Remove file" and checks the tags again.
- She uploaded a second picture through "Workshop files" and the poster did not change: a later picture is listed as "Staff reference". She swaps the poster through "Edit details" instead, then checks "Workshop files" as above.
- The wrong agenda was uploaded: she clicks "Remove" next to it. The box reads "Remove "{file name}"?" and "Staff will no longer be able to download it. This cannot be undone." She checks the file name, clicks "Remove file" and sees the toast ""{file name}" removed." Then she uploads the right file with a clear name, for example "Agenda FINAL".

Cannot be undone: The workshop goes public. The link works for anyone. The workshop is listed on the website Events page until its end time passes or you close it. The booking link keeps taking bookings until someone clicks "Close registrations", or until the nightly run closes it at 00:05 after its end date. The uploaded poster and agenda stay until someone removes them, and a removal cannot be undone. The optional poster swap removes the old poster for good.

If you are running late: Skip the optional poster swap (steps 40 to 43) and the part about two QR codes on one poster (steps 30 to 32). Check-in is taught later in the day. Never paste the link into a real group.

Debrief:

1. "What did the screen tell you before you published, and what changed straight after? When do Copy link and Open link work, and when are they greyed out?"
2. "Deon asked for three things the system does not do the way he hoped. Which was yours to do, which was Finance's, and which was a no?"
3. "Why does the booking QR go on the poster and not the check-in QR?"

How did she do?

- **Workshop published and checked on screen.** Done well when she clicked "Publish workshop", read the toast "Workshop link is active. Registrations are open." and showed the card under "Current & upcoming" with a green "Published" pill. Partly when it was published but she did not check the toast or the group. Missed when it was not published, or she tried to share a draft link.
- **The right thing shared to the right place.** Done well when the link was copied (toast seen), the booking page was opened and checked, and the booking QR was downloaded, with the link matched to WhatsApp and the QR to the poster. Partly when she shared only one of the two, or skipped checking the booking page. Missed when neither was shared, or she gave the check-in QR for the poster.

- **Honest about bulk email and the hand-off to Finance.** Done well when she said plainly there is no bulk send, and named Finance for the discount without promising a code. Partly when she said no to the bulk send but was vague about who handles the discount. Missed when she promised a bulk email, or said she would create the discount herself.
- **Check-in QR kept off the public poster.** Done well when she said no and gave the reason: it is for the door on the day, and it is not open before then. Partly when she said no without a reason, or hesitated and said she would think about it. Missed when she gave him the check-in QR for the poster.

09:42 · Quick self-check quiz (3 min)

Goal: She realises that she can answer real situations from this part without looking at the screen. She now knows that "Workshop created." does not mean the link is live.

Who drives: Her. You read each situation out loud and she answers in her own words.

What happens:

1. You always ask the first question below.
2. If there is time, you pick one or two more.
3. The rest go into her workbook for later.

The questions, with the right answer:

1. **Always ask this one.** You have just clicked "Create workshop" and the toast (the small message that pops up after a click) says "Workshop created." A colleague asks for the booking link to put on WhatsApp right now. What is true, and what do you do?
 - **Right answer:** It is a draft. Open "Published Links" > "Drafts", click "Publish workshop", then "Copy link".
 - **Why:** A new workshop always lands in "Drafts". Copy and Open only work once it is published, and only before its end date passes.
 - **Wrong answers she may give:** "The link is already live" (no, the box says "Publish this workshop to activate the application link."). "Ask the super admin to switch it on" (no need, as Workshop creator she publishes it herself). "Links go live once the first person pays" (no, payment has nothing to do with it).
2. The presenter emails a nicer poster two days after the workshop was published. How do you swap the poster?
 - **Right answer:** "Edit details" > "4. Documents & Media" > choose the new picture > "Save changes".
 - **Why:** The old poster is removed when she saves. A picture added under "Workshop files" (the staff shelf for agendas and notes) only becomes a "Staff reference" while the old poster is still on file, and it is not a Finance job. Afterwards she checks in "Workshop files" that the new picture is tagged "Public poster · shown on the booking page".
3. You uploaded the wrong agenda PDF to "Workshop files". The right one is on your desktop. What do you do?
 - **Right answer:** Click "Remove" next to the wrong agenda, check the file name, click "Remove file", then upload the right one with a clear name such as "Agenda FINAL".
 - **Why:** The Workshop creator and the super admin can remove a file, and a removal cannot be undone. Closing registrations and starting again is far too much, and the system cannot send files to attendees.

4. Try it before you look: your TRAINING workshop is published, has a poster and is in the Western Cape. A principal looks at the website Events page. What will she see?
 - **Right answer:** A card with no poster and a "Register" button that opens the booking page with the poster.
 - **Why:** The Events page never shows a workshop poster. There is no approval step, and bookings do not change the card. When the paid seats run out, the card shows "Full" with no link.
5. While you set up the workshop, a colleague asks for a 50 percent discount code for principals. Is this yours, or do you hand it on?
 - **Right answer:** Set up and publish the workshop, then pass the coupon request to Finance with the exact details.
 - **Why:** Discount codes are a Finance job. Only someone with the Finance tick (the setting that turns on money actions), an auditor or the super admin can make one. In the Western Cape that means the super admins, because nobody here has the Finance tick and there is no auditor. She does not have the Finance tick. Once made, Finance can change how many people may use a code, or switch it off and on, but never its price or the code itself. Halving the member price would change it for every member. Saying "the system cannot do discounts" is not true. She can say: "Discount codes are set up by our Finance person. I will pass that part to them today."
6. You click "Publish workshop" and the toast says "The workshop dates have passed. Review the dates or close registrations before sharing its link." The event has moved to next month. What do you do?
 - **Right answer:** Find it in "Needs closure", click "Edit details", set the new dates, "Save changes", then share.
 - **Why:** "Needs closure" is the group for published workshops whose dates have passed. Moving the dates into the future moves it back to "Current & upcoming" and Copy and Open work again. A new workshop would split the records, and dates are not a Finance job.
7. Your planning sheet says the venue is probably Parow Teachers' Centre, but the booking is only confirmed next week. What do you choose under "How it runs"?
 - **Right answer:** The dashed "To be confirmed" chip. Switch to "In person" with the venue in "Edit details" once it is confirmed.
 - **Why:** The booking page then says "Venue to be confirmed - we will email you as soon as it is arranged", which is true. Members read a typed venue as fact and plan their travel around it. Choosing "Online" would also be false.
8. You notice you created two drafts of the same workshop by mistake. Your manager says "just delete the extra one". What do you do?
 - **Right answer:** Select the extra draft and check its title. Click "Delete workshop", give the reason, tick "I understand this cannot be undone." and click "Delete workshop for good".
 - **Why are you deleting it?:** created by mistake
 - **Why:** Nobody has paid for a draft, so it can be deleted. The toast reads ""{workshop title}" deleted." Finance alone cannot delete a workshop. Publishing it just to close it would make it public on the Events page, even if only briefly. Once anyone has paid for a workshop, "Delete workshop" refuses and "Close registrations" is the only way.
9. Your workshop was today, from 09:00 to 15:00. At 17:00 a teacher phones. She found the booking link in an old WhatsApp message and has just booked. How is that possible, and what do you do?
 - **Right answer:** Registration only closes by itself at 00:05 tonight. Open "Published Links" > "Needs closure", select the workshop and click "Close registrations".

- **Why:** The Events page dropped the workshop after 15:00, but the booking link stays open until someone clicks "Close registrations" or the nightly run closes it at 00:05. The page says "These workshop dates have passed but their registration links are still open." After closing, it moves to the archive and the link stops taking bookings. Had she phoned the next morning, the nightly run would already have closed it and the link would have refused her.

Cannot be undone: Nothing in this block.

If you are running late: Ask only the first question. The rest go into her workbook.

Part 3: Booking and paying, from the attendee's side (09:45 to 10:40)

In this part she sits in the attendee's chair. She books her own training workshop the way a teacher or a school would, then looks at the same booking from the staff side. Members phone the office about what they see on the booking page, not about what staff see. Once she has booked herself, she can talk them through it. She can also tell straight away whether a booking is saved, paid or stuck.

One question runs through the whole part: is this mine to do, or do I hand it to Finance?

Every booking in this part goes on the workshop she created and published this morning:

- **Title:** TRAINING - Classroom Discipline - delete after
- **Date and time:** Saturday 14 Nov 2026, 08:30 to 12:30
- **Venue:** Parow Teachers' Centre
- **Non-member price:** R 450
- **Member price:** R 350
- **Short code:** TCDDA2
- **Capacity:** 60

No money moves today. Nobody pays for a TRAINING booking.

09:45 · Find the public booking link (2 min)

Goal: She now knows where the public booking link for a workshop lives, and that anyone with that link can book without logging in.

Who drives: Her screen.

Before you start:

- "TRAINING - Classroom Discipline - delete after" is published. She did that herself at 09:33.
- Her staff screen is on Workshops.

The Application link is the public address of the booking page. You share it with teachers and schools. The public page needs no login, so she opens it in a private (incognito) browser window and makes every booking there.

The link keeps taking bookings until someone clicks "Close registrations", or until the nightly run closes it at 00:05 after the workshop ends. The website's Events page drops the workshop by itself once its end time passes, but until that night's run anyone who still has the link or the QR code can book.

What happens:

1. She clicks Workshops, then "Published Links".
2. She selects "TRAINING - Classroom Discipline - delete after".
3. She copies its Application link.
4. She opens a private browser window and pastes the link.

She should see:

- The public booking page, on its first step "Confirm workshop details", with the title, date, place and price.

Cannot be undone: Nothing in this block.

If you are running late: Open the link on your second screen for her.

09:47 · She books as Siphso, then Siphso phones the office (12 min)

Goal: She learns that a booking exists the moment the person clicks "Save details and continue", but a seat only counts once the booking is paid. She now knows that marking an EFT paid is not possible for her. It is Finance's job. Her part is to pass on the EFT reference.

Who drives: Her screen. She makes the booking in the private window, then answers the call on her staff screen. You play the caller.

Timing: About 5 minutes for the booking, then about 7 minutes for the call.

Before you start:

- The private window shows the booking page for "TRAINING - Classroom Discipline - delete after".
- Her staff screen is on Workshops > "Published Links" with that workshop selected.
- Her own inbox, <Trainee work email>, is open in another tab. Every email from her bookings lands in her own inboxes.
- Your second screen has the same workshop open.
- Your facilitator card (hidden facts and success checks) and the hint cards are face down.
- Test cell number 1 from your seed sheet is to hand.

Ideas to explain as they come up:

- **EFT** is a bank transfer. When the person clicks "Send EFT instructions", the system emails them the bank details and an EFT reference.
- **The EFT reference** is a short code the payer must type exactly into their bank's reference box. It is built like EFT, then the short code TCDDA2, then a number, then up to 5 letters of the surname. It is the same on the success page, in the email and on the staff row. Finance uses it to match the bank statement.
- **"Owes money"** is the group in "All Registrations" where unpaid bookings sit. The same bookings show as "Bookings incomplete" in the workshop header. A seat is only counted once the booking is paid.
- **The Attendee ledger** is the list of every booking on this one workshop.
- **The NAP number** is the NAPTOSA membership number. **The PERSAL number** is a teacher's government staff number. It is not a NAPTOSA number.

First, the booking

What happens:

1. She reads the first step, "Confirm workshop details": the title, date, place and price box. The price box also shows "NAPTOSA members R ...".
2. She leaves "Has your school already paid for your place?" empty.
3. She clicks "Continue".
4. On "Who should be invoiced?" she clicks "Individual".
5. Under "Are you booking as a NAPTOSA member?" she clicks "No, standard rate R 450". The fee pill changes to "Standard fee".
6. She clicks "Continue".
7. On "Invoice and receipt details" she types Siphso's details:
 - **Name:** Siphso

- **Surname:** Ndlovu
 - **Email address:** <Trainee work email>
 - **Cell phone number:** test cell number 1 from your seed sheet
 - **PERSAL number (optional):** leave it empty, or type the test PERSAL number from your seed sheet. Never a real one.
 - **NAP number:** not asked, because he is not a member
8. She clicks "Save details and continue".
 9. On the payment step she reads "Invoice details are saved. Choose how you would like to pay."
 10. She leaves the payment method on EFT and reads the note under it.
 - **Payment method:** EFT (it is the default)
 - **Coupon code:** none
 11. She clicks "Send EFT instructions". She does not click "Card (demonstration)".
 12. On the success page she reads the blue card "Pay R 450 by EFT", the line "Reference (use this exactly)" and "Payment status" "Awaiting EFT". She does not transfer any money. The bank details are for training only. Never pay them.
 13. On her staff screen she clicks the Refresh button at the top of the Workshops page. She reads the workshop header and the "Bookings incomplete" box.
 14. She expands "Registrations, coupons and documents" and finds the new row in the "Attendee ledger".
 15. She clicks "Open this workshop's registration desk". This opens "All Registrations" for this workshop.
 16. She opens the "Owes money" group and finds Sipho's row.
 17. On that row she clicks "..." then "View details". She reads "Amount / method", "Payment reference", "Invoice" and "Email".
 18. In the <Trainee work email> inbox she opens the email:
 - **Subject:** Workshop EFT payment instructions - TRAINING - Classroom Discipline - delete after

She should see:

- After saving the details: a green toast "Invoice and receipt details saved. Continue to payment."
- On the success page: "EFT instructions sent" above the heading "Workshop registration pending EFT", a reference like EFT-TCDDA2-NNN-NDLOV, "Payment status" "Awaiting EFT", "Email status" "Sent", and a "Pay by card instead" button she does not click. The NNN is a number the system picks.
- In the staff header after Refresh: "0 seats paid · 1 booking incomplete · 1 booking total". It is higher if other test bookings exist. "Bookings incomplete" goes up by one.
- In the Attendee ledger: a pill "EFT pending" and the same EFT reference. On a narrow screen the reference sits inside "Payment, receipt and email details". If a payment reminder is queued she also sees "Next reminder" and a date. The amount line with "Mark EFT paid" and "Cancel booking" only shows on Finance screens, so she does not see it.
- In "Owes money": the badge "Owes R ... · EFT" with R 450, the text "ref EFT-... · Not reminded yet", and "Attendance opens once the EFT is marked paid".
- In "View details": "Standard rate · EFT" under the amount, "Invoice" "Waits for payment", and "Email" "Sent · EFT instructions".
- The email shows the amount due, the EFT reference, the bank details and a "Pay by card instead" button.

Then, the phone call

Read her this before you start: "You work at the NAPTOSA Western Cape office. You are the Workshop creator. You do not have the Finance tick. A teacher who just booked a workshop is on the phone. Use the booking you made a few minutes ago to answer him, using the real staff screens. Try it before you look anything up in your notes."

The Finance tick is a permission on a staff account that unlocks the money buttons. She does not have it. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance means the super admins. You are one today.

You play: Mr Sipho Ndlovu. He teaches Foundation Phase at Bellville South Primary and is not a NAPTOSA member. He booked on his phone, chose EFT and saw a page that said "pending". He has not paid. He is polite but a bit anxious about money and about losing his place. He talks quickly, in short sentences, and repeats his question when he is worried. A colleague has put ideas in his head.

Open with: "Hi, good morning. I booked that workshop on my phone just now, but I have not paid yet. Does my seat actually exist, or must I book again?"

Keep these to yourself until she asks:

- He has not checked his Spam or Junk folder. Say so only if she asks where he looked for the email.
- He plans to pay on Friday, when he gets paid. Say so only if she asks when he will pay.
- A colleague told him it would have been cheaper to say he is a member and type his PERSAL number in the member box. Say so only if she asks whether he has other questions, or mentions the member rate.
- He typed his email correctly. It is the address on the booking. Say so only if she asks him to confirm his email.

Stay inside these lines:

- He never gives a real ID, PERSAL, NAP or cell number. If asked, he says "it is on the booking", or you use the test values from your seed sheet.
- He never reads out or asks for card details, and never says he paid by card.
- No money moves. If she asks him to pay, he says "Friday".
- He stays a caller. He never coaches her, never names a button and never says whether she is right.

What happens:

Part one: does my booking exist?

19. You say (as Sipho): "Does my seat actually exist, or must I book again?"

20. She checks the staff side. Either she clicks Refresh and reads the "Bookings incomplete" count, or she finds his row under "Owes money" in "All Registrations".

21. She tells him the booking is saved but not paid. A seat only counts once it is paid. He must not book again.

22. If she freezes, you say: "Narrator: Your Published Links page is still showing what it showed before he booked." Saying "Narrator:" out loud tells her you have stepped out of character. This line points her to Refresh without naming it.

23. If she says "you have a seat", stay in character and say: "Great, so I don't have to pay?" Let her correct herself. He wants to hear he is "in".

Part two: the cheaper member price (optional. Play it only if time allows and the hidden fact has come out.)

24. You say (as Sipho): "My colleague says I should have said I am a member and put my PERSAL number in that box. Can you change me to the member price?"
25. She says no. The member rate is only for paid-up members. The number box wants a NAP number or an SA ID number, never a PERSAL number. His booking stays at the standard rate. If he wants details corrected, Finance handles it.
26. If she says "the system will catch you", you say in character: "Oh, so it checks?" See whether she corrects herself. It does not check. A good answer says the number is only recorded and NAPTOSA checks it later.

Part three: just mark it paid

27. If it helps, before this part you say, as a colleague: "So I just find the Mark EFT paid button, right?" She should notice she does not have that button.
28. You say (as Sipho): "Look, I will pay on Friday for sure. Can't you just mark it as paid now so I don't lose my place?"
29. She says she cannot mark an EFT paid. She names Finance (or the super admin) as the person who does it, once the money shows in NAPTOSA's bank account. She offers to pass on his EFT reference. She does not promise him a seat. Accept any wording close to: "Only our Finance person can mark it paid, once it shows in NAPTOSA's bank account. I will pass on your reference."
30. If you are skipping part four, end the call here and go straight to step 37.

Part four: the email never came (optional)

31. You say (as Sipho): "And the email with the bank details never came. Should I just book again so it sends a new one?"
32. She asks where he looked. He has not looked in Spam or Junk.
33. She tells him not to book again. Booking again would make a second booking and bring up a "Possible existing registration" warning.
34. She opens "View details" on his row and reads the "Email" line. It says "Sent · EFT instructions". That is her proof the email left.
35. She clicks "Preview eft instructions email" and reads him the amount and the reference. She reminds him to type the reference exactly. In training she only reads them out. Nobody pays.
36. If she clicks "Resend eft instructions email" instead, let her read the toast "EFT instructions email was already delivered, so it was not sent again." Then steer her to the preview.
37. You step out of character as coach. Name one thing she did well and ONE thing to improve. Only one.

She should see:

- Sipho's row under "Owes money", with the badge "Owes R ... · EFT".
- In "View details", the "Email" line "Sent · EFT instructions".
- After "Resend eft instructions email" on a sent email: the toast "EFT instructions email was already delivered, so it was not sent again."

If she gets stuck (give one hint at a time):

- Does his booking exist? "Before you answer, look at the booking with your own eyes on the staff side." Then: "Think about the difference between a booking that exists and a seat that is paid for."
- The member price: "What does the hint under the member number field say?" Then: "Is changing a booking after EFT instructions something the attendee or you can do?"
- Mark it paid: "Before you answer, decide whose job this is." Then: "What would Finance need from you to find his payment quickly?"

- The missing email: "Ask before you tell: where has he already looked?" Then: "Check what the booking's email status says on your side before you promise anything."

If it goes wrong:

- "Enter a South African cell (mobile) number, e.g. ..." with "Check the cell phone number above to continue.": a landline was typed. Use the test mobile number.
- "A PERSAL number is 5 to 10 digits. Check it, or leave it empty.": fix the number or clear the box.
- A warning "Possible existing workshop registration found." and a panel "Possible existing registration": that email, cell number or name already booked this workshop. Today every booking she makes uses her own email, so this is expected once her email is on an earlier booking. She reads the reason, for example "same email, same telephone", and clicks "Save as additional entry". In real life she only clicks it if it really is a second booking.
- The staff counters did not move: they do not update while you watch. Click the Refresh button.
- The success page says "Bank details needed" or "The bank details aren't ready on this page yet...": Settings > Payment details is not saved for the province. Stop and tell the super admin.
- The email has not arrived: check Spam or Junk first. Then open "View details" and read "Email". If it says "Sent", "Resend eft instructions email" will not send it again. Use "Preview eft instructions email" to read the amount and reference to the person instead. Only if it says "Failed" does "Resend eft instructions email" try again.
- A red banner "This workshop has reached capacity. New registrations are closed.": the workshop's paid seats are used up. Raise the capacity.

Not possible, and what to say instead:

- "Can I pay by card instead, with my real card?" Real card payments are not available on ordinary workshops. PayFast only works on two pilot workshops. "Card (demonstration)" moves no money and is not used today. Today is EFT only, and never a real card. In real life, tell the member to pay by EFT using the reference exactly as shown.
- "Can I pay half now and half next month?" There are no partial payments. A booking is paid in full or not at all, and Finance only marks it paid for the full amount. The booking stays under "Owes money" until then, and payment reminders go out while it is unpaid.
- "Please mark my EFT paid now." "Mark EFT paid" is a Finance action. Only someone with the Finance tick, an auditor or the super admin can do it. In the Western Cape nobody has the Finance tick and there is no auditor, so that means the super admins. A Workshop creator does not see the button, and the system would refuse her anyway. She says: "Only our Finance person can mark it paid, once it shows on NAPTOSA's bank statement. I will pass your reference to Finance." Then she gives Finance the EFT reference.
- "Have you checked that I am a member?" or "Just put me in as a member." There is no membership lookup during booking. She says the member rate is for paid-up members and the number is recorded for NAPTOSA to check. A non-member books at the standard rate. A PERSAL number only goes in the optional PERSAL box, never in the NAP box.

Cannot be undone: The EFT instructions email to <Trainee work email> cannot be recalled. Once "Send EFT instructions" is clicked the booking is frozen. That means nobody can change it and only Finance can cancel it. The booking also creates a new contact in CRM contacts with the source "Workshop". That is normal, not an error, and she never edits those contacts from the workshop screens.

If you are running late: Never drop this block. Skip the member price part and the missing email part of the call.

Debrief:

1. "What did you look at on the staff side before you told him his booking existed, and what exactly did it say?"
2. "Say it in your own words: whose job is 'Mark EFT paid', and what do you do instead?"
3. "Do you really know why the member trick does not work, or does it just feel like you know? Explain it without your notes."

How did she do?

- **Confirms the booking from the staff side.** Done well when she pressed Refresh or opened "Owes money", found Sipho, and said "saved, not paid, the seat counts once paid". Partly when she said the booking exists without checking, or checked but told him he "has a seat". Missed when she told him to book again or guessed without looking.
- **Handles the member price temptation truthfully (optional part).** Done well when she refused, explained NAP or ID number (not PERSAL), and did not claim the system checks membership. Partly when she refused but said "the system will check", or could not say what the field wants. Missed when she agreed to change him to the member rate or suggested he book again as a member.
- **Hands "Mark EFT paid" to Finance.** Done well when she said she cannot do it, named Finance or the super admin, and offered to pass on the EFT reference. Partly when she said she cannot do it but not who can, or promised a seat. Missed when she tried to mark it paid or told him it is "done".
- **Solves the missing email without confusion (optional part).** Done well when she asked about Spam or Junk, checked the "Email" line in "View details", told him not to book again, and used "Preview eft instructions email" to give him the amount and reference. Partly when she checked the status but promised a resend the system will not send, or did not tell him to avoid booking again. Missed when she told him to book again or invented a different fix.

09:59 • She books as a member at the member price (6 min)

Goal: She learns that the member price is self-declared. The NAP number is only written down for NAPTOSA to check later. She now knows that the system does not look up membership, and that the only check is the check digit on a 13-digit SA ID number.

Who drives: Her screen. She books in the private window, then looks at the staff side.

Before you start:

- The private window is open on the Application link for "TRAINING - Classroom Discipline - delete after".
- From your seed sheet: test member NAP number 01, test cell number 2, and the synthetic invalid ID.
- She books with her own personal email, <Trainee personal email>, and a fresh test cell number. If her email is already on an earlier booking for this workshop, the duplicate check speaks up. That is expected. See "If it goes wrong".

Ideas to explain as they come up:

- **The NAP number** is the NAPTOSA membership number. It is printed on a teacher's payslip next to the NAPTOSA deduction. It is not the PERSAL number, which is the teacher's government staff number.
- **The check digit** is the last digit of a 13-digit SA ID number. It is worked out from the other 12 digits, so a typo usually breaks it.
- **The duplicate check** warns with "Possible existing registration" when the same email, cell number or name has already booked this workshop. The panel names the reason, for example "same email, same

telephone". Today she reuses her own two emails on purpose, so she sees it later in this part and clicks "Save as additional entry".

- **The price is locked** when the booking is saved. A later price change on the workshop never changes what this booking owes.
- **The EFT reference** is the code the payer types into their bank's reference box. Finance uses it to match the bank statement.
- **"Owes money"** is the group in "All Registrations" where unpaid bookings sit.

What happens:

1. She opens the Application link. On "Confirm workshop details" she clicks "Continue".
2. On "Who should be invoiced?" she clicks "Individual".
3. She clicks "Yes, member rate R 350".
4. In the member number box she types the invalid ID and reads the message.
 - **NAP number (preferred) or SA ID number:** the synthetic invalid ID from your seed sheet
5. She deletes it and types the test NAP number instead.
 - **NAP number (preferred) or SA ID number:** test member NAP number 01 from your seed sheet
6. She reads the hint under the box out loud: "Your NAP number is printed on your payslip, next to the NAPTOSA deduction. This is not your PERSAL number."
7. She clicks "Continue".
8. On "Invoice and receipt details" she types Refilwe's details:
 - **Name:** Refilwe
 - **Surname:** Moloi
 - **Email address:** <Trainee personal email>
 - **Cell phone number:** test cell number 2 from your seed sheet
 - **PERSAL number:** not asked. A member is not asked for PERSAL.
9. She clicks "Save details and continue".
10. On the payment step she leaves the method on EFT, with no coupon.
 - **Payment method:** EFT
 - **Coupon code:** none
11. She clicks "Send EFT instructions".
12. On her staff screen she opens "All Registrations".
13. In the "Workshop" switcher she chooses "TRAINING - Classroom Discipline - delete after".
14. She opens the "Owes money" group.
15. On Refilwe's row she clicks "..." then "View details".

She should see:

- After the invalid ID: "That looks like an SA ID number but the check digit does not match. Check the digits, or use your NAP membership number instead."
- After the NAP number: "NAPTOSA uses this to match your booking to your membership." The fee pill reads "Member fee".
- On the success page: "Amount due (member rate)" with R 350, an EFT reference ending in MOLOI, and "Payment status" "Awaiting EFT".
- On the staff row: the badge "Owes R ... · EFT" with R 350.

- In "View details": "Member rate · EFT" under the amount, and "ID / member no" showing exactly what she typed.
- Nothing anywhere says the membership was checked, because it was not.

If it goes wrong:

- A red "Choose one of these to continue." and "Tell us whether you are booking as a NAPTOSA member.": answer the member question first.
- "Required to book at the member rate. Either number is fine." with "Enter your NAP number or SA ID number.": the number box is empty.
- A PERSAL number typed into the NAP box is accepted without any warning, because NAP numbers have no format check. Read the hint again and correct it before saving.
- A "Possible existing registration" panel: her email or cell number is already on a booking for this workshop. She reads the reason, for example "same email, same telephone", and clicks "Save as additional entry".

Not possible, and what to say instead:

- A member asks "You have checked that I am a member, right?", or a non-member asks you to "just put me in as a member". There is no membership lookup during booking. The NAP or ID number is only recorded for NAPTOSA to check later. It never changes or confirms the price. She says plainly that the member rate is for paid-up members and the number is recorded for NAPTOSA to check. A non-member books at the standard rate.

Cannot be undone: The EFT instructions email to <Trainee personal email> cannot be recalled. The booking is frozen, which means nobody can change it and only Finance can cancel it. A new contact is created in CRM contacts with the source "Workshop".

If you are running late: Skip the whole block. It is number 4 on your drop-first list. Say in one sentence that the member rate is self-declared and the number is only recorded.

10:05 • Coupons: Finance makes them, she uses them (5 min)

Goal: She realises that creating a coupon is not possible for her. It is Finance's job. She learns that a coupon changes the amount on the payment step, that a members-only code is refused for a non-member, and that only Finance can change a coupon afterwards. Finance can change the number of people and the note, or switch it off. The code and the price never change.

Who drives: Both. You create the coupons on your Finance screen (your second screen). She looks at the coupons on her own screen and applies them in the private window.

Before you start:

- Your second screen is signed in as super admin.
- Her staff screen is on Workshops > "Published Links" with "TRAINING - Classroom Discipline - delete after" selected.
- From your seed sheet: test cell number 3. For the optional free booking, also test cell number 4 and test member NAP number 02.

Ideas to explain as they come up:

- **A coupon** is a code Finance creates on one workshop. It either makes the booking free (the "Comp" option) or sets one fixed price for everyone who uses it. It can be for all bookings or for members only. A use is only counted once the booking is paid.

- **Finance** here means a super admin, an auditor or any staff account with the Finance tick, which is the permission that unlocks the money buttons. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance means the super admins. You are one today. She is not.
- **EFT** is a bank transfer. "Send EFT instructions" emails the person the bank details and a reference.
- **"Owes money"** is the group in "All Registrations" for unpaid bookings. **"Check in"** is the group for paid bookings.

What happens:

1. You (as Finance) go to "Published Links" and select "TRAINING - Classroom Discipline - delete after".
2. You open "Registrations, coupons and documents", then "Coupons".
3. You fill the "Create coupon" form for the first coupon and click "Create coupon":
 - **Applies to:** All bookings
 - **Code:** TRAINFIX
 - **What it does:** Fixed price
 - **Price in ZAR:** 200
 - **How many people:** 3
 - **Why (optional):** training
4. You fill the form again for the second coupon and click "Create coupon":
 - **Applies to:** Members only
 - **Code:** TRAINFREE
 - **What it does:** Comp (free)
 - **How many people:** 2
5. She opens the same "Coupons" panel on her own screen and reads what a non-Finance user sees.
6. If the new coupons are not listed on her screen, she clicks another workshop and then back, or reloads the page. The Refresh button does not reload the Coupons list.
7. In the private window she opens the Application link and clicks "Continue".
8. On "Who should be invoiced?" she clicks "Individual".
9. She clicks "No, standard rate R 450", then "Continue".
10. On "Invoice and receipt details" she types Carmen's details:
 - **Name:** Carmen
 - **Surname:** Februarie
 - **Email address:** <Trainee work email>
 - **Cell phone number:** test cell number 3 from your seed sheet
11. She clicks "Save details and continue". This comes before the coupon, because saving the details again clears a coupon. Her work email is already on Sipho's booking, so the panel "Possible existing registration" opens. She reads the reason, for example "same email, same telephone", and clicks "Save as additional entry".
12. On the payment step she types the members-only code in the "Enter coupon code" box and clicks "Apply". She reads the message.
 - **Coupon code:** TRAINFREE
13. She types the fixed-price code and clicks "Apply".
 - **Coupon code:** TRAINFIX

14. She chooses EFT and clicks "Send EFT instructions". Applying a code, or pressing Enter in the box, never pays by itself.
 - **Payment method:** EFT
15. Optional, once only: she opens the Application link again, clicks "Continue", then "Individual", then "Yes, member rate R 350".
16. She types the member number and clicks "Continue".
 - **NAP number (preferred) or SA ID number:** test member NAP number 02 from your seed sheet
17. On "Invoice and receipt details" she types Bongani's details and clicks "Save details and continue":
 - **Name:** Bongani
 - **Surname:** Mabaso
 - **Email address:** <Trainee work email>
 - **Cell phone number:** test cell number 4 from your seed sheet

Her work email is already on Sipho's and Carmen's bookings. Bongani never uses her personal email, because Anita needs it for her school place at 10:10. When "Possible existing registration" opens, she reads the reason and clicks "Save as additional entry".
18. On the payment step she applies the free code and clicks "Confirm free booking". There is no payment method to choose, because the coupon covers the full fee.
 - **Coupon code:** TRAINFREE
19. Back on her staff screen she clicks another workshop and back, then reads the Coupons list again.
20. Optional: she watches your Finance screen. On the TRAINFIX row you click "Edit", read the box, type the new values and click "Save":
 - **How many people:** 4
 - **Why (optional):** training, one extra place
21. Optional: on the same row you click "Switch off", read the box and click "Switch off". Carmen's unpaid booking still holds the code, so the system refuses and the coupon stays on.
22. She checks her own Coupons list. She sees the coupons but no "Edit" or "Switch off" buttons.

She should see:

- On her screen: the coupons list and, where the form would be, "Only a super admin, an auditor or a Finance user can create coupons."
- On your Finance screen after each one: the toast "Coupon created."
- TRAINFREE on Carmen, a non-member: the red toast "This coupon can only be used by NAPTOSA members."
- TRAINFIX: the toast "Coupon applied. Amount due is now R ..." and the green line "Amount due: R ...", both showing R 200.
- Only if Bongani's free booking was made: the toast "Coupon applied. This booking is fully covered.", the payment method section disappears, and a green box says the coupon covers the full fee. After "Confirm free booking": "Workshop registration confirmed" and an email "Workshop invoice and receipt - TRAINING - Classroom Discipline - delete after" showing R 0.00 and the method Coupon.
- In the Coupons list: TRAINFIX still shows all its uses left, because a pending EFT uses none yet. If the free booking was made, TRAINFREE shows one use fewer, because that booking is already paid.
- In "All Registrations": Carmen's booking under "Owes money" at the coupon price. If the free booking was made, it sits under "Check in" with "Paid R 0,00 · Coupon (no charge)".

- Only if the optional Edit was shown: the box "Edit coupon TRAINFIX" with "0 of 3 used. To change the price or the code, switch this coupon off and create a new one.", then the toast "Coupon TRAINFIX saved. N of 4 left."
- Only if the optional Switch off was shown: the box "Switch off coupon TRAINFIX?" with "Nobody can use this code from now on. People who already used it keep their place.", then the refusal "1 unpaid booking is using this code. Cancel that booking, or wait until it is paid, then switch the coupon off."
- On her own screen: the coupons, with no "Edit", "Switch off" or "Switch on" buttons.

If it goes wrong:

- "That code isn't valid for this workshop.": the same message shows for a wrong, used-up, switched-off or other-workshop code. Check the code against this workshop's Coupons list with Finance.
- The coupon disappeared after clicking "Save details and continue" again: saving the details clears the coupon. Apply the code last, on the payment step.
- "EFT instructions have already been issued. Contact staff to change this booking.": the booking is frozen and a coupon cannot be added any more. Hand it to Finance.
- Finance gets "That code already exists on this workshop. Choose a different code.": choose another code.
- A "Possible existing registration" panel: her own email is already on a booking for this workshop. That is expected today. She reads the reason, for example "same email, same telephone", and clicks "Save as additional entry".
- Finance gets "How many people may use it? A whole number above zero." when saving an edit: type a whole number above zero. The number also cannot go below the people who used the code plus the people holding it.
- Finance gets "Someone changed this coupon a moment ago. The list has been refreshed. Check it and try again.": someone else saved first. Check the list and try again.
- She looks for a "Create coupon" form on her screen and only finds "Only a super admin, an auditor or a Finance user can create coupons.": that is correct. It is a Finance job.

Not possible, and what to say instead:

- "Finance, please fix the coupon you made: wrong price, switch it off, or change the number of uses." Finance can change the number of people and the note with "Edit", and can stop the code with "Switch off" and bring it back with "Switch on". The code, the kind, the price and "Applies to" never change. For a wrong price, Finance switches the coupon off and creates a new one with a different code. Finance cannot switch a coupon off while an unpaid booking holds the code. That booking must be paid or cancelled first. People who already used a switched-off code keep their place. She sees the coupons but has no "Edit" or "Switch off" buttons, so she stops sharing the wrong code and tells Finance straight away. In the Western Cape, Finance means the super admins.
- "I got my EFT instructions. Now I want to change my name or headcount, add a coupon, or cancel it myself." Once EFT instructions are sent, the booking is frozen. The attendee sees "EFT instructions have already been issued. Contact staff to change this booking." The attendee cannot cancel or edit it, and staff cannot edit those fields either. She hands it to Finance. Finance can use "Correct payer email" for a wrong email. For anything else, Finance cancels the unpaid booking with "Cancel booking" and the person books again.
- "I pressed Refresh but the new coupon is not in the Coupons list." The Refresh button at the top reloads the workshop list, not the Coupons list. Click another workshop and then back, or reload the page.

Cannot be undone: Both coupons stay on the workshop. Their code and price can never change. Add TRAINFIX and TRAINFREE to the super admin clean-up list, to switch off once no unpaid booking holds them. TRAINFIX stays on while Carmen's booking is unpaid. Carmen's EFT instructions email cannot be recalled. Bongani's free booking, if made, becomes a paid booking with a receipt and uses one coupon place.

If you are running late: Skip the whole block, or skip only Bongani's free booking and the optional Edit and Switch off. This block is number 2 on your drop-first list.

10:10 • The school clerk who wants one invoice for three teachers (13 min)

Goal: She learns that a school can pay once for several teachers, and that no teacher ID numbers are needed at booking. She realises that the school code only exists after Finance marks the payment paid, and that marking it paid is not possible for her. She now knows a member may take a non-member place, but a non-member can never take a member place.

Who drives: Both. She books on the public page while you, as the clerk, give her the details. You also press the Finance button on your second screen. Later she registers one teacher.

Before you start:

- The private window is open on the Application link for "TRAINING - Classroom Discipline - delete after".
- Her staff screen is on "All Registrations" with that workshop chosen in the "Workshop" switcher.
- You are signed in as super admin on "All Registrations" on your second screen.
- Her two inboxes, <Trainee work email> and <Trainee personal email>, are open in one mail client. The school's email is her work email. Anita's email is her personal email. It must be: a teacher on a school place is refused if the email already has a paid booking on the workshop ("This email already has a paid booking for this workshop."), and her work email already holds the paid school booking.
- The synthetic valid ID from your seed sheet is on your facilitator card only, never on her handouts.
- The workshop's "Capacity" box shows at least 3 seats still free. It counts paid seats against the limit, and the school's headcount counts against capacity.
- Your facilitator card (hidden facts and success checks) and the hint cards are face down.
- Bergrivier is booked once, marked paid once and Anita registers once. Do not repeat any of them.

Ideas to explain as they come up:

- **A school booking** pays once for a number of member places and non-member places. The school is not asked for any ID or NAP number.
- **The Finance tick** is a permission on a staff account that unlocks the money buttons, such as "Mark EFT paid". She does not have it. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance means the super admins. You are one today.
- **The EFT reference** is the code the payer types into their bank's reference box. Finance uses it to find the payment on the bank statement.
- **"Owes money"** is the group in "All Registrations" for unpaid bookings. **"Check in"** is the group for paid bookings. **"Done"** is where the paid school row moves to. Its teachers then check in on their own places.
- **The school code** is printed in the school's receipt email. The school only gets it, with a "Register a teacher" link, after Finance marks the payment paid. Teachers use it to register themselves at R 0,00.
- **INV and RCT numbers** are the invoice and receipt numbers the system issues when Finance marks a booking paid. They are real numbers that count in "Revenue collected", so you log each one on the

training receipts list.

Read her this before you start: "A school clerk is on the phone. Her principal wants to send three teachers and pay once. You will fill in the public booking page while she gives you the details, using your own work email as the school's email. You are the Workshop creator without the Finance tick. Keep asking yourself: is this mine to do, or do I hand it to Finance?"

You play: Mrs Elmarie Pienaar, admin clerk at Bergrivier Primary School in Wellington. She is efficient, friendly and busy, and used to doing things for the whole staffroom. She speaks in practical questions and wants things done in one go. Her principal asked her to book three teachers, two NAPTOSA members and one non-member, on one invoice for the school. She does not have the teachers' ID numbers with her. Later she wants to share the code as widely as possible.

Open with: "Morning! The principal wants to send three teachers to your workshop. Two are NAPTOSA members, one is not. Can the school get one invoice for all of them?"

Keep these to yourself until she asks:

- The school wants to pay by EFT. Say so if she asks how the school will pay.
- The school has no VAT number. Say so only if she asks about VAT.
- She plans to put the school code in the staffroom WhatsApp group, with about 40 teachers. Say so when she gets the code, or if asked who she will send it to.
- Only Anita (a non-member) and two member teachers are meant to go. Johan, another non-member, also wants to attend but was not in the headcount. Say so only if she asks whether the three names are final.

Stay inside these lines:

- She never gives a real ID, PERSAL, NAP or cell number. The teacher ID used on screen is the synthetic valid ID from your seed sheet.
- She never offers card details. The school pays by EFT.
- She never coaches. She does not name buttons or say whether an answer is right.
- She sticks to the headcount: 2 members, 1 non-member.

What happens:

Part one: one invoice, no ID numbers

1. You say (as Elmarie): "Can the school get one invoice? And do you need the teachers' ID numbers now? I don't have them here."
2. She opens the Application link and clicks "Continue".
3. On "Who should be invoiced?" she clicks "School".
4. Under "How many people are attending?" she types the headcount:
 - **Members · R ... each:** 2
 - **Non-members · R ... each:** 1
5. She reads "Total people" and "Total price" back to you.
6. She tells you no teacher ID numbers are needed now. Each teacher gives their own details later.
7. She clicks "Continue".
8. She asks you for the school's details. If she hunts for an ID field for the school, stay in character: "So what do you need from me?"
9. She types the school's details:
 - **School name:** Bergrivier Primary School

- **Address:** a training address, for example "TRAINING ONLY - no event" on line 1 and the suburb on line 2
 - **VAT number:** leave it empty
 - **Email address:** <Trainee work email>
10. She clicks "Save details and continue". If the panel "Possible existing registration" opens because her work email is already on earlier bookings, she reads the reason and clicks "Save as additional entry".
11. On the payment step she reads the "Amount due" box for 3 people.
12. She chooses EFT and clicks "Send EFT instructions".
- **Payment method:** EFT
 - **Coupon code:** none

Part two: we paid, please confirm

13. You say (as Elmarie): "Great, I've done the EFT from the school account just now. Can you confirm it so the teachers can register today?"
14. On her staff screen she opens "All Registrations", the "Owes money" group, then the Bergrivier row.
15. She looks for a "Mark EFT paid" button and does not find one.
16. She tells you Finance marks it paid once it shows on NAPTOSA's bank statement. The school code and teacher link come in the receipt email after that.
17. She passes it to Finance (you) with the EFT reference.
18. Only after she has handed it over, you switch hats out loud: "Narrator: Finance has found the payment on the statement." Saying "Narrator:" tells her you have stepped out of character.
19. You (as Finance, on your second screen) open "All Registrations", then "Owes money", then the Bergrivier row, and click "Mark EFT paid".
20. You read the dialog, then click "Mark paid and send receipt". Do this once only.
21. She reads the toast and sees the row move to "Check in".
22. She opens the <Trainee work email> inbox and the receipt email. She finds the "School code:" line and the "Register a teacher" link.
- **Subject:** Workshop invoice and receipt - TRAINING - Classroom Discipline - delete after

Part three: can I put the code on WhatsApp?

23. You say (as Elmarie): "We got the receipt with a school code! Can I just put it in the staffroom WhatsApp group so everyone can register?"
24. She tells you the code covers exactly 3 places, 2 member and 1 non-member. It must only go to the three named teachers, because once the places are used nobody else can register on it.
25. As Anita, she opens the "Register a teacher" link and clicks "No, I am not a member".
26. She types Anita's details:
- **First name:** Anita
 - **Surname:** Fourie
 - **Email:** <Trainee personal email>
 - **SA ID number:** the synthetic valid ID from your seed sheet
 - **Cell number (optional):** leave it empty
 - **PERSAL number (optional):** leave it empty
27. She clicks "Register my place (R 0,00)". There is no payment step.
28. On her staff screen she opens "Check in" and finds Anita's row.

29. She clicks the underlined school name and reads the teachers sheet.
30. If you are skipping part four, end the call here. Step out of character as coach: name one thing she did well and ONE thing to improve.
- Part four: Johan cannot get in (optional)
31. You say (as Elmarie): "Johan says Bergrivier paid for him too, but the page tells him the only places left are member places. He is not a member. Can you sort it out?"
32. As Johan, she opens the same "Register a teacher" link and clicks "No, I am not a member". She types nothing else. She reads the message.
33. She explains that a member may take a non-member place but never the reverse. She cannot swap places. The school must contact NAPTOSA so Finance can sort it out with the school.
34. She points to "Places used 1 of 3" on the teachers sheet.
35. If she asks whether the three names were final, tell her Johan was never in the headcount. Do not let her suggest Johan "just ticks member".
36. Step out of character as coach: name one thing she did well and ONE thing to improve.

She should see:

- The fee pill "School total R ... · 3 people". On the success page, "Attendees" "3 people: 2 members, 1 non-member" and an EFT reference ending in BERGR.
- On the staff row before payment: "Owes R ... · EFT" and "School · 2 members, 1 non-member (3 total)". No "Mark EFT paid" button on her screen.
- In your Finance dialog: "Mark R ... paid for Bergrivier Primary School (2 members, 1 non-member (3 total))?" and "Check the bank statement shows reference EFT-... A receipt is emailed immediately and this cannot be undone."
- The toast, in the form "payer in workshop, ref EFT reference: EFT marked paid and the receipt was emailed." The row moves to "Check in" with "Paid R ... · EFT".
- In the school's receipt email: a box "Your teachers register themselves", a "School code:" line with the code, a "Register a teacher" button, and a PDF "COMBINED INVOICE & RECEIPT" with Members and Non-members lines.
- On Anita's page before registering: "Paid for by Bergrivier Primary School. This covers your place.", "2 member and 1 non-member places left (0 of 3 used)." and "Amount due: R 0,00. There is no payment step."
- After registering: "Registered on a school place" and "You're registered, Anita". The email "You are registered - TRAINING - Classroom Discipline - delete after" goes to Anita, and "Anita Fourie registered - 1 of 3 places used - TRAINING - Classroom Discipline - delete after" goes to the school.
- On the staff side: Anita's row shows "Paid by school", "School place · R 0,00" and "Place paid for by Bergrivier Primary School · 1 of 3 places used". The school row is now in "Done" with "Teachers check in on their own places · 1 registered". The sheet "Teachers on Bergrivier Primary School's places" shows "Places used 1 of 3" and "Paid: 2 member, 1 non-member · 2 unclaimed places".
- Only if the Johan part is played: Johan sees straight away "The places still open are member places. A non-member cannot take a member place. Ask Bergrivier Primary School to contact NAPTOSA." No form opens and no row is created for him.

If she gets stuck (give one hint at a time):

- One invoice: "Look at what the page asks a school for, and what it does not ask." Then: "Read the total back to her before you save."

- We paid: "Check your own screen before you promise anything." Then: "What will Finance need from you to find this payment?"
- WhatsApp: "How many places did the school pay for, and of which kind?" Then: "What happens to the fourth person who uses the code?"
- Johan: "Read the screen Johan sees before you answer." Then: "Is there anything on your side that changes a place? If not, who deals with the school?"

If it goes wrong:

- "Enter at least one attendee to continue.": both boxes are 0.
- "Only N seat(s) are left for this workshop." when saving: the school's headcount is more than the seats left. Raise the capacity.
- "Complete the school billing details.": a school field is empty.
- You (as Finance) see "This workshop is full. Refund this person, then use Cancel booking on this row." instead of the button: the workshop is full. Stop. Do not mark it paid.
- A toast "...EFT marked paid. The receipt email did not send...": you (as Finance) open the row's "..." menu in "Check in" and choose "Resend receipt email".
- The teacher sees "This school booking is not paid, so its code cannot be used. Ask the school to contact NAPTOSA.": Finance has not marked it paid yet. The staff sheet says the same: "Teachers can register once this school booking is paid. The school code is emailed with the receipt."
- "That SA ID number is not valid. Check the 13 digits.": the test ID fails the check digit. Use the synthetic valid ID from your seed sheet.
- "Too many attempts. Wait 10 minutes and try again.": too many wrong code lookups. Wait, then use the link from the email.

Not possible, and what to say instead:

- "Please mark the school's EFT paid now." Only Finance, an auditor or the super admin can. In the Western Cape nobody has the Finance tick and there is no auditor, so that means the super admins. She says: "Only our Finance person can mark it paid, once it shows on NAPTOSA's bank statement. I will pass your reference to Finance." Then she gives Finance the EFT reference.
- "Send me the school code now so the teachers can register before we pay." The school code only exists after the school booking is marked paid. She explains that Finance marks the school paid first and the code arrives in the school's receipt email.
- "Can you take a teacher off our places so someone else can have it?" Releasing or swapping a teacher, and cancelling or reissuing a school code, are not built. For any swap or mix-up, the school contacts NAPTOSA and Finance sorts it out with the school.

Cannot be undone: Bergrivier is marked paid for good. Real INV and RCT numbers are issued, and the receipt with the school code is emailed. Add them to the training receipts list. Anita's registration sends "You are registered" to her and a places-used email to the school. Johan's refusal creates nothing.

If you are running late: Never drop this block. Skip the Johan part.

Debrief:

1. "Say it in your own words: what had to happen before the school code existed, and whose job was it?"
2. "Why did Johan get refused while a member could have taken Anita's place?"
3. "Do you really know what you would tell a school that wants to swap a teacher, or does it just feel like you know?"

How did she do?

- **Books the school correctly.** Done well when she chose "School", entered 2 and 1, read the total back, told the clerk no teacher IDs are needed, and sent EFT instructions. Partly when she booked the school but asked for ID numbers or did not check the total. Missed when she booked as an individual or a company, or got the headcount wrong.
 - **Hands the payment to Finance.** Done well when she found no "Mark EFT paid" on her screen, named Finance, passed on the EFT reference, and explained the code arrives after payment. Partly when she handed it off but promised the teachers could register "today", or did not mention the reference. Missed when she said she would mark it paid or told the clerk the code was already available.
 - **Protects the school's places.** Done well when she stopped the WhatsApp idea with the 3-place reason and registered Anita correctly on the teacher link. Partly when she stopped the WhatsApp idea without a reason, or needed a hint to register Anita. Missed when she agreed to share the code widely.
 - **Handles a refused teacher honestly (optional part).** Done well when she read Johan's refusal, explained "a member may take a non-member place, never the reverse", and sent the school to NAPTOSA and Finance. Partly when she explained the rule but offered a workaround that does not exist. Missed when she told Johan to register as a member or promised to swap a place herself.
-

10:23 • Quick self-check: two questions (2 min)

Goal: She now knows where an unpaid EFT booking sits, and that confirming a school's payment is not possible for her.

Who drives: Her. You read each question and the options, and she answers out loud.

Question 1. You have just booked yourself as a non-member and clicked "Send EFT instructions". The success page says "Workshop registration pending EFT". You go back to the staff screen. After clicking Refresh, where do you expect to find this booking in "All Registrations"?

- a) In "Check in", because the instructions were sent.
- b) In "Owes money", with a badge "Owes R ... · EFT".
- c) Nowhere, because staff only see a booking once it is paid.
- d) In "Cancelled", until Finance confirms the money.

Right answer: b. An unpaid EFT booking sits in "Owes money" until Finance marks it paid. It shows its reference and "Attendance opens once the EFT is marked paid". "Check in" is only for paid bookings. Staff can see a booking from the moment it is saved. "Cancelled" is only for bookings someone cancelled.

Question 2. The clerk from a school phones: "We paid the EFT this morning. Please confirm it so our teachers get the code today." You open the school's row under "Owes money". What do you do?

- a) Find the "Mark EFT paid" button on the row and confirm it.
- b) Tell the school their code is already in the EFT instructions email.
- c) Hand it to Finance with the school's EFT reference, and tell the clerk the code comes in the receipt email once Finance marks it paid.
- d) Ask the school to pay again by card so it confirms immediately.

Right answer: c. Finance checks the bank statement and clicks "Mark EFT paid". The receipt that follows carries the school code and the "Register a teacher" link. She will not find the button. The code does not exist before payment. Real card payments are never offered to a school.

Cannot be undone: Nothing in this block.

If you are running late: Move both questions into her workbook.

10:25 • Break (15 min)

She takes a break. You use it for three checks on your second screen:

1. On "TRAINING - Chasing the money - delete after", check that the rows for Jaco van der Merwe and Nomvula Dlamini both read "Reminded 08 Oct". Both have unpaid EFT bookings, and this morning's automatic reminder should have gone to each of them.
2. Add the invoice and receipt numbers (INV and RCT) for Bergrivier Primary School, and for Bongani Mabaso if his free booking was made, to the training receipts list.
3. Check that she cannot reach your second screen, the one with the Finance buttons.

If you are running late: Shorten the break to 10 minutes. Never skip the reminder check.

Part 4: Chasing the money and handing it to Finance (10:40 to 11:10)

This part is about the phone calls members make most: "I paid, why are you still emailing me?" She learns to find the booking, read it out honestly, explain the reminders and hand the money job to Finance. She never marks anything paid herself.

Two words come up all the time in this part:

- **Finance** means anyone with the Finance tick, the auditor role or a super admin. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance here is the super admins only. Today that is you, on your second screen.
- **Her account** has the Workshop creator tick on and the Finance tick off. So the money buttons are missing from her screen on purpose. That is not a fault.

If she asks who has the Finance tick, say it in words. In the staff list, the Finance column is empty for every Western Cape person, and there is no auditor. So every money job here goes to a super admin.

10:40 · Find the booking she made earlier (2 min)

Goal: She learns that one search box finds any booking by surname, email or EFT reference, across every workshop. She now knows that the booking she made earlier this morning is sitting in "Owes money", waiting for Finance.

Who drives: Her screen. You watch.

Before you start:

- She is on the staff workshops page.
- The booking she made at about 09:47 is the one to find:
 - **Person:** Sipho Ndlovu (non-member, chose EFT, not paid yet)
 - **Email:** <Trainee work email> (her own email, so every email on this booking lands in her own inbox)
 - **Workshop:** "TRAINING - Classroom Discipline - delete after"
 - **EFT reference:** ends in NDLOV

"All Registrations" is the tab that lists every booking, sorted into groups. "Owes money" is the group that holds every booking not paid yet. An EFT booking stays there until Finance marks it paid. Finance means anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that is the super admins only. The EFT reference is the code the payer must type on the bank transfer. Finance uses it to match the bank statement.

What happens:

1. She clicks the "All Registrations" tab.
2. She reads the summary line out loud.
 - **Summary line:** '<N> registrations across <M> current workshops.'
3. She clicks in the search box "Find a person, email or EFT reference" and types the surname.
 - **Search:** Ndlovu
4. The group holding the match opens by itself and scrolls into view. She finds Sipho's row in "Owes money".
5. She deletes the search and types the email instead.

- **Search:** <Trainee work email>

6. She deletes it again and types the EFT reference from his row.

- **Search:** the EFT reference ending in NDLOV

She should see:

- Every search finds the same row.
- With a search typed, the summary reads '<N> match(es) across all workshops.' Search reaches every workshop, closed ones too.
- Siphos row in "Owes money" with:
 - **Badge:** 'Owes R <amount> · EFT' (his non-member price)
 - **Grey text:** 'Attendance opens once the EFT is marked paid'
- In her own inbox (<Trainee work email>): the EFT instructions email for Siphos booking. She booked him with her own email, so she sees what a real payer sees.

If it goes wrong:

- 'Nobody here matches the current search.': check the spelling, or search by email or EFT reference instead of the name.
- 'Nobody matches these filters.': a filter is hiding the row. She clicks 'Clear' on the 'Filtered:' line, or "Reset" in the filter panel.
- The page opens already filtered: filters live in the web address, so a shared link or a refresh brings them back. She reads the 'Filtered:' line and clicks 'Clear'.
- 'Registrations could not be loaded. Use Retry workshops above.': she clicks Retry. If it keeps failing, she tells you.
- Two people with the same name: with 'All current workshops' selected, each row shows its workshop title. She picks the workshop in the "Workshop" box first.

Cannot be undone: Nothing in this block.

If you are running late: Search by surname only. Skip the email and EFT reference searches.

10:42 · Read the money queue and the reminder schedule, look only (6 min)

Goal: She learns to read a booking's money story on the row and in "View details". She realises the money buttons are missing from her screen on purpose. She now knows the reminder schedule is one schedule for everyone, that she can read it but not change it, and that the "Workshop starting soon" email for paid people stays off until a super admin switches it on.

Who drives: Her screen. You watch. She saves nothing.

Before you start:

- She is still in "All Registrations" with Siphos row in view.
- Who can change what, so you can answer if she asks:
 - **Reminder schedule:** super admin, case admin, admin, supervisor or Finance can edit it. In the Western Cape that means the super admins. She can only read it.
 - **Bank details:** only a super admin can change them.
 - **The bank details on screen:** ABSA, account 12345678910, branch 123456. They are for training only. Never pay them.

A few ideas she meets in this block, in plain words:

- **Owes money:** the group in "All Registrations" that holds every booking not paid yet. An EFT booking stays there until Finance marks it paid.
- **Finance:** anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that is the super admins only. The money buttons belong to them.
- **EFT reference:** the short code the payer types on the bank transfer, for example EFT-TRC-<NNN>-VANDE. It is 20 characters at most, with the surname cut to 5 letters. Finance uses it to match the bank statement. She always copies it from 'Payment reference' in "View details", never from memory.
- **Automatic reminders:** one schedule for every workshop and every province. Reminders go 14, 7 and 2 days before the workshop. They only go to EFT bookings that are still unpaid, and only for dates after the booking was made. They stop when Finance marks the booking paid, when the booking is cancelled, when registrations close, or when the workshop starts. None go out while the workshop is full. Ignoring them does not cancel the booking.
- **The payer:** every reminder and receipt goes to the email on the booking. Nobody can change who a reminder goes to. Only Finance can fix a wrong address, with "Correct payer email".

What happens:

1. She clears the search box.
2. She clicks "More filters" and sets the method.
 - **Method:** EFT
3. She looks at the number badge on "More filters" and at the line that starts 'Filtered:'.
4. She opens the "Workshop" box and picks her workshop.
 - **Workshop:** "TRAINING - Classroom Discipline - delete after"
5. She reads the new summary line. It now describes one workshop:
 - **Summary line:** '<date range> · Upcoming · bookings · <p> paid seats · <o> owe R <amount> · <c> checked in'
6. She reads Sipho's row out loud:
 - **Badge:** 'Owes R <amount> · EFT'
 - **Reference line:** 'ref <EFT reference> · Reminded <dd Mon>', or 'Not reminded yet'
 - **Grey text:** 'Attendance opens once the EFT is marked paid'
7. She clicks the "... " button at the end of the row and chooses "View details".
8. In the sheet 'Payment, receipt and email details' she reads each line out loud:
 - **Amount / method**
 - **Payment reference**
 - **Invoice:** Waits for payment
 - **Receipt:** Waits for payment
 - **Email:** the status and type, then who it went to and when
 - **Next reminder:** a date, if the line is there
 - **Captured:** the date the booking was made
9. Before she closes the sheet, she names what is missing from her screen: no "Mark EFT paid", no "Remind" and no "Cancel booking" on the row, and no "Correct payer email" or Money history in the sheet. Those belong to Finance.

10. If a group ends in 'Show all <N>', she clicks it to see every row, then clicks 'Show fewer'. A group shows 8 rows until she opens it.
11. She clicks 'Clear' on the 'Filtered:' line, so the next person does not inherit her filter.
12. She clicks the "Reminders" tab. Her view opens on "Reminder settings".
13. She reads the notice: 'You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor.'
14. Under 'Waiting for an EFT' she reads the three rules:
 - **First:** 'First EFT reminder, 14 days before'
 - **Second:** 'Second EFT reminder, 7 days before'
 - **Final:** 'Final EFT reminder, 2 days before'
 - **The line under them:** 'Stops as soon as staff mark the booking paid, and never fires after the workshop.'
15. Under 'Card checkout abandoned' she reads 'Retry link, 30 minutes after stopping'. This one goes to someone who chose card, filled in their details, then stopped before paying.
16. Under 'Workshop starting soon' she reads the line 'Sent once, before the workshop, to each paid attendee's own email address. Never to a school's booking address.' She sees it is set to 1 day before and the 'On' box is not ticked.
 - **Days before:** 1
17. You tell her how it works. It is off until a super admin switches it on. Once it is on, each paid attendee gets one email before the workshop, for example 'Tomorrow: <workshop title> starts at <HH:MM>'. It goes only to paid bookings, never to the waiting list, unpaid or cancelled people, and never to a school's booking address. Each address gets it once per workshop. Someone who books after the reminder moment does not get it. It can arrive up to 15 minutes late. On the workshop day itself, a creator can still open the Check-in link and QR panel and use "Email check-in details to attendees" (the 'Workshop starts today' email), then 'Send to N attendees'. That one only works on the workshop's own day.
18. She reads the two attendance emails below it:
 - **Thank you for attending:** 'Sent to a person once they are marked present, by staff or by checking themselves in.'
 - **Sorry we missed you:** 'Sent to a person once staff mark their booking absent.'
 - **Minutes after:** 10
 - Both are off until a super admin switches them on.
19. She says in her own words: this is one schedule for every workshop in every province, and nobody changes it for one person.
20. She opens Settings, then "Payment details".
21. She reads the card 'What members see now': Bank, Account name, Account number and Branch code. Then she reads 'Only a super admin can change these details.' She never presses a save button here.
22. You say: these bank details are for training only. Never pay them. Nobody pays for a TRAINING booking, so never send a real person to pay for one.

She should see:

- A number badge on "More filters" and a line 'Filtered: Method EFT · Clear' that stays after the panel closes.
- Sipho's row in "Owes money" with 'Owes R <amount> · EFT' and 'Attendance opens once the EFT is marked paid'.

- In "View details": 'Invoice: Waits for payment', 'Receipt: Waits for payment', and the Email row as '<Status> · <Type>' (for example 'Sent · EFT instructions') followed by 'Email to <address> · Sent <date, time>'.
- In "Reminders": the three EFT rules, the card rule, 'Workshop starting soon', the two attendance emails, and the read-only notice.
- No 'Send an EFT payment reminder now' section at the top, and no "Save" she can use. That section belongs to Finance, so it is hidden from her. The tab is not broken.
- 'Workshop starting soon', 'Thank you for attending' and 'Sorry we missed you' with the 'On' box not ticked.
- In Settings: the 'What members see now' card with the training bank details, and 'Only a super admin can change these details.'

Two things that catch people, worth saying out loud:

- The 'Reminded <dd Mon>' text on a row counts automatic reminders only. A reminder Finance sends by hand does not change it. That one only shows in the Email row of "View details".
- While one of her workshops is running right now, "Check in" comes before "Owes money" in the list. Picking a workshop in the "Workshop" box gives that workshop's own order.

If it goes wrong:

- 'Nobody matches these filters.': a filter is hiding the row. She clicks 'Clear' on the 'Filtered:' line, or "Reset" in the panel.
- 'Registrations could not be loaded. Use Retry workshops above.': she retries. If it keeps failing, she tells you.
- 'Reminder settings could not be loaded. Check your connection and try again.': she clicks "Try again".
- 'No reminder rules are configured. Ask an administrator to check the workshop reminder setup.': stop and take note. Without rules, nobody is being chased.
- "Payment details" shows 'No bank account is saved yet. EFT payment instructions emails currently show DEMO bank details, so members cannot pay by EFT until a super admin saves the real account here.': tell the super admin. Nobody promises anyone an EFT payment.
- The card heading reads 'Saved, not confirmed yet' instead of 'What members see now': members are not shown that account until a super admin confirms it. Make a note to follow it up.
- She can tick 'On' or type a number in a rule: her account has more than the Creator tick. She saves nothing, and you check her account after the session.

Cannot be undone: Nothing in this block. Nothing is saved in "Reminder settings" or "Payment details".

If you are running late: Skip "Show all" and the "More filters" steps. In "Reminders", read only the three 'Waiting for an EFT' rules and the 'Workshop starting soon' line, and say in one line that it stays off until a super admin switches it on.

10:48 · Role-play: the phone call from Jaco, who says he already paid (12 min)

Goal: She learns that when someone says "I paid", her job is to find the booking, read it out honestly, explain the reminders and hand the payment to Finance with every detail Finance needs. She now knows it is not possible for her to mark a booking paid, and that she can still resend or download the receipt herself.

Who drives: Both. She works on her own screen. You play Jaco by voice, then step out of character to do the Finance click on your second screen.

Before you start:

- Start after 09:15 SAST, so the automatic 2-day reminder has gone out this morning.
- The workshop in this scene:
 - **Title:** "TRAINING - Chasing the money - delete after"
 - **Short code:** TRC (the code the system puts in EFT references and receipt numbers)
 - **Date:** Saturday 10 October, 09:00 to 12:30
 - **Non-member price:** R 450
- Her screen: the staff workshops page, on the "All Registrations" tab. Her account has the Workshop creator tick on and the Finance tick off.
- Your second screen: logged in as super admin, on the same page.
- Mail open on loxly@lbtec.co.za. Every email from a booking you made lands here. Emails from her own bookings go to her own inbox.
 - **Jaco's booking email:** loxly@lbtec.co.za (you made this booking)
- The bank details in his emails are for training only. Never pay them.
- Your facilitator card: before the scene, write on it the real EFT reference (EFT-TRC-<NNN>-VANDE) and the time this morning's reminder went out.
- Her workbook page for this part and a pen.
- Hint cards for each part of the call, face down.
- Ask her to write down as she goes: the message Finance saw, the group the row moved to, the new badge, the invoice number and the receipt number, the exact message after "Resend receipt email", and the file name of the PDF.

Words in this scene, in plain terms:

- **Finance:** anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that is the super admins only. Today that is you. Only Finance can mark a booking paid.
- **Owes money:** the group in "All Registrations" for bookings not paid yet. An EFT booking stays there until Finance marks it paid.
- **Check in:** the group a booking moves to once it is paid.
- **EFT reference:** the code the payer should type on the bank transfer, here EFT-TRC-<NNN>-VANDE. Finance uses it to find the money on the bank statement.
- **Invoice and receipt numbers:** the invoice number starts with INV and the receipt number starts with RCT. The system issues both the moment Finance marks the booking paid.

Read her the brief (as Coach): "Take a phone call from a teacher who says he has paid and is annoyed that he is still getting payment emails. You are the Workshop creator and do not have the Finance tick. Find his booking, tell him what the system shows, and get his payment confirmed by the right person. When it is done, make sure he can get his receipt."

The story so far: Thursday 8 October 2026, about 10:15, at the NAPTOSA Western Cape office. The workshop runs Saturday 10 October, 09:00 to 12:30, at the office in Rondebosch. Jaco booked on the evening of 7 October and chose EFT. He has had the EFT instructions email, one reminder sent by hand on 7 October, and the automatic 2-day reminder this morning. The times on screen show the real clock, not the time in the story.

You play: Jaco van der Merwe. A non-member teacher at Kraaifontein High, mid-forties. Polite but clipped. Busy between classes and a little defensive about money. He speaks in short sentences and wants a yes or a no. He believes he paid R450 by EFT, and he has just had another email asking him to pay. He thinks NAPTOSA has lost his money or is careless.

Open with: "Hi, it's Jaco van der Merwe from Kraaifontein High. I booked for the Saturday workshop and I paid on Monday already, but I got another email this morning asking me to pay. Why are you still chasing me?"

Keep these to yourself until she asks:

- **When exactly did you pay?** He checks his banking app and admits it was Wednesday evening, 7 October, right after he booked. Not Monday. ("View details" shows 'Captured' 7 October, so Monday cannot be right.)
- **Which bank?** He paid from his FNB app.
- **What reference did you type?** 'J v d Merwe', not the long code from the email.
- **How much?** R450 exactly.
- **Have you got the receipt email?** (Only after the payment is confirmed.) He cannot see it and has not checked his spam folder. Give the spam fact only if she asks whether he has checked other folders.

Staying in character:

- Jaco never gives a real ID, PERSAL, member or cell number. If she asks, use the placeholders from your card, for example <test cell number>.
- Jaco never reads out or asks for real bank or card numbers. The money is a role-play claim. Nobody transfers anything.
- Jaco never asks her to log in as someone else.
- Speak only as Jaco. Never mention training, steps or what she should do next.

What happens:

First, he wants to know where his money is.

1. You say (as Jaco) the opening line above.
2. You say: "I did the transfer from my banking app, R450. Surely you can see it on your side?"
3. She opens the "Workshop" box in "All Registrations" and picks the workshop.
 - **Workshop:** "TRAINING - Chasing the money - delete after"
4. She reads the summary line.
5. She types in "Find a person, email or EFT reference".
 - **Search:** merwe
6. The "Owes money" group opens on Jaco van der Merwe's row. She reads the row to him:
 - **Badge:** 'Owes R 450,00 · EFT'
 - **Reference line:** 'ref EFT-TRC-<NNN>-VANDE · Reminded 08 Oct'
 - **Grey text:** 'Attendance opens once the EFT is marked paid'
7. She tells Jaco in plain words that the system does not show his payment as received yet.
 - **Watch for:** if she says "I can see you paid" before she searches, Jaco says "Good, so stop the emails then", and the next part gets harder.
 - **Watch for the wrong Jaco:** if she searches with 'All current workshops' selected and does not read the workshop title on the row, she can land on the wrong booking.

- **Good to know:** before the 09:00 automatic reminder has gone, the row reads 'Not reminded yet'. A reminder sent by hand does not change this text.

Next, he asks why he got an email this morning. Skip this part if time is short.

8. You say: "So why did I get another email today? Must I just ignore these? If I ignore them, will my booking fall away?"
9. She clicks the "... " button on his row and chooses "View details".
10. She reads the sheet:
 - **Amount / method:** R 450,00 · Standard rate · EFT
 - **Payment reference:** EFT-TRC-<NNN>-VANDE
 - **Invoice:** Waits for payment
 - **Receipt:** Waits for payment
 - **Email:** Sent · EFT reminder
 - **Captured:** 7 October
11. She explains three things. The email this morning was the system's scheduled 2-day reminder, not a person chasing him. Reminders stop the moment Finance marks the booking paid. Ignoring them does not cancel his booking.
 - **Watch for:** if she says "we chased you" or "Finance sent that", Jaco gets more irritated: "So someone there is sending me these on purpose?"
 - **Good to know:** 'Reminded 08 Oct' on the row comes from the automatic reminder only. The reminder sent by hand on 7 October never changes that text. It only shows in the Email row of "View details", and that row now shows this morning's automatic one.

Then he asks her to just tick him off as paid. This is the decision point.

12. You say: "Reference? I just put my name, J v d Merwe, I didn't use that long code thing. Does that matter? So who actually ticks me off as paid? Is it you? Can you just do it now while I'm on the phone?"
13. She asks for the date he paid, the amount, the bank and the reference he typed, and writes them down. He corrects the date to 7 October. If he did not use the EFT reference, Finance has to search the statement by amount and date instead.
14. She tells Jaco she cannot mark it paid herself, and that Finance does it once the money is found on the bank statement. If the email part was skipped, she also says here, in one line, that the reminders stop once Finance marks it paid and that ignoring them does not cancel his booking.
15. She hands the job to you (as Finance) with these details. In real life she uses the office's usual channel, because the app has no hand-off message.
 - **Name:** Jaco van der Merwe
 - **Workshop:** "TRAINING - Chasing the money - delete after"
 - **EFT reference:** EFT-TRC-<NNN>-VANDE
 - **Amount:** R 450,00
 - **Date paid:** 7 October
 - **Bank:** FNB
 - **Reference he typed:** J v d Merwe
 - **Watch for:** if she looks for a "Mark EFT paid" button, let her look. It is not there, and that is her cue. If she says "I'll mark you paid now", play Jaco as relieved. Then say as Narrator: "Nothing changes on screen." Let her find the gap herself.

16. Once her hand-off is complete, you say as Narrator: "Finance has found the payment and is marking it paid."
 17. You say out loud first: "This cannot be undone."
 18. You (as Finance, on your second screen) open "Owes money", find Jaco's row and click "Mark EFT paid".
 19. You read the box out loud:
 - **Question:** 'Mark R 450,00 paid for Jaco van der Merwe?'
 - **Warning:** 'Check the bank statement shows reference EFT-TRC-<NNN>-VANDE. A receipt is emailed immediately and this cannot be undone.'
 20. You click "Mark paid and send receipt". The button reads 'Confirming EFT...' while it works.
 21. You write Jaco's invoice and receipt numbers on the training receipts list straight away. That is your printed list of every payer, workshop and invoice and receipt number the training creates.
- Last, he wants to know how he will know it is sorted.*
22. You say: "Fine. What do I get once it's sorted, and how will I know? I'm looking at my inbox and I don't see anything."
 23. She clicks "Refresh". Her screen does not update by itself.
 24. She searches again.
 - **Search:** merwe
 25. She finds the row in "Check in", the group for paid bookings. It reads 'Paid R 450,00 · EFT', and the line 'Attendance opens once the EFT is marked paid' has gone.
 26. She clicks "... " and "View details" again and reads:
 - **Invoice:** INV-2026-<NNNN>-TRC-JVANDERMERWE
 - **Receipt:** RCT-2026-<NNNN>-TRC-JVANDERMERWE
 - **Email:** Sent · Invoice and receipt
 - **Next reminder:** the line is gone
 27. She clicks "Download receipt PDF" in the sheet.
 28. She tells Jaco the invoice and receipt email with the PDF has been sent, and that the reminders have stopped.
 29. You (as Jaco) say you cannot find the email.
 30. She closes the sheet, clicks "... " on the row and chooses "Resend receipt email". She reads the message: a receipt that was delivered is not sent twice.
 31. She clicks "... " and chooses "Download receipt (PDF)". She offers Jaco the file. She can send it to him herself if he cannot find the email.
 32. You check your inbox that 'Workshop invoice and receipt - TRAINING - Chasing the money - delete after' arrived, so the PDF she offers matches the email.

She should see:

- On your screen, after the Finance click: 'Jaco van der Merwe in TRAINING - Chasing the money - delete after, ref EFT-TRC-<NNN>-VANDE: EFT marked paid and the receipt was emailed.'
- On her screen, after "Refresh": the row in "Check in" with 'Paid R 450,00 · EFT'. The workshop summary shows one more paid seat, and 'owe R' is down by R450.
- In the inbox: 'Workshop invoice and receipt - TRAINING - Chasing the money - delete after', with this PDF attached:

- **File name:** 'RCT-2026-<NNNN>-TRC-JVANDERMERWE - TRAINING - Chasing the money - delete - J van der Merwe.pdf' (file names cut the title to 40 characters at a word break)
- After "Resend receipt email": 'Invoice and receipt email was already delivered, so it was not sent again.'
- A downloaded file named '<RCT number> - <title> - <Initial Surname>.pdf'.

If she gets stuck: give one hint at a time, from the face-down cards.

- When he asks where his money is:
 1. "Before you answer him, find out what the screen actually says."
 2. "Which group would an unpaid EFT booking sit in?"
- When he asks about this morning's email:
 1. "What makes the reminders stop? Think about who changes the booking, not who complains."
 2. "Check the Email row in View details before you explain."
- When he asks her to tick him off:
 1. "Before you promise anything, decide whose job this is."
 2. "What would Finance need to find his transfer on a statement without the code?"
- When he asks how he will know:
 1. "Your screen does not update by itself. What do you need to do first?"
 2. "If a delivered email cannot be sent twice, what else can you give him?"

If it goes wrong:

- She cannot find "Mark EFT paid": that is correct. Creators do not have it, and the database refuses them anyway. She hands it to Finance.
- You see a warning that the EFT was marked paid but the receipt email did not send: open the row's "... menu in "Check in" and choose "Resend receipt email".
- You see '<row>: EFT marked paid, but no receipt email was queued. Refresh this row and investigate the receipt; do not confirm payment again.': nobody presses "Mark EFT paid" again. Report it.
- You see 'EFT confirmation could not be verified.' and the row says 'EFT confirmation unverified. Review the refreshed row before retrying.': refresh and read the row before anyone tries again.
- Finance sees 'This workshop is full. Refund this person, then use Cancel booking on this row.' instead of the button: never promise a seat. Finance refunds outside the system and cancels the booking.
- '<Type> email could not be sent. Not sent: the booking has no email address.' (or 'not addressed to the booking's own email address'): Finance fixes the address with "Correct payer email".
- 'Invoice and receipt email was already delivered, so it was not sent again.': this is not an error. She uses "Download receipt (PDF)" and sends the file by hand.

Cannot be undone: Jaco is marked paid for good. His invoice and receipt numbers are issued and the invoice and receipt email is sent. Add them to the training receipts list. "Resend receipt email" sends nothing new.

If you are running late: Never drop this scene. Skip the part about this morning's email. She says the stop rule in one line when he asks her to tick him off.

Debrief:

1. For each part of the call, did you do it? Find and read the row, explain the reminders, hand off with the full details, confirm the result and get him his receipt. Which moment stood out for you, and why?
2. Whose job is "Mark EFT paid", and what do you say and do instead? Answer in your own words.

3. Do you really know which details Finance needs, or does it just feel like you know? List them without looking.

How did she do?

- **Finds the right booking and reads it accurately**
 - Done well when: she chose the workshop or read the title on the row, searched, and read 'Owes R 450,00 · EFT' to Jaco without guessing.
 - Partly when: she found the row but read it loosely ("it looks unpaid"), or needed a hint to find the right Jaco.
 - Missed when: she told Jaco something about his payment before finding his row, or used the wrong booking.
- **Explains why the reminders continue**
 - Done well when: she said the morning email was the scheduled reminder, that reminders stop when Finance marks it paid, and that ignoring them does not cancel the booking.
 - Partly when: she gave one or two of the three points, or said "we chased you".
 - Missed when: she promised the reminders would stop because he paid, or said the booking would lapse.
- **Hands off to Finance with complete details**
 - Done well when: she said she cannot mark it paid, named Finance, and passed on the name, workshop, EFT reference, amount, date (corrected to 7 October), bank and the reference he used.
 - Partly when: she handed off but left details out, so Finance would have to ask again (no date or no bank, for example), or did not ask about the reference.
 - Missed when: she promised to mark it paid herself, or asked a colleague to do it "just this once".
- **Confirms the result and gets him his receipt**
 - Done well when: she refreshed, saw the row in "Check in" with 'Paid R 450,00 · EFT', explained the receipt email, and used "Resend receipt email" and "Download receipt (PDF)" correctly.
 - Partly when: she confirmed the paid row but could not explain why the resend did not send, or did not offer the PDF.
 - Missed when: she did not refresh or check the row, or said the receipt would come "some time".

11:00 · Role-play: Nomvula wants the reminders stopped (6 min, skip if behind)

Goal: She learns that she cannot switch reminders off for one person, and that changing the schedule would change it for everyone. She realises that a member who is not coming needs Finance to cancel the unpaid booking. She now knows a booking cannot be handed to a colleague: the colleague books her own place.

Who drives: Both. She works on her own screen. You play Nomvula by email or phone, then step out of character to do the Finance click on your second screen.

Before you start:

- The same workshop as the last scene:
 - **Title:** "TRAINING - Chasing the money - delete after"
 - **Date:** Saturday 10 October
 - **Member price:** R 350

- Her screen: "All Registrations", plus the "Reminders" tab open in a second browser tab. Her account has the Workshop creator tick on and the Finance tick off.
- Your second screen: logged in as super admin.
- Mail open on loxly@lbtec.co.za.
 - **Nomvula's booking email:** loxly@lbtec.co.za (you made this booking)
 - **Nomvula's member number:** <test member NAP number>, filled in on your card before the day
 - Jaco and Nomvula share loxly@lbtec.co.za on this workshop. If the page showed 'Possible existing registration' when you made Nomvula's booking, you clicked 'Save as additional entry'.
- Her workbook page for this part. Hint cards, face down.
- The slot is short, so run two parts: the one where she wants the reminders switched off (the screen work) and the one where she wants to be deleted (the hand-off). The last part is optional.

Words in this scene, in plain terms:

- **Finance:** anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that is the super admins only. Today that is you. Only Finance can cancel a booking.
- **Owes money:** the group in "All Registrations" for bookings not paid yet. Only an unpaid booking can be cancelled.
- **EFT reference:** the code the payer should type on the bank transfer, here EFT-TRC-<NNN>-DLAMI. Finance uses it to find the right booking.
- **Reminder settings:** the one reminder schedule for every workshop in every province. She can read it but not change it.

Read her the brief (as Coach): "A member who booked at the member rate is irritated by payment emails and wants them stopped. You are the Workshop creator without the Finance tick. Work out what she really needs, what you can and cannot do, and who has to act."

The story so far: Thursday 8 October 2026, 14:05. Nomvula booked on 7 October at the member rate of R350, chose EFT and has not paid. She has had two emails: the EFT instructions and this morning's automatic reminder. The times on screen show the real clock, not the time in the story.

You play: Nomvula Dlamini. A NAPTOSA member and senior teacher at Rondebosch Primary. Formal, firm and a little offended. She writes and speaks in full sentences and expects to be treated as a valued member, not a debtor. She wants the payment emails to stop.

Open with: "Good afternoon. Please stop sending me these payment emails. I have had two now and I do not appreciate being chased like a debtor."

Keep these to yourself until she asks:

- **Have you paid anything?** No, nothing yet. She meant to pay at month end, on the 25th.
- **Can you still come on Saturday 10 October?** No. It clashes with her school's sports day, so she is not coming.
- **Has your colleague Zanele booked?** No, Zanele has not booked anything yet.
- **Do you want a reason recorded?** "I can no longer attend, that is the reason."

Staying in character:

- Nomvula never gives a real member, ID, PERSAL or cell number. If asked, use <test member NAP number>.
- Nomvula never asks for or reads out bank or card details.
- Nomvula never names a button. She asks for outcomes only.

- Speak only as Nomvula, never as a coach.

What happens:

First, she wants the reminders switched off until the 25th.

1. You say (as Nomvula) the opening line above.
2. You say: "I booked at the member rate and I was going to pay at month end. Can you just switch the reminders off for me until the 25th?"
3. She opens the "Workshop" box in "All Registrations" and picks the training workshop.
 - **Workshop:** "TRAINING - Chasing the money - delete after"
4. She types in "Find a person, email or EFT reference".
 - **Search:** dlamini
5. She reads the row:
 - **Badge:** 'Owes R 350,00 · EFT'
 - **Reference line:** 'ref EFT-TRC-<NNN>-DLAMI · Reminded 08 Oct' (or 'Not reminded yet' before 09:00)
6. She clicks "..." on the row and chooses "View details". She reads:
 - **Amount / method:** R 350,00 · Member rate · EFT
 - **Email:** Sent · EFT reminder
 - There is no 'Next reminder' line, because the 2-day reminder was the last one on the schedule.
7. She switches to the "Reminders" tab and shows that this is not something she can switch off. It is one schedule for everyone, it is read-only for her, and there is no switch for one person.
8. She tells Nomvula three things. There is no switch for one person. Reminders stop when the booking is paid or cancelled, or when the workshop starts. And the workshop is on 10 October, before the 25th.
 - **Watch for:** if she opens "Reminder settings" and tries to untick 'On', let her try. The read-only notice stops her. If she misses the notice, read it out loud as Narrator.
 - **The turning point:** paying on the 25th for a workshop on the 10th does not work. She should notice that herself.

Next, Nomvula says she is not coming and wants to be deleted.

9. You say: "Actually, you know what, I'm not coming anymore. Just delete me from the system completely, and give my spot to my colleague Zanele, she'll pay."
10. She tells Nomvula she cannot cancel the booking herself, and that Finance does it. The booking is unpaid (it sits in "Owes money"), so Finance can cancel it.
11. She tells Nomvula that a booking cannot move to another person. Zanele books her own place on the same link and pays herself. The link comes from Published Links, then "Application link", then "Copy link".
12. She hands the job to you (as Finance) with these details:
 - **Name:** Nomvula Dlamini
 - **Workshop:** "TRAINING - Chasing the money - delete after"
 - **EFT reference:** EFT-TRC-<NNN>-DLAMI
 - **Reason:** Can no longer attend
13. Once she has handed off, you say as Narrator: "Finance is cancelling the booking."
14. You say out loud first: "This deletes the booking and sends an email."

15. You (as Finance, on your second screen) open "Owes money", find Nomvula's row and click "Cancel booking".
16. The box 'Cancel and delete this booking?' says the booking 'will be deleted permanently. They get a cancellation email and no more reminders.' You open 'Choose a reason' and pick one.
 - **Reason:** Can no longer attend
17. You click "Cancel and delete booking". (The other button is "Keep booking".)
18. You read the message out loud: 'Booking removed for Nomvula Dlamini. The confirmation email was sent.'

Last, she asks about more paperwork. Skip this part if time is short.

19. You say: "Will I still get an invoice or anything? I don't want any more paperwork from you. And what if I change my mind next week?"
20. She clicks "Refresh". The row has gone from "Owes money", and 'owe R' is down by R350.
21. She tells Nomvula she will get one last email confirming the cancellation, and then no more reminders. If she changes her mind, she can book again from the workshop page.
 - **Watch for the trap:** "You will get nothing more." The cancellation itself sends an email.
22. You check your inbox that 'Booking cancelled - TRAINING - Chasing the money - delete after' arrived.

If you skip this last part: after the message in step 18 she still clicks "Refresh" to see the row gone, and you say in one line that one cancellation email arrives and then no more reminders.

She should see:

- On your screen: 'Booking removed for Nomvula Dlamini. The confirmation email was sent.'
- On her screen: no Dlamini row in "Owes money". The "Cancelled" group stays hidden at 0, because the row was deleted, not moved.
- In the inbox: 'Booking cancelled - TRAINING - Chasing the money - delete after', with the line 'No payment is due and you will not receive further payment reminders for this booking.'
- Her old booking page (the one she landed on after booking) now shows 'We can't find this booking' and 'It may have been cancelled. Contact NAPTOSA on 021 686 8521, or book again from the workshop page.'

If she gets stuck: give one hint at a time, from the face-down cards.

- When Nomvula wants the reminders off until the 25th:
 1. "Look at the workshop date before you agree to any date."
 2. "Who else would be affected if a reminder rule changed?"
- When Nomvula wants to be deleted:
 1. "Is this booking paid or unpaid, and does that change who can cancel it?"
 2. "Can a booking change owner, or does someone new book?"
- When Nomvula asks about more paperwork:
 1. "Check the screen before you promise anything."
 2. "Is it really 'no more emails ever'?"

If it goes wrong:

- The booking is already paid (it sits in "Check in", not "Owes money"): a paid row has no "Cancel booking", and the server refuses with 'This booking is paid. Paid bookings need a refund and cannot be cancelled here.' A paid booking cannot be cancelled in the system. She escalates the refund to Finance and the Provincial CEO.

- Finance sees 'Booking cancelled, but the confirmation email could not be sent. The booking was kept and marked cancelled. Tell the person yourself, then use Remove to delete it.': she tells the person herself. Then Finance opens "All Registrations", picks the "Cancelled" group and clicks "Remove" on the row. The box 'Remove this cancelled booking?' asks for a reason.
 - **Reason:** Can no longer attend
 - Finance clicks "Remove booking" (the other button is "Keep booking") and sees 'Booking removed for Nomvula Dlamini.'
 - Remove only shows for a cancelled booking with no payment history. A row with a payment record shows 'Kept for the money record: this booking has a payment history.' instead. Finance can also remove the row from the Attendee ledger, the full list of everyone booked on one workshop, opened from Published Links by picking the workshop.
- "Cancel and delete booking" stays grey and cannot be clicked: no reason has been chosen yet. Finance picks one under 'Choose a reason'. For 'Other', type at least 3 characters in 'Describe the reason'.
- She is tempted to untick 'On' on a rule to help one member: she does not. It would change reminders for every workshop in every province, and she cannot save it anyway.

Cannot be undone: Nomvula's booking is deleted for good and a 'Booking cancelled' email is sent. Her old booking page shows 'We can't find this booking'.

If you are running late: This is number 3 on your drop-first list (the printed list of what to cut first when behind). Skip the whole scene, and Nomvula is cancelled in the evening clean-up instead. Or keep the scene and skip the last part about paperwork.

Debrief:

1. Did you change anything in "Reminder settings"? Why, or why not?
2. What did you notice about the dates that changed the conversation?
3. Whose job is "Cancel booking", and what would be different if she had already paid? What is one thing you would say differently to a member who feels chased?

How did she do?

- **Leaves the shared schedule alone and explains what stops the reminders**
 - Done well when: she changed nothing, and named paid, cancelled and workshop started as what stops the reminders.
 - Partly when: she changed nothing but explained the stop conditions only in part, or said sorry that she "can't switch them off" without saying why.
 - Missed when: she tried to edit a rule for one person, or promised the emails would stop on request.
- **Spots the date problem**
 - Done well when: she pointed out the workshop is on 10 October, before the 25th, and asked whether Nomvula can still attend.
 - Partly when: she noticed the date only after a hint.
 - Missed when: she agreed to wait for payment on the 25th.
- **Hands off the cancellation and handles the colleague request**
 - Done well when: she said she cannot cancel, named Finance, passed on name, workshop, EFT reference and reason, and sent Zanele to book her own place.
 - Partly when: she handed off without the reason, or left the Zanele question unanswered.
 - Missed when: she promised to delete the booking herself or to move it to Zanele.

- **Closes honestly**

- Done well when: she refreshed, confirmed the row was gone, and mentioned the one cancellation email and how to book again.
- Partly when: she confirmed the cancellation but promised no more emails at all.
- Missed when: she did not check the result.

11:06 • Checkpoint: do it, hand it to Finance, or stop (4 min)

Goal: She realises that most money calls end in one of three answers: she does it herself, she hands it to Finance, or she stops and escalates. She now knows that a paid mark is permanent, so waiting for Finance is always safer than a shortcut.

Who drives: Her, out loud. You read each situation and she answers before you read out any of the wrong answers.

Before you start: the words in these questions, in plain terms:

- **Finance:** anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that is the super admins only. Only Finance can mark a booking paid, send a reminder by hand or cancel a booking.
- **Owes money:** the group for bookings not paid yet. **Check in:** the group for paid bookings.
- **EFT reference:** the code the payer types on the bank transfer, so Finance can match it on the bank statement.
- **Money history:** the record in "View details" of who did what with the money on a booking. Only Finance sees it.

What happens:

1. You read a situation out loud.
2. She says what she would do: do it herself, hand it to Finance, or stop and escalate.
3. You say the right answer and the reason in one line.

The questions:

1. **A member phones: "I did the EFT yesterday, please confirm my place."** She is a Workshop creator without the Finance tick. The row is in "Owes money".
 - **Right answer:** read the row, take the date, amount, bank and reference, and hand it to Finance.
 - **Why:** she can find and read the booking. Confirming payment is Finance's job, and Finance needs those details to match the bank statement.
 - **Tempting wrong answers:** pressing "Mark EFT paid" (she does not have it, and the database refuses anyone but Finance). Lowering the capacity by one to hold her seat (capacity is for the whole workshop and holds nobody's seat). Telling her to use 'Pay by card instead' (she would pay twice, and the pay page warns 'If you have already transferred the money, do not pay again by card'. On ordinary workshops card is also only a demonstration that moves no money).
2. **Finance is about to click "Mark paid and send receipt". What can no longer be reversed?**
 - **Right answer:** all of it. The booking is paid, invoice and receipt numbers are issued, and the receipt is emailed at once.
 - **Why:** the box says 'A receipt is emailed immediately and this cannot be undone.' That is why Finance checks the bank statement first.

- **Tempting wrong answers:** that the "... " menu can remove the paid status (it has no such item). That nothing is final until the member opens the email (the email goes the moment Finance confirms). That the message after the click has an "Undo" (it does not. The "Undo" she may have seen belongs to attendance marks, a different action).

3. **It is 16:30 and the super admin who does Finance has gone home. Another colleague says: "Just log in as me, my account has the money buttons. Mark that EFT paid just this once, the member is upset."**

- **Right answer:** stop. Tell the member it will be confirmed when Finance has checked the statement, and pass the details to Finance.
- **Why:** waiting a few hours is safe. A wrong paid mark is permanent. Reminders stop on their own once Finance marks it paid.
- **Tempting wrong answers:** logging in as the colleague (never use someone else's login, and Money history would record the wrong person). Asking the super admin for the Finance tick for the afternoon (that gets round the split between creating and paying). Telling the member her place is confirmed (never confirm what the system has not confirmed).

4. **A non-member emails: "Please send me the banking details again, I deleted the email."** Her row is in "Owes money" and the EFT instructions email shows 'Sent'.

- **Right answer:** read the details from 'Preview eft instructions email', give her the EFT reference exactly, and ask Finance for one reminder by hand if she wants the full email.
- **Why:** the preview shows what she was sent. A reminder from Finance carries the amount, the EFT reference and the bank details.
- **Tempting wrong answers:** clicking 'Resend eft instructions email' (a delivered email is not sent twice: 'EFT instructions email was already delivered, so it was not sent again.'). Giving her the membership-fee bank account (workshop money goes to the account in Settings, "Payment details", and money paid to the wrong account gets lost). Asking Finance for three reminders today (each person gets one reminder by hand per day).

5. **A member who is still coming says: "Stop these reminders. I will pay when I am ready."**

- **Right answer:** explain there is no switch for one person, and that reminders stop when the booking is paid or the workshop starts.
- **Why:** the schedule is 14, 7 and 2 days before and stops on its own. She is coming, so nothing needs cancelling.
- **Tempting wrong answers:** unticking 'Final EFT reminder, 2 days before' (she cannot save it, and it would stop reminders for everybody). Asking Finance to cancel the booking (she is still coming, and cancelling deletes it for good). Telling her unpaid bookings drop off after a week (they never expire, and ignoring reminders cancels nothing).

6. **A colleague says: "Switch on 'Workshop starting soon' so everyone who paid gets reminded on Friday."**

- **Right answer:** she cannot switch it on herself. She asks a super admin to switch it on, 1 day before. On the day itself, she can also use "Email check-in details to attendees" in the Check-in link and QR panel.
- **Why:** once a super admin switches it on, each paid attendee gets one 'Tomorrow: <workshop title> starts at <HH:MM>' email. It goes to paid bookings only, once per address, and never to a school's booking address. Anyone who books after the reminder moment does not get it.

- **Tempting wrong answers:** ticking 'On' herself (a creator cannot save it). Asking Finance to use "Remind" (that is for unpaid EFT bookings only). Using 'Send an EFT payment reminder now' (Finance-only, and it lists unpaid EFT bookings only). Expecting it to reach the people who still owe money (it goes to paid bookings only).

7. A school bursar emails: "We will pay half of our booking now and the rest next month. Please record the first half."

- **Right answer:** explain there are no part payments. The booking stays unpaid until the full amount is in. Pass it to Finance.
- **Why:** the system cannot record part payments. Reminders continue until Finance marks it paid in full. Finance or the Provincial CEO decides any exception.
- **Tempting wrong answers:** asking Finance to mark it paid when half arrives ("Mark EFT paid" always records the full booked amount, so it would record a payment that did not happen). Halving the workshop price (existing bookings keep their booked amount, and everyone booking after would pay less).

8. Finance marked a member's EFT paid this morning. She phones: "I never got my receipt." Her row is in "Check in" and "View details" shows 'Sent · Invoice and receipt' to her correct address.

- **Right answer:** ask her to check her spam folder, use "Resend receipt email", and if it says already delivered, send her the file from "Download receipt (PDF)".
- **Why:** both buttons are hers to use. A delivered receipt is not sent twice, so the PDF download is the backup.
- **Tempting wrong answers:** asking Finance to press "Mark EFT paid" again (the server refuses a second payment, and a paid mark must never be repeated). Asking Finance for a "Remind" email (reminders are for unpaid bookings and carry no receipt). Saying a copy cannot be made (any staff member can download the receipt PDF from the row's "... " menu).

9. A member with an unpaid EFT booking phones. She has not paid yet. "Your email has a 'Pay by card instead' button. I clicked it and the page said 'Welcome back. Your details are still saved, so you only need to pay.' Did I make a second booking? Should I just pay by card?"

- **Right answer:** it is the same booking, not a new one. On this workshop the card option is only a demonstration, so she pays by EFT with the EFT reference from the email, and pays once.
- **Why:** "Pay by card instead" and the other pay links in the booking emails reopen the booking she already has. That is why the page says 'Welcome back'. The same goes for the one 'Your workshop booking is not paid yet - <title>' email ('Complete your payment') that goes to someone who chose card and stopped. That is the 'Card checkout abandoned' rule at work. On ordinary workshops the button reads 'Card (demonstration)' and says 'NO REAL MONEY MOVES'. Reminders stop once Finance marks it paid.
- **Tempting wrong answers:** paying by card (on ordinary workshops card is a demonstration: 'No money moves and nothing is charged, the receipt says so.' The page would show her as paid, but NAPTOSA gets nothing). Saying she made a second booking and asking Finance to cancel one (there is only one booking). Telling her to start again for a fresh EFT reference (her booking and reference are still valid).

What she cannot do, and what happens instead:

- **Switch on the 'Workshop starting soon' email or the two attendance emails.** They are switched on in "Reminder settings" by a super admin, case admin, admin, supervisor or Finance. In the Western Cape that means the super admins. All three are off until someone switches them on. **Instead:** she asks a super admin. Once 'Workshop starting soon' is on, each paid attendee gets one email before the

workshop. On the workshop day, a creator can also open the Check-in link and QR panel, click "Email check-in details to attendees" (the 'Workshop starts today' email), then 'Send to N attendees'. That one only works on the workshop's own day.

- **Send a payment reminder by hand** ("Remind" on the row, or 'Send an EFT payment reminder now' on the "Reminders" tab). Both are Finance-only and hidden from a creator. Each person can get one reminder by hand per South African calendar day. A second try that day says the person 'already had a reminder sent today. Nobody was emailed again.' **Instead:** ask Finance to send one. Meanwhile give the member the EFT reference and the details she can read in "View details", in the Email row, under 'Preview <type> email'.
- **Send a reminder to a different email, or stop reminders for one person.** A reminder always goes to the payer's booking email, and nobody can change who it goes to. There is no switch per person or per workshop. The schedule is shared by every province. **Instead:** for a wrong address, Finance uses "Correct payer email" in "View details". Reminders stop when Finance marks the booking paid, when Finance cancels the unpaid booking, when registrations close, or when the workshop starts.
- **Undo a "Mark EFT paid" done by mistake.** Invoice and receipt numbers are issued and the receipt goes at once. No button reverses it. **Instead:** never mark paid until the bank statement shows the money. If a mistake happens, stop and escalate to the super admin and the Provincial CEO. Do not try to fix it in the app.
- **Record a part payment.** A booking is only paid for the full amount it was booked at, in one go. **Instead:** the booking stays in "Owes money" and reminders continue until the full amount is in. Pass the details to Finance and escalate if the payer insists.
- **Refund a member, or cancel a booking that is already paid.** There is no refund in the system, a paid row has no "Cancel booking", and the server refuses: 'This booking is paid. Paid bookings need a refund and cannot be cancelled here.' **Instead:** escalate to Finance and the Provincial CEO. A refund is a bank transfer made outside the app.
- **Move a booking to another person.** Once EFT instructions have gone out, staff cannot change the name, the number of places or the payer type on a booking. Only the email can be corrected, and only by Finance. **Instead:** Finance cancels the unpaid booking, and the colleague books her own place on the same link (Published Links, then "Application link", then "Copy link") and pays herself.
- **Re-send an email that was already delivered** (EFT instructions or the receipt). She gets '<Type> email was already delivered, so it was not sent again.' **Instead:** for a receipt, use "Download receipt (PDF)" and send the file by hand. For bank details, read them from 'Preview <type> email', or ask Finance for a reminder by hand, which carries the same details.

Cannot be undone: Nothing in this block.

If you are running late: Ask only the first question (the "I did the EFT yesterday" call) and the third (the "just log in as me" colleague). The rest go into her workbook.

Part 5: Changes, problems and what to escalate

(11:10 to 11:50)

This part is about what happens after a workshop is live. Venues fall through, dates move, prices go up, and members type their email wrong or can't come. Most of these calls reach her first. Half the fixes belong to Finance, not to her.

So the question for the whole part stays the same: is this mine to do, or do I recognise it and hand it to Finance?

"Finance" means anyone with the Finance tick, the auditor role or a super admin. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance here is the super admins only. Today that is you, on your second screen.

11:10 · Change a live workshop, then close and reopen it (2 min)

Goal: She learns that she can change the price of a workshop after people have booked, and that the people already booked keep the amount they booked at. She also now knows that closing a workshop is safe: it switches off the booking link, deletes nothing, and can be reopened.

Who drives: Her screen. You watch.

Before you start:

- She works on the workshop she created this morning:
 - **Title:** TRAINING - Classroom Discipline - delete after
 - **Short code:** TCDDA2
- Siphon Ndlovu's booking is on it. She made it at 09:47 as a non-member paying by EFT, with her own email, so his EFT instructions have gone out to her inbox.
 - **Email on Siphon's booking:** <Trainee work email>
- She must not touch "TRAINING - Conflict Resolution Skills - delete after" or "TRAINING - Positive Discipline Follow-up - delete after". The next two role-plays need them exactly as they are. If her own workshop has no booking with EFT instructions sent, she tells you.

Two ideas she needs for this block:

- **EFT instructions** is the email with NAPTOSA's bank details and a payment reference. Once someone presses "Send EFT instructions", the amount they owe is fixed. A later price change only affects new bookings.
- **The short code** is the code of up to 6 letters the system built from the title when she created the workshop. It goes into every EFT payment reference and receipt number. So Siphon's reference looks like EFT-TCDDA2-<number>-NDLOV.

What happens:

1. She goes to the staff workshop page and opens "Published Links".
2. She picks "TRAINING - Classroom Discipline - delete after" under "Current & upcoming".
3. You ask: "If you raise the price now, what will Siphon owe?" She writes her guess down before she clicks anything.
4. She clicks "Edit details". The form opens with the heading "Edit Workshop".

5. She reads the band that starts "Changing a price or a date affects future registrations only". Point out that there is no Status field in this form.
6. In section "2. Delivery & Pricing" she raises the non-member price by R 50:
 - **Field:** Non-member price in ZAR
 - **Old value:** 450
 - **New value:** 500
7. She clicks "Save changes" and reads the toast. A toast is the short message that pops up on screen after a click.
8. She opens the "Registrations, coupons and documents" section and clicks "Open this workshop's registration desk".
9. She finds Sipho's row, clicks the "..." button on that row and chooses "View details".
10. She reads "Amount / method" and compares it with her guess.
11. Back on "Published Links", with the workshop still selected, she clicks "Close registrations". There is no "are you sure" question. One click closes it.
12. She opens the "Closed archive" group, finds the workshop and reads the "Application link" field. The Application link is the public link people use to book.
13. She clicks "Reopen registrations".
14. She confirms the question that pops up.
15. She writes in her workbook: the toast after saving, which group the workshop sat in, Sipho's "Amount / method", the closing toast word for word, and what the "Application link" field said while it was closed. She does not edit or close the workshop a second time to do this.

She should see:

- After saving: the toast "Workshop updated." She is back on "Published Links" on the same workshop, still under "Current & upcoming", with the new price on the card.
- In "View details": "Amount / method" still shows the amount Sipho booked at (R 450,00 if he booked at the full non-member price). His row still reads "Owes R 450,00 · EFT ref EFT-TCDDA2-<number>-NDLOV" with the same reference as before.
- After closing: the toast "Registrations closed. The application link is inactive." The workshop now sits under "Closed archive".
- The "Application link" field reads "Reopen registrations to activate the application link."
- The reopen question reads: 'Reopen registrations for "TRAINING - Classroom Discipline - delete after"? The public application link will become active and people can register again.'
- After reopening: the toast "Workshop link is active. Registrations are open." The workshop is back under "Current & upcoming" and "Copy link" works again.

If it goes wrong:

- "Member price cannot be more than the standard (non-member) price.": she makes "Member price in ZAR" the same as or lower than "Non-member price in ZAR", then clicks "Save changes" again.
- "Use a valid date range where the end is after the start.": she fixes the End date so it is after the Start.
- The workshop jumped to "Needs closure" and "Copy link" and "Open link" are greyed out: she saved an End date in the past. "Needs closure" is the group for workshops whose end date has passed but whose booking link is still open. She clicks "Edit details" again, fixes the dates and saves.
- She asks whether a finished workshop closes by itself: yes, at 00:05 the night after it ends. The website's Events page drops a workshop once its end time passes. The booking link still takes bookings

from anyone who has the link or the QR code until someone clicks "Close registrations" or that night's run closes it. Ended workshops wait in "Needs closure" until then. If she reopens a workshop whose dates have passed, the next 00:05 run closes it again, so if the event moved she edits the dates instead.

- "Workshop changes could not be saved." followed by a reason: nothing was saved. She reads the reason, fixes it and clicks "Save changes" again.
- She clicked "Cancel edit": nothing was saved. She opens "Edit details" again.
- She pressed Enter in the venue box: that only adds a new line. It does not save.
- She reaches for the red "Delete workshop" button: stop her. It is not for taking a workshop off sale. It deletes the workshop, its link, its files and every booking on it for good, without emailing anyone, and it only works while nobody has paid. Sipho hasn't paid, so here it would work. Closing registrations is how you take a workshop off sale.

Cannot be undone: Nothing in this block. The price change only affects new bookings and can be edited back. Closing and reopening can both be reversed. No email goes out. The workshop must end this block reopened, because it stays open until the clean-up at the end of the day.

If you are running late: Skip closing and reopening. She does them for real in the capstone at 12:27. Keep only the price change and the "View details" check.

11:12 • The phone call from the Rietvlei bursar (13 min)

Goal: She learns that she can move a workshop's date, venue and price after people have booked, and that anyone who already got EFT instructions keeps their old amount. She realises that saving the change tells nobody, so she has to email people herself. She now knows that changing the number of people on a booking is not possible for her: Finance cancels the booking and the school books again.

Who drives: Her screen, in the real staff app, while she talks to you on the "phone". Your second screen (Finance) only comes in if you choose to run the cancel at the very end.

Before you start:

- The workshop is selected in "Published Links" > "Current & upcoming". Right now it looks like this:
 - **Title:** TRAINING - Conflict Resolution Skills - delete after
 - **Venue and address:** TRAINING ONLY, not a real event (Training Room 1)
 - **Start:** 14 Nov 2026 08:30
 - **End:** 14 Nov 2026 12:30
 - **Non-member price:** R 350
 - **Member price:** R 250
 - **Capacity:** 30
 - **CPTD points:** 5
 - **Short code:** the one you noted in pre-flight (expected TCRSDA)
- The short code is the code of up to 6 letters the system built from the title. It goes into every EFT payment reference, so each booking's reference starts EFT-TCRSDA.
- Two unpaid EFT bookings sit on it. EFT instructions is the email with NAPTOSA's bank details and a payment reference. Both bookings have had theirs sent, so their amounts are fixed. Neither is paid.
 - Booking 1:
 - **Booked by:** Rietvlei Primary School, 3 members and 2 non-members

- **Email:** loxly@lbtec.co.za
- **Owes:** R 1 450,00, reference ending RIETV
- Booking 2:
- **Booked by:** Lungile Mkhize, member
- **Email:** loxly@lbtec.co.za
- **Owes:** R 250,00, reference ending MKHIZ
- The new Bellville poster (a portrait picture file under 25 MB, with "bellville" in its name) is on her desktop.
- She is signed in as a Workshop creator with the Finance tick off. The Finance tick is the setting that gives a staff account the money buttons: mark paid, cancel, remind and correct an email. Your Finance screen is on the second screen.
- The hand-off sentence card lies face down on the table.
- As Coach, read her brief aloud: "You are the Workshop creator. You do not have the Finance tick. The Provincial CEO has asked you to move "TRAINING - Conflict Resolution Skills - delete after" to Bellville Teachers' Centre, 12 Voortrekker Road, Bellville, 7530, on 21 Nov 2026 from 09:00 to 13:00. Raise the non-member price to R 400. Members stay at R 250. Use the new poster on your desktop. A school bursar who booked last week is about to phone. Work in the app while you talk."
- Say the warning now, before the scene starts: "When you save, the old poster is gone for good." If you plan to run the Finance cancel at the end, also say: "That cancel deletes the booking for good and sends a cancellation email."

You play: Mrs Fatima Salie, the bursar at Rietvlei Primary School in Athlone. She handles the school's payments and leave paperwork. Organised, polite and a little rushed. She talks in short, practical sentences and wants clear answers she can take to her principal. She booked 5 places for her staff by EFT last week and hasn't paid yet. She's heard the November workshop is moving, and she's seen a higher price on the website.

Open with: "Hi, it's Fatima from Rietvlei Primary. I heard the November workshop is moving. Is it still in Training Room 1 on the 14th?"

Keep these to yourself until she asks:

- She asks whether you've paid or what you've received: you have last week's EFT instructions email with the reference on it, and you planned to pay this Friday.
- She asks why you need it in writing, or by when: your principal needs the new venue and date in writing by tomorrow to sign leave forms.
- She explains that the booking must be cancelled and made again: the sixth teacher only decided this morning, and you don't mind a new reference as long as you're told clearly.

Stay inside these lines as Fatima:

- Never pay the EFT and never read out real bank or card details.
- Never give a real ID, PERSAL, NAP or cell number. Use placeholder values if she asks.
- Only use loxly@lbtec.co.za.
- If she promises an automatic email, accept it in character. Raise it in the debrief.
- Stay polite. Mild impatience at most.

What happens:

Part 1: Where and when now?

1. You say, as Narrator: "You hear typing on the other end of the line." Then, as Fatima, the opening line. Let her put you on hold while she works.
2. She clicks "Edit details" and reads the band at the top.
3. In section "1. Details & Scheduling" she moves the date:
 - **Start, old:** 14 Nov 2026 08:30
 - **Start, new:** 21 Nov 2026 09:00
 - **End, old:** 14 Nov 2026 12:30
 - **End, new:** 21 Nov 2026 13:00
4. In section "2. Delivery & Pricing" she changes the venue. Pressing Enter in this box only adds a line. It does not save.
 - **Venue and address, old:** TRAINING ONLY, not a real event (Training Room 1)
 - **Venue and address, new:** Bellville Teachers' Centre, 12 Voortrekker Road, Bellville, 7530
5. In the same section she raises the non-member price and leaves the member price alone:
 - **Non-member price in ZAR, old:** 350
 - **Non-member price in ZAR, new:** 400
 - **Member price in ZAR:** stays 250
6. In section "4. Documents & Media" she clicks "Browse files" and picks the new Bellville poster from the desktop.
 - **Poster, old:** the original Conflict Resolution poster
 - **Poster, new:** the Bellville poster
7. She checks that the saved poster now reads "Public poster · replaced when you save changes".
8. She clicks "Preview" and checks the card shows the new venue, date and price. She closes it with "Hide preview", the X ("Close preview") or Escape.
9. She clicks "Save changes" and reads the toast. A toast is the short message that pops up after a click.
10. She checks the card is still under "Current & upcoming" with the 21 Nov dates.
11. She tells Fatima the new venue and date, read off the saved card and not from memory.

Watch for: she doesn't go looking for a Status field, she doesn't press Enter in the venue box to save, she checks the poster in "Workshop files", and she uses "Preview". "Workshop files" is the list of every picture and document saved on this workshop. If she clicks "Cancel edit" by mistake, let the old poster stay and see whether she checks.

Part 2: Do we owe more now?

12. You say, as Fatima: "Okay. And I saw on the website the price is now R400 for non-members. We haven't paid our EFT yet, so do our two non-members now owe R400 each?"
13. She opens "Registrations, coupons and documents" and clicks "Open this workshop's registration desk".
14. She finds the Rietvlei Primary School row, clicks the "..." button and chooses "View details".
15. She reads "Amount / method".
16. She tells Fatima that the amount and the reference haven't changed, because the amount was fixed when the EFT instructions went out.
17. She does the same "View details" check on Lungile Mkhize's row.

If she answers from memory without opening "View details", you ask as Fatima: "Are you sure? Can you check?" If she says R 400 each, accept it, sounding worried. Don't correct her in character. Take it to the

debrief.

Part 3: Put it in writing

18. You say, as Fatima: "Can you send me something in writing with the new venue and date? Our principal needs it for the leave forms."
19. She tells Fatima that the system doesn't email anyone about the change, and that she'll email Fatima herself from the office mailbox.
20. She goes to "All Registrations" and clicks "Export <N> (CSV)", where N is the number of bookings shown. This downloads a spreadsheet of the bookings. Her copy has no money columns, but it does have the Email column. Reading Fatima's email in "View details" also counts.
21. She thinks of the other person on this workshop, Lungile Mkhize, who also needs to hear about the change.

The big catch here is a false promise like "you'll get an email from the system". If she makes it, Fatima says "Great, I'll watch for it" and moves on. Note whether she remembers Lungile without a prompt. Optional: she can open "Preview eft instructions email" to see what Fatima already has.

Part 4: One more teacher

22. If she's new to this, model the wrong move first, as Coach: "So I just add one on the booking, right?" Let her stop you.
23. You say, as Fatima: "Oh, and one more teacher wants to come. Can you make our booking 6 people instead of 5? We'll just add it to the same EFT."
24. She says she can't change the number of people on a booking once the EFT instructions have gone out. No staff screen has a headcount field, so she doesn't go looking for one.
25. She names Finance as the person who cancels the unpaid booking.
26. She tells Fatima to book again for 6 people on the same link, and that a new reference will come in the new EFT instructions email.
27. Only if time allows: you, as Finance on your screen, click "Cancel booking" on the Rietvlei row and pick the reason. She watches the row disappear.

- **Reason:** Booked by mistake

What a good hand-off sounds like (the card she turns over if she needs it): "Mrs Salie, I can't change the number of people on a booking once the EFT instructions have gone out. I'll ask our Finance colleague to cancel this booking today. You'll get a cancellation email saying no payment is due, and then please book again for 6 people on the same link. Your new EFT reference will be in the new EFT instructions email."

She should see:

- The toast "Workshop updated." The card under "Current & upcoming" shows the 21 Nov 2026 dates, "R 400,00" and the line "Members R 250,00".
- "Workshop files" lists the new picture as "Public poster · shown on the booking page". The old poster is gone. Above the list sits the note "The poster shows on the booking page only. To take a workshop off the website's Events page, use Close registrations." Each file has "Download" and "Remove". She doesn't click "Remove".
- "Open link" shows the public booking page with the Bellville venue, "R 400,00" and "NAPTOSA members R 250,00".
- The Rietvlei row still starts "Owes R 1 450,00 · EFT ref" with the same reference ending RIETV. In "View details", "Amount / method" shows "R 1 450,00" with "3 members, 2 non-members (5 total) · EFT" under it.

- Lungile's row still starts "Owes R 250,00 · EFT ref" with the reference ending MKHIZ. Her "Amount / method" shows "R 250,00" with "Member rate · EFT" under it.
- After the export, a spreadsheet file downloads with "no-financial-data" in its name. No toast appears for this.

If she gets stuck: Wait for a real stall: she says she's stuck, asks for help, or sits for about a minute without a move. First point her at the face-down hint slip. Then give these one at a time.

- Part 1: "Say what you will check before you answer, then check the saved workshop, not your memory."
- Part 1: "After saving, look at where the card sits and what it shows."
- Part 2: "The question is about her booking, not about the workshop. Where do you see one booking's amount?"
- Part 2: "Before you answer, decide whether a price change can reach a booking that already has EFT instructions."
- Part 3: "Ask yourself: when you pressed Save, who was told?"
- Part 3: "Is Fatima the only person on this workshop who needs to know?"
- Part 4: "Decide first: is changing a booking something your account can do, or something you hand on?"
- Part 4: "Tell her what will happen next, in order, and what she will receive."

If it goes wrong:

- She clicked "Cancel edit" after dropping in the new picture: nothing saved and the old poster stays. The habit to teach: always "Save changes", then check "Workshop files".
- The toast says "Workshop updated and the new picture saved, but the previous poster could not be removed, so it is still the public poster. Check Workshop files under Published Links.": she tells you. She opens "Workshop files" and clicks "Remove" next to the old poster. The box reads 'Remove the public poster "<file name>?"' and names the next picture that becomes the poster. She checks it names the Bellville poster, then clicks "Remove file". The toast reads 'Poster removed. The booking page now shows "<Bellville file name>".' Removing a file can't be undone, so she checks the file name before she clicks.
- The toast says "Workshop details saved, but some files did not upload. Open this workshop's Documents section to upload the remaining files.": she uploads the poster again through "Edit details" and saves.
- "Member price cannot be more than the standard (non-member) price.": she makes the member price the same as or lower than the non-member price, then saves again.
- She saved an End date in the past and the workshop jumped to "Needs closure": she clicks "Edit details", fixes the dates and saves. "Needs closure" is the group for workshops whose end date has passed.
- Fatima says the public booking page refused her change with "EFT instructions have already been issued. Contact staff to change this booking.": that's expected. Only Finance can cancel the booking so the school can book again.

Cannot be undone:

- The old poster is removed for good when she saves.
- If she clicks "Remove" on any file in "Workshop files", that file is gone for good.
- Only if you run the cancel at the end: the Rietvlei booking is deleted and a cancellation email goes to loxly@lbttec.co.za.

If you are running late: Never drop this scene. Skip the Finance cancel in the last part. She only says the hand-off sentence.

Debrief: After the scene, as Coach, name one specific thing that worked and one thing to try next time. No "great job". Then ask:

1. When Fatima asked if her non-members now owe R 400, what did you look at before answering, and what did it show?
2. What did you tell her about getting the change in writing, and who else on this workshop needed to hear about it?
3. In your own words, why couldn't you make the booking 6 people, and what does Finance do next?
4. If there's time: do you really know that a saved change emails nobody, or does it just feel like you know it? How would you check?

How did she do? Mark each one achieved, partial or missed on the scoring sheet straight away.

- **Edit the workshop:** done well when she changed the date, venue, non-member price and poster, saved, saw "Workshop updated.", the card stayed in "Current & upcoming" and the new poster shows in "Workshop files". Partly when she saved most of it but missed one thing (poster not checked, or the member price left out of line), or needed help to find "Edit details". Missed when she didn't save, clicked "Cancel edit", or saved an End date in the past and didn't notice "Needs closure".
- **Prove the booked amount didn't change:** done well when she opened "View details" on the Rietvlei row, told Fatima "R 1 450,00" and the same reference, and explained the amount was fixed once her EFT instructions went out. Partly when she gave the right answer without checking, or checked but didn't explain why. Missed when she told Fatima the non-members now owe R 400 each.
- **Tell people about the change honestly:** done well when she said no automatic email goes out, offered to email from the office mailbox, used "Export <N> (CSV)" or "View details" to get the addresses, and remembered Lungile. Partly when she offered to email Fatima only, or forgot to say the system sends nothing. Missed when she promised the system would email everyone.
- **Hand the headcount change to Finance:** done well when she refused to change the headcount, named Finance, and explained cancel, then book again for 6 on the same link, with a new reference. Partly when she named Finance but left out the rebooking or the new reference. Missed when she tried to change it herself, or told Fatima to just pay for 6.

11:25 · From the member's chair: a wrong email, a reminder and a cancellation (10 min)

Goal: She learns what Finance's fixes really look like when they land in a member's inbox. She realises that correcting an email address only moves emails that haven't gone out yet, so the original EFT instructions never reach the new address. She now knows that a cancelled unpaid booking is deleted for good, the member gets one cancellation email, and putting it back is not possible.

Who drives: Both. She plays the member on the public booking page and reads the inboxes. You play the office and do every Finance click on your second screen. Finance means anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that is the super admins only, and today that is you. She needs no staff rights for this.

Before you start:

- The workshop is published, dated at least 3 days away (so the "Remind" button still shows), with no bookings yet:

- **Title:** TRAINING - Positive Discipline Follow-up - delete after
- **Date:** 21 Nov 2026, 09:00 to 13:00
- **Short code:** DISC21
- The short code is the code of up to 6 letters and numbers the system built from the title. It goes into every EFT payment reference and receipt number.
- Its Application link (the public booking link) is open on her screen.
- On the second screen, her own inbox for the right address is open. The wrong address is not a real mailbox, so nobody ever receives what goes there.
 - **Wrong address (the typo):** wrong.address@example.com
 - **Right address:** <Trainee personal email>
- From your pre-flight list, have these two test values ready:
 - **NAP number:** test member NAP number 05
 - **Cell:** test cell number 9
- Optional: talk about the member portal for <Trainee personal email>. This is words only. No portal account is made for training.
- The hand-off sentence card lies face down.
- As Coach, read her brief aloud: "You are Busisiwe Nkosi, a NAPTOSA member. You booked a TRAINING workshop by EFT but typed your email wrong, so nothing arrived. Later your principal will not release you. Today you see the other side: what the office's fixes actually look like when they land in your inbox. Afterwards you will say the sentence the creator uses on this call."
- Say the warnings now, before the scene: "The EFT email to the wrong address can never be moved. The reminder is really sent. The cancel deletes the booking for good and sends an email."

You play: Yourself, Loxly at the NAPTOSA Western Cape office. You answer the phone and you also hold Finance rights. Friendly, quick and exact. While you work, you say in plain words what you're doing, and you stick to what the system really does. Don't coach her. Answer only what a real office person would.

Open with: "Good morning, NAPTOSA Western Cape office, Loxly speaking. How can I help?"

Keep these to yourself until she asks:

- She asks if you'll resend the bank details: the first EFT instructions email went to the typo address, and it can't be sent again to the new one.
- She asks how she'll get the payment details now: a reminder carries the same amount, reference and bank details to the corrected address.
- She asks if the booking can be "put back" or "kept on file": a cancelled unpaid booking is deleted, not kept. Only an internal record of who removed it, when and why stays behind. Nobody can reopen it.
- She asks what to do if she changes her mind: she books again on the same link and gets a new reference.

Stay inside these lines as the office:

- Never send anything to a third person's address. Every email goes only to the booking's own address.
- Never cancel a paid booking and never promise a refund.
- Never read out or ask for real bank, card, ID, PERSAL, NAP or cell numbers. Use the placeholders.
- Never invent a button or an email that isn't on screen.

What happens:

Part 1: The email that never came

She books before she phones. That booking is her first move in the scene.

1. She opens the Application link and clicks "Continue".
 2. She chooses "Individual".
 3. She chooses the option that starts "Yes, member rate".
 4. In the box "NAP number (preferred) or SA ID number" she types the NAP number (her NAPTOSA membership number) and clicks "Continue". A test number the system doesn't know still books at the member rate.
 - **NAP number (preferred) or SA ID number:** test member NAP number 05
 5. She fills in her details, with the wrong email on purpose. She leaves PERSAL number empty, because it is optional.
 - **Name:** Busisiwe
 - **Surname:** Nkosi
 - **Email address:** wrong.address@example.com
 - **Cell phone number:** test cell number 9
 6. She clicks "Save details and continue". The toast reads "Invoice and receipt details saved. Continue to payment."
 7. On the payment step she sees "Coupon code", "Card (demonstration)" and "EFT". She clicks "EFT".
 8. She clicks "Send EFT instructions". EFT instructions is the email with NAPTOSA's bank details and her payment reference. It goes out the moment she clicks, to the address she typed.
 9. The page shows "EFT INSTRUCTIONS SENT", "Workshop registration pending EFT", the bank details, "PAYMENT STATUS Awaiting EFT" and "EMAIL STATUS Sent". The bank details are for training only. Never pay them. She writes down the line "REFERENCE (USE THIS EXACTLY)" and keeps this tab open. The EFT reference is the code a payer puts on the bank transfer so Finance can match the money. It is built from the short code, a number and the first letters of the payer's name. It should look like this:
 - **Reference:** EFT-DISC21-<number>-NKOSI
 10. She phones you. You answer with the opening line.
 11. She says her email was wrong and gives the right one:
 - **Correct email:** <Trainee personal email>
 12. You, as Finance, click "Correct payer email" and type the reason. Read the toast aloud. A toast is the short message that pops up after a click.
 - **Reason:** member phoned, the address had a typo
 13. She opens the inbox for <Trainee personal email> and checks the To line on each email.
 14. She says out loud that nothing new has arrived there.
 15. You, as Finance, try "Resend eft instructions email" and read the result aloud.
- "Correct payer email" is a Finance-only button that changes the email address on a booking. It only redirects emails that haven't been sent yet.
- Part 2: Send it to my husband (drop this part first if time is short)*
16. You say: "I've fixed the address on your booking. Is there anything else?"
 17. She asks for the bank details to go to her husband's email. If she doesn't bring him up, prompt only in character: "Who handles the payment at home?"
 18. You refuse to use any other address. You can only send to the booking's own address.

19. You, as Finance, click "Remind" on her row. The row reads "Not reminded yet" before you click. The box asks "Send an EFT reminder to Busisiwe Nkosi?" and says "Each person can get at most one manual reminder per day." Click "Send reminder" and read the toast aloud. "Remind" sends an EFT payment reminder by hand. It works once per person per South African day.
20. She opens the reminder in the <Trainee personal email> inbox.
21. She reads out the amount and the reference, and finds the bank details block and the "Pay by card instead" link.
22. She compares the reference with the one she wrote down.
23. She does not pay and does not click "Pay by card instead". The bank details are for training only. Never pay them. Make sure of this.

Part 3: My principal won't release me

24. You say, as Narrator: "Ten minutes later the phone rings again." Then, as the office: "Okay, the reminder's on its way. You should have it now." If you skipped part 2, say instead: "I've fixed the address on your booking. Is there anything else?"
25. She asks to cancel because she can no longer attend.
26. You, as Finance, click "Cancel booking" and pick the reason:
 - **Reason:** Can no longer attend
27. You click "Cancel and delete booking" and read the toast aloud.
28. She opens the cancellation email in the <Trainee personal email> inbox and reads it.
29. She goes back to the booking tab she kept open from the start and refreshes it.

Part 4: Can you just put it back?

30. You say: "It's cancelled now. Is there anything else I can help with?"
31. She asks whether it can be put back. You tell her it can't.
32. You step out of the scene as Coach and ask her for the hand-off sentence.
33. She says, in her own words, what the creator would say on this call.
34. Optional: show the member portal page "Workshops" for <Trainee personal email>, which reads "No workshop bookings yet".

What a good hand-off sounds like: "Only our Finance person can change the address on a booking and send the reminder. The original email can't be re-sent, so the reminder will carry the same reference and bank details to your correct address. If you cancel, Finance deletes the unpaid booking, you get one cancellation email, and no further reminders."

She should see:

- Your toast after the correction: "Email corrected to <Trainee personal email>. No unsent emails needed to change."
- Nothing new addressed to <Trainee personal email> after the correction.
- The resend result: "EFT instructions email was already delivered, so it was not sent again." Emails that have already gone out are never moved.
- Your toast after the reminder: "Reminder sent to Busisiwe Nkosi."
- In the <Trainee personal email> inbox: a reminder whose subject starts "<N> days left before", then the workshop title, and ends "EFT payment reminder". It carries the same reference, EFT-DISC21-<number>-NKOSI.
- Your toast after the cancel: "Booking removed for Busisiwe Nkosi. The confirmation email was sent."

- In the <Trainee personal email> inbox: an email whose subject starts "Booking cancelled - TRAINING". It says "No payment is due and you will not receive further payment reminders for this booking."
- The old booking tab now shows "We can't find this booking" and "It may have been cancelled. Contact NAPTOSA on 021 686 8521, or book again from the workshop page."
- On your screen, in "All Registrations", after "Refresh", the Nkosi row is gone from "Owes money". "Owes money" is the group that lists unpaid bookings.

If she gets stuck: Wait for a real stall, point her at the hint slip first, then give these one at a time.

- Part 1: "Before you call, write down what the booking page showed you, so you have it in front of you."
- Part 1: "After the office says it is fixed, check for yourself where emails now land."
- Part 2: "Ask for what Busisiwe really wants, then notice exactly what the office can and cannot do."
- Part 2: "When an email arrives, compare its reference with the one you wrote down."
- Part 3: "Think about what you, as the member, would want to be sure of after cancelling."
- Part 3: "Go back to the tab you kept open from the start."
- Part 4: "As Busisiwe, ask what you would actually do next week."
- Part 4: "Then switch chairs: you are now the creator taking this call. What would you say?"

If it goes wrong:

- No "Remind" button on your screen: "Remind" is hidden once a workshop has started. This workshop must be at least 3 days ahead.
- "<person> already had a reminder sent today. Nobody was emailed again.": only one manual reminder per person per day. Read the earlier reminder instead.
- The correction is refused with a duplicate address error: another booking on this workshop already uses that address. Correct it to her other email instead, and she checks that inbox from then on.
 - **Correct email, second choice:** <Trainee work email>
- The correction toast says "Email corrected. 1 unsent email will now go to <Trainee personal email>." (or a different number): an email was still waiting to go out and will now go to the corrected address. Carry on.
- The cancel says "Booking cancelled, but the confirmation email could not be sent. The booking was kept and marked cancelled. Tell the person yourself, then use Remove to delete it.": the row now sits in the "Cancelled" group. Tell her. You, as Finance, open "All Registrations", choose the group "Cancelled" and click "Remove" on her row. The box asks "Remove this cancelled booking?" You pick the reason and click "Remove booking". The toast reads "Booking removed for Busisiwe Nkosi." The same "Remove" is also in the Attendee ledger, the full list of bookings for one workshop.
 - **Reason:** Can no longer attend

Cannot be undone:

- The EFT instructions email went to wrong.address@example.com and is never moved.
- The reminder is really sent, and that person can't get another one today.
- The booking is deleted for good and a cancellation email is sent.

If you are running late: This is the first block to drop. Either skip the whole scene and teach one sentence: "Correct payer email only moves emails that have not been sent yet." Or keep the scene and skip part 2, the reminder.

Debrief: After the scene, as Coach, name one specific thing that worked and one thing to try next time. Then ask:

1. What did correcting the email change, and what did it not change? Point to what you saw in each inbox.
2. Which of the office's actions today could you, as a creator, do yourself, and which did you hand on?
3. What happened to the booking after the cancellation, and how would you explain that to a member who wants it back?
4. If there's time: if a paid member phoned asking for the same cancellation, what would be different?

How did she do? Mark each one achieved, partial or missed on the scoring sheet straight away.

- **Read a corrected email correctly:** done well when she checked the right inbox, said nothing new arrived after the correction, and linked that to "emails already sent are not changed". Partly when she noticed the empty inbox but expected the original email to turn up later. Missed when she didn't check the inbox, or believed the original email was re-sent.
- **Find the payment details in the reminder** (don't score this if you skipped part 2): done well when she opened the reminder, read the amount, the same reference and "Pay by card instead", and didn't press it. Partly when she found the reminder but missed the reference match. Missed when she didn't find the reminder, or clicked to pay.
- **See what a cancellation leaves behind:** done well when she read the line in the cancellation email and saw "We can't find this booking" on the old tab. Partly when she read the email but didn't check the old link. Missed when she expected the booking to stay visible.
- **Say the creator's hand-off sentence:** done well when she said, in her own words, that Finance corrects the address and sends the reminder, the original email isn't re-sent, and a cancelled unpaid booking is deleted with one email and no more reminders. Partly when she named Finance but left out what the member will and won't receive. Missed when she couldn't say whose job it was.

11:35 • Go or stop? Four tricky requests (5 min)

Goal: She realises that some requests are hers and some she must stop and hand on. She now knows that refunds, calling off a whole workshop, fixing a wrong coupon and removing a cancelled booking are not possible for her in the app, and she knows who to pass each one to.

Worth knowing before you start: Finance can now switch a coupon off and on and change how many people may use it, and Finance can remove a cancelled booking straight from "All Registrations". None of these buttons show on her Workshop creator account, so her answer stays the same: stop and hand on.

Who drives: Her. She answers on her own. You read out each situation and its options.

Before you start:

- This is a go-or-stop check. For each situation she decides: can I go ahead myself, or must I stop and escalate?
- Introduce it in one line only: "Try these on your own, we will go through them after." Give no hints.
- After each answer, read out the feedback for the option she picked, right or wrong. A wrong answer means check, fix, try again. It's never a dead end.
- Words she will hear in the answers:
 - **Finance:** anyone with the Finance tick, the auditor role or a super admin. The Finance tick is the setting that gives a staff account the money buttons. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance is the super admins.
 - **EFT instructions:** the email with NAPTOSA's bank details and a payment reference. Once it goes out, the amount on that booking is fixed.

- **Export <N> (CSV):** the button in "All Registrations" that downloads a spreadsheet of the bookings. Her copy has no money columns, but it has every email address.

What happens: Ask these four, in this order.

1. The wrong coupon. A coupon is a discount code that only Finance can create or change.

- **Situation:** Finance tells you they made a coupon for this workshop with the wrong price, and it was already shared with a school.
- **Question:** What happens now?
- **A.** Open the Coupons panel and switch the coupon off yourself. *Wrong.* A Workshop creator can see coupons but gets no "Edit" or "Switch off" button. Only Finance can.
- **B.** Finance clicks "Edit" on the coupon and fixes the price. *Wrong.* "Edit" only changes how many people may use it and the note. The price and the code can't change. The box itself says "To change the price or the code, switch this coupon off and create a new one."
- **C.** Stop sharing the code and hand it to Finance, the super admins in the Western Cape. They click "Switch off" on the coupon and create a new one with the right price. *Right.* This is a stop. Tell the school not to use the code until the office sends the new one. People who already used the old code keep their place. If an unpaid booking still holds the code, Finance sees "1 unpaid booking is using this code. Cancel that booking, or wait until it is paid, then switch the coupon off."

2. The paid refund.

- **Situation:** A paid attendee emails the day before: "I can't come, please cancel and refund me."
- **Question:** What can you and the system do?
- **A.** Ask Finance to press "Cancel booking". The refund then goes back automatically. *Wrong.* "Cancel booking" only works on unpaid bookings. On a paid one the system refuses with "This booking is paid. Paid bookings need a refund and cannot be cancelled here."
- **B.** The system can't do this. There is no refund control and a paid booking can't be cancelled. Pass it to Finance, who arrange any refund outside the system with the Provincial CEO's approval. *Right.* This is a stop. Tell the attendee Finance will contact them. Don't promise a refund or a date.
- **C.** Mark them absent after the workshop. The system refunds absent people overnight. *Wrong.* Marking someone present or absent moves no money. At most it sends a "Thank you for attending" or "We missed you" email, and only if those emails have been switched on.
- **D.** Open "Payments needing a decision" and choose Refunded. *Wrong.* That panel has no Refunded choice. It only shows flagged payments (like people who paid after the workshop filled up), with a note box and a "Mark resolved" button. "Mark resolved" is Finance-only, records a decision and moves no money.

3. The cancelled booking that needs removing.

- **Situation:** A booking's cancellation email failed, so the booking now sits in the "Cancelled" group in "All Registrations". It needs to be removed.
- **Question:** Who does it, and where?
- **A.** Finance, from "All Registrations" > the group "Cancelled" > "Remove" on that row > pick a reason > "Remove booking". *Right.* "Remove" is a Finance action, and it only shows when the cancelled booking has no payment history. The same button is also in the Attendee ledger (the full list of bookings for one workshop). If the booking has a payment history, the row reads "Kept for the money record: this booking has a payment history." and nobody can remove it.
- **B.** You, from the cancelled row in "All Registrations" > "Remove". *Wrong.* "Remove" is Finance-only. On her Workshop creator account it doesn't show.

- **C.** Nobody. Cancelled bookings delete themselves overnight. *Wrong*. It stays until Finance removes it. Also tell the person yourself, because their cancellation email didn't go.
- **D.** You press "Close registrations", which clears out cancelled bookings. *Wrong*. Closing keeps every record with the workshop. It removes nothing.

4. The whole workshop is called off.

- **Situation:** The venue fell through and the whole workshop must be called off. 12 people have already paid and 3 have not.
- **Question:** What do you do?
- **A.** Press "Cancel workshop". It emails and refunds every payer. *Wrong*. There is no such button. The buttons are "Publish workshop", "Close registrations", the two Reopen buttons and "Delete workshop".
- **B.** Press "Delete workshop" so nobody can book. *Wrong*. 12 people have paid, so it refuses: "A payment has been recorded for this workshop, so it cannot be deleted. Payment records are always kept." There is no "Cancel workshop" button, so the way to stop new bookings is "Close registrations". Even with nobody paid, deleting wipes every booking and emails nobody.
- **C.** Press "Close registrations". Export the payers with "Export <N> (CSV)" and contact each person yourself. Hand the 3 unpaid bookings to Finance to cancel. Escalate the 12 refunds to Finance and the Provincial CEO. *Right*. Closing stops new bookings and keeps every record in "Closed archive". The notices and the refunds are done by hand.
- **D.** Use "Edit details" to move the date to next year so the reminders stop. *Wrong*. That hides the problem. Nobody is told, and the paid people still expect to attend.

If you have time left, use these from the same set:

- **The price went up after she booked.** You raise the non-member price from R 300 to R 350, three weeks before the workshop. Mpho booked at R 300 last week, got EFT instructions and hasn't paid. What does she owe now? *Right answer:* R 300. Her amount was fixed when her EFT instructions went out. *Traps:* R 350 (no, the band in "Edit details" says a price change affects future registrations only). "Nothing, her booking is cancelled" (no, editing a workshop never cancels a booking, only Finance's "Cancel booking" does). "Finance must re-price it in Money history" (no, Money history is a read-only record).
- **The venue moved.** A workshop has 9 bookings, 4 paid. You moved the venue and saw "Workshop updated." What do you do so people know? *Right answer:* use "Export <N> (CSV)" in "All Registrations" to get every payer's email, then write to them yourself from the office mailbox. *Traps:* "Nothing, the system emails everyone" (saving an edit sends no email). "Ask Finance to press Remind for everyone" (that's a payment reminder for unpaid bookings only, paid people get nothing, and it isn't a change notice).
- **A school wants a different contact email.** EFT instructions were already sent and you don't have the Finance tick. *Right answer:* hand it to Finance. They use "All Registrations" > the row's "..." > "View details" > "Correct payer email", with a reason. "Correct payer email" is the Finance-only button that changes the email address on a booking. Tell the school that emails already sent won't be re-sent, but future emails go to the new address. *Traps:* changing it in "Edit details" (that changes the workshop, not a booking). Asking the school to book again (that makes a second booking that also gets chased, and the first one still owes). Changing the reminder's recipient (reminders always go to the booking's own address).
- **A paid non-member wants to move to next month's workshop.** *Right answer:* tell her the system can't move a paid booking. Take her details and hand it to Finance, who decide with the Provincial CEO on a refund or another arrangement. Tell her Finance will contact her. *Traps:* changing the workshop on

her booking (no screen does that). Sending next month's link and saying this month's booking cancels itself (nothing cancels itself, and she would pay twice). Asking Finance to press "Cancel booking" (her booking is paid, so it's refused).

- **The workshop is full and an unpaid teacher still wants to come.** She has an email titled "Capacity reached - <title> - please do not pay", and her booking page says "Please do not send payment". *Right answer:* check the workshop's "Capacity" first. If management agrees to more seats, raise "Capacity" in "Edit details" > "2. Delivery & Pricing" and click "Save changes", then tell her yourself she may pay with the reference she already has. If not, tell her not to pay and hand the booking to Finance to cancel. *Why:* the "please do not pay" email goes to every unpaid booking the moment paid seats fill the workshop. More seats is a management call (room, facilitator, materials). If it stays full, Finance's row reads "This workshop is full. Refund this person, then use Cancel booking on this row." She hasn't paid, so Finance only cancels, and she gets one "Booking cancelled" email. *Traps:* "Pay anyway" (while it's full the system won't let Finance mark her paid, and her money would need a refund outside the system). Raising capacity without asking (you can, but it isn't your decision). "The system will email you when a seat opens" (there is no such email, and the "please do not pay" email is not taken back).

What the system cannot do, and what to do instead (read these out if she asks):

- **Delete a workshop that someone has paid for.** "Delete workshop" only works while nobody has paid. It asks for a reason and a tick on "I understand this cannot be undone.", then deletes the workshop, its link, its files and every unpaid booking for good, and emails nobody. Once any payment exists it refuses. Press "Close registrations" instead. A closed workshop sits in "Closed archive" with all its records. A draft that was never published can be deleted, or just left in "Drafts".
- **Keep a finished workshop open.** Since 08 Oct the system closes every published workshop at 00:05 the night after it ends. A closed workshop refuses new bookings, an unpaid booking on it can no longer get EFT details or pay by card, and its payment reminders stop. Pressing "Reopen registrations" on a workshop whose dates have passed is undone at the next 00:05 run. If the event moved, use "Edit details" to set the new dates. Until that night's run the link still takes bookings, so check "Needs closure" after each workshop and close what is done.
- **Call off a whole workshop and tell everyone, or email everyone about a change.** Neither exists, and saving "Edit details" sends nothing. Press "Close registrations". Use "Export <N> (CSV)" to get every payer's email and contact them yourself from the office mailbox. Hand the unpaid bookings to Finance to cancel. Each person then gets a "Booking cancelled" email that says it was cancelled as requested, so write to them first. Hand paid people to Finance and the Provincial CEO for refunds.
- **Refund someone, or cancel a paid booking.** There's no refund control, and "Cancel booking" refuses a paid booking. Tell the person you're passing it to Finance. Finance arranges the refund by bank transfer outside the system, with the Provincial CEO's approval. Don't promise a date or an amount.
- **Take a part payment, a deposit, or cash or card at the door.** Every payment is recorded for the full amount. The person pays the full amount by EFT. A walk-in books on the public page like anyone else, and Finance marks the EFT paid when it arrives.
- **Remove a cancelled booking that has a payment history.** Its row reads "Kept for the money record: this booking has a payment history." Money records are never destroyed. A cancelled booking with no payment history can go: hand it to Finance, who click "Remove" on the row in "All Registrations" > "Cancelled", pick a reason and click "Remove booking". She doesn't get this button.
- **Change a coupon's price or code.** Finance can only change how many people may use a coupon and its note, or switch it off and on. For a wrong price, Finance switches the coupon off and creates a new

one. Tell Finance straight away, the super admins in the Western Cape. Don't share the code in the meantime.

- **Change the number of people, the name or the coupon on a booking after EFT instructions went out, or move a booking to another workshop.** The booking is locked ("EFT instructions have already been issued. Contact staff to change this booking.") and no staff screen edits a headcount or moves a booking. Unpaid: Finance cancels it and the person books again on the right Application link. Paid: it needs a refund decision, so hand it to Finance and the Provincial CEO.
- **Send the original EFT instructions or receipt to a new address, or to someone else (a husband, a bursar).** "Correct payer email" only moves emails that haven't been sent yet, and every email goes only to the booking's own address. Finance corrects the address and sends a "Remind" (for an unpaid EFT), which carries the same reference and bank details to the new address. The person forwards it themselves if someone else is paying.

If she asks about the "Payments needing a decision" panel:

- It sits on "Published Links", just above "Registrations, coupons and documents", for the selected workshop. It only appears when something needs a decision. On most workshops she won't see it.
- Each line shows the person's name, the amount and the reason, for example "Paid after available seats filled. Open another seat or arrange a refund."
- As a creator she sees "Only a super admin or the finance (auditor) role can close this." There's no note box and no button for her. In the Western Cape there is no auditor, so that means the super admins.
- In "All Registrations", the same person shows a row badge "Paid R <amount> · seat needs review".
- If Finance shows her their screen, a pending EFT row on a full workshop reads "This workshop is full. Refund this person, then use Cancel booking on this row." That's Finance's instruction too, not hers.
- Her job: send Finance a short message with the workshop title, the person's name, the amount and what she saw. Then tell the person only what's true: NAPTOSA has their payment and will contact them to confirm a seat or arrange a refund.
- When Finance types a note and clicks "Mark resolved", the toast reads "Marked as resolved." and the line disappears. The panel goes once nothing is left. "Mark resolved" sends no email, so Finance or the office must contact the person.
- If she promised a refund on the spot: she calls back and corrects it. Refunds happen outside the system and need Finance and the Provincial CEO.

Cannot be undone: Nothing in this block.

If you are running late: Ask only the paid refund, the cancelled booking and the whole workshop questions.

11:40 • Break (10 min)

Goal: She rests. Nothing to learn here. You use the time to set up the next part.

Who drives: You, on your second screen. Nothing here is permanent.

- On "TRAINING - Classroom Management Essentials - delete after" (today's workshop): Palesa Khoza is still in "Check in" (the group of paid people waiting to arrive) and Aisha Abrahams is still in "Owes money" (the group of unpaid bookings). That's how it looked at 09:00.
- On "TRAINING - Reading Recovery - delete after" (tomorrow's workshop): check-in is not open. There's no "Opened early by" line.

- Get the phone ready with the door QR code for today's workshop. That's the code that goes on the hall door and opens the check-in page.

If you are running late: Cut the break to 7 minutes.

Part 6: On the day, attendance, certificates and exports (11:50 to 12:25)

This part is the workshop day itself. Members judge NAPTOSA on this day, and their CPTD points depend on two things: attendance and the certificate. Attendance needs a staff click, or the person checking in with the QR at the door. The certificate goes out by itself at 08:00 the morning after the workshop, to everyone who paid and was marked present. Staff can send it sooner. Two kinds of email stay off unless a super admin switched them on: the reminder before the workshop, and the email when someone is marked present or absent. She cannot switch them on herself. Registration closes by itself at 00:05 the night after the workshop ends, not the moment it ends. Money is still not her job on the day. An unpaid person at the door goes to Finance, and her export has no amounts in it.

Two training workshops are used in this part:

- **Today's workshop:** "TRAINING - Classroom Management Essentials - delete after"
 - **Date and time:** Thu 08 Oct 2026, 08:00 to 16:30
 - **Venue:** Silvertree Primary School hall (in person)
 - **Presenter (the Facilitator field):** Mrs Charmaine Adonis
 - **CPTD points:** 5
- **Tomorrow's workshop:** "TRAINING - Reading Recovery - delete after"
 - **Date and time:** Fri 09 Oct 2026, 09:00 to 12:00
 - **Bookings:** none

You made every booking on today's workshop the night before. All of them use loxly@lbtec.co.za except Xolani Ngcobo's school place, which uses <Trainee work email>, because a teacher on a school place cannot use an email that already has a paid booking on the workshop. Every other email lands in your inbox. None of the bookings she made earlier in the day is on this workshop.

11:50 • Find today's workshop and read the day at a glance (2 min)

Goal: She learns that on the workshop day one screen shows everyone who booked, sorted by what still has to happen to them. She now knows that the paid people she is waiting for sit in "Check in".

Who drives: Her screen. You talk.

Before you start:

- The workshop is "TRAINING - Classroom Management Essentials - delete after".
- Nobody is marked present yet, no certificate has gone out and the morning email has not been sent.

What happens:

1. She clicks the "All Registrations" tab.
2. She opens the "Workshop" select and picks:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
3. She reads the summary line out loud. It gives the date, 'In progress', the number of bookings, the paid seats, who still owes, and how many are checked in.
4. You say: "This screen sorts the workshop's people into groups. 'Owes money' is anyone who has not paid. 'Check in' is paid people we are still waiting for. 'Certificate to send' is people marked present.

'Done' is people who have their certificate or were marked absent. Cancelled bookings sit in 'Cancelled'."

5. She finds the paid bookings in "Check in". Today it is the first group.

She should see:

- In "Check in": Thandi Mokoena, Hennie Steyn, Palesa Khoza, Naledi and Xolani Ngcobo. Xolani is a teacher on a school place.
- In "Done": the Silvertree Primary School row, with 1 of its 2 places used.
- In "Owes money": Aisha Abrahams.

Cannot be undone: Nothing in this block.

If you are running late: Name the groups out loud yourself while she opens the workshop.

11:52 • Get the door ready and send the morning email (7 min)

Goal: She learns that the door QR is how paid people check themselves in, and that she can open check-in early to test it and then close it again. She now knows that the "Workshop starts today" email can only go on the workshop's own day and only reaches paid people. She also knows that a reminder before the workshop only goes out if a super admin has switched on "Workshop starting soon".

Who drives: Both. She works on her screen. You scan the QR with your phone.

Before you start:

- Your phone, ready to scan a QR.
- Your inbox open:
 - **Inbox:** loxly@lbtec.co.za
- Her account has the Workshop creator tick. That is the permission that lets a staff member run workshops. She needs it to open check-in early and to send the email. Anyone on staff in the province can open the dialog, copy the link and download the QR.

What happens:

Tomorrow's workshop: test the door QR

1. She opens Workshops and clicks the "Published Links" tab.
2. Under "Workshop list" > "Current & upcoming" she clicks the card for:
 - **Workshop:** TRAINING - Reading Recovery - delete after
3. In its link box she clicks "Check-in link & QR".
4. You say: "This is the door QR. It goes on the hall door. A paid person scans it, finds their own booking and presses "I'm present". It is a different QR from the "Booking link QR". That one goes on posters and emails, and it opens the booking and payment page."
5. She reads the dialog sentence out loud. It says people with a paid booking find their own booking and press "I'm present".
6. She clicks "Download QR".
7. She clicks "Copy" next to the check-in link.
8. In the 'Open check-in early' section she clicks "Open check-in now".
9. She reads the confirm text out loud:
 - **Confirm text:** Open check-in now? Attendees with a paid booking can check themselves in from now until the end of the workshop's last day.

10. She clicks "Yes, open check-in".
11. She turns her screen to you, or opens the QR file she downloaded.
12. You scan the QR with your phone.
13. You say: "That was only a test. Switch it off."
14. She clicks "Close check-in".

Today's workshop: send the morning email

15. She closes the dialog.
16. She clicks the card for:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
17. She clicks "Check-in link & QR" and reads the line 'Check-in is open now (workshop day).'
18. In the 'Email attendees on the day' section she clicks "Email check-in details to attendees".
19. She waits for 'Counting attendees...' to finish, then reads three lines:
 - **Count line:** This will email N paid attendees.
 - **Subject line:** the email's subject
 - **Format line:** how the workshop runs
20. Before she presses anything, she says out loud who is in that number and who is not.
21. You say, if she needs it: "Only paid people get it. 'Owes money' is the group of people who have not paid, so the unpaid booking there is left out. The school's row is left out too, because a school row is a payment for places, not a person. A teacher on a school place does get it, on his own row. The count line is the truth, so read it before you send."
22. She clicks "Send to N attendees".
23. She watches 'Sending 1 of N...', reads the result line and clicks "Done".
24. She clicks "Email check-in details to attendees" once more, to see that nothing new goes out.
25. She clicks "Close".
26. She opens your inbox and counts the new 'Today: ...' emails:
 - **Inbox:** loxly@lbtec.co.za
27. She checks that the number matches the count line, and says out loud that none of them is for Aisha.

She should see:

- After "Copy": the button reads "Copied" and the toast says 'Check-in link copied.'
- After "Download QR": a PNG file starting check-in-qr in her Downloads.
- After "Yes, open check-in": the toast 'Check-in is open. Attendees can check in now.' and the line 'Opened early by <your name> at <date time> (SAST). Attendees can check in now, until the end of the workshop's last day.' with a "Close check-in" button.
- On your phone: 'NAPTOSA workshop / Check in' and 'Check-in was opened early by the organiser.'
- After "Close check-in": the toast 'Check-in is closed until the workshop day.'
- After sending: a result like 'Sent N, failed 0.'
- On the second try: 'Already sent to all N attendees today. Nothing new to send.'
- In loxly@lbtec.co.za, one email for each paid person (Thandi, Hennie, Palesa and Naledi), and Xolani's in her <Trainee work email> inbox:
 - **Subject:** Today: TRAINING - Classroom Management Essentials - delete after starts at <time>
 - **What it says:** When you arrive, scan the QR code at the door to check in.

- **Link:** none, because this workshop is in person.
- No email for Aisha, who has not paid.

If it goes wrong:

- 'This email says the workshop starts today, so it can only be sent on the workshop day (<day>).': She opened tomorrow's workshop. The email only goes on the workshop's own day. Send it that morning.
- 'Set the workshop format (online, in person or hybrid) before emailing check-in details.': The format is still 'To be confirmed'. She opens "Edit details", goes to '2. Delivery & Pricing', sets 'How it runs', clicks "Save changes" and then sends.
- 'There are no paid attendees to email yet.': Nobody has paid. Payment is Finance's job. Do not work around it.
- 'Only a workshop creator for this province or a super admin can open check-in early.': Her account is missing the Workshop creator tick. Ask the super admin to open it, and tell the facilitator she will confirm when it is live.
- Names listed under 'Not sent': She presses the button again. It only retries the ones that failed. If the reason points to a wrong email address, fixing it is "Correct payer email", which is a Finance action.
- 'Copy failed. Select the link and copy it by hand.': She selects the link text in the dialog and copies it herself.
- 'This check-in link isn't valid' on the phone: The code scanned is not this workshop's check-in code, for example a damaged print or a mistyped link. Download the QR again from this dialog.

If she is asked for something the system cannot do:

- "Switch on 'Workshop starting soon' in Reminders so everyone gets a reminder tonight.": She cannot change the reminder settings. Her screen says 'You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor.' In the Western Cape that means a super admin. The rule stays off unless a super admin switched it on. When it is on, it emails each paid person once, before the workshop, the number of days before that is set, and it can be up to 15 minutes late. It never goes to unpaid people or to a school's booking address, and people who book after the reminder moment do not get it. For today's workshop, send the morning email. If something truly cannot wait, contact the people from her own mailbox.
- "Send the morning email tonight, or the day after.": It only goes on the workshop's own day. The day before, she can open check-in early so the facilitator can test the door QR, then close it again.
- "Put the check-in link in the email for an in-person workshop.": By design the in-person email says to scan the QR at the door and has no link. Print the door QR from "Download QR". The link is only for online and hybrid workshops.

Quick check (ask her): "Say the preview said 'This will email 4 paid attendees.' but the workshop showed 6 bookings. Who is left out, and why?"

- **Right answer:** Only paid people get it. The unpaid booking in 'Owes money' is left out. The school row is left out because it is money, not a person. A teacher on a school place does get it on his own row. Read the count line before you send.

Cannot be undone: The 'Today: ... starts at ...' email goes to every paid person on today's workshop (Thandi, Hennie, Palesa, Naledi and Xolani) and cannot be called back. Opening check-in early on tomorrow's workshop is undone with "Close check-in", and it must end closed.

If you are running late: Skip the second "Email check-in details to attendees" click and the inbox check.

11:59 · Charmaine's WhatsApp call from the hall door (12 min)

Goal: She learns that she can keep the register right from the office while the presenter phones in. She now knows that she can mark one person present and undo it, mark exactly two people at once, and mark a no-show absent. She now knows that marking an unpaid person present is not possible, that this goes to Finance, and that teachers on a school's places register themselves. She also knows whether a mark sends that person an email, and that this depends on two settings only a super admin can switch on.

Who drives: Both. She keeps the register on her screen. You play Charmaine on a WhatsApp voice call, and you use your phone to check Palesa in (and to play Lerato if there is time).

Before you start:

- Her screen: "All Registrations" open, with this workshop picked in the "Workshop" select:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
 - **Where and when:** in person, Silvertree Primary School hall, 08:00 to 16:30
- "Check in" is the first group. All Registrations sorts people into groups: 'Owes money' (not paid), 'Check in' (paid, not here yet), 'Certificate to send' (marked present) and 'Done' (certificate sent or marked absent).
- Your phone, for Palesa's check-in, the WhatsApp call and maybe Lerato.
- The Silvertree receipt email. It holds the school code and the 'Register a teacher' link. The school code lets a teacher register herself on one of the school's paid places.
 - **Inbox:** loxly@lbtec.co.za
- The learner card: the story, her role, what Charmaine can see, and the hints face down.
- Who is on the register. You marked these paid yourself, as Finance, beforehand:
 - Thandi Mokoena (member), paid
 - Hennie Steyn (non-member), paid
 - Palesa Khoza (member), paid, still in "Check in"
 - Naledi (member), paid, not in the room, stays in "Check in"
 - Silvertree Primary School, 2 places, paid, with teacher Xolani Ngcobo on one place
 - Aisha Abrahams booked to pay by EFT (a bank transfer) and has NOT paid
- The story runs today between 08:30 and 11:00. The times on screen show the real clock, not the story time.
- Whether the two attendance emails are on. You noted this during the setup, in Workshops > "Reminders" > "Reminder settings".
 - **"Thank you for attending":** goes to a person once they are marked present, by staff or by checking themselves in.
 - **"Sorry we missed you":** goes to a person once staff mark them absent.
 - **When they are On:** the email waits 10 minutes after the mark, then goes within the next 15 minutes. An "Undo" inside those 10 minutes sends nothing. Each booking gets one attendance email, ever, so a later correction sends nothing more.
 - **When they are Off:** marking present or absent sends no email. Both are Off unless a super admin switched them on.

Read her the brief: "You are the Workshop creator at the office. The facilitator at the venue calls you on WhatsApp while people arrive. Keep the register right from All Registrations. You do not have the Finance tick. Every request you get, ask yourself: is this mine to do, or do I hand it to Finance?"

The Finance tick is the permission that lets someone mark an EFT payment as paid. She does not have it. In the Western Cape nobody has it, so Finance here means the super admins. Today you hold it, as super admin.

You play: Mrs Charmaine Adonis, the presenter of this workshop, standing at the hall door with a queue. She is experienced, warm but rushed. She talks in short sentences, wants the queue moving and wants the door closed by eleven. She calls the trainee by her first name.

Open with: "Morning! Thandi Mokoena is here but her old phone won't scan. Please mark her present."
(Say it after Palesa's check-in below.)

Keep these to yourself until she asks:

- The first person was Thandi's sister dropping off her bag. Thandi herself walks in two minutes later with Hennie Steyn. (You say this yourself as the twist, right after she marks Thandi.)
- Aisha has no proof of payment on her phone yet. Only if she asks about proof or a payment reference.
- Aisha's EFT reference ends ABRAH. It comes from her EFT instructions email. Only if she asks for the reference. (Each booking gets its own payment reference so Finance can match the money on the bank statement.)
- Lerato Jantjies is a non-member and has her SA ID document with her. The school's email with the code went to the school office. Her deputy principal can WhatsApp her the 'Register a teacher' link. Only if she asks whether Lerato has the school code or link.
- Xolani sent no message and might still arrive late. Only if she asks whether you are sure he is not coming.

Stay inside these lines:

- Never say a real ID, PERSAL, NAP or cell number. If asked, use a placeholder such as <test ID number>.
- Never hand over real money or card details, and never ask her to type any.
- Never mention a button, email or automation that is not in this guide.
- Push for a moving queue, but accept a clear no. Do not coach or praise.

What happens:

Opening: Palesa checks herself in

1. You scan the door QR on your phone. The door QR is the QR on the hall door. It opens the check-in page, where a paid person finds their own booking.
2. You type the start of Palesa Khoza's surname. She booked as a member with only a <test member NAP number>.
 - **Surname:** at least 3 letters of Khoza
3. You tap the one masked suggestion, "This is me".
4. In the box 'Last 4 digits of your ID or PERSAL number, or your full email address' you type her full booking email. Last 4 digits will not work, because she has a NAP number and no PERSAL.
 - **Email:** loxly@lbtec.co.za
5. You press "I'm present".
6. She watches Palesa's row move from "Check in" to "Certificate to send", marked 'Self check-in'. If it has not moved after about 15 seconds, she clicks "Refresh".

Thandi, not Thandi, then both

7. You say: "Morning! Thandi Mokoena is here but her old phone won't scan. Please mark her present."

8. She clicks "Present" on Thandi Mokoena's row in "Check in". The row moves to "Certificate to send".
9. You say, fast, while her toast is still on screen: "No wait, that wasn't Thandi, it was her sister dropping off her bag. Take that off again."
10. She clicks "Undo" on the toast. The row goes back to "Check in". (After "Present" or "Mark absent" the toast has an "Undo" button for a few seconds only. Marking several people at once has no Undo.)
11. You say: "Right, now Thandi AND Hennie Steyn are both actually in the room. Do them both."
12. She ticks the checkboxes on Thandi's and Hennie's rows only. A dark bar shows '2 selected'.
13. She clicks "Mark 2 present".
14. She reads 'Update the 2 selected attendees?' in the confirm panel.
15. She clicks "Mark 2 attended".
 - If the toast vanished before she clicked "Undo": stay in character. Thandi walks in two minutes later anyway, so her 'Attended' mark is right again. She clicks "Present" on Hennie's row only.
 - If she reaches for "Mark all N present": let her read the count in the confirm panel. It would include Xolani and Naledi too. She can still click "Cancel" there. Once she confirms, there is no Undo.

Aisha says she paid

16. You say: "Aisha Abrahams is here too, she says she paid last night by EFT. Mark her present, I can't hold the queue."
17. She finds Aisha's row in "Owes money". It has no "Present" button, only 'Attendance opens once the EFT is marked paid'.
18. She tells Charmaine she cannot mark Aisha present, and that Finance marks an EFT paid.
19. You push once more: "Just this once, she's a teacher. She's got R250 cash in her hand. Can I just take it and you tick her?"
20. She says no to the cash and gives Charmaine a next step: Aisha sends proof of payment to the office, and she can sit in meanwhile.
 - If she messages you as Finance: you (as Finance) do NOT mark it paid. There is nothing on the bank statement. Nobody pays for a training booking.

The Silvertree teacher who never registered (optional if time is short)

21. You say: "Lerato Jantjies from Silvertree Primary arrived. The school paid for her but she says she never registered anything. What must she do?"
22. She finds the Silvertree Primary School row in "Done", marked 'Teachers check in on their own places'. A school row is the school's payment for a number of places. It is not a person. Each teacher registers on one of the places and gets their own row.
23. She clicks the underlined school name. 'Teachers on Silvertree Primary School's places' opens.
24. She reads how many places are used:
 - **Places used:** 1 of 2
25. She tells Charmaine: Lerato registers herself on her phone with the school's 'Register a teacher' link, or with the school code on the booking page, and then scans the door QR. She does not try to mark the school row present.
26. If there is time, you play Lerato. You open the Silvertree email on your phone and register her as a non-member:
 - **Email:** <Trainee personal email>
 - **SA ID:** the <test ID number> you prepared before the day (never a real ID)

- Never loxly@lbtec.co.za here. That address already has paid bookings on this workshop, and the page refuses a teacher whose email does: "This email already has a paid booking for this workshop."

27. She clicks "Refresh" and sees Lerato's own 'Paid by school' row appear in "Check in".

- If time is short, skip playing Lerato. Her explanation counts. If you skip this whole part, say the school-code route out loud in the debrief.

Eleven o'clock and Xolani has not come

28. You say: "It's eleven o'clock and Xolani Ngcobo from Silvertree hasn't pitched. Mark him absent so I can close the door."

29. On Xolani's row, still in "Check in", she clicks the "..." menu.

30. She clicks "Mark absent".

31. She tells Charmaine whether Xolani gets an email because of it. If "Sorry we missed you" is On, he gets 'We missed you at TRAINING - Classroom Management Essentials - delete after' 10 to 25 minutes later. If it is Off, he gets nothing.

32. You step out of character and say, as narrator: "Charmaine closes the hall door."

- If she asks whether you are sure he is not coming: tell her he might still arrive late. A good answer says that if he does, he can scan the door QR before 23:59 today, which overrides 'Absent', or staff can fix it in the Attendee ledger. The Attendee ledger is the full list of one workshop's bookings, under "Published Links", where each paid row's attendance can be changed at any time. If "Sorry we missed you" is On and the email has already gone, the fix sends nothing more, so she would tell him herself.

After the scene: show the late fix (point only, change nothing)

33. You say, as coach: "If the Undo toast has gone, this is where a wrong mark gets fixed."

34. She clicks "Published Links" and selects this workshop.

35. She expands 'Registrations, coupons and documents'.

36. She finds Thandi's row in the 'Attendee ledger' and points to its 'Attendance' select. It offers 'Not checked in', 'Attended' or 'Absent'.

37. She changes nothing. Thandi is in the room, so 'Attended' is correct, and the next scene needs her in "Certificate to send".

She should see:

- Your phone after Palesa's check-in: 'Thank you Palesa, you're checked in to TRAINING - Classroom Management Essentials - delete after' and 'You're marked present on the attendance register. You can close this page.'
- Palesa's row in "Certificate to send" reading 'Checked in <date and time> · Self check-in'.
- After "Present" on Thandi: the toast '<name> in <workshop>, ref <EFT reference>: marked attended.' with "Undo". (A teacher on a school place shows 'booked <date>' instead of the reference.)
- After "Undo": '...: marked not checked in.'
- After "Mark 2 attended": the toast '2 attendees marked attended.' with no Undo, and both rows in "Certificate to send" marked 'Staff'.
- After "Mark absent": the toast '...: marked absent.' with "Undo", and Xolani's row in "Done" as 'Absent (Staff)'.
- Aisha's row unchanged in "Owes money".
- If the attendance emails are On: 10 to 25 minutes after each mark, loxly@lbtec.co.za gets 'Thank you for attending TRAINING - Classroom Management Essentials - delete after' for Palesa, Thandi and

Hennie, and her <Trainee work email> inbox gets 'We missed you at TRAINING - Classroom Management Essentials - delete after' for Xolani. Thandi's first mark, undone within seconds, sends nothing extra.

- If they are Off: no email goes to anyone when she marks present or absent.

If she gets stuck: give one hint at a time.

- Thandi mix-up, first hint: "Before you fix the mistake, look at what is still on screen."
- Thandi mix-up, second hint: "Two people walked in. Which control touches exactly two rows?"
- Aisha, first hint: "Before you answer, decide whose job this is."
- Aisha, second hint: "Look at what her row offers you, and what it does not."
- Lerato, first hint: "A school row is money, not a person. Where do the people on its places show up?"
- Lerato, second hint: "Find out how many of the school's places are still free."
- Xolani, first hint: "Think about what happens if he walks in at half past eleven."
- Xolani, second hint: "Which menu holds the no-show option?"

If it goes wrong:

- Phone says 'That doesn't match this booking. 2 tries left.': The member booked with a NAP number and has no PERSAL, so last 4 digits will not work. Type the full booking email, or she marks them "Present" herself.
- Phone says 'Too many tries for that booking. Search again, or ask the NAPTOSA staff.': She marks them "Present" on the register.
- Phone says 'We found your booking, but it isn't paid yet. Please see the NAPTOSA staff at the registration desk.': Unpaid. Hand to Finance. She cannot mark them present.
- Phone says 'Keep typing your surname, add your first name, or use your ID, PERSAL or NAP number or your email.': There is no single paid match. Add the first name, use the booking email, or she checks the register herself.
- Red row text 'Could not save. Choose a status again to retry.' and a toast ending 'Try again on this row.': She tries the row again. If it says the booking is not paid or is cancelled, it is not hers to fix.
- "Mark all N present" is greyed out with 'Bulk check-in works one workshop at a time. Select a workshop above, or use Present on each row.': She picks one workshop in the "Workshop" select first.
- She clicked "Mark all N present" by mistake: a confirm panel opens first, so she clicks "Cancel". If she already clicked "Mark N attended", it covered everyone still in "Check in" for that workshop and has no Undo. She fixes each wrong row in "Published Links" > 'Attendee ledger' > the 'Attendance' select.
- A wrong 'Absent' after the toast has gone: nothing in the "Done" row's "..." menu fixes it. She uses the 'Attendance' select in the Attendee ledger. On the workshop day itself, the person scanning the door QR before 23:59 also changes a staff 'Absent' to attended.

If she is asked for something the system cannot do:

- "Switch on the emails that tell people they were marked present or absent.": She cannot change the reminder settings. Her screen says 'You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor.' In the Western Cape that means a super admin. Once a super admin switches on "Thank you for attending" and "Sorry we missed you", each booking gets one attendance email, ever, 10 to 25 minutes after the mark. A mark more than a day old is never emailed, so switching them on does not mail old registers. While they are Off and someone needs to know, she contacts them herself. A member who logs in to the portal sees 'You were marked absent, so there is no certificate. Attended? Contact the office.'

- "Fix that wrong 'Absent' from the Done row.": Once the Undo toast has gone, the "Done" row's "..."
menu has no attendance option. She goes to "Published Links" > the workshop > 'Registrations,
coupons and documents' > 'Attendee ledger' > the row's 'Attendance' select. On the workshop day, the
person scanning the door QR before 23:59 also changes it to attended.
- "Mark this unpaid person present, or take cash or card at the door.": Attendance only works on paid
bookings, and there is no door, cash or walk-in payment in the system. "Mark EFT paid" is Finance only.
Hand it to Finance: the person pays by EFT with the reference in their email, Finance marks it paid once
it is on the bank statement, and then she marks them "Present".

Cannot be undone: Attendance marks can be fixed later in the Attendee ledger, but the two-at-once mark
has no Undo. If the attendance emails are On, an email that has gone cannot be called back, and a fix
sends nothing new. If you play Lerato, her registration sends emails to her and to the school, and it uses
the school's last place.

If you are running late: Never drop this scene. Skip the Lerato part, or explain the school-code route in
words only.

Debrief:

1. "Walk me through the moment Charmaine said it was not Thandi. What did you click, and what would
you have done if the toast had already gone?"
 2. "Aisha was standing there with cash. In your own words, whose job was that, and what did you tell
Charmaine to do next?"
 3. "Why did you choose 'Mark 2 present' and not 'Mark all present'? What would the other one have done
here?"
 4. "Do you really know how to fix a wrong mark tomorrow morning, or does it just feel like you know?
Show me where you would go."
- **Right answer to question 3:** 'Mark all' marks everyone still in "Check in" for that workshop, including
people who are not there, and once confirmed it has no Undo. Tick just the two rows and use "Mark 2
present", or click "Present" on each row, whose toast has Undo.

How did she do?

- **Present and Undo on one person.** Done well when she clicked "Present" on Thandi, then "Undo" on
the visible toast, and the row went back to "Check in". Partly when she marked Thandi but missed the
Undo, or only undid it after help. Missed when she did not undo and could not say where a wrong mark
is fixed once the toast has gone.
- **Marking exactly two people.** Done well when she ticked two rows, used "Mark 2 present" > "Mark 2
attended" and saw '2 attendees marked attended.' Partly when both got marked, but one by one, or
after starting "Mark all" and cancelling. Missed when she used "Mark all present" and marked someone
who was not in the room.
- **Unpaid person handed to Finance.** Done well when she said she cannot mark Aisha present or take
cash, named Finance and gave a clear next step. Partly when she refused but did not name Finance or
give a next step. Missed when she tried to mark Aisha present, promised it, or agreed to take cash.
- **School teacher sent to the school code (only if you ran the Lerato part).** Done well when she read
the school's places and sent Lerato to the 'Register a teacher' link or school code, then the door QR.
Partly when she knew Lerato must register but could not say where or how. Missed when she tried to
mark the school row present or told Lerato she cannot attend.
- **No-show marked absent.** Done well when she used "Mark absent" on Xolani, the row read 'Absent
(Staff)', and she said correctly whether an email goes out (only when "Sorry we missed you" is On).

Partly when she marked him absent but got the email part wrong. Missed when she did not mark Xolani, or marked the wrong row.

12:11 • Thandi phones about her certificate (10 min)

Goal: She learns that certificates go out by themselves at 08:00 the morning after the workshop to everyone who paid and was marked present, that she can send one straight away, and that an issued certificate is final. She now knows that changing the name on a certificate is not possible, and that an unpaid person cannot get a certificate until Finance marks the payment paid.

Who drives: Both. First you issue Palesa's certificate on your second screen. Then you play Thandi on the phone while she works on her screen.

Before you start:

- **Workshop:** TRAINING - Classroom Management Essentials - delete after
- In the story it is 17:10, after the 16:30 end. The workshop then sits under the 'Closed archive' heading of the "Workshop" select. If you run this earlier in the day, it is still under current workshops. Certificates do not need the workshop to have ended.
- All Registrations sorts people into groups. 'Certificate to send' holds people marked present. 'Done' holds people who have their certificate or were marked absent. 'Owes money' holds people who have not paid.
- "Certificate to send" holds Thandi Mokoena and Hennie Steyn, marked in the last scene. Xolani is 'Absent (Staff)'. Aisha is still in "Owes money".
- The workshop carries:
 - **CPTD points:** 5. These are the professional development points SACE counts for teachers.
 - **SACE number:** <test SACE endorsement number>
- Automatic certificates cover this workshop. It ends at 16:30 today, after a super admin switched them on at 03:24 this morning. Anyone on it who is paid, marked present and still without a certificate gets one from 08:00 tomorrow. Naledi is never marked, so she gets none. Aisha is unpaid, so she gets none.
- Your inbox, open on a second screen or your phone. Thandi's emails land there, together with everyone else's on this workshop:
 - **Inbox:** loxly@lbtec.co.za
- The "CPTD points" tab, ready.
- The learner card.

Read her the brief: "You are the Workshop creator closing out the workshop. A member phones about her certificate. Issue certificates, prove what was sent, and be honest about what a certificate cannot do once it is issued."

When a certificate is issued, the name as booked, the workshop title, the dates, the facilitator, the CPTD points and the SACE number are copied onto it with a certificate number. Editing the workshop later never changes it, and it cannot be withdrawn. The dialog says 'This cannot be undone.'

Certificates also go out by themselves. At 08:00 the morning after a workshop's last day, everyone who paid and was marked present, and has no certificate yet, gets one by email. It goes once only. In "Published Links", the workshop's "Certificates" panel reads 'Automatic certificates, all provinces: On since 08 Oct 2026'. Only a super admin sees "Pause", "Resume" and "Run now", and "Run now" only shows once the workshop has ended. She can use "Issue now" on that panel for one person. It issues and emails at once, so she checks the name first.

You play: Thandi Mokoena, a member and primary school teacher. Friendly and chatty, a little anxious about her SACE points, and she will not let go of her name. She speaks quickly and repeats what matters to her. She has just got home. Her colleague Palesa already has a certificate in her inbox and Thandi has nothing yet.

Open with: "Hi, Thandi Mokoena, I was at the Classroom Management workshop today. Palesa already has her certificate in her inbox, where's mine?"

Keep these to yourself until she asks:

- She was booked as 'Thandi Mokoena'. She wants 'Thandiwe Mokoena-Sithole' because that is the name on her SACE profile. Only if she asks why the name matters.
- She needs the certificate tonight for a school claim. If she is offered "wait until it is fixed" or "issue now as booked", she chooses issue now as booked. Only once the trainee offers the choice.
- Aisha's EFT has still not been confirmed by Finance. Only if she asks whether Aisha has paid.
- She signs in to the member portal with the same email she booked with. Only if she asks which email Thandi uses for the portal. (Words only. No portal account exists.)
- She also did a workshop with another provider this year. Those points are not on NAPTOSA's system. Only if she asks how many points Thandi expected.

Stay inside these lines:

- Never say a real ID, PERSAL, NAP, SACE or cell number. If pushed, use a placeholder such as <test SACE number>.
- Never ask her to edit a PDF, or to send a certificate any way other than through the app.
- Never mention a button, email or automation that is not in this guide.
- Push for your name and your friend, but accept a clear and honest no. Do not coach or praise.

What happens:

Before the scene: you issue Palesa's certificate

1. You open "All Registrations", pick the workshop and open "Certificate to send".
2. You (as super admin) click "Send certificate" on Palesa Khoza's row only. Never use "Send all" here, because it would also take Thandi and Hennie.
3. You confirm. Palesa's row moves to "Done".

Her screen

4. She clicks "All Registrations" and picks the workshop in the "Workshop" select. After 16:30 it is under 'Closed archive'. Before that it is under current workshops.
5. She opens the "Certificate to send" group.

Where is mine, and fix my name first

6. You say: "Hi, Thandi Mokoena, I was at the Classroom Management workshop today. Palesa already has her certificate in her inbox, where's mine?"
7. You say: "Before you send it: my full name must read Thandiwe Mokoena-Sithole, not whatever you've got. Change it first, please."
8. She checks the name on Thandi's row before she clicks anything.
9. She tells Thandi that the certificate prints the name exactly as it was booked, that nobody can edit a booked name on screen, and that an issued certificate cannot be changed. She also says it would come by itself at about 08:00 tomorrow.

10. She offers two choices: log it with the system administrator and issue it later, or issue it now with the name as booked. She says plainly that waiting only helps if the name is fixed before 08:00 tomorrow, because the automatic run sends it then with the name as booked.
11. You (as Thandi) choose now, as booked, because you need it tonight for a school claim.
12. She clicks "Send certificate" on Thandi's row.
13. She reads the dialog:
 - **Title:** Issue and email a certificate for Thandi Mokoena?
 - **Line:** Thandi Mokoena will be emailed a certificate for TRAINING - Classroom Management Essentials - delete after. This cannot be undone.
14. She clicks "Send certificate" in the dialog.
15. She watches the button read 'Sending...', then reads the toast. The row moves to "Done".
 - If she clicks Send before dealing with the name: let it happen and stay in character. "So it says Thandi Mokoena? I asked you to change it." Use it in the debrief: issuing is final. Do not let anyone "fix" it any other way.

My friend Aisha needs hers too

16. You say: "And my friend Aisha Abrahams was in the room the whole day, she needs hers too."
17. She searches for Aisha:
 - **Search:** Abrahams
18. She finds the row in "Owes money". She tells Thandi no certificate is possible now, and names the order. First Finance confirms the EFT (the bank transfer) and marks it paid. Then Aisha's attendance is marked. Then the certificate is sent. She promises no date.

Hennie's certificate

19. You step out of character and say, as narrator: "Hennie Steyn's row is still in Certificate to send."
20. She checks that Hennie is the only row left in "Certificate to send". If anyone else is there (for example after a "Mark all" in the last scene), she does not use "Send all". She clicks "Send certificate" on Hennie's row only and skips to step 24.
21. She clicks "Send all 1" in the group header. The button shows the count.
22. In the confirm panel she reads two lines. The second must name only this workshop.
 - **Title:** Issue and email 1 certificate?
 - **Covers line:** This covers TRAINING - Classroom Management Essentials - delete after.
23. She clicks "Send 1". This is the only "Send all" on this workshop. It runs once and never again, in the practice log or anywhere else.
24. She opens your inbox and finds Thandi's certificate email. Palesa's and Hennie's are there too, so she checks that the attachment name ends with Thandi's initial and surname:
 - **Inbox:** loxly@lbtec.co.za
25. She opens the PDF and reads what is printed on it.

Does this count for my SACE points? (optional if time is short)

26. You say: "Does this count for my SACE points? How many did I get from you this year?"
27. She clicks the "CPTD points" tab.
28. She types in 'Search':
 - **Search:** Mokoena
29. She clicks Thandi's row to open it.

30. She reads back the workshop, the date, the 5 points, the SACE number and the certificate number. She says the SACE number is the one staff typed on the workshop. It is not a check with SACE.
- If she promises "yes, SACE accepts it", push in character: "So you're saying SACE has confirmed it?"
- If she asks why you expected more points: you also did a workshop with another provider, which is not on NAPTOSA's system.
- If you skip this part, the "CPTD points" tab is covered live at 12:21.

Send it one more time anyway

31. You say: "Okay, I see it now, thanks. Send it one more time anyway, to be safe."
32. In "Done", on Thandi's row, she clicks the "..." menu.
33. She clicks "Resend certificate email".
34. She reads the toast.
35. She tells Thandi to keep the email and to check Spam if it ever goes missing. She adds that it is also under Workshops in the member portal when Thandi signs in with her booking email.
36. You say, as narrator: "Thandi says thanks and hangs up."
37. You step out as coach and give her one highlight and one thing to improve.
- If she asks which email Thandi uses for the portal: it is her booking email, so the portal will show 'Download certificate'.

She should see:

- After Thandi's certificate: the toast 'Certificate CERT-WS-<date>-<SC>-<INITIAL+SURNAME> issued. Emailed to the attendee.' and the row in "Done". The certificate number is built from the date, the workshop's short code (SC) and the person's initial and surname. The short code is a code of up to 6 letters the system builds from the workshop title.
- After "Send 1": the toast '1 certificate issued.' It says 'certificates' when more than one goes.
- "Certificate to send" reads 'No certificates waiting to be sent.'
- Rows in "Done" read 'Attended (Staff) · Certificate CERT-WS-... issued'.
- In loxly@lbtec.co.za, Thandi's email:
 - **Subject:** Certificate of Achievement - TRAINING - Classroom Management Essentials - delete after
 - **What it says:** Your Certificate of Achievement is attached to this email as a PDF.
 - **Attachment:** Certificate - TRAINING - Classroom Management Essentials - delete after - <Initial Surname>.pdf
 - **On the PDF:** her name, the workshop title, the dates, the facilitator, the CPTD points and the SACE number when one is set.
- If "Thank you for attending" is On, the inbox also holds 'Thank you for attending ...' emails. They say the certificate comes at 08:00 the morning after the workshop. Sending it sooner is fine.
- After the resend: 'Certificate email was already delivered, so it was not sent again.'

If she gets stuck: give one hint at a time.

- The name, first hint: "Read the dialog before you confirm. What does it say about changing things later?"
- The name, second hint: "She asked you for a change. Is there anywhere in the app you could make it?"
- Aisha, first hint: "Find Aisha before you answer. Which group is she in?"
- Aisha, second hint: "A certificate needs two things to be true first. Which ones?"
- Points, first hint: "There is a tab that totals points per person."

- Points, second hint: "Say only what the screen shows. Do not promise what SACE will do."
- Resend, first hint: "Think about where she can find it again without calling you."
- Resend, second hint: "The row's '...' menu in Done has the option you need."

If it goes wrong:

- A warning that stays on screen, saying the certificate was issued but the email did not send: She goes to "Done", opens the row's "..." menu and chooses "Resend certificate email". A failed row also shows a red '... Certificate email failed' and an outline "Resend certificate email" button.
- 'Certificate email could not be sent. <reason>' on resend: She reads the reason. A bad address needs "Correct payer email", which is a Finance action.
- An error starting 'certificate: ... has not paid for this workshop': The person is unpaid. Finance first, then attendance, then the certificate.
- An error starting 'certificate: ... is not marked as attended': She marks them "Present" first.
- The 'This covers ...' line names more than one workshop: She clicks "Cancel", picks this workshop in the "Workshop" select and tries again.
- She cannot find a person in "Certificate to send": They are unpaid ("Owes money"), not marked present ("Check in"), absent or already sent ("Done"), or it is a school row. Schools never get certificates. Teachers get them in their own names.
- Watch out for the ledger button. The Attendee ledger is the full list of the workshop's bookings, under "Published Links". Its "Issue & email certificate" button sends straight away, with no 'This cannot be undone' dialog. Check the name before clicking it.

If she is asked for something the system cannot do:

- "Send the automatic certificates tonight, or change their 08:00 time.": The time is fixed at 08:00 the morning after the last day, for all provinces, and nobody can change it. To send tonight, she uses "Send certificate" on each row or "Send all N" for the workshop. "Run now" on the "Certificates" panel is for a super admin only, and only once the workshop has ended.
- "Withdraw a certificate, or change the name, points, SACE number or dates on one already issued.": Issuing is final ('This cannot be undone.'). Those facts are frozen when it is issued, and editing the workshop later never changes them. No screen lets any staff member edit a booked name, super admin included. Check the name before issuing. If it is wrong, do not issue. Log it with the system administrator as a data fix, and issue once it is fixed. The automatic run sends it at 08:00 the morning after with the name as booked, so the fix has to happen before then.
- "Keep the booking link open for late bookings the day after the workshop.": It cannot. At 00:05 tonight the nightly run closes every workshop that ended before midnight, this one included. After that, new bookings are refused, an unpaid booking can no longer get EFT details or pay by card, and its payment reminders stop. Pressing "Reopen registrations" on it is undone at the next 00:05 run. Until tonight's run, after 16:30 the website's Events page drops the workshop on its own, but the booking link and its QR code still take bookings. In "Published Links" the workshop moves to "Needs closure", which reads 'N past dates still open'. To stop bookings sooner she selects it there and clicks "Close registrations". She can, because she has the Workshop creator tick, and so can a super admin. The workshop then moves to "Closed archive" and keeps every booking, payment, attendance mark and certificate.
- "Link my portal account to a booking made with another email, so my certificate shows in the portal.": The portal only matches the confirmed sign-in email, and the staff tool to link them is not built. She finds the person in All Registrations, uses "Resend certificate email" to the booking address, and helps by phone or email.

- "Show me how an online or hybrid attendee gets the joining link, and the check-in link in their morning email.": Not practised today. This workshop is in person, so its email has no link. It is the first self-paced follow-up lesson. Until she has done it, she asks the facilitator before setting up an online or hybrid workshop.

Cannot be undone: Palesa's certificate (issued by you), Thandi's and Hennie's are issued for good. The name as booked, points, SACE number and dates are frozen, the certificates cannot be withdrawn, and the emails cannot be called back. "Send all" runs once on this workshop, never again. The resend sends nothing new.

If you are running late: Never drop this scene. Skip the SACE points question, because the 12:21 block covers it.

Debrief:

1. "When Thandi asked for her name to change, what did you say before you clicked? What is frozen on a certificate when it is issued?"
 2. "Who may click Send certificate, and what could you not undo afterwards?"
 3. "Aisha's certificate: in your own words, in what order do things have to happen, and whose job is the first step?"
 4. "Do you really know what the 'This covers' line protects you from, or does it just feel like you know?"
 5. "Before we close: online and hybrid joining links were not practised today. Which self-paced lesson covers them?" Right answer: the first follow-up lesson. Tell her now that it is held over for later.
- **Extra check:** "You just sent Thandi's certificate. What was frozen on it, and what happens if someone edits the workshop's CPTD points tomorrow?" Right answer: her name exactly as booked, the workshop title, the dates, the facilitator, the CPTD points, the SACE number and the certificate number. Editing the workshop tomorrow changes nothing on her certificate, and it cannot be withdrawn.

How did she do?

- **Name settled before issuing.** Done well when she explained the name as booked, that there is no on-screen edit and that the certificate is final, and offered both choices before clicking. Partly when she explained it only after clicking "Send certificate". Missed when she promised to change the name, or issued without dealing with it.
- **One certificate sent and checked.** Done well when she clicked "Send certificate", read 'This cannot be undone.', confirmed, and saw the toast and the row in "Done". Partly when she sent it but did not read the dialog or check the toast. Missed when she did not send it.
- **Send all checked against the workshop.** Done well when she checked only Hennie was left and read 'This covers TRAINING - Classroom Management Essentials - delete after.' before "Send 1", then saw '1 certificate issued.' Partly when she sent all without reading the 'This covers' line. Missed when she did not send the remaining certificate.
- **Unpaid friend refused honestly.** Done well when she found Aisha in "Owes money", said no and named the order with Finance first. Partly when she said no but could not say why or who. Missed when she promised Aisha a certificate.
- **Points read (only if you asked) and resend handled.** Done well when she read Thandi's line in "CPTD points", used "Resend certificate email" and explained the 'already delivered' toast and the portal. Partly when she did one of the two, or promised SACE would accept it. Missed when she did neither.

12:21 • Export the register and read someone's points (2 min)

Goal: She learns that she can export the register herself, and that her file never has money in it. She now knows that the full export with amounts is not possible from her login. Finance runs that one. In the Western Cape that means the super admins, because nobody here has the Finance tick and there is no auditor. She also learns where a person's CPTD points show.

Who drives: Her screen.

Before you start:

- "All Registrations" open.
- **Workshop:** TRAINING - Classroom Management Essentials - delete after

What happens:

1. She clicks "Export Excel" in the All Registrations toolbar.
2. In the 'Export Excel' dialog she types the workshop name in 'Find a workshop' and ticks only:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
3. She leaves 'Member type' as it is:
 - **Member type:** All registrations
4. You point out that there is no 'Payment' filter on her screen.
5. She reads the note out loud. It says 'A school booking is one row, with every teacher who used its code listed beneath it.' It ends: 'This file has no financial data: no amounts, payment details, invoice or receipt numbers. A Finance user can export the full report.'
6. She reads '<n> registrations match these filters'.
7. She clicks "Download Excel".
8. She opens the file and names the sheets: About this report, Summary, Registrations, Attendance register, CPTD points.
9. She shows that Amount, Payment status, invoice numbers and receipt numbers are not there. The Registrations sheet has 'Booking status' instead.
10. Optional, skip if time is short: back on the desk she clicks "More filters" and sets:
 - **Attendance:** Attended
11. She checks the 'Filtered:' line and clicks "Export N (CSV)".
12. She clicks the "CPTD points" tab.
13. In 'Search' she types a surname from today, for example:
 - **Search:** Mokoena
14. She clicks the person's row and reads the date, the points, the SACE number and the certificate number.

She should see:

- The button reads 'Preparing Excel...', then the toast 'Excel download started.'
- **Excel file name ends:** -no-financial-data-<date>.xlsx
- **CSV file name:** registrations-<workshop>-no-financial-data-<date>.csv, with only the attended rows.
- In "CPTD points": '<n> attendees. Select a person to see each workshop.' After she opens a row, one line per workshop with 'CPTD points', 'SACE number' and 'Certificate number'.

If it goes wrong:

- 'Choose at least one workshop.': She ticks a workshop in the list.

- 'Workshop data could not be loaded. No file was exported.': She clicks "Retry loading".
- 'Excel export failed. Please retry the download.': She clicks "Download Excel" again.
- The CSV has other workshops' people in it: The CSV exports exactly the rows on screen. She sets the "Workshop" select and the filters first.
- "CPTD points" says 'No CPTD points yet. A workshop counts once the attendee is marked attended and their certificate is issued.': The person is not marked attended or has no certificate yet. Go back to the register.
- Someone asks her for amounts or receipt numbers: She does not type them in from the screen. She asks Finance to run the full export from their own login. In the Western Cape that is a super admin.

If she is asked for something the system cannot do:

- "Send Finance a report with amounts, payment status and receipt numbers.": Her export has no money columns. Only Finance gets the full version, and in the Western Cape Finance means the super admins. She sends her attendance register if it helps, says it has no amounts, and asks Finance to run "Export Excel" from their own login. She never types the amounts in by hand.

Quick check (ask her): "Whose job is the full export with amounts and receipt numbers, and what do you send when someone asks you for it?"

- **Right answer:** Finance runs it from their own login. In the Western Cape that is a super admin, because nobody here has the Finance tick and there is no auditor. She can send her no-money export as the attendance register, saying it has no amounts. She never types amounts in by hand.

Cannot be undone: Nothing in this block. These are downloads only.

If you are running late: This block is fifth on the list of things to drop. Skip it, because the last big exercise of the day (you play the Provincial CEO) repeats the export. Or skip only the optional CSV step.

12:23 • Self-check quiz (2 min)

Goal: She now knows that any staff member except read-only and bot accounts may send a certificate. She learns that an unpaid person with cash at the door goes to Finance, not onto the register.

Who drives: Her. You read each situation and the choices, and she answers.

Before you start:

- Two words she needs. The Finance tick is the permission that lets someone mark an EFT payment as paid. EFT is a bank transfer, and each booking has its own reference so Finance can match the money on the bank statement. In the Western Cape, Finance means the super admins.

Question 1

- **Situation:** Two people sit in "Certificate to send". A colleague who is a case manager (not read-only, no Finance tick) asks if she may send them while you are on a call.
- **Question:** What is true?
- **Choices:**
 - A. Only Finance may send certificates, and they can withdraw one later.
 - B. Only the super admin may send them, because CPTD points are printed on them.
 - C. Any staff except read-only and bot may click "Send certificate". Once issued it cannot be undone, and later workshop edits never change it.
 - D. Only the creator who built the workshop may send them, and a second click deletes the first one.

- **Right answer:** C. She may send them. Ask her to check the names first, because the name as booked is frozen on the certificate. If nobody sends them, they go out by themselves at 08:00 the morning after the workshop.
- **Why the others are wrong:**
 - A: Certificates need no Finance tick, and none can be withdrawn. The dialog says 'This cannot be undone.'
 - B: Points on the certificate do not change who may click. Any staff except read-only and bot may.
 - D: Any staff except read-only and bot may send, and nothing deletes an issued certificate. "Resend certificate email" only sends the email again.

Question 2

- **Situation:** A teacher at the door says she paid by EFT last night. Her row is in "Owes money" with 'Attendance opens once the EFT is marked paid'. She offers R250 cash.
- **Question:** What do you do?
- **Choices:**
 - A. Take the cash and click "Present". Finance can sort out the money later.
 - B. Hand it to Finance: ask her to email proof of payment, and once Finance has marked the EFT paid, mark her "Present". She can go in and sit down meanwhile.
 - C. Ask Finance to mark her paid now because she promised.
 - D. Send her away. Unpaid people may not attend.
- **Right answer:** B. "Mark EFT paid" is Finance only, and Finance marks it once the reference shows on the bank statement. Then attendance opens and she marks her present.
- **Why the others are wrong:**
 - A: Her row has no "Present" button, and there is no cash or door payment in the system.
 - C: "Mark EFT paid" sends a receipt straight away and cannot be undone. Finance only marks it when the money is on the statement.
 - D: Whether she may sit in is not something the app decides. The app only blocks marking her present until Finance confirms payment.

Cannot be undone: Nothing in this block.

If you are running late: Move both questions into the workbook.

Part 7: Capstone, one workshop end to end, and the close (12:25 to 13:10)

This is the last part of the day. She runs one brand-new workshop from start to finish on her own, from her own planning sheet. You play the Provincial CEO, the member who books, and Finance. Then you debrief, and she writes down what she learned.

12:25 · Hand over the capstone brief and checklist (2 min)

Goal: She learns what the whole job looks like before she touches the app: one workshop, from her planning sheet to closed record, today. She now knows where her line is. Anything about money goes to Finance.

Who drives: She does, on her own laptop. You read the brief out loud and hand her the sheets.

Before you start: you set this up before 12:25, not her.

- The past workshop is waiting. "TRAINING - Term 3 Curriculum Planning - delete after" is already published with past dates and has no bookings.
 - **Start:** 01 Oct 2026, 09:00
 - **End:** 01 Oct 2026, 12:00
 - **Where it sits:** under "Needs closure"
- "Needs closure" is a group on the "Published Links" tab. It holds workshops whose dates have passed but whose booking link is still open.
- Your second screen is signed in as super admin. The booking values are on your facilitator card. The moment her link arrives in the next block, you fill in the booking up to the payment step.
- The printed one-page brief, the 12-line completion checklist and her printed capstone "Workshop planning sheet" are ready.
- Her start-of-day prediction sheet is face down on the table.

What happens:

1. You hand her the one-page brief.
2. You read the brief out loud:
 - **Goal:** run one workshop from her planning sheet to closed record, today.
 - **Your role:** Workshop creator, without the Finance tick.
 - **Who it is for:** members who book, the presenter, Finance and the Provincial CEO.
 - **The workshop:** a new one from her own planning sheet, titled "TRAINING - Capstone Run - delete after", dated today, in person, small capacity, EFT only.
 - **What done looks like:** published and shared, one booking followed, the payment handed to Finance, the "Workshop starts today" email sent, attendance marked, a certificate issued, an export downloaded, management questions answered, and registrations closed on this workshop and on every other TRAINING workshop (the clean-up).
 - **The standard:** the completion checklist.
3. You explain the Finance tick in one line: it is an extra permission on a staff account, and without it she cannot see money buttons like "Mark EFT paid". In the Western Cape nobody has the Finance tick today and there is no auditor, so Finance here means the super admins.
4. You read the anchor question out loud: "Is this mine to do, or do I recognise it and hand it to Finance?"

5. She writes "mine" or "Finance" next to each checklist line. No notes, no looking things up.
6. She turns the sheet face down. You keep it for the debrief.
7. She signs in on her own Western Cape staff account.
8. She opens the Workshops page.
9. She checks the tab bar. It should show these six tabs:
 - "Create Workshop"
 - "Published Links"
 - "All Registrations"
 - "Analytics"
 - "Reminders"
 - "CPTD points"

The completion checklist she ticks during the run. A line is done only when she can see the result on screen, not when she thinks she clicked it.

1. Toast "Workshop created." and the workshop sits under "Drafts".
2. Toast "Workshop link is active. Registrations are open."
3. Toast "Application link copied."
4. The booking row sits in "Owes money".
5. She said the hand-off sentence to Finance and saw Finance's toast.
6. The row sits in "Check in" and shows "Paid R 250,00 · EFT".
7. The check-in email result line starts with "Sent 1".
8. A toast ending "marked attended."
9. Toast "Certificate CERT-WS-... issued. Emailed to the attendee."
10. Toast "Excel download started."
11. She answered management from the right screens.
12. Toast "Registrations closed. The application link is inactive." for the capstone workshop, for "TRAINING - Term 3 Curriculum Planning - delete after" and for every other open TRAINING workshop. All of them sit in "Closed archive".

The checklist uses a few group names. A toast is the short message that pops up after a click. "Drafts" holds workshops that are not published yet. "Owes money" holds bookings that are not paid yet. "Check in" holds paid bookings waiting for the day. "Closed archive" holds closed workshops, with all their records kept.

She should see:

- The tab bar with "Create Workshop" in it. Only workshop creators see that tab.
- Her own written guess of which steps are hers and which are Finance's, kept face down until the debrief.

If it goes wrong:

- No "Create Workshop" tab: her account is missing the "Workshop creator" tick. That tick is the permission that lets her create and run workshops. You fix it on the second screen in Settings > "Roles & Permissions" > "Staff Access Management" > "Provincial Roles". Then she reloads the page. The change only shows after a reload.
- She sees workshops from other provinces: she is on the wrong account. Only the super admin sees other provinces. She signs out and signs in with her own Western Cape login.

Cannot be undone: Nothing in this block.

If you are running late: Hand over the checklist and read only the end task and the role line.

12:27 · The capstone: her own workshop, from planning sheet to closed record (25 min)

Goal: She learns that she can run a whole workshop by herself, from her own planning sheet, from "Create workshop" to "Close registrations", with no hints. She realises that every money step stops with her and goes to Finance. She now knows that a workshop with a payment on it cannot be deleted, that nothing is refunded in the system, and that closing is the answer and keeps every record.

Who drives: Both of you. She drives her own laptop for every step except two. You drive the second screen for those two: you book as the member, and you mark the payment as Finance. Never hand her the second screen.

Before you start:

- Her laptop is signed in on her own Western Cape account, with the Workshops page open.
 - **Workshop creator tick:** ON
 - **Finance tick:** OFF
- The Workshop creator tick lets her create and run workshops. The Finance tick is the extra permission that shows money buttons like "Mark EFT paid". She does not have it.
- Your second screen is signed in as super admin. The facilitator inbox loxly@lbtec.co.za is open on it, so you can show her each email as it lands.
- Your facilitator card has these values filled in:
 - **Capstone start time:** 13:00
 - **Training venue address:** written on your card
 - **Test member NAP number for Sizwe Dube:** written on your card
 - **Facilitator test cell number:** written on your card
- Her printed "Workshop planning sheet" for the capstone is on the table, with these values filled in:
 - **Title:** TRAINING - Capstone Run - delete after
 - **Member price:** R 250
 - **Non-member price:** R 400
 - **Capacity:** 5
 - **How it runs:** In person
 - **Venue and address:** the training venue address from your card
 - **Start:** today, 08 Oct 2026, 13:00
 - **End:** today, 08 Oct 2026, 16:00
 - **CPTD points:** 2
 - **SACE endorsement number:** none
- "TRAINING - Term 3 Curriculum Planning - delete after" sits under "Needs closure" with no bookings. "Needs closure" is the group for workshops whose dates have passed but whose booking link is still open.
- Finance has been told that marking this booking paid writes a real invoice number and receipt number (INV and RCT) from the shared counter.

- You have a list of every TRAINING workshop still open at 12:25, so you can check the clean-up at the end:
 - "TRAINING - Capstone Run - delete after" (once she creates it)
 - "TRAINING - Term 3 Curriculum Planning - delete after"
 - "TRAINING - Classroom Discipline - delete after"
 - "TRAINING - Chasing the money - delete after"
 - "TRAINING - Conflict Resolution Skills - delete after"
 - "TRAINING - Positive Discipline Follow-up - delete after"
 - "TRAINING - Classroom Management Essentials - delete after"
 - "TRAINING - Reading Recovery - delete after"
- The checklist is on the table next to her. Her prediction sheet stays face down.
- The setting: today is 08 Oct 2026, and this is the real production staff app. EFT only. Nobody uses a card today.

Read her this brief before you start:

> "You are the Workshop creator and you do not have the Finance tick. This afternoon's workshop is on your own planning sheet. Run it today, from setting it up to closing it. Do every step yourself in the real app on the TRAINING workshop. When a step is about money, say who does it and pass it on. Your checklist is on the page beside you. Try it before you look anything up."

You play: three people, and you say which one is talking.

- **The Provincial CEO.** Her senior manager. Warm but rushed. He talks in short bursts between meetings. He wants results and numbers, not explanations. He is not technical, and he assumes the system can do anything a person could do by hand. He knows this afternoon's workshop is on her programme. He wants the link, a member ticked off as paid, numbers for his exco call, and the training clutter gone from the website.
- **The Narrator.** You say short scene lines, like "A booking comes in on the link you sent."
- **Finance.** You say "Finance:" out loud before you click anything as Finance.

Open with: (as Narrator) "This afternoon's workshop is on your planning sheet. Set it up and publish it."

Keep these to yourself until she asks:

- There is no poster yet. The presenter may send one later. Say this only if she asks about a picture or a poster.
- The member who "paid" only sent the CEO a screenshot. Nobody has checked the bank statement. Say this only if she asks whether the payment shows in the bank or whether there is proof.
- The member has arrived and is sitting in the venue. He walked in five minutes ago. Say this only if she asks whether he is actually there before she marks attendance.
- The real reason the CEO wants the TRAINING workshops deleted: he does not want them on the website. Say this only if she asks why.
- Nobody booked or paid for "TRAINING - Term 3 Curriculum Planning - delete after". Say this only if she asks or checks.

Rules for you while in character:

- Never ask for or give a real card number, SA ID, PERSAL, NAP or cell number. Use only the values on your facilitator card.

- Talk only about the TRAINING workshops. Never ask her to edit, publish, book or close a real workshop or another province's workshop.
- Never invent a button, email or automation. Never say "the system will email them" or "just delete it in Settings".
- Never coach, grade or hint while you are the CEO. Push for what you want (speed, a tick, a deletion, a refund) and live with her answer.
- EFT only. Never ask her to try card or PayFast.

What happens:

Scene part 1: "Set it up from your planning sheet"

1. You say the opening line as Narrator.
2. She reads her planning sheet. Every value she types comes from it. If she skips the CPTD line, the form stops her with "Enter the CPTD points, or tick No CPTD points for this workshop." Let the app teach her that.
3. She checks the sheet for anything missing before she starts. There is no poster on it.
4. She clicks the "Create Workshop" tab.
5. In "1. Details & Scheduling" she types:
 - **Title:** TRAINING - Capstone Run - delete after
 - **Short code:** she accepts the one the system suggests, or types her own of up to 6 letters or digits
 - **Description:** a short description in her own words
 - **Start:** today, 08 Oct 2026, 13:00
 - **End:** today, 08 Oct 2026, 16:00 (at least 3 hours after the start)

The short code is a code the system suggests from the title. It becomes part of the EFT payment reference people use when they pay.

6. In "2. Delivery & Pricing" she fills in:
 - **Non-member price in ZAR:** 400
 - **Member price in ZAR:** 250
 - **How it runs:** In person
 - **Venue and address:** the training venue address on her planning sheet
 - **Capacity:** 5
7. In "3. Certificate & SACE Accreditation" she fills in:
 - **CPTD points:** 2
 - **SACE endorsement number:** leave it empty, because her planning sheet says none

CPTD points are the professional development points the attendee gets on the certificate.

8. In "4. Documents & Media" she adds nothing. There is no poster yet. She never uploads a test or placeholder picture. A file can be taken off later with "Remove", but the removal cannot be undone and the wrong picture sits on the booking page until then. If she wants to upload a test picture anyway, you stay in character and say "Whatever you think." You raise it as a coach point in the debrief.
9. She clicks "Create workshop". The toast reads "Workshop created." The app takes her to "Published Links" with the new workshop selected under "Drafts". "Drafts" holds workshops that are not published yet.
10. She clicks "Publish workshop" in the workshop header. A draft publishes with no confirm box.

11. You (as the CEO) say: "Morning. Can you send me the link for this afternoon's workshop? I'm between meetings, so quickly please."
12. She clicks "Copy link" next to the "Application link".
13. She sends you the link. She can paste it into a chat or an email to loxly@lbtec.co.za.
14. You open the link on the second screen the moment it arrives. Do not tell her. This saves time in part 2.
15. You (as the member) click "Continue".
16. You choose "Individual".
17. You choose "Yes, member rate R 250,00".
18. You type the number in the field "NAP number (preferred) or SA ID number":
 - **NAP number:** the test member NAP number for Sizwe Dube on your card
19. You click "Continue".
20. You fill in the booker's details:
 - **Name:** Sizwe
 - **Surname:** Dube
 - **Email address:** loxly@lbtec.co.za
 - **Cell phone number:** the facilitator test cell number on your card
 - **PERSAL number (optional):** leave it empty
21. You click "Save details and continue". The toast reads "Invoice and receipt details saved. Continue to payment." You stop on the payment step and wait for part 2. Do not pick a payment method yet.

Scene part 2: "Just tick him off as paid"

22. You (as Narrator) say: "A booking comes in on the link you sent."
 23. You choose "EFT" on the second screen. Never "Card (demonstration)".
 24. You click "Send EFT instructions". Your screen now shows "EFT INSTRUCTIONS SENT", the bank details and the reference under "REFERENCE (USE THIS EXACTLY)". This is the reference Sizwe would put on his bank transfer so Finance can match the money to his booking. It looks like EFT-, then the short code, then a number, then the start of the surname, so this one ends in -DUBE. The bank details are for training only. Never pay them.
 25. You (as the CEO) say: "One of my members has just booked. He says he's paid already. Just tick him off as paid so he gets his receipt, I don't want him phoning me."
 26. She clicks the "All Registrations" tab.
 27. She opens the "Workshop" select and chooses "TRAINING - Capstone Run - delete after".
 28. She finds Sizwe Dube's row in the "Owes money" group. "Owes money" is where every booking that has not been paid yet sits.
 29. She tells you she cannot mark an EFT paid herself, and that Finance checks it against the bank statement first.
 30. She says the hand-off sentence to Finance. It must have four things in it:
 - **Name:** Sizwe Dube
 - **Workshop:** TRAINING - Capstone Run - delete after
 - **Amount:** R 250,00
 - **EFT reference:** the one shown on his row
- For example: "Finance, Sizwe Dube booked the Capstone Run for R 250,00 by EFT, reference EFT-...-DUBE. Please check the bank and mark it paid."

If she wavers before she says it, you say in a colleague's voice: "So I just look for the paid button, right?"

31. Only after she has said the hand-off, you say "Finance:" out loud.
32. You (as Finance) go to "Owes money" on the second screen and click "Mark EFT paid" on Sizwe's row.
33. You read the dialog and click "Mark paid and send receipt".
34. You show her the receipt email in the inbox.
35. She clicks "Refresh" at the right of the tab bar. On a narrow screen only its icon shows.
36. She finds Sizwe's row again, now in the "Check in" group. "Check in" holds paid bookings waiting for attendance on the day.

If she asks whether there is proof of payment or whether it shows in the bank, you tell her the member only sent the CEO a screenshot.

Scene part 3: "Get them in and certified today"

37. You (as the CEO) say: "The facilitator starts soon. Do people know where to go? And I want certificates out today, not next week. Also send me a list of who came."
38. She goes to the "Published Links" tab and selects "TRAINING - Capstone Run - delete after".
39. She clicks "Check-in link & QR".
40. Under "Email attendees on the day" she clicks "Email check-in details to attendees".
41. She reads the count line and the Subject line.
42. She clicks "Send to 1 attendee" and waits for the result line.
43. She clicks "Done".
44. You show her the "Today: ... starts at ..." email in the inbox. Because the workshop is in person, it tells the attendee to scan the QR code at the door, and it has no joining link.
45. She should ask you whether Sizwe is actually in the room. Only if she asks, you say: "He walked in five minutes ago." If she clicks "Present" without asking, let it stand and mark it partial in the debrief.
46. She goes to "All Registrations", opens the "Check in" group and clicks "Present" on Sizwe's row. The attendance emails are switched off by default, so this sends no email today.
47. She tells you certificates go out by themselves at 08:00 the morning after the workshop, to everyone who paid and was marked present. The CEO wants it today, so she sends Sizwe's now. Tomorrow's automatic run skips him, because nobody gets a second one. If she wants proof, she points at the "Certificates" panel on the workshop in "Published Links": "Automatic certificates, all provinces: On since 08 Oct 2026".
48. In the "Certificate to send" group she clicks "Send certificate" on Sizwe's row. "Certificate to send" holds people marked present who still need their certificate.
49. She reads the dialog and checks that the name is spelt right. A certificate keeps the name it was issued with.
50. She clicks "Send certificate" in the dialog.
51. You show her the "Certificate of Achievement - ..." email in the inbox, with the PDF.
52. In "All Registrations" she clicks "Export Excel".
53. She clicks "Clear" in the export dialog.
54. She ticks only one workshop and leaves the member filter alone:
 - **Workshop:** TRAINING - Capstone Run - delete after
 - **Member type:** All registrations (leave as it is)

55. She reads the note in the dialog and clicks "Download Excel".

56. She tells you the version with money in it belongs to Finance.

If she goes to the "Reminders" tab or the "Workshop starting soon" rule, you stay in character and say "So they'll get it?" The coach point for later: this rule is switched off. In the Western Cape only a super admin can switch it on. Once it is on, it emails each paid attendee once before the workshop, but never someone who booked after the reminder moment. So Sizwe would not get it today either way.

Scene part 4: "Numbers, then get rid of it"

Ask each question on its own, then wait for her answer before you ask the next one.

57. You (as the CEO) say: "Quick one before my exco call: how many people actually came, and how many paid?"

58. She goes to "All Registrations" and chooses "TRAINING - Capstone Run - delete after" in the "Workshop" select.

59. She reads you the summary line (date range, status, bookings, paid seats, how many owe, checked in) and the summary of the "Done" group. "Done" holds people who attended and got their certificate.

60. You say: "Were we near full?"

61. She clicks the "Analytics" tab and reads "Workshop trends": the "Attendance", "Payment completion" and "Revenue collected" cards and the "Capacity pressure" list.

62. She tells you these cards add up every workshop in the province, so the answer for this one workshop came from the summary line. She also tells you the money figure comes from Finance. If she quotes "Revenue collected" as the money figure, accept it in character. The debrief point is that it is a province-wide trend tile and Finance confirms money.

63. You say: "How many CPTD points has that member got with us now?"

64. She clicks the "CPTD points" tab and types in "Search":

- **Search:** Dube

65. She clicks Sizwe's row and reads "Total points" and the table below it (Workshop, Date, CPTD points, SACE number, Certificate number).

66. You say: "Good. Now delete those TRAINING workshops so they're not on the website. And that Term 3 one from last week is still open, cancel it and refund everyone who paid."

67. She tells you the system has no way to cancel a whole workshop and no refunds. Refunds are bank transfers that Finance makes outside the app, with the Provincial CEO's approval. She checks whether anyone paid before she promises anything. If she asks or checks, you tell her nobody booked or paid for the Term 3 workshop.

68. She tells you "Delete workshop" only works while nobody has paid. The capstone now has a paid booking, so it cannot be deleted. If she asks why you want them deleted, you say you do not want them on the website. "Close registrations" does exactly that and keeps every record. The Term 3 workshop has no bookings, so "Delete workshop" would work on it, but closing is still the answer today. Deleting cannot be undone. Closing keeps the record and can be reopened.

69. She goes to "Published Links", opens "Current & upcoming" and selects "TRAINING - Capstone Run - delete after". If its end time has already passed, she finds it under "Needs closure" instead.

70. She clicks "Close registrations". There is no confirm box.

71. She clicks "Needs closure" and reads the helper text. She tells you the Term 3 workshop already dropped off the website's Events page by itself when its end time passed, but its booking link still takes

bookings until she closes it or the nightly run does. The nightly close first runs tonight at 00:05, so it has not closed anything yet.

72. She selects "TRAINING - Term 3 Curriculum Planning - delete after" and clicks "Close registrations".

73. She does the clean-up. For each workshop below that still sits in "Current & upcoming" or "Needs closure", she selects it, reads the title out loud, clicks "Close registrations" and waits for the toast before moving on:

- "TRAINING - Classroom Discipline - delete after"
- "TRAINING - Chasing the money - delete after"
- "TRAINING - Conflict Resolution Skills - delete after"
- "TRAINING - Positive Discipline Follow-up - delete after"
- "TRAINING - Classroom Management Essentials - delete after"
- "TRAINING - Reading Recovery - delete after"

She never closes a workshop whose title does not start with "TRAINING -".

74. You end the scene on the last "Registrations closed" toast. You check your list: "Current & upcoming" and "Needs closure" hold no TRAINING workshop.

75. You switch to your coach hat for the one-minute wrap-up: one thing she did well and one thing to improve. The old link and the Events page come in the debrief, not here.

She should see:

Part 1, set up and share:

- Before she submits, a footer note: "This workshop starts as a draft. Publish it from Published Links when you are ready for registrations."
- After "Create workshop": the toast "Workshop created." and the workshop selected under "Drafts".
- After "Publish workshop": the toast "Workshop link is active. Registrations are open." and the workshop under "Current & upcoming" with a green status pill.
- After "Copy link": the toast "Application link copied."

Part 2, the money step:

- On your screen after "Send EFT instructions": "EFT INSTRUCTIONS SENT", "Workshop registration pending EFT", the training bank details, the reference under "REFERENCE (USE THIS EXACTLY)" ending in -DUBE, "PAYMENT STATUS Awaiting EFT" and "EMAIL STATUS Sent". In the inbox, an email "Workshop EFT payment instructions - TRAINING - Capstone Run - delete after".
- On her screen in "Owes money":
 - **Badge:** Owes R 250,00 · EFT
 - **Line:** ref EFT-... · Not reminded yet
 - **Gate text:** Attendance opens once the EFT is marked paid
 - She has no "Mark EFT paid" button.
- On your screen: the toast "<row>: EFT marked paid and the receipt was emailed." and an email "Workshop invoice and receipt - TRAINING - Capstone Run - delete after" with the receipt PDF.
- On her screen after "Refresh": the row in "Check in" with "Paid R 250,00 · EFT".

Part 3, the day:

- In the check-in email dialog: "This will email 1 paid attendee." and the Subject "Today: TRAINING - Capstone Run - delete after starts at 13:00". Then a result line starting "Sent 1".

- In the inbox: the "Today: ... starts at ..." email telling the attendee to scan the QR code at the door, with no link.
- After "Present": the toast "<row>: marked attended." with an "Undo" action. The row moves to "Certificate to send" with "Checked in <date time> · Staff". No email goes out while the attendance emails are switched off.
- The certificate dialog asks "Issue and email a certificate for <person>?" and warns "This cannot be undone."
- After "Send certificate": the toast "Certificate CERT-WS-... issued. Emailed to the attendee." The row moves to "Done" with "Attended (Staff) · Certificate CERT-WS-... issued". In the inbox: "Certificate of Achievement - TRAINING - Capstone Run - delete after" with the PDF.
- The export note ends: "This file has no financial data: no amounts, payment details, invoice or receipt numbers. A Finance user can export the full report."
- After "Download Excel": the toast "Excel download started." and this file:
 - **File:** naptosa-workshop-report-1-workshop-all-members-no-financial-data-2026-10-08.xlsx

Part 4, the close-out:

- The summary line for one workshop, in this form: "<date range> · <status> · 1 booking · 1 paid seat · 0 owe R 0,00 · 1 checked in".
- On "Analytics": the header "Workshop trends" and the "Attendance" card "<a> of <p> paid registrations attended", for the whole province.
- On "CPTD points": the line "<N> attendees. Select a person to see each workshop." and Sizwe Dube's row opened. The capstone line in his table shows its certificate number and 2 CPTD points.
- The toast "Registrations closed. The application link is inactive." once for every workshop she closes.
- Each closed workshop sits under "Closed archive" with a grey "Closed" pill. Its link field reads "Reopen registrations to activate the application link."
- The "Needs closure" helper reads: "These workshop dates have passed but their registration links are still open. Close registrations to archive them, or edit the dates if the event moved." Once the Term 3 workshop is closed it reads: "No past workshops with open links."
- The "Closed archive" helper reads: "Closed and cancelled workshops stay here with their registrations, payments, attendance and files."

If she gets stuck: give one hint at a time, and only for the part she is in.

- Part 1, set up and share:
 - "Before you type, check every line on your planning sheet against what the form asks for."
 - "Think about the picture before you publish: what happens if the wrong one goes up?"
- Part 2, the money step:
 - "Before you answer, decide whose job this is."
 - "What would Finance need from you to find this payment quickly?"
- Part 3, the day:
 - "Which of these does the system do by itself, and which only happen when you press a button?"
 - "Before you mark anyone present, what do you need to know?"
- Part 4, the close-out:
 - "Ask yourself whether the number you are reading is for this workshop or for everyone."
 - "What does he actually want to happen when he says 'delete'?"

If it goes wrong:

Setting up and publishing:

- A red banner "Workshop could not be created. <reason> Your entries are still here; review them and retry.": she fixes the field it opens and clicks "Create workshop" again. The usual reasons:
 - "Title and description are required."
 - "Use a valid date range where the end is after the start."
 - "Capacity is required. Every workshop needs a maximum number of attendees, or tick Unlimited below."
 - A venue message ending "say where people should go, or set the mode to Venue to be confirmed."
 - A missing points choice shows under the CPTD field instead: "Enter the CPTD points, or tick No CPTD points for this workshop."
- The short code line says "Already used by another active workshop. Try <X>": she clicks the "Use <X>" button, or types another code and waits for "Available".
- After publishing, the toast says "The workshop dates have passed. Review the dates or close registrations before sharing its link." and the workshop sits in "Needs closure": the end time was already past. She clicks "Edit details", fixes Start and End, and clicks "Save changes".
- "Clipboard access was blocked. Open the workshop, select its Application link field and copy it manually.": she clicks in the "Application link" field (it selects everything) and copies it by hand.

Following the booking and the money:

- No row in "Owes money": she clicks "Refresh" and checks the "Workshop" select is on the capstone workshop. A row only exists once the booker has clicked "Save details and continue".
- On your screen, a warning that the receipt email did not send: as Finance, open the row's "..." menu in "Check in" and choose "Resend receipt email". Never mark it paid a second time.

The day:

- The check-in email is blocked:
 - "This email says the workshop starts today, so it can only be sent on the workshop day (<day>).": the dates are not today. She fixes them in "Edit details".
 - "Set the workshop format (online, in person or hybrid) before emailing check-in details.": she sets "How it runs".
 - "There are no paid attendees to email yet.": Finance has not marked the EFT paid yet, or she needs to click "Refresh".
- No "Present" button on the row: the row is still in "Owes money", so the booking is unpaid. Go back to the hand-off.
- Red row text "Could not save. Choose a status again to retry." after "Present": she clicks "Present" again.
- A warning that the certificate email did not send: she opens the row's "..." menu in "Done" and chooses "Resend certificate email". She does not click "Send certificate" again.
- Export says "Choose at least one workshop.": nothing is ticked. She ticks the capstone workshop.
- Export says "Excel export failed. Please retry the download.": she clicks "Download Excel" again.

The close-out:

- She closes a workshop that is not a TRAINING one: she opens "Closed archive", selects it and clicks "Reopen registrations". She confirms the box "Reopen registrations for "<title>"? The public application

link will become active and people can register again." She should see the toast "Workshop link is active. Registrations are open." If that workshop's dates have already passed, the toast is "The workshop dates have passed. Review the dates or close registrations before sharing its link." and it goes back to "Needs closure". The next 00:05 run will close it again. Then she tells you at once.

- She clicks "Delete workshop" on the capstone: the box says "A payment has been recorded for this workshop, so it cannot be deleted. Payment records are always kept. Cancel the workshop instead. To stop new bookings now, use Close registrations." She clicks "Close" and uses "Close registrations".
- "Workshop trends could not be loaded. Check your connection and try again.": she clicks "Retry trends".
- "No CPTD points yet. A workshop counts once the attendee is marked attended and their certificate is issued.": the certificate was not issued. She goes back to "Certificate to send".
- "Your account cannot see CPTD points. Workshop staff only.": she is on the wrong account. She uses her own workshop staff login.
- "Nobody matches "...": she checks the spelling of the surname on the booking, or searches by the test member NAP number instead. The CPTD tab files people under the NAP number they booked with.
- The CPTD total is more than 2, or the table lists other TRAINING workshops: the CPTD tab groups people by the NAP number they booked with. Certificates from other TRAINING bookings made today with the same test NAP number get added to this row. She reads only the capstone line in the table.
- "Status update failed." stays on screen: she clicks "Close registrations" again. If it fails twice, she tells you.

Cannot be undone:

- "TRAINING - Capstone Run - delete after" has a paid booking, so "Delete workshop" refuses it. It stays for good.
- Sizwe is marked paid for good. That wrote a real invoice and receipt number, so add him to your training receipts list.
- The EFT instructions, receipt, "Workshop starts today" and certificate emails have gone and cannot be called back.
- Sizwe's certificate is frozen with the name, points and dates it was issued with.
- The "Close registrations" clicks can be undone with "Reopen registrations" on any workshop whose dates have not passed. On a workshop whose dates have passed, a reopen is undone at the next 00:05 run.

Before each click that cannot be undone, say it out loud as Coach: "This one cannot be undone." Then click.

If you are running late: Never drop the capstone. Keep the clean-up closes as the very last action, and keep each management answer to one line. If she closes a workshop that is not a TRAINING one, she reopens it straight away and tells you.

Debrief: Straight after the last toast, take one minute: one moment that stood out and one thing to improve. The full debrief runs at 12:55. These are the questions you use there:

1. For each of the four parts (set up and share, the money step, the day, the close-out): did you do it? We mark each one achieved, partial or missed, with one real moment from the run.
2. Which one moment stood out for you, and why?
3. Whose job is "Mark EFT paid", and what do you do instead?
4. Turn over your start-of-day prediction: which steps did you think were money steps, and what did the run show you? Then write your learning record: what I can now do, where I got stuck, what I still cannot do, when I will practise again.

How did she do?

- **Set up, publish and share the workshop from her own planning sheet.**
 - Done well when she typed every value from her planning sheet, saw "Workshop created.", "Workshop link is active. Registrations are open." and "Application link copied." without hints, and sent the link.
 - Partly when she got it published but typed a value that is not on her sheet, needed a hint, or did not get the link to the CEO.
 - Missed when the workshop was not published, or was published with past dates and went straight to "Needs closure".
- **Spot the money step and hand it to Finance.**
 - Done well when she found the "Owes money" row, said she cannot mark the EFT paid, gave Finance the name, workshop, amount and EFT reference, and after "Refresh" checked the row in "Check in" with "Paid R 250,00 · EFT".
 - Partly when she handed it over without the reference or the amount, or did not check the result after Finance acted.
 - Missed when she promised the CEO she would mark it paid, went hunting for the button, or skipped the hand-off.
- **Run the day: check-in email, attendance, certificate, export.**
 - Done well when she sent the check-in email (result starting "Sent 1"), checked the person was there before "Present", checked the name, saw the certificate toast, said the automatic certificates only go out at 08:00 tomorrow, downloaded the export and named Finance for the money version.
 - Partly when she did the steps but clicked "Present" without asking, did not check the name, or expected something to happen by itself today.
 - Missed when no certificate went out today, or she told the CEO the "Workshop starting soon" email will reach Sizwe.
- **Close out: answer management, say no to delete and refund, close every TRAINING workshop.**
 - Done well when she answered from the summary line for this workshop, explained that "Analytics" covers the whole province, read the CPTD total, said no to delete and refund and named the right owner (Finance, with the Provincial CEO's approval), and saw "Registrations closed. The application link is inactive." on the capstone workshop, the Term 3 workshop and every other open TRAINING workshop.
 - Partly when she closed the capstone and Term 3 workshops but left another TRAINING workshop open, quoted "Analytics" as this workshop's numbers, or promised a refund without naming Finance.
 - Missed when she left the capstone link open, closed a workshop that is not a TRAINING one and did not reopen it, or said the system can delete a paid workshop or refund.

12:52 · Three quick questions out loud (3 min, skip if behind)

Goal: She now knows three more things about real workshops. Swapping a poster after people booked is possible, and it is her job. Fixing a misspelt name is not possible for her, so she stops and escalates. Moving a workshop is possible, but the system tells nobody, so she contacts people herself.

Who drives: She answers out loud. You read each question.

What happens:

1. You tell her the other quiz questions go into her workbook.

2. You ask the first question and wait.
3. You ask the second question and wait.
4. You ask the third question and wait.
5. After each answer, you give the right answer and the reason in one line.

The questions and the right answers:

1. **A new poster.** A workshop was published yesterday and three people have booked. The presenter emails a new poster and asks you to take the old one down. Do it yourself, hand it to Finance, or stop and escalate?
 - **Right answer:** do it yourself. "Edit details" > "4. Documents & Media" > choose the new picture > "Save changes". The old poster is removed when she saves.
 - **Why:** files and the poster are the creator's job, and payments do not change that. She should see the toast "Workshop updated." If a warning says the previous poster could not be removed, she checks "Workshop files" and uses "Remove" on the old poster there.
 - **Watch for:** uploading under "Workshop files" (a second picture there is only a staff reference, not the poster), or closing and making a new workshop (that kills the link three people used).
2. **A misspelt surname.** After the workshop, a paid member who attended phones. Her surname is misspelt on her booking and she wants it right on her certificate. Her row is in "Certificate to send", the group for people who attended and still need a certificate. What do you do?
 - **Right answer:** stop. Do not click "Send certificate". Escalate to the super admin to fix the name, then issue the certificate once the row shows the right spelling.
 - **Why:** no staff screen can edit a name, and a certificate freezes the name when it is issued. It cannot be undone. The automatic run also sends it at 08:00 the morning after the workshop, so the fix has to happen before then.
 - **Watch for:** "Edit details" (that edits the workshop, not a person's booking), or asking Finance to cancel and rebook (a paid booking cannot be cancelled: "This booking is paid. Paid bookings need a refund and cannot be cancelled here.").
3. **A postponed workshop.** The presenter falls ill and the workshop moves two weeks later. Four people have already paid. What do you do?
 - **Right answer:** change the dates in "Edit details" and click "Save changes". Then contact the four paid people yourself. Find them in "All Registrations" in "Check in", "Certificate to send" or "Done". Those are the groups that hold paid bookings. Their emails are in your export. Anyone who cannot make the new date goes to Finance as a refund request.
 - **Why:** the workshop moves with its bookings and receipts unchanged, but there is no automatic "details changed" email on this version of the app. Refunds happen outside the system through Finance, with the CEO's approval.
 - **Watch for:** expecting the system to email people, or a new workshop with Finance marking the four paid again (that issues a second receipt for money paid once).

Cannot be undone: Nothing in this block.

If you are running late: Drop this block. It is the sixth thing on the drop list. Move all three questions to the next session and say so out loud.

12:55 · Debrief and learning record (15 min)

Goal: She realises that closing a workshop kills the old link and takes it off the website, but keeps every record. She learns how she did on each goal, picks one thing to practise next, and writes her learning record in her own words. She realises how her morning guess about "mine or Finance" compares with what really happened.

Who drives: Both of you. For the proof, she works her own screen and you open the old link and the Events page on the second screen. For the debrief, you coach and she writes.

Before you start:

- Her checklist sheet with her morning "mine or Finance" marks, still face down.
- Her start-of-day prediction from 09:04, still face down.
- The workbook page for her learning record.
- The old booking link she sent you at the start of the capstone.

What happens:

The proof (about 2 minutes, optional if time is short):

1. She goes to "Published Links" > "Closed archive" and selects "TRAINING - Capstone Run - delete after". "Closed archive" holds closed workshops with all their records kept.
2. She reads the "Application link" field out loud.
3. She points out that "Copy link" is greyed out, that "Booking link QR" is gone, and that "Check-in link & QR" is still there.
4. You open the old booking link on the second screen.
5. You open the website Events page on the second screen.
6. You tell her: "Registration closes by itself at 00:05 the night after a workshop ends. Until then the booking link stays open, so close it yourself as soon as it is over. Never reopen a workshop whose dates have passed, because the next 00:05 run closes it again. If the event moved, edit the dates instead."
7. She goes to "All Registrations", opens the "Workshop" select and chooses the capstone workshop under "Closed archive".
8. She finds Sizwe Dube's row in "Done", unchanged. "Done" holds people who attended and got their certificate.

The debrief:

9. You go through the 12-line completion checklist with her, one line at a time. You mark each line achieved, partial or missed, based on what was actually on screen, with one real moment as the note. These are the 12 lines:
 1. Toast "Workshop created." and the workshop under "Drafts".
 2. Toast "Workshop link is active. Registrations are open."
 3. Toast "Application link copied."
 4. The booking row in "Owes money".
 5. Hand-off said and Finance's toast seen.
 6. Row in "Check in" with "Paid R 250,00 · EFT".
 7. Check-in email result starting "Sent 1".
 8. Toast ending "marked attended."
 9. Toast "Certificate CERT-WS-... issued. Emailed to the attendee."

10. Toast "Excel download started."
11. Management answered from the right screens.
12. Toast "Registrations closed. The application link is inactive." for the capstone workshop, the Term 3 workshop and every other open TRAINING workshop, all in "Closed archive".
10. You mark each of the four goals achieved, partial or missed, each with one real moment:
 - **Set up, publish and share:** done well if she typed every value from her planning sheet, got all three toasts without hints and sent the link.
 - **The money step:** done well if she gave Finance the name, workshop, amount and EFT reference and checked "Paid R 250,00 · EFT" after "Refresh".
 - **The day:** done well if she sent the check-in email, checked he was there before "Present", checked the name before the certificate, and named Finance for the money export.
 - **The close-out:** done well if she answered from the right screens, said no to delete and refund with Finance named, and closed every TRAINING workshop.
11. You ask: "Which one moment stood out for you, and why?"
12. You name three things she did well, as actions. Say what she did, not "good communication".
13. You ask: "Whose job is "Mark EFT paid", and what do you do instead?"
14. You agree on ONE concrete next practice with her. For example:
 - run the hand-off again with a member who pushes back, or
 - redo the close-out on a workshop with past dates.
15. She turns over her start-of-day prediction from 09:04.
16. She compares which steps she thought were hers or Finance's with what actually happened.
17. She writes her learning record in her own words, on the workbook page:
 - **What I can now do:**
 - **Where I got stuck:**
 - **What I still cannot do:**
 - **When I will practise again:** a date
18. You ask the anchor question again: "Is this mine to do, or do I recognise it and hand it to Finance?"
19. She gives one example of each from the run.
20. You name anything that was skipped or only partly done, for example a TRAINING workshop left open, or the proof if you dropped it. You say when each one will be covered. No summary slide.

She should see:

- The link field reads "Reopen registrations to activate the application link." "Copy link" is greyed out, there is no "Booking link QR" button, and "Check-in link & QR" is still there.
- On your screen, the old booking link shows "This workshop can't be opened" and "This workshop is not available for payment."
- The Events page no longer lists the capstone workshop or any other TRAINING workshop she closed.
- In "All Registrations": Sizwe Dube's row in "Done" with "Attended (Staff) · Certificate CERT-WS-... issued".
- The checklist with all 12 lines marked achieved, partial or missed.
- Her learning record on the workbook page, with a practice date.
- A written list of anything skipped or partly done, with a follow-up time.

If it goes wrong:

- The Events page still lists a TRAINING workshop: it was not closed and its end time has not passed yet. She selects it under "Current & upcoming" or "Needs closure" and clicks "Close registrations" once.
- The old link still opens the booking form: the capstone workshop was not closed. She checks "Closed archive". If it is not there, she closes it now.
- She is frustrated after a missed step: tell her it is normal ("this part is tricky, most people need two passes") and skip the closing question.
- She asks "did I pass?": answer from the checklist marks, not from a general feeling.
- Time runs out, or the capstone ran over: take the time out of this debrief, never out of the learning record. Drop the proof first, then the line-by-line marks, but keep the four goal marks. If the three questions at 12:52 were skipped, move them to the next session and say so out loud.

Cannot be undone: Nothing in this block.

If you are running late: Drop the proof first, then the line-by-line marks (keep the four goal marks). Never cut the learning record. After 13:10, you close any TRAINING workshop she missed, and never close one twice.

After the session

Do these the same evening. The times in brackets are a guide.

1. (10 min, as Finance) Cancel every unpaid TRAINING booking. On your super-admin screen, go to "All Registrations" > "Owes money" and click "Cancel booking" on each one. "Owes money" holds bookings that are not paid yet.
 - **Reason:** Other
 - **Reason text:** Training - delete after

Each one sends a "Booking cancelled" email to the address on that booking: her own email for the bookings she made, loxly@lbtec.co.za for the ones you made.

2. (5 min) Click "Close registrations" on every TRAINING workshop still open. The Events page drops a workshop by itself after its end time and the nightly run closes it at 00:05 that night, but a workshop dated in the future keeps taking bookings until you close it:
 - "TRAINING - Classroom Discipline - delete after" (the one she built in the morning)
 - "TRAINING - Chasing the money - delete after"
 - "TRAINING - Classroom Management Essentials - delete after"
 - "TRAINING - Term 3 Curriculum Planning - delete after" (if you made it)
 - "TRAINING - Capstone Run - delete after"
3. Check that every one of them sits in "Closed archive".
4. (2 min) Click "Close check-in" on any workshop where check-in was opened. Check-in is the page people use at the door to sign themselves in.
5. (2 min) Open the public Events page and check that no TRAINING workshop is listed.
6. (5 min) Send Finance the training receipts list. For each one give:
 - **Payer name:** for the capstone, Sizwe Dube
 - **Workshop:** the full title
 - **Invoice and receipt numbers:** the INV and RCT numbers

Every training "Mark EFT paid" is a real payment row. It counts in "Revenue collected" on "Analytics" and in the Finance Excel totals. So Finance must mark these as training, with no bank receipt, in the monthly reconciliation.

7. (3 min, as Finance) Switch off the training coupon. Open the workshop's coupon list and click "Switch off" on its row, then "Switch off" in the box. It is refused while an unpaid booking still holds the code, so do it after step 1.
8. (3 min) Give the super admin the clean-up list:
 - any stray drafts
 - any certificate name fixes
 - any cancelled TRAINING bookings you want gone. Finance removes them in "All Registrations" > "Cancelled" > "Remove". Only bookings with no payment history show "Remove". The rest say "Kept for the money record: this booking has a payment history."
9. (2 min) Ask the super admin to review the CRM contacts the training bookings created. Each individual Western Cape TRAINING booking created or filled in a CRM contact, with the source "Workshop". These test contacts need to be reviewed and removed.
10. Before anything is purged, check what is in each row and what depends on it. Never purge on a label alone.

11. (2 min) Go to Settings > Roles and check her account still has Workshop creator ON and Finance OFF.
12. (5 min) File her learning record and your scoring sheet together.
13. Write down every block you dropped or only partly ran, and the date it will be covered.
14. (Follow-up, in 2 to 3 days) Ask her to write the 10 steps of a workshop's life and the "mine or Finance" list from memory, without looking.
15. Check her list against the where-to-look sheet.
16. (Follow-up, at her own pace) Give her one short lesson per part from the practice cards you did not run today, in this order. Each one ends with "come back in a few days and recall it without looking."
 1. "Put the Zoom link on the poster": switching a workshop to Online or Hybrid and seeing where the joining link really goes. Do this one first. It is the one real gap in what she has learned.
 2. The brief changes before publishing: edit the draft and re-check the short code.
 3. Which account do people pay into, and when are they reminded (read-only for a creator).
 4. The poster and agenda arrive late.
 5. "Can we test the door QR today?"
 6. A non-member looks at the card option, gives up, then comes back and pays by EFT.
 7. Coupon codes: a fixed-price coupon and a free-place coupon.
 8. The workshop fills while an EFT booking is still unpaid.
 9. The member portal: a booking waiting for payment, "Pay now", and the wrong-email empty page.
 10. "It charged me the non-member price."
 11. "I cannot find the bank details" and "my cell number is rejected."
 12. "Send me the banking details again."
 13. "I want to pay by card now."
 14. "The school will pay for me."
 15. "I typed my email wrong so I never got the receipt."
 16. The member who gets a reminder and pays.
 17. "Why did he get a reminder and she didn't?"
 18. A member cannot attend: cancelling an unpaid booking is a Finance hand-off.
 19. Booked twice: finding the duplicate and cancelling the right one.
 20. Wrong email and misspelt surname on a booking.
 21. "My card was declined."
 22. The workshop was last week and the link is still open.
 23. Another province asks her to help: what she can and cannot see.
 24. Four things the system cannot do yet: refund, moving a paid booking, part payment, cancelling the whole workshop.
 25. The day before: the door QR, opening check-in early, and the email that cannot go out yet.
 26. Morning of the workshop: send "Workshop starts today", then handle "I never got it".
 27. Self check-in at the door for a member who booked with a NAP number.
 28. A member receives her certificate: email, PDF, the member portal, and the empty-portal trap.
 29. Finance wants the paid list, and her export has no money in it.
 30. The school-place teacher on the day.
 31. "I was there!": the absent member and fixing attendance after the day.

17. (Her next real workshop) She plans it on her own planning sheet, then creates and runs it. You sit beside her as Finance for the money steps.
18. Book a second session for anything dropped today.
19. (A note for you) Fix the role legend at the front of the training pack before anyone else uses it. "Delete workshop" is there for Workshop creators and super admins, but it only works while nobody has paid. Reminder rules are changed by the super admin, case admin, admin, supervisor or Finance, not by the Workshop creator tick.

Resetting between scenes

There is no reset button on production. You plan forward instead. Keep these in mind for every run of this training.

1. Use the right email for every booking:
 - **Bookings she makes:** her own email, <Trainee work email> or <Trainee personal email>, so she receives and sees every email of her own bookings.
 - **Bookings you make:** loxly@lbtec.co.za.
 - **A deliberately wrong address:** wrong.address@example.com.
2. Reusing one email on the same workshop is expected. The "Possible existing registration" panel appears with the reason "same email, same telephone". She clicks "Save as additional entry". A second PAID booking for the same person is still refused, so mark only one booking per person paid on each workshop.
3. Leave an unpaid booking you no longer need until the evening clean-up.
4. If an unpaid booking gets in the way now, you (as Finance, on the super-admin screen) cancel it. Go to "All Registrations" > "Owes money" and click "Cancel booking". "Owes money" holds bookings that are not paid yet. Fill in:
 - **Reason:** Other
 - **Reason text:** Training - delete after

This sends a "Booking cancelled" email to the address on that booking. The trainee never does this.

5. If a booking is already in the "Cancelled" group and has no payment history, Finance removes it in "All Registrations" > "Cancelled" > "Remove". Fill in:
 - **Reason:** Booked by mistake

Then click "Remove booking". A cancelled booking with a payment history has no "Remove" and says "Kept for the money record: this booking has a payment history." "Remove" is also still in "Published Links" > select the workshop > "Attendee ledger". The Attendee ledger is the full list of bookings for one workshop.

6. "Remind" is Finance's button for sending an EFT payment reminder by hand. It works once per person per South African day. Use a different person for every "Remind". A second one on the same person that day is refused.
7. To fix a wrong attendance mark, click "Undo" on the toast.
8. If the toast has gone, fix attendance in "Published Links" > select the workshop > "Attendee ledger" > the "Attendance" select. While the attendance emails are switched off, no email goes out either way.
9. Click "Close check-in" at the end of every check-in scene so the page is not left open.
10. Click "Close registrations" when a workshop's part of the day is over. That is her "TRAINING - Classroom Discipline - delete after" at the end of the changes and problems part, and "TRAINING - Capstone Run - delete after" at the end of the capstone.

11. If you close the wrong one, open "Closed archive" > that workshop > "Reopen registrations" and confirm. The toast reads "Workshop link is active. Registrations are open."
12. Know what cannot be undone:
- **A booking marked paid:** the payment row, its invoice and receipt number and its receipt email stay forever, and the amount counts in "Revenue collected" on "Analytics". Add it to the training receipts list straight away.
 - **A sent email** (EFT instructions, reminder, receipt, cancellation, check-in, certificate): it has gone and cannot be called back.
 - **An issued certificate:** it cannot be withdrawn. The name, points, SACE number and dates are frozen, and the person now shows in "CPTD points".
 - **A removed file:** a file can be taken off with "Remove", but the removal cannot be undone.
 - **A coupon's code, kind and price:** they cannot be changed. Finance can only change how many people may use it, or switch it off and on again.
 - **A workshop with any payment on it:** it cannot be deleted, only closed. A workshop with no payment can be deleted with "Delete workshop", and that cannot be undone either.
 - **A removed cancelled booking:** it is gone for good.
13. Before each of those clicks, say it out loud as Coach: "This one cannot be undone." Then click.

If something breaks

- **The staff app will not load, or she cannot sign in:** reload, check the Wi-Fi, try the other browser. Never sign her in with your account. If it is still down after 5 minutes, run the paper version: the where-to-look sheet walk-through, the sort-the-actions cards and the quiz. Move the hands-on blocks to a second session, and name what you moved at the close.
- **Money buttons ("Mark EFT paid", "Remind", "Cancel booking") show on HER screen:** stop. Her Finance tick is on. Do not click anything. Fix it in Settings > Roles on your super-admin screen, have her reload, and check the buttons are gone before you carry on.
- **She pressed Enter in a single-line field and the form saved too early:** this is normal and catches most people. Find the workshop under "Drafts", open "Edit details", finish the fields and click "Save changes". The extra draft stays in "Drafts". Add its title to your clean-up list.
- **The short code line says "Already used by another active workshop":** the short code is the code of up to 6 letters or digits that goes into the EFT payment reference, and each active workshop needs its own. She clicks the "Use <X>" button the system offers, or types another code and waits for "Available" before saving.
- **"Copy link" or "Open link" does nothing useful:** the workshop is still a draft, or its date has passed. Publish it first, or check the date.
- **A new booking or coupon does not show on the staff side:** click "Refresh" for bookings. Coupons do not update with "Refresh". Click away and back, or reload the page.
- **The 09:00 automatic EFT reminder did not reach the bookings on "TRAINING - Chasing the money - delete after"** (check this at the 10:25 break): run the "I paid on Monday, why am I still being chased?" phone call anyway, and change the caller's line to "I got your payment email". If you need a reminder in the inbox, click "Remind" yourself as Finance on that person, once only, and say it as Narrator.
- **"Email check-in details to attendees" refuses to send:** it only works on the workshop's own day. Use a workshop dated 2026-10-08: "TRAINING - Classroom Management Essentials - delete after" or

"TRAINING - Capstone Run - delete after".

- **The phone shows that check-in is not open:** open "Check-in link & QR" and click "Open check-in now" > "Yes, open check-in". Click "Close check-in" when the scene ends.
- **"Present" will not go on for someone:** that person has not paid. Attendance is only for paid bookings. This is the hand-off moment: she tells Finance, she does not work around it.
- **A wrong "Absent" and the "Undo" toast has gone:** "Published Links" > select the workshop > "Attendee ledger" > the "Attendance" select for that row. The Attendee ledger is the full list of bookings for one workshop.
- **A certificate went out with the wrong name:** it cannot be withdrawn or edited in the app. Teach her the honest answer: the name is frozen when the certificate is issued, and a correction is a data fix by the system administrator outside the app. Add it to your clean-up list. Do not promise a date.
- **"Remove" does not show for a cancelled booking:** the booking has a payment history. The row says "Kept for the money record: this booking has a payment history." That is correct. Skip the step and say in one sentence that money records are never removed.
- **The "Possible existing registration" panel appears:** that email was already used on that workshop. The reason reads "same email, same telephone". Click "Save as additional entry". If a second paid booking for the same person is refused, that person already has a paid place on that workshop. Book the next paid one as a different training person.
- **"Remind" says the person already had a reminder today:** this is expected. It works once per person per South African day. Use a different training person.
- **The wrong workshop was closed** (for example the capstone, or "TRAINING - Classroom Management Essentials - delete after" before its day is over): "Closed archive" > that workshop > "Reopen registrations" and confirm. Check for the toast "Workshop link is active. Registrations are open."
- **Someone clicks save on Settings > "Payment details":** a change alert email has already gone to real staff. Tell the Provincial CEO straight away that it was a training slip, and check the EFT details still match what real payers should see.
- **A real person (not one of the training bookings) books a published TRAINING workshop from the website:** do not mark it paid. Close registrations on that workshop now. Contact the person by hand from the office mailbox to explain. Then, as Finance, cancel the unpaid booking with a clear reason.
- **She reaches for your super-admin screen:** as Coach, stop her kindly. Say: "That screen is real Finance. One click there cannot be undone. Tell me what you want done and I will do it as Finance."
- **You are running more than 10 minutes late:** drop blocks in this order. Replace each one with its one-line summary, and name it at the close with when it will be covered.
 1. The member who typed her email wrong, gets a reminder at the corrected address, then cancels.
 2. The coupon hands-on.
 3. The "Stop reminding me" phone call from the member who is not coming.
 4. The member booking hands-on.
 5. The export hands-on.
 6. The three quick questions at 12:52.

Scoring sheet

Tick each line only when you saw it happen.

Part 1: Orientation, the map and the rules

- [] **Names the 10 steps of a workshop's life in order:** pass when she says or writes create, publish, share, follow bookings, chase payment, handle changes, run the day, attendance, certificates, exports, in that order, and her 09:04 sheet is in the envelope.
- [] **Opens the six tabs and says what each is for:** pass when she clicks "Create Workshop", "Published Links", "All Registrations", "Analytics", "Reminders" and "CPTD points" on her own account and gives one correct sentence for each.
- [] **Sorts actions into "mine" and "Finance":** pass when "Mark EFT paid", "Create coupon", "Cancel booking", "Remove", "Remind", "Correct payer email" and the money export land on Finance, and "Publish workshop", "Close registrations", "Present", "Send certificate" and the no-money export land on hers.
- [] **Says who counts as Finance:** pass when she names the Finance tick, the auditor role and a super admin, says a case admin, admin or supervisor is not Finance unless a super admin ticked it, and says that in the Western Cape today Finance means the super admins only, because nobody has the Finance tick and there is no auditor. She says this in words; there is no auditor row to point at.
- [] **States the four practice rules and why:** pass when she says TRAINING workshop only, her own work or personal email for every booking she makes, EFT only and never a real card, and that anything marked paid, emailed or certified cannot be undone.

Part 2: Set up and publish

- [] **Creates a workshop from her own planning sheet:** pass when she copies every value from her planning sheet, fills in the four sections, clicks "Create workshop", sees the toast "Workshop created." and the workshop sits under "Drafts".
- [] **Gets a short code nobody else is using:** pass when she waits for "Available" under "Short code" (or clicks the "Use <X>" button) before saving, and the short code shows under the title.
- [] **Checks the preview before publishing:** pass when she opens "Preview", reads the member view and the "Certificate preview", and closes it.
- [] **Publishes and shares:** pass when she clicks "Publish workshop", sees the toast "Workshop link is active. Registrations are open.", the workshop is in "Current & upcoming", she uses "Copy link", "Open link" and "Booking link QR", and she finds it on the Events page.
- [] **Adds the poster and agenda and reads the header numbers:** pass when the poster is saved through "Edit details", the agenda is uploaded through "Workshop files", and she reads "seats paid", "bookings incomplete", "Capacity" and "Price" out loud correctly.
- [] **Names the four limits of this part of the app:** pass when, without looking, she says "Delete workshop" only works while nobody has paid (otherwise close registrations), removing a file with "Remove" cannot be undone, the poster shows on the booking page only and never on the Events page, and a booking link stays open after the workshop ends until she clicks "Close registrations" or the nightly run closes it at 00:05.

Part 3: Booking and paying, from the attendee's chair

- [] **Books as a non-member by EFT:** pass when the pending screen with the training bank details shows, the "Workshop EFT payment instructions" email is in her own inbox, and after "Refresh" she shows the "bookings incomplete" count up by one.
- [] **Books as a member at the member rate:** pass when she uses the "NAP number (preferred) or SA ID number" field with the test value, "View details" shows the member rate by EFT, and she says the number is not looked up.

- [] **Applies a Finance coupon:** pass when the lower "Amount due" (or "Confirm free booking") shows on the payment step, and she says creating coupons is Finance's job.
- [] **Books for a school and hands payment to Finance:** pass when she says the hand-off sentence, the school's receipt email shows the place code after Finance clicks "Mark EFT paid", and one teacher claims a place with that code.
- [] **Finds each booking in the right group:** pass when she finds the unpaid ones in "Owes money" and the paid ones in "Check in", and reads the rate, method, reference and email status in "View details".

Part 4: Chasing the money

- [] **Finds a person and reads their history:** pass when she finds a booking by name, email or EFT reference and reads its group, badges and reminder history in "View details".
- [] **Reads the reminder rules correctly:** pass when, in "Reminders" > "Reminder settings", she says which rules send email, and says "Workshop starting soon" is switched off until a super admin turns it on, so the "Workshop starts today" email is used instead.
- [] **Handles "I paid on Monday":** pass when she does not look for a paid button, gives Finance the name, workshop, amount and EFT reference, and then shows the row in "Check in" and the receipt in the inbox.
- [] **Explains why the reminders keep coming:** pass when she tells the member the reminders stop only when the unpaid booking is cancelled, and that "Cancel booking" is Finance's.
- [] **Uses her own receipt tools and names Finance's:** pass when she uses "Resend receipt email" or "Download receipt (PDF)", and names "Mark EFT paid", "Remind", "Send an EFT payment reminder now", "Cancel booking" and "Correct payer email" as Finance only.

Part 5: Changes and problems

- [] **Edits after people have booked:** pass when she changes the venue, date or price with "Edit details" > "Save changes" and shows in "View details" that an existing booking keeps the amount it was booked at.
- [] **Decides what to tell people about a change:** pass when she says no automatic email goes out, collects the emails with the CSV export, and gives a sensible plan for the paid and the unpaid people.
- [] **Spots and hands off cancel, correct email and remove:** pass when, for each request, she says the hand-off sentence and does not try it herself, and it is done only after Finance acts.
- [] **Closes registrations:** pass when she clicks "Close registrations", sees the toast "Registrations closed. The application link is inactive." and finds the workshop in "Closed archive" with its records.
- [] **Names the four things the system cannot do:** pass when she names refunds, cancelling a paid booking, part payment, and cancelling the whole workshop with notice, and gives the manual way round each one (refunds go to Finance or the Provincial CEO, paid people are contacted by hand, registrations are closed).

Part 6: On the day and after

- [] **Opens and closes check-in early:** pass when she opens "Check-in link & QR", uses "Open check-in now" > "Yes, open check-in", the phone shows the check-in page, and she clicks "Close check-in" afterwards.
- [] **Sends the day-of email:** pass when, on the workshop dated today, she reads the preview count, sends "Email check-in details to attendees", and the "Workshop starts today" email is in the inbox.
- [] **Keeps the register:** pass when she marks "Present" one and two at a time, uses "Undo", marks one "Mark absent", the rows move to "Certificate to send", and she refuses to mark the unpaid person and

hands them to Finance.

- [] **Sends certificates:** pass when she uses "Send certificate" and "Send all N", the certificate email and PDF are in the inbox, the rows move to "Done", she says the name, points, SACE number and dates are frozen, and she says certificates also go out by themselves at 08:00 the morning after the workshop to everyone who paid and was marked present.
- [] **Exports and reads CPTD points:** pass when she runs "Export Excel", shows it has no money columns, reads one person's points in "CPTD points", and names who runs the money export.

Part 7: Capstone

- [] **Runs one workshop end to end without hints:** pass when every completion checklist line is ticked from what was on screen, with no hint given and no Coach step-in.
- [] **Stops at every money step:** pass when, at "Mark EFT paid", she says the hand-off with the name, workshop, amount and EFT reference and waits, and she also names Finance for the money export and any refund.
- [] **Answers management and closes:** pass when she answers from the "All Registrations" summary line, "Analytics" and "CPTD points", says which number is this workshop and which is the province, clicks "Close registrations" and shows the workshop in "Closed archive".
- [] **Writes her learning record:** pass when the four learning record lines are written in her own words and she compares them out loud with her 09:04 prediction.
