

NAPTOSA WESTERN CAPE

Running a workshop

Your workbook for the workshop creator training, 8 October 2026.

Your name

Your work email

Your personal email

Orientation: the map and the rules

In this first part you learn where everything lives and which jobs are yours. Nothing here can break anything. You look, you write and you talk. You never press a money button, and you never touch your facilitator's screen.

Write your two email addresses here first. You use them for every booking you make today.

- **Trainee work email:** _____
- **Trainee personal email:** _____

You will ask yourself one question all day:

- **The question:** Is this mine to do, or do I recognise it and hand it to Finance?

Exercise 1: The four practice rules

What you will learn: You will learn that some clicks on the live system can never be taken back. You will also learn the four rules that keep today's practice safe.

What is happening: Your facilitator welcomes you and talks you through a one-page brief. On your desk you have the brief, a printed cheat sheet open at Stage 1, this workbook and a pen.

Your steps:

1. Read the title of the brief.
 - **Brief title:** Run a workshop from first draft to certificate today
2. Write the question at the top of this workbook.
 - **Write:** Is this mine to do, or do I recognise it and hand it to Finance?
3. Read your role. Your account has the "Workshop creator" tick. It does NOT have the "Finance" tick. So some buttons will simply not be on your screen. That is on purpose. It is not a fault.
4. Read what each tick lets a person do. A tick is a permission that a super admin switches on for a staff account.
 - **"Workshop creator" tick (yours):** create, edit, publish and close workshops. Upload and remove files. Open check-in early. It is why you see the "Create Workshop" tab. You can also delete a workshop for good with "Delete workshop", but only while nobody has paid. It does not let you change the reminder settings.
 - **"Finance" tick (not yours):** the money jobs. Mark a booking paid. Create, edit or switch off coupons. Cancel or remove a booking. Send a payment reminder by hand. Correct a payer's email. Pull the export that has money in it.
 - **In the Western Cape today:** nobody has the "Finance" tick and there is no auditor. So Finance here means the super admins.
5. Read what you will have done by 13:10. You will have created, published and shared a TRAINING workshop, followed a booking, handed a payment to Finance, run check-in, marked attendance, sent a certificate and pulled an export.
6. Read the order of the day. You follow one workshop's life in this order:
 1. Create it yourself, from your own printed planning sheet.
 2. Publish.
 3. Share.
 4. Follow bookings.
 5. Chase payment, and hand the money to Finance.
 6. Handle changes.

7. Run the day.
 8. Attendance.
 9. Certificates.
 10. Exports.
7. Learn the four practice rules.
- **Rule 1, which workshop:** only touch workshops titled "TRAINING - <topic> - delete after". Nothing else.
 - **Rule 2, which email:** every booking you make uses your own email. Never a real member's email.
 - **Your bookings:** <Trainee work email> or <Trainee personal email>
 - **Your facilitator's bookings:** loxly@lbtec.co.za
 - **When an exercise asks for a wrong address on purpose:** wrong.address@example.com
 - **Rule 3, how they pay:** EFT only. EFT is a plain bank transfer into NAPTOSA's account. The bank details on the EFT instructions are for training only. Never pay them.
 - **Rule 4, cards:** never type a real card number anywhere. Not even on the "Card (demonstration)" option.
8. Read why the rules matter. These are the exact warnings you will meet later today:
- **On the "Mark EFT paid" box:** "A receipt is emailed immediately and this cannot be undone."
 - **On certificates:** "This cannot be undone."
 - Every email the system sends is a real email.
9. Turn the brief over and say the four rules back to your facilitator in your own words.

Why your own email matters: the system emails the address on the booking. Because you use your own address, you receive and read every email your bookings send. You see exactly what a member sees, and no real member gets anything.

If you book the same workshop twice with the same email: you see "Possible existing registration" with the reason "same email, same telephone". Click "Save as additional entry".

How role-plays work today: sometimes your facilitator plays a caller, such as a member, a school asking about a booking or payment, or a colleague. When he says "Narrator", he is telling you what happens on screen. When he says "Coach", he is himself again. Hint slips lie face down beside you. Turn one over whenever you want.

What you should see:

- The question written at the top of this workbook.
- Your cheat sheet beside your keyboard, open at Stage 1.
- You can say all four rules without looking.

Notes:

Exercise 2: Your first version on paper

What you will learn: You will learn that you already know more than you think. At the end of the day you compare this page with what you can actually do.

What is happening: Before anyone shows you a screen, you write down how you think a workshop goes from idea to certificate. There is no wrong answer.

Your steps:

1. Turn to a blank page.
2. Write the steps of a workshop's life in your own words, in the order you think they happen.
3. Circle every step you think involves money.
4. At the bottom of the page, write one question you hope today answers.
5. Write the label at the top of the page.

- **Label on the page:** My first version

6. Fold the page and put it in the back of this workbook. Nobody corrects it now.

If you get stuck: ask yourself, "What is the very first thing that happens when the office decides to run a workshop?"

What you should see:

- A list of steps in your own handwriting.
- Some steps circled as money steps.
- One open question at the bottom.
- The page folded away.

Exercise 3: The six tabs on your screen

What you will learn: You will learn what each of the six Workshops tabs is for. You will also learn that a missing money button is not a fault. It tells you who to call.

What is happening: You sign in on your own staff login and click through the Workshops page. You only look. You type nothing and save nothing.

Your steps:

1. Open the staff login page and sign in with your own staff login.
 - **Web address:** <https://naptosawc.co.za/staff>
2. Open the Workshops page.
 - **Web address:** <https://naptosawc.co.za/staff/operations/workshops>
3. Click "Create Workshop". Say what it is for: building a new workshop. You only see this tab because of your Workshop creator tick. Do not type in it yet.
 - **Watch out:** if you press Enter in a one-line box on this form, it creates or saves the workshop. Never use Enter to move between boxes.
4. Click "Published Links". Say what it is for: every workshop, with its links, QR codes, check-in, files and coupons. Workshops sit in four groups:
 - **"Current & upcoming":** workshops still to happen.
 - **"Closed archive":** workshops where registrations were closed.
 - **"Drafts":** workshops never published.
 - **"Needs closure":** workshops whose date has passed but which are still open. From the night of 8 to 9 October 2026, a nightly run at 00:05 closes them by itself, so a workshop only waits here until that night's run. Today's ended workshops still show here until tonight's run. You can close one sooner yourself.
5. Select the practice workshop.
 - **Workshop:** TRAINING - Chasing the money - delete after
6. Open "Registrations, coupons and documents" on that workshop.

7. Look at "Coupons" and read the line on screen aloud. A coupon is a discount code a person types when they book. Making one is a Finance job.
8. Click "All Registrations". Say what it is for: every booking, grouped by what needs doing.
9. Look at any booking row. Notice what is NOT there: "Mark EFT paid", "Remind" and "Cancel booking". "Mark EFT paid" is what Finance presses once a member's bank transfer shows on the statement. It emails a receipt straight away.
10. Click "Analytics". Say what it is for: reporting you can read but not change, such as "Payment completion", "Revenue collected" and "Attendance".
11. Click "Reminders". Say what it is for: the schedule of automatic reminder emails. You land on "Reminder settings". Look only. Press no "Save" here. The button for sending a payment reminder by hand is Finance only, so it is not on your screen.
12. Click "CPTD points". Say what it is for: the points each attendee earned, with their SACE number and certificate number, for the Western Cape. CPTD points are the professional development points teachers earn at workshops. SACE is the South African Council for Educators, where every teacher is registered.
13. Click "Refresh" at the end of the tab bar. On a smaller screen it shows only as a circular arrows icon. It reloads the workshop list only. Nothing else.
14. Look at your facilitator's screen on the second monitor. His workshop cards carry a province label and show every province. Yours show the Western Cape only, with no label. Anything you create is always a Western Cape workshop.

What you should see:

- Each tab swaps the content below it. The web address changes to name the tab, so refreshing the browser keeps you on the same tab.
- "Create Workshop" is on your screen.
- **Coupon line:** "Only a super admin, an auditor or a Finance user can create coupons."
- No money buttons on any booking row in "All Registrations".
- "Reminders" opens at "Reminder settings". You may also see: "You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor."

Notes:

Exercise 4: Sort the 12 action cards

What you will learn: You will learn which jobs are yours and which belong to Finance.

What is happening: Twelve action cards lie on the table. You sort them into two piles.

Your steps:

1. Read each card and what it does:
 - **"Publish workshop"**: puts the workshop live so people can book.
 - **"Close registrations"**: stops bookings and moves the workshop to "Closed archive". The system also does this by itself at 00:05 on the night after the workshop ends, but you can do it sooner.
 - **"Present"**: marks a person as having attended.
 - **"Send certificate"**: emails the person their CPTD certificate. Certificates also go out by themselves at 08:00 the morning after the workshop, to everyone who paid and was marked present.
 - **"Export Excel" (no money)**: downloads a spreadsheet of the bookings without amounts.
 - **"Mark EFT paid"**: confirms a bank transfer arrived and emails a receipt.

- The "Provincial Roles" section text on your facilitator's screen.
- A "Finance" column with no Western Cape row ticked.
- Your own row with Workshop creator on and Finance off.

Exercise 6: A helpful colleague offers to sort everything out

What you will learn: You will learn that being senior does not bring money rights, and how to hand a money job to the right person.

What is happening: You are the Workshop creator for the Western Cape. You have the Workshop creator tick and not the Finance tick. It is mid-morning in the office. A teacher's EFT has shown on the bank statement for a booking on the TRAINING workshop. A friendly colleague, Mariam, stops at your desk with a mug of tea and a list of offers from herself and two colleagues, Riaan and Thabo. For each offer, decide whose job it really is.

Your steps:

1. Put your own screen on "All Registrations".
2. Listen to Mariam's first offer.
3. Before you answer, ask questions. Find out the person's role and what their account can do.
4. Answer the offer. Say whose job it is and why.
5. Repeat for each offer Mariam makes.
6. Close with your own hand-off sentence (see "When to hand it to Finance" below).

Good to know: you will not find the teacher's booking on your list. That is expected. This scene is about who presses the button, not about finding the row.

If you get stuck: turn over the next hint slip. One at a time.

Notes:

When to hand it to Finance

Hand it over whenever the job is one of these:

- Marking a booking paid ("Mark EFT paid").
- Creating, editing or switching off a coupon.
- Cancelling a booking, or removing a cancelled one.
- Sending one person a payment reminder by hand ("Remind").
- Correcting a payer's email ("Correct payer email").
- Pulling the export with money in it.

A missing button is your cue. Reloading or "Refresh" will not make it appear.

When you hand it over, pass on three things: the booking name, the workshop, and what is needed.

What you say: "This is a Finance job. [Finance person], please [what is needed] for [booking name] on [workshop]. [Any fact you checked, such as the payment date]."

Example: "This is a Finance job. [Finance person], please mark Kagiso's booking on the TRAINING workshop as EFT paid. His transfer shows on yesterday's statement."

Write your own hand-off sentence here:

- **My hand-off sentence:** _____

What the system cannot do yet, and what to do instead

- **Registration closes by itself overnight, not the moment a workshop ends.** From the night of 8 to 9 October 2026, a nightly run at 00:05 closes every published workshop whose end time was before midnight. Once a workshop's end time passes, the website Events page drops it on its own. But until the 00:05 run that night, the booking link and its QR code keep taking bookings. After the run the workshop sits in "Closed archive". It refuses new bookings, an unpaid booking on it can no longer get EFT details or pay by card, and its payment reminders stop.
 - **What to do instead:** to stop bookings sooner, open "Published Links", click the group "Needs closure", select the ended workshop and click "Close registrations". The workshop moves to "Closed archive" and the link stops taking bookings at once.
 - **If the event moved:** edit the dates. Do not press "Reopen registrations" on a workshop whose dates have passed, because the next 00:05 run closes it again.
 - **The line you will see on an ended, open workshop:** "This link is still open, but the workshop dates have passed. Edit the dates or close registrations before sharing it."
- **"Delete workshop" only works while nobody has paid.** Once a booking on your TRAINING workshop is marked paid, it cannot be deleted. The box then says: "A payment has been recorded for this workshop, so it cannot be deleted. Payment records are always kept. Cancel the workshop instead. To stop new bookings now, use Close registrations."
 - **What to do instead:** "delete after" in the title means you click "Close registrations" when the day ends.
- **A paid mark, a sent email or an issued certificate cannot be undone.** Receipts cannot be deleted either.
 - **What to do instead:** prevent it. Use the TRAINING workshop, your own email on every booking, EFT only and never a real card. If something real goes wrong, stop and tell your facilitator.
- **You cannot do money jobs.** The buttons are not on your screen, and the system refuses them even if you reach them another way.
 - **What to do instead:** find the booking, check the facts and hand it to a named Finance person. You can still pull "Export Excel" without money.
- **You see the Western Cape only.** You cannot help with another province's workshop.
 - **What to do instead:** send the colleague to the super admin, or to their own province's staff.
- **Reminder settings are one list for every province.** Changing them for one booking changes them for everyone.
 - **What to do instead:** look only and save nothing. If it really needs changing, raise it with the super admin.
- **Bank details belong to the super admin.** Every save on "Payment details" emails a change alert to real staff, and "Confirm these details" changes the bank account real payers see.
 - **What to do instead:** look only, never save, and pass the question to the super admin.
- **"Refresh" reloads workshops only.** A coupon change will not show after it.
 - **What to do instead:** click away and back, or reload the browser.

Check yourself

Answer without looking.

1. Name the ten steps of a workshop's life in order.
2. Who counts as Finance, and why is a case admin colleague not Finance?
3. What are the four practice rules, and why do they matter on this system?
4. The workshop title says "delete after". What will you actually do at the end of the day, and why?
5. A teacher phones. She paid her EFT yesterday and wants confirmation. Her booking row has no "Mark EFT paid" button. What do you do?

Notes:

Answers

- **Check yourself 1:** Create (from your own planning sheet), publish, share, follow bookings, chase payment and hand it to Finance, handle changes, run the day, attendance, certificates, exports.
- **Check yourself 2:** Anyone with the Finance tick, anyone with the auditor role, and a super admin. A case admin only becomes Finance if a super admin ticks Finance on their row. In the Western Cape today Finance is the super admins only.
- **Check yourself 3:** Only TRAINING workshops. Your own email on your bookings. EFT only, and never pay the training bank details. Never a real card. They matter because a paid mark, a sent email or a certificate cannot be undone.
- **Check yourself 4:** Click "Close registrations" on "Published Links". A workshop with a paid booking cannot be deleted. Closing it yourself stops bookings at once, instead of waiting for the 00:05 run that night.
- **Check yourself 5:** Hand it to a Finance person with her name, the workshop and the payment date. Tell the teacher Finance will confirm it.
- **Card sort:** Mine is "Publish workshop", "Close registrations", "Present", "Send certificate" and "Export Excel" (no money). Finance is "Mark EFT paid", "Create coupon", "Cancel booking", "Remove", "Remind", "Correct payer email" and "Export Excel" (full, with money).

Set up and publish a workshop

In this part you plan a workshop from your own planning sheet. You set it up, make it public and share the link. Everything else you do today hangs off this workshop: the bookings, the payments, the day itself and the certificates.

Words you will see

- **Workshop creator tick:** a setting on your staff login. It lets you create, edit and publish workshops. You have it today.
- **Finance tick:** a setting that turns on the money actions, like marking a payment as received or making a discount code. You do not have it. In the Western Cape nobody has it, and there is no auditor. Finance here means the super admins.
- **Toast:** the small message that pops up after you click a button. It tells you what just happened.
- **Pill:** the small coloured label on a workshop card. Gold "Draft" means private. Green "Published" means live.

Before you start: four rules to remember

You will learn that a new workshop is always private until you publish it.

1. Every new workshop starts as a draft. A draft is private. Nobody outside the office can see it or book it.
2. The order is always the same. Draft first. Then check the preview. Then publish.
3. Do not press Enter in a one-line box, like the title or a price. Enter saves the whole form. Move from box to box with Tab or the mouse. Only the Description, the Venue and address, and the Terms boxes take Enter as a new line.
4. The public link is built from the title on the day you create the workshop. It never changes, even if you edit the title later. So get the title right the first time.

Notes:

Exercise 1: Create the workshop from your planning sheet

You will learn that your planning sheet only becomes a saved draft when every date, price, venue and certificate fact is in the form, and that a venue that is not booked yet is not a fact.

What is happening: this is the next workshop in the annual programme, and you are planning it yourself. Your printed "Workshop planning sheet" is in front of you. At the end, a colleague phones you for the link.

Your planning sheet says:

- **Topic:** Classroom discipline for Foundation Phase
- **Date and time:** Saturday 14 Nov 2026, 08:30 to 12:30
- **Venue:** Parow Teachers' Centre (NOT confirmed yet. The booking only comes back on Monday.)
- **Non-member price:** R 450
- **Member price:** R 350

- **Seats:** 40
- **CPTD points:** 5
- **SACE endorsement number:** PD-20461
- **Facilitator:** Dr Lindiwe Khumalo

The details

1. Read your planning sheet once, top to bottom, before you touch the form.
2. Click the "Create Workshop" tab in the top tab bar.
3. In section "1. Details & Scheduling", type the title:
 - **Title:** TRAINING - Classroom Discipline - delete after
4. Read the line under "Short code". The short code goes into EFT payment references and receipt numbers, so wait until it says it is available.
5. If the code is already taken, click the "Use TCDDA2" button.
 - **Short code:** TCDDA2
6. Type the description. Enter makes a new line in this box.
 - **Description:** Classroom discipline for Foundation Phase teachers
7. Pick the start with the calendar and clock picker.
 - **Start:** 14 Nov 2026, 08:30
8. Pick the end the same way.
 - **End:** 14 Nov 2026, 12:30

What you should see:

- Under "Short code", first "Suggested from the title. Checking...", then "Already used by another active workshop. Try TCDDA2."
- After you click "Use TCDDA2": "Available (6/6)".

Price, seats and the venue

9. Read the price, seats and venue lines on your sheet.
10. Go to section "2. Delivery & Pricing". The non-member price box starts at 0.00. Type over it.
 - **Non-member price in ZAR:** 450
11. Type the member price.
 - **Member price in ZAR:** 350
12. Check the venue line on your sheet. Is the venue booked yet?
13. Under "How it runs", click the dashed "To be confirmed" chip. Do not choose "In person" with a guessed venue.
 - **How it runs:** To be confirmed
 - **Venue and address:** leave it empty
14. Type the number of seats.
 - **Capacity:** 40
 - **Buffer above capacity:** leave it empty
 - **Unlimited capacity:** not ticked

What you should see: the hint beside the chip reads "Pages and emails say the venue is still being arranged."

The certificate facts

15. Read the certificate lines on your sheet.
16. In section "3. Certificate & SACE Accreditation", type:
 - **Facilitator:** Dr Lindiwe Khumalo
 - **CPTD points:** 5
 - **SACE endorsement number:** PD-20461
 - **No CPTD points for this workshop:** not ticked
 - **Terms:** leave it as it is
17. Skip section "4. Documents & Media". The poster and agenda go on in Exercise 2.
18. Click "Preview" at the top right.
19. Read the workshop card under "Live preview · What members will see · Updates as you type". Check the picture, title, date, description and price.
20. Scroll to "Certificate preview". Read the facilitator, the points and the SACE number out loud.
21. Close the preview with the X or the Escape key.

What you should see: the card has no venue line. That is normal. The points you type are printed on each teacher's certificate.

Save it, then take a call

22. Read the note at the bottom of the form: "This workshop starts as a draft. Publish it from Published Links when you are ready for registrations."
23. Click "Create workshop".
24. Your phone rings. A colleague wants the link for his circular. Answer him truthfully from what is on your screen.
25. Tell him it is a draft and it is not public yet.
26. Agree with him when it will be published. Either Monday, once the venue is confirmed, or now, with "To be confirmed" clearly agreed.

What you should see after "Create workshop":

- The toast "Workshop created."
- The screen jumps to the "Published Links" tab, with your workshop selected under "Drafts".
- A gold "Draft" pill on the card.
- The price "R 450,00" with the line "Members R 350,00".
- The date line "14 Nov 2026, 08:30 to 14 Nov 2026, 12:30 SAST".
- The header "0 seats paid · 0 bookings incomplete · 0 bookings total", and "Capacity 0/40".
- The "Application link" box reads "Publish this workshop to activate the application link."
- No email is sent.

If the venue is not confirmed: the booking page will say "Venue to be confirmed - we will email you as soon as it is arranged". That is the true answer to give anyone who asks.

Check your saved code

27. Click "Edit details" on your new workshop.
28. Look at the "Short code" box. This is the only place the saved code shows.
29. Click "Cancel edit". Do not save.
30. Write these down:

- **Line you saw under Short code:**
- **Short code saved:**
- **Toast after Create workshop:**
- **Group the workshop landed in:**

If something goes wrong:

- "Workshop could not be created. Title and description are required. Your entries are still here; review them and retry." You probably pressed Enter in a one-line box. Fill the missing box and click "Create workshop" again.
- "Enter the CPTD points, or tick No CPTD points for this workshop." Type the points from your sheet.
- "Use a valid date range where the end is after the start." Fix the end time.
- "Member price cannot be more than the standard (non-member) price." The two prices are the wrong way round.
- "Capacity is required. Every workshop needs a maximum number of attendees, or tick Unlimited below." Type the number of seats.

Careful: once you click "Create workshop", the workshop exists. Its link and its short code are fixed. You can only remove it with "Delete workshop" while nobody has paid, and that cannot be undone.

Notes:

Exercise 2: The venue is confirmed. Update, publish, share and add the poster

You will learn that a workshop only goes public when you click "Publish workshop", that the link is for WhatsApp and the booking QR code is for a poster, and that removing a file cannot be undone.

What is happening: it is now Monday. The Parow Teachers' Centre booking is confirmed. The same colleague phones again. He wants to put the workshop on the principals' WhatsApp group and print an A3 poster for the district office.

Update the details

1. Click "Edit details" in the header of your workshop. The heading reads "Edit Workshop".
2. Under "How it runs", click "In person".
 - **How it runs:** In person
3. Type the venue on two lines. Enter makes a new line here.
 - **Venue and address:** Parow Teachers' Centre (on two lines)
4. Change the seats.
 - **Capacity:** 60
5. Leave the title alone.
 - **Title:** TRAINING - Classroom Discipline - delete after (do not change it)
6. Click "Save changes".

What you should see: the toast "Workshop updated." The workshop is still under "Drafts".

Get it live

7. Look at the "Application link" box. "Copy link", "Open link" and "Booking link QR" are greyed out while it is a draft.
8. Click "Publish workshop" in the header. There is no confirm box for a draft.
9. Read the toast out loud.
10. Find your card under "Current & upcoming".

What you should see:

- Before publishing: "Publish this workshop to activate the application link." and "Publish first to get a booking QR."
- After publishing: the toast "Workshop link is active. Registrations are open."
- The card sits under "Current & upcoming" with a green "Published" pill.

Share the link and the poster QR

11. Click once in the "Application link" box. One click selects the whole link.
12. Click "Copy link".
13. Click "Open link". Read the booking page the way a member would. Then close the tab.
14. Click "Booking link QR" and read the box.
15. Click "Download QR (PNG)".
16. Tell your colleague: the link is for WhatsApp, the QR code is for the poster.
17. Read the header out loud.
 - **Header line:** 0 seats paid · 0 bookings incomplete · 0 bookings total
 - **Capacity:** 0/60
18. Open the Events page on the NAPTOSA WC website. Find your workshop and click "Register".

What you should see:

- After "Copy link": the toast "Application link copied."
- The booking page: "NAPTOSA Workshop", the heading "Register for this workshop", the venue, the fee and "NAPTOSA members R...".
- In the QR box: "Put this QR code in an email or on a poster for <title>. Scanning it opens the public booking page, the same page as the link below."
- In your Downloads folder: a picture file whose name starts with booking-qr-.
- On the Events page: your workshop card with a "Register" button and no poster. "Register" opens the same booking page.

Do not paste the link into a real WhatsApp group today.

Add the poster and the agenda

19. With your workshop selected, open "Registrations, coupons and documents" and find "Workshop files".
20. Read the notes. The first picture you upload is the public poster. A second note reads: "The poster shows on the booking page only. To take a workshop off the website's Events page, use Close registrations."
21. Under "Add workshop files", choose two files.
 - **Poster:** the prepared TRAINING poster picture
 - **Agenda:** the prepared TRAINING agenda PDF
22. Click "Upload 2 documents". Upload them once only.

23. Click "Download" on the agenda to prove staff can fetch it.
24. Look at the "Remove" button next to each file. Do not click it.
25. Click "Open link" to see your poster on the booking page.

What you should see:

- The toast "Documents added to the workshop."
- The poster listed as "Public poster · shown on the booking page".
- The agenda listed as "Staff reference · download here".
- A "Remove" button beside "Download" on each file.

Careful: a removed file cannot be brought back. Upload only the prepared files, never a test picture.

If you have time: swap the poster

26. Click "Edit details" and open "4. Documents & Media".
27. Drop the second prepared TRAINING poster on "Upload a workshop picture", or click "Browse files".
 - **Poster:** the second prepared TRAINING poster picture
28. Click "Save changes".
29. Open "Workshop files" and check the new picture is tagged "Public poster · shown on the booking page".

What you should see: the old poster reads "Public poster · replaced when you save changes" before you save. After saving, the toast "Workshop updated."

If something goes wrong

- You uploaded the wrong agenda: click "Remove" next to it. The box reads "Staff will no longer be able to download it. This cannot be undone." Check the file name, click "Remove file", then upload the right one with a clear name such as "Agenda FINAL".
- The toast says "The workshop dates have passed. Review the dates or close registrations before sharing its link." Click "Edit details", fix the dates, click "Save changes", then share.
- "Clipboard access was blocked." Click the link box and copy with Ctrl+C.

Leave this workshop open. You use it for bookings later today, and you close it yourself at the end of the day.

Notes:

When to hand it to Finance

Discount codes and anything to do with money belong to Finance. In the Western Cape that means the super admins. If you look down the Finance column on the staff list, you will not find a tick for anyone in the province, and there is no auditor.

When someone asks you for a discount code, do not promise a code or an amount. Say:

- **What you say:** "Discount codes are set up by our Finance person. I will pass that part to them today."

Then pass on the exact details: which workshop, who it is for, and how many people.

What the system cannot do yet, and what to do instead

- **Close registration the moment a workshop ends:** it does not. The Events page drops a workshop after its end time, and a nightly run at 00:05 closes its registrations. Until that run, anyone with the link or the QR code can still book. Instead: to stop bookings sooner, open "Published Links", click the group "Needs closure", select the workshop and click "Close registrations". If the event moved, edit the dates rather than pressing "Reopen registrations", because the next 00:05 run would close it again.
- **Email the link to all schools:** there is no button for this. The system only emails people after they book. Instead: give the person the copied link or the QR code to send themselves.
- **Show a poster on the website Events page:** never. The poster shows only on the booking page, which opens from "Register", the link and the QR code.
- **Share the link of a draft, or of a workshop whose dates have passed:** "Copy link", "Open link" and "Booking link QR" do not work then. Instead: publish first. If the dates have passed, fix them in "Edit details" if the event moved, or click "Close registrations" if it is over.
- **Delete a workshop once anyone has paid:** it refuses. "Delete workshop" only works while nobody has paid. It needs a reason, nobody who booked is emailed, and it cannot be undone. Instead: click "Close registrations". Every record is kept and the link stops taking bookings.
- **Put the check-in QR on a poster:** do not. The check-in QR ("Check-in link & QR") is for the venue door on the day. Before the day the check-in page says "Check-in isn't open today". The booking QR is the one for the poster.
- **Make a discount code yourself:** you cannot. Finance makes it. Once made, Finance can change how many people may use it, or switch it off and on, but never its price or the code itself.

Check yourself

1. You have just clicked "Create workshop" and seen "Workshop created." A colleague wants the booking link for WhatsApp right now. What is true, and what do you do?
2. While you set up a workshop, a colleague asks for a 50 percent discount code for principals. Is this yours, or do you hand it on?
3. Your planning sheet says the venue is probably Parow Teachers' Centre, but the booking is only confirmed next week. What do you choose under "How it runs"?
4. You made two drafts of the same workshop by mistake. Nobody has booked. How do you get rid of the extra one?
5. Your workshop ran today from 09:00 to 15:00. At 19:00 the same evening a teacher phones. She found the link in an old WhatsApp message and has just booked. How is that possible, and what do you do?

Notes:

Answers

1. It is still a draft. Go to "Published Links" > "Drafts", click "Publish workshop", then "Copy link".
2. Hand it to Finance (the super admins) with the exact details. Do not promise a code or an amount.
3. The dashed "To be confirmed" chip. Switch to "In person" in "Edit details" once the venue is booked.

4. Select the extra draft and click "Delete workshop". Give the reason "created by mistake", tick "I understand this cannot be undone." and click "Delete workshop for good".
5. The link stays open until the nightly run closes it at 00:05. To stop bookings now, go to "Published Links" > "Needs closure", select the workshop and click "Close registrations".

Booking and paying, from the attendee's side

In this chapter you sit in the attendee's chair. You book your own training workshop the way a teacher or a school would. Then you look at the same booking from the staff side.

Members phone the office about what they see on the booking page, not about what staff see. Once you have booked yourself, you can talk them through it. You can also tell straight away whether a booking is saved, paid or stuck.

Keep one question in mind the whole time: is this mine to do, or do I hand it to Finance?

Every booking in this chapter goes on the workshop you created and published this morning:

- **Title:** TRAINING - Classroom Discipline - delete after
- **Date and time:** Saturday 14 Nov 2026, 08:30 to 12:30
- **Venue:** Parow Teachers' Centre
- **Non-member price:** R 450
- **Member price:** R 350
- **Short code:** TCDDA2
- **Capacity:** 60

Every booking you make uses your own email, so every email from your bookings lands in your own inbox:

- **Trainee work email:** <Trainee work email>
- **Trainee personal email:** <Trainee personal email>

A few rules for today:

- No money moves. Nobody pays for a TRAINING booking.
- The bank details on the booking pages are for training only. Never pay them.
- Your facilitator gives you the test cell numbers, test member numbers and test ID numbers. Never type a real ID, PERSAL, NAP or cell number.
- Make every booking in a private (incognito) browser window.

1. Find the public booking link

What you will learn: You will learn where a workshop's public booking link lives, and that anyone with that link can book without logging in.

What is happening: You published your training workshop earlier this morning. Now you need its public booking link. That is the link you share with teachers and schools.

Steps:

1. Click Workshops, then "Published Links".
2. Select the workshop.
 - **Workshop:** TRAINING - Classroom Discipline - delete after
3. Copy its Application link.
4. Open a private (incognito) browser window.
5. Paste the link and open it.

What you should see:

- The public booking page, on its first step "Confirm workshop details".

- The title, the date, the place and the price.

Good to know: The Application link is the public address of the booking page. The page needs no login. Anyone who has the link, or the QR code, can book.

What the system cannot do yet, and what to do instead:

- Registration does not close the moment a workshop ends. From the night of 8 to 9 October 2026, a nightly run at 00:05 closes every published workshop whose end time was before midnight.
- The website's Events page drops the workshop by itself once its end time passes. So it looks closed on the website.
- But until the 00:05 run, the booking link stays open. Anyone who still has the link or the QR code can still book that evening.
- After the run, the workshop refuses new bookings, an unpaid booking on it can no longer get EFT details or pay by card, and its payment reminders stop.
- What to do instead: to stop bookings sooner, close its registrations yourself. You are a Workshop creator, so you can.

To close a workshop that has ended, before the nightly run:

1. Open Workshops, then "Published Links".
2. Click the group "Needs closure". It shows "N past dates still open".
3. Select the workshop that has ended. The page says: "These workshop dates have passed but their registration links are still open. Close registrations to archive them, or edit the dates if the event moved."
4. Click "Close registrations".
5. The workshop moves to "Closed archive". The booking link stops taking bookings.

If the event moved to new dates, edit the dates instead. Pressing "Reopen registrations" on a workshop whose dates have passed is undone at the next 00:05 run.

Do not close your training workshop yet. You still need it for the rest of this chapter, and you close it yourself at the end of the day.

Notes:

2. Book as Sipho, then Sipho phones you

What you will learn: You will learn that a booking exists the moment the person clicks "Save details and continue", but a seat only counts once the booking is paid. Marking an EFT paid is Finance's job, not yours. Your part is to pass on the EFT reference.

What is happening: You book a place as Sipho Ndlovu. He teaches Foundation Phase and is not a NAPTOSA member. He pays by EFT. A few minutes later, Sipho phones the office with questions about his booking.

Words you will meet:

- EFT is a bank transfer. When the person clicks "Send EFT instructions", the system emails them the bank details and an EFT reference.

- The EFT reference is a short code the payer types exactly into their bank's reference box. It starts with EFT, then the short code TCDDA2, then a number, then up to 5 letters of the surname. It is the same on the success page, in the email and on the staff row. Finance uses it to match the bank statement.
- "Owes money" is the group in "All Registrations" where unpaid bookings sit. The same bookings show as "Bookings incomplete" in the workshop header.
- The Attendee ledger is the list of every booking on one workshop.
- The NAP number is the NAPTOSA membership number. The PERSAL number is a teacher's government staff number. It is not a NAPTOSA number.
- The Finance tick is a permission on a staff account that unlocks the money buttons. You do not have it. In the Western Cape nobody has the Finance tick and there is no auditor, so Finance means the super admins.

First, the booking

1. In the private window, read the first step, "Confirm workshop details". Look at the title, date, place and the price box. The price box also shows "NAPTOSA members R ...".
2. Leave the school question empty.
 - **Has your school already paid for your place?:** leave it empty
3. Click "Continue".
4. On "Who should be invoiced?", click "Individual".
 - **Who should be invoiced?:** Individual
5. Under "Are you booking as a NAPTOSA member?", choose the standard rate. The fee pill changes to "Standard fee".
 - **Are you booking as a NAPTOSA member?:** No, standard rate R 450
6. Click "Continue".
7. On "Invoice and receipt details", type Siphos details:
 - **Name:** Siphos
 - **Surname:** Ndlovu
 - **Email address:** <Trainee work email>
 - **Cell phone number:** test cell number 1 (from your facilitator)
 - **PERSAL number (optional):** leave it empty
8. Click "Save details and continue".
9. If the panel "Possible existing registration" opens, read the reason, for example "same email, same telephone". Click "Save as additional entry". This happens when your email is already on an earlier booking for this workshop.
10. On the payment step, read "Invoice details are saved. Choose how you would like to pay."
11. Leave the payment method on EFT. Read the note under it.
 - **Payment method:** EFT (it is the default)
 - **Coupon code:** leave it empty
12. Click "Send EFT instructions". Do not click "Card (demonstration)".
13. Read the success page. Do not transfer any money. The bank details are for training only. Never pay them.
14. Go to your staff screen. Click the Refresh button at the top of the Workshops page.
15. Read the workshop header and the "Bookings incomplete" box.

16. Expand "Registrations, coupons and documents". Find the new row in the "Attendee ledger".
17. Click "Open this workshop's registration desk". This opens "All Registrations" for this workshop.
18. Open the "Owes money" group and find Sipho's row.
19. On that row, click "..." then "View details". Read "Amount / method", "Payment reference", "Invoice" and "Email".
20. Open your work inbox and find the email:
 - **Subject:** Workshop EFT payment instructions - TRAINING - Classroom Discipline - delete after

What you should see:

- After saving the details, a green toast: "Invoice and receipt details saved. Continue to payment."
- On the payment step: "Coupon code", "Card (demonstration)" and "EFT".
- On the success page: "EFT INSTRUCTIONS SENT" above the heading "Workshop registration pending EFT".
- The bank details, and "REFERENCE (USE THIS EXACTLY)" with a reference like EFT-TCDDA2-NNN-NDLOV. The NNN is a number the system picks.
- "PAYMENT STATUS" "Awaiting EFT" and "EMAIL STATUS" "Sent".
- A "Pay by card instead" button. Do not click it.
- In the staff header after Refresh: "0 seats paid · 1 booking incomplete · 1 booking total". The numbers are higher if other test bookings exist.
- In the Attendee ledger: a pill "EFT pending" and the same EFT reference. On a narrow screen the reference sits inside "Payment, receipt and email details".
- In "Owes money": "Owes R 450,00 · EFT ref" followed by Sipho's reference, then "· Not reminded yet".
- On the same row: "Attendance opens once the EFT is marked paid".
- In "View details": "Standard rate · EFT" under the amount, "Invoice" "Waits for payment", and "Email" "Sent · EFT instructions".
- In the email: the amount due, the EFT reference, the bank details and a "Pay by card instead" button.

You will not see "Mark EFT paid" or "Cancel booking" anywhere. Those buttons only show on Finance screens.

Then, the phone call

What is happening: You work at the NAPTOSA Western Cape office. You are the Workshop creator. You do not have the Finance tick. Siphon, the teacher who just booked, is on the phone. He booked on his phone, chose EFT and saw a page that said "pending". He has not paid. Use the booking you just made and the real staff screens to answer him. Try it before you look anything up in your notes.

1. Listen to his first question.
2. Before you answer, look at his booking on the staff side. Click Refresh and read "Bookings incomplete", or find his row under "Owes money" in "All Registrations".
3. Answer him from what you see on the screen.
4. If he asks you to change something on his booking, ask yourself whether this is yours to do.
5. If he says an email never came, ask him where he has already looked.
6. Open "View details" on his row and read the "Email" line.
7. To give him the amount and the reference again, click "Preview eft instructions email". Read them to him. Remind him to type the reference exactly.

What you should see:

- Siphos row under "Owes money", with "Owes R 450,00 · EFT".
- In "View details", the "Email" line "Sent · EFT instructions".
- If you click "Resend eft instructions email" on an email that was already sent, the toast: "EFT instructions email was already delivered, so it was not sent again."

If you see this:

- "Enter a South African cell (mobile) number, e.g. ..." and "Check the cell phone number above to continue.": you typed a landline. Use the test mobile number.
- "A PERSAL number is 5 to 10 digits. Check it, or leave it empty.": fix the number or clear the box.
- The staff counters did not move: they do not update while you watch. Click the Refresh button.
- "Bank details needed", or "The bank details aren't ready on this page yet...": stop and tell your facilitator.

When to hand it to Finance: When he asks you to mark his EFT paid. You do not have that button, and the system would refuse you anyway. Say:

"Only our Finance person can mark it paid, once it shows in NAPTOSA's bank account. I will pass on your reference."

Then give Finance his EFT reference. Do not promise him a seat.

What the system cannot do yet, and what to do instead:

- Real card payments are not available on ordinary workshops. "Card (demonstration)" moves no money. Tell the member to pay by EFT, using the reference exactly as shown.
- There are no part payments. A booking is paid in full or not at all. It stays under "Owes money" until Finance marks it paid, and payment reminders go out while it is unpaid.
- There is no membership check during booking. The member rate is for paid-up members. A non-member books at the standard rate. A PERSAL number only goes in the optional PERSAL box, never in the member number box.
- If the email status says "Sent", "Resend eft instructions email" will not send it again. Ask the person to check Spam or Junk, then use "Preview eft instructions email" to read them the amount and reference. Only when it says "Failed" does "Resend eft instructions email" try again.
- Tell the person not to book again. A second booking is a second booking. It brings up a "Possible existing registration" warning.

Good to know:

- Once "Send EFT instructions" is clicked, the booking is frozen. Nobody can change it, and only Finance can cancel it.
- The EFT instructions email cannot be recalled.
- The booking creates a new contact in CRM contacts with the source "Workshop". That is normal. Never edit those contacts from the workshop screens.

Notes:

3. Book as a member at the member price

What you will learn: You will learn that the member price is self-declared. The NAP number is only written down for NAPTOSA to check later. The system does not look up membership. The only check is the check digit on a 13-digit SA ID number.

What is happening: You book a place as Refilwe Moloi, a NAPTOSA member, at the member price. Then you look at her booking on the staff side.

Words you will meet:

- The NAP number is printed on a teacher's payslip, next to the NAPTOSA deduction. It is not the PERSAL number.
- The check digit is the last digit of a 13-digit SA ID number. It is worked out from the other 12 digits, so a typo usually breaks it.
- The price is locked when the booking is saved. A later price change on the workshop never changes what this booking owes.

Steps:

1. In the private window, open the Application link. On "Confirm workshop details", click "Continue".
2. On "Who should be invoiced?", click "Individual".
 - **Who should be invoiced?:** Individual
3. Choose the member rate.
 - **Are you booking as a NAPTOSA member?:** Yes, member rate R 350
4. In the member number box, type the invalid ID and read the message:
 - **NAP number (preferred) or SA ID number:** the invalid test ID (from your facilitator)
5. Delete it. Type the test NAP number instead:
 - **NAP number (preferred) or SA ID number:** test member NAP number 01 (from your facilitator)
6. Read the hint under the box out loud.
7. Click "Continue".
8. On "Invoice and receipt details", type Refilwe's details:
 - **Name:** Refilwe
 - **Surname:** Moloi
 - **Email address:** <Trainee personal email>
 - **Cell phone number:** test cell number 2 (from your facilitator)
 - **PERSAL number:** not asked, because a member is not asked for it
9. Click "Save details and continue".
10. If the panel "Possible existing registration" opens, read the reason, for example "same email, same telephone". Click "Save as additional entry".
11. On the payment step, leave the method on EFT, with no coupon:
 - **Payment method:** EFT
 - **Coupon code:** leave it empty
12. Click "Send EFT instructions".
13. On your staff screen, open "All Registrations".
14. In the "Workshop" switcher, choose the workshop.
 - **Workshop:** TRAINING - Classroom Discipline - delete after

15. Open the "Owes money" group.

16. On Refilwe's row, click "..." then "View details".

What you should see:

- After the invalid ID: "That looks like an SA ID number but the check digit does not match. Check the digits, or use your NAP membership number instead."
- The hint under the box: "Your NAP number is printed on your payslip, next to the NAPTOSA deduction. This is not your PERSAL number."
- After the NAP number: "NAPTOSA uses this to match your booking to your membership." The fee pill reads "Member fee".
- On the success page: "Amount due (member rate)" with R 350, an EFT reference ending in MOLOI, and "PAYMENT STATUS" "Awaiting EFT".
- On the staff row: "Owes R 350,00 · EFT".
- In "View details": "Member rate · EFT" under the amount, and "ID / member no" showing exactly what you typed.
- Nothing anywhere says the membership was checked, because it was not.

If you see this:

- A red "Choose one of these to continue." and "Tell us whether you are booking as a NAPTOSA member.": answer the member question first.
- "Required to book at the member rate. Either number is fine." and "Enter your NAP number or SA ID number.": the number box is empty.
- A PERSAL number typed into the member number box is accepted with no warning. NAP numbers have no format check. Read the hint again and correct it before you save.

What the system cannot do yet, and what to do instead:

- There is no membership lookup during booking. The NAP or ID number is only recorded for NAPTOSA to check later. It never changes or confirms the price.
- When a member asks "You have checked that I am a member, right?", or a non-member asks you to "just put me in as a member", say plainly that the member rate is for paid-up members and the number is recorded for NAPTOSA to check. A non-member books at the standard rate.

Good to know: The EFT instructions email cannot be recalled. The booking is now frozen. Nobody can change it, and only Finance can cancel it. A new contact appears in CRM contacts with the source "Workshop".

Notes:

4. Coupons: Finance makes them, you use them

What you will learn: You will learn that creating a coupon is Finance's job, not yours. A coupon changes the amount on the payment step. A members-only code is refused for a non-member. Only Finance can change a coupon afterwards, and the code and the price never change.

What is happening: Your facilitator, acting as Finance, creates two coupons on your training workshop. You look at them on your own screen, then use them on real bookings in the private window.

Words you will meet:

- A coupon is a code Finance creates on one workshop. It either makes the booking free ("Comp") or sets one fixed price for everyone who uses it. It can be for all bookings or for members only.
- A coupon use only counts once the booking is paid.
- "Check in" is the group in "All Registrations" for paid bookings.

The two coupons your facilitator creates:

- **Code:** TRAINFIX
- **Applies to:** All bookings
- **What it does:** Fixed price
- **Price in ZAR:** 200
- **How many people:** 3
- **Code:** TRAINFREE
- **Applies to:** Members only
- **What it does:** Comp (free)
- **How many people:** 2

Steps:

1. On your staff screen, open Workshops > "Published Links" and select the workshop.
 - **Workshop:** TRAINING - Classroom Discipline - delete after
2. Open "Registrations, coupons and documents", then "Coupons". Read what you can see there.
3. If the new coupons are not listed, click another workshop and then back, or reload the page. The Refresh button does not reload the Coupons list.
4. In the private window, open the Application link and click "Continue".
5. On "Who should be invoiced?", click "Individual".
 - **Who should be invoiced?:** Individual
6. Choose the standard rate, then click "Continue".
 - **Are you booking as a NAPTOSA member?:** No, standard rate R 450
7. On "Invoice and receipt details", type Carmen's details:
 - **Name:** Carmen
 - **Surname:** Februarie
 - **Email address:** <Trainee work email>
 - **Cell phone number:** test cell number 3 (from your facilitator)
8. Click "Save details and continue". Do this before you add a coupon, because saving the details again clears a coupon.
9. Your work email is already on Sipho's booking, so the panel "Possible existing registration" opens. Read the reason, for example "same email, same telephone". Click "Save as additional entry".
10. On the payment step, type the members-only code in the "Enter coupon code" box and click "Apply". Read the message.
 - **Coupon code:** TRAINFREE
11. Clear the box. Type the fixed-price code and click "Apply".

- **Coupon code:** TRAINFIX
12. Choose EFT and click "Send EFT instructions". Applying a code, or pressing Enter in the box, never pays by itself.
- **Payment method:** EFT
13. Only if your facilitator asks you to: book a free member place. Open the Application link again and click "Continue".
- **Who should be invoiced?:** Individual
 - **Are you booking as a NAPTOSA member?:** Yes, member rate R 350
14. Type the member number and click "Continue":
- **NAP number (preferred) or SA ID number:** test member NAP number 02 (from your facilitator)
15. On "Invoice and receipt details", type Bongani's details:
- **Name:** Bongani
 - **Surname:** Mabaso
 - **Email address:** <Trainee work email>
 - **Cell phone number:** test cell number 4 (from your facilitator)
16. Click "Save details and continue". Your work email is already on Siphos and Carmen's bookings. When "Possible existing registration" opens, read the reason and click "Save as additional entry".
17. On the payment step, apply the free code:
- **Coupon code:** TRAINFREE
18. Click "Confirm free booking". There is no payment method to choose, because the coupon covers the full fee.
19. Back on your staff screen, click another workshop and back. Read the Coupons list again.
20. Your facilitator may show you, on the Finance screen, how a coupon is edited and switched off. Watch. Then check your own Coupons list for "Edit" or "Switch off" buttons.

What you should see:

- On your screen, where the coupon form would be: "Only a super admin, an auditor or a Finance user can create coupons."
- TRAINFREE on Carmen, a non-member: the red toast "This coupon can only be used by NAPTOSA members."
- TRAINFIX: the toast "Coupon applied. Amount due is now R 200,00" and the green line "Amount due: R 200,00".
- If you made Bongani's free booking: the toast "Coupon applied. This booking is fully covered." The payment method section disappears. A green box says the coupon covers the full fee.
- After "Confirm free booking": "Workshop registration confirmed", and an email "Workshop invoice and receipt - TRAINING - Classroom Discipline - delete after" showing R 0.00 and the method Coupon.
- In the Coupons list: TRAINFIX still shows all its uses left, because a pending EFT uses none yet. If you made the free booking, TRAINFREE shows one use fewer, because that booking is already paid.
- In "All Registrations": Carmen's booking under "Owes money" at the coupon price. Bongani's free booking, if made, under "Check in" with "Paid R 0,00 · Coupon (no charge)".
- If your facilitator showed the edit: the box "Edit coupon TRAINFIX" with "0 of 3 used. To change the price or the code, switch this coupon off and create a new one.", then a toast that starts "Coupon TRAINFIX saved." and says how many uses are left.

- If your facilitator showed the switch off: the box "Switch off coupon TRAINFIX?" with "Nobody can use this code from now on. People who already used it keep their place.", then the refusal "1 unpaid booking is using this code. Cancel that booking, or wait until it is paid, then switch the coupon off."
- On your own screen: the coupons, with no "Edit", "Switch off" or "Switch on" buttons.

If you see this:

- "That code isn't valid for this workshop.": the same message shows for a wrong, used-up, switched-off or other-workshop code. Check the code against this workshop's Coupons list with Finance.
- The coupon disappeared after you clicked "Save details and continue" again: saving the details clears the coupon. Apply the code last, on the payment step.
- "EFT instructions have already been issued. Contact staff to change this booking.": the booking is frozen. A coupon cannot be added any more. Hand it to Finance.

When to hand it to Finance: When a coupon needs to be created, changed or stopped, or a booking needs changing after EFT instructions went out. Stop sharing a wrong code straight away. Say:

"I can see the coupon, but only Finance can change it. I will ask Finance now."

What the system cannot do yet, and what to do instead:

- Finance can change only the number of people and the note on a coupon. The code, the kind, the price and "Applies to" never change. For a wrong price, Finance switches the coupon off and creates a new one.
- Finance cannot switch a coupon off while an unpaid booking holds the code. That booking must be paid or cancelled first. People who already used a switched-off code keep their place.
- Once EFT instructions are sent, the attendee cannot change their name or headcount, add a coupon or cancel. You cannot edit those fields either. Hand it to Finance. Finance can correct a wrong payer email. For anything else, Finance cancels the unpaid booking and the person books again.
- The Refresh button at the top reloads the workshop list, not the Coupons list. Click another workshop and back, or reload the page.

Notes:

5. The school clerk who wants one invoice for three teachers

What you will learn: You will learn that a school can pay once for several teachers, and that no teacher ID numbers are needed at booking. The school code only exists after Finance marks the payment paid. A member may take a non-member place, but a non-member can never take a member place.

What is happening: Mrs Elmarie Pienaar, the admin clerk at Bergrivier Primary School in Wellington, phones the office. Her principal wants to send three teachers, two NAPTOSA members and one non-member, and pay once. You fill in the public booking page while she gives you the details. Use your own work email as the school's email. You are the Workshop creator without the Finance tick.

Words you will meet:

- A school booking pays once for a number of member places and non-member places. The school is not asked for any ID or NAP number.

- The school code is a short code that starts with the letters SCH. The school only gets it, with a "Register a teacher" link, after Finance marks the payment paid. Teachers use it to register themselves at R 0,00.
- "Done" is where the paid school row moves to. Its teachers then check in on their own places.
- INV and RCT numbers are the invoice and receipt numbers the system issues when Finance marks a booking paid.

Part one: one invoice, no ID numbers

1. Listen to the clerk's question.
2. In the private window, open the Application link and click "Continue".
3. On "Who should be invoiced?", click "School".
 - **Who should be invoiced?:** School
4. Under "How many people are attending?", type the headcount:
 - **Members · R 350 each:** 2
 - **Non-members · R 450 each:** 1
5. Read "Total people" and "Total price" back to the clerk. The total should be R 1 150.
6. Tell her no teacher ID numbers are needed now. Each teacher gives their own details later.
7. Click "Continue".
8. Ask the clerk for the school's details. Type them:
 - **School name:** Bergrivier Primary School
 - **Address line 1:** TRAINING ONLY - no event
 - **Address line 2:** Wellington
 - **VAT number:** leave it empty
 - **Email address:** <Trainee work email>
9. Click "Save details and continue". If "Possible existing registration" opens, read the reason and click "Save as additional entry".
10. On the payment step, read the "Amount due" box for 3 people.
11. Choose EFT and click "Send EFT instructions":
 - **Payment method:** EFT
 - **Coupon code:** leave it empty

Part two: "We paid, please confirm"

12. The clerk says the school has paid and asks you to confirm it so the teachers can register today.
13. On your staff screen, open "All Registrations", then the "Owes money" group, then the Bergrivier row.
14. Look for a "Mark EFT paid" button. You will not find one.
15. Tell the clerk who marks it paid, and when the school code arrives.
16. Pass it to Finance with the school's EFT reference.
17. Your facilitator, acting as Finance, marks it paid.
18. Look at "All Registrations" again. The Bergrivier row has moved to "Check in".
19. Open your work inbox and the receipt email. Find the line "School code:" with the school's code, and the "Register a teacher" link.
 - **Subject:** Workshop invoice and receipt - TRAINING - Classroom Discipline - delete after

Part three: "Can I put the code on WhatsApp?"

20. The clerk wants to put the school code in the staffroom WhatsApp group so everyone can register. Answer her. Think about how many places the school paid for, and of which kind.
21. Now act as Anita, the non-member teacher. Open the "Register a teacher" link and choose the non-member option.
 - **Your choice:** No, I am not a member
22. Type Anita's details:
 - **First name:** Anita
 - **Surname:** Fourie
 - **Email:** <Trainee personal email>
 - **SA ID number:** the valid test ID (from your facilitator)
 - **Cell number (optional):** leave it empty
 - **PERSAL number (optional):** leave it empty
 - **Why your personal email:** your work email is on the school's booking, which is now paid. The page refuses an email that already has a paid booking on this workshop.
23. Click "Register my place (R 0,00)". There is no payment step.
24. On your staff screen, open "Check in" and find Anita's row.
25. Click the underlined school name. Read the teachers sheet.

Part four: Johan cannot get in (only if your facilitator plays it)

26. The clerk says Johan, a non-member, cannot get in. The page tells him the only places left are member places.
27. Act as Johan. Open the same "Register a teacher" link and choose the non-member option. Type nothing else. Read the message.
 - **Your choice:** No, I am not a member
28. Explain the rule to the clerk. Point to "Places used 1 of 3" on the teachers sheet.

What you should see:

- The fee pill "School total R ... · 3 people", showing R 1 150.
- On the success page: "Attendees" "3 people: 2 members, 1 non-member" and an EFT reference ending in BERGR.
- On the staff row before payment: "Owes R ... · EFT" and "School · 2 members, 1 non-member (3 total)". No "Mark EFT paid" button on your screen.
- After Finance marks it paid: the row is in "Check in" with "Paid R ... · EFT".
- In the school's receipt email: a box "Your teachers register themselves", the line "School code:" with the school's code, a "Register a teacher" button, and a PDF "COMBINED INVOICE & RECEIPT" with Members and Non-members lines.
- On Anita's page before registering: "Paid for by Bergrivier Primary School. This covers your place.", "2 member and 1 non-member places left (0 of 3 used)." and "Amount due: R 0,00. There is no payment step."
- After registering: "Registered on a school place" and "You're registered, Anita".
- In your personal inbox: "You are registered - TRAINING - Classroom Discipline - delete after".
- In your work inbox (the school's): "Anita Fourie registered - 1 of 3 places used - TRAINING - Classroom Discipline - delete after".

- On the staff side: Anita's row shows "Paid by school", "School place · R 0,00" and "Place paid for by Bergrivier Primary School · 1 of 3 places used".
- The school row is now in "Done" with "Teachers check in on their own places · 1 registered".
- The sheet "Teachers on Bergrivier Primary School's places" shows "Places used 1 of 3" and "Paid: 2 member, 1 non-member · 2 unclaimed places".
- Only if you played Johan: "The places still open are member places. A non-member cannot take a member place. Ask Bergrivier Primary School to contact NAPTOSA." No form opens, and no booking is created for him.

If you see this:

- "Enter at least one attendee to continue.": both headcount boxes are 0.
- "Only N seat(s) are left for this workshop.": the school's headcount is more than the seats left. Tell your facilitator.
- "Complete the school billing details.": a school field is empty.
- "This school booking is not paid, so its code cannot be used. Ask the school to contact NAPTOSA.": Finance has not marked it paid yet. The staff sheet says the same: "Teachers can register once this school booking is paid. The school code is emailed with the receipt."
- "That SA ID number is not valid. Check the 13 digits.": the ID fails the check digit. Use the valid test ID from your facilitator.
- "Too many attempts. Wait 10 minutes and try again.": too many wrong code lookups. Wait, then use the link from the email.
- "This email already has a paid booking for this workshop.": the teacher's email already has a paid booking here. Use an email with no paid booking on this workshop, such as <Trainee personal email>.

When to hand it to Finance: When the school says it has paid. You do not have "Mark EFT paid". Say: "Only our Finance person can mark it paid, once it shows on NAPTOSA's bank statement. I will pass your reference to Finance."

Then give Finance the school's EFT reference. Tell the clerk the school code comes in the receipt email once Finance marks it paid. Do not promise the teachers can register today.

What the system cannot do yet, and what to do instead:

- The school code does not exist before the school booking is marked paid. Finance marks the school paid first, and the code arrives in the school's receipt email.
- The code covers exactly the places the school paid for, of each kind. Once those are used, nobody else can register on it. It should only go to the named teachers, never to a whole WhatsApp group.
- Releasing or swapping a teacher, and cancelling or reissuing a school code, are not built. You cannot swap a place. For any swap or mix-up, the school contacts NAPTOSA and Finance sorts it out with the school.
- A member may take a non-member place, but a non-member can never take a member place. Never tell a non-member to tick "member" to get in.

Notes:

Check yourself

1. You have just booked yourself as a non-member and clicked "Send EFT instructions". The success page says "Workshop registration pending EFT". You go back to the staff screen and click Refresh. Where do you expect to find this booking in "All Registrations"?
 - a) In "Check in", because the instructions were sent.
 - b) In "Owes money", with "Owes R ... · EFT".
 - c) Nowhere, because staff only see a booking once it is paid.
 - d) In "Cancelled", until Finance confirms the money.
2. A school clerk phones: "We paid the EFT this morning. Please confirm it so our teachers get the code today." You open the school's row under "Owes money". What do you do?
 - a) Find the "Mark EFT paid" button on the row and confirm it.
 - b) Tell the school their code is already in the EFT instructions email.
 - c) Hand it to Finance with the school's EFT reference, and tell the clerk the code comes in the receipt email once Finance marks it paid.
 - d) Ask the school to pay again by card so it confirms immediately.
3. A non-member asks you to change his booking to the member price, using his PERSAL number in the member number box. What do you tell him?
4. A coupon was created with the wrong price. Who fixes it, and how?
5. A workshop ended today at 15:00. It is now 18:00. Can people still book it, and what do you do?

Notes:

Answers

1. b. An unpaid EFT booking sits in "Owes money" until Finance marks it paid.
2. c. Finance checks the bank statement and marks it paid. The school code comes with the receipt.
3. No. The member rate is for paid-up members. The box wants a NAP or SA ID number, never a PERSAL number. Nothing is checked during booking.
4. Finance (in the Western Cape, a super admin). Finance switches the coupon off and creates a new one with the right price. The price can never be edited.
5. Yes, until the nightly run closes it at 00:05. The Events page drops it, but the booking link stays open until then. To stop bookings now, open "Needs closure", select the workshop and click "Close registrations".

Chasing the money and handing it to Finance

This chapter is about the calls members make most often: "I paid, so why are you still emailing me?" You learn to find the booking, read it out honestly, explain the reminders and hand the money job to Finance. You never mark anything paid yourself.

Two words come up all the time in this chapter:

- **Finance:** anyone with the Finance tick, the auditor role or a super admin. In the Western Cape nobody has the Finance tick and there is no auditor. So Finance here means the super admins only. Look at the Finance column in the staff list: it is empty for every Western Cape person. Every money job here goes to a super admin. In this training, your facilitator plays Finance.
- **Your account:** the Workshop creator tick is on and the Finance tick is off. So the money buttons are missing from your screen on purpose. That is not a fault.

Exercise 1: Find the booking you made earlier

What you will learn: You will learn that one search box finds any booking by surname, email or EFT reference, across every workshop.

What is happening: Earlier this morning you booked Sipho Ndlovu, a non-member, onto your training workshop. He chose EFT and has not paid. You used your own email, so every email on his booking lands in your inbox. Now you find that booking again.

The booking you are looking for:

- **Person:** Sipho Ndlovu
- **Email:** <Trainee work email>
- **Workshop:** TRAINING - Classroom Discipline - delete after
- **EFT reference:** ends in NDLOV

A few words you meet here:

- **All Registrations:** the tab that lists every booking, sorted into groups.
- **Owes money:** the group that holds every booking not paid yet. An EFT booking stays there until Finance marks it paid.
- **EFT reference:** the code the payer must type on the bank transfer. Finance uses it to match the bank statement.

Steps:

1. On the staff workshops page, click the "All Registrations" tab.
2. Read the summary line out loud. It looks like this:
 - **Summary line:** '<N> registrations across <M> current workshops.'
3. Click in the search box "Find a person, email or EFT reference" and type the surname.
 - **Search:** Ndlovu
4. The group with the match opens by itself and scrolls into view. Find Sipho's row in "Owes money".
5. Delete the search. Type the email you booked him with.
 - **Search:** <Trainee work email>
6. Delete it again. Type the EFT reference from his row.
 - **Search:** the EFT reference ending in NDLOV

7. Open your own inbox at <Trainee work email>. Find the EFT instructions email for Sipho's booking.

What you should see:

- Every search finds the same row.
- With a search typed, the summary reads '<N> match(es) across all workshops.' Search reaches every workshop, closed ones too.
- Sipho's row in "Owes money" with:
 - **Badge:** 'Owes R <amount> · EFT'
 - **Grey text:** 'Attendance opens once the EFT is marked paid'
- In your inbox: the EFT instructions email for Sipho. You see exactly what a real payer sees.

If something goes wrong:

- 'Nobody here matches the current search.' Check the spelling, or search by email or EFT reference instead of the name.
- 'Nobody matches these filters.' A filter is hiding the row. Click 'Clear' on the 'Filtered:' line, or "Reset" in the filter panel.
- The page opens already filtered. Filters live in the web address, so a shared link or a refresh brings them back. Read the 'Filtered:' line and click 'Clear'.
- 'Registrations could not be loaded. Use Retry workshops above.' Click Retry. If it keeps failing, tell your facilitator.
- Two people with the same name. With 'All current workshops' selected, each row shows its workshop title. Pick the workshop in the "Workshop" box first.

Notes:

Exercise 2: Read the money queue and the reminder schedule (look only)

What you will learn: You will learn that the reminder schedule is one schedule for everyone, that you can read it but not change it, and that the money buttons belong to Finance.

What is happening: You stay on Sipho's booking and read its money story, then you read the reminder schedule and the bank details. You save nothing in this exercise.

A few words you meet here:

- **EFT reference:** for example EFT-TRC-<NNN>-VANDE. It is 20 characters at most, with the surname cut to 5 letters. Always copy it from 'Payment reference' in "View details", never from memory.
- **Automatic reminders:** one schedule for every workshop and every province. Reminders go 14, 7 and 2 days before the workshop. They only go to EFT bookings that are still unpaid, and only for dates after the booking was made.
- **What stops the reminders:** Finance marks the booking paid, the booking is cancelled, registrations close, or the workshop starts. None go out while the workshop is full. Ignoring them does not cancel the booking.
- **The payer:** every reminder and receipt goes to the email on the booking. Nobody can change who a reminder goes to. Only Finance can fix a wrong address, with "Correct payer email".

Steps:

1. Clear the search box.
2. Click "More filters" and set the method.
 - **Method:** EFT

3. Look at the number badge on "More filters" and at the line that starts 'Filtered:'.
4. Open the "Workshop" box and pick your workshop.
 - **Workshop:** TRAINING - Classroom Discipline - delete after
5. Read the new summary line. It now describes one workshop:
 - **Summary line:** '<date range> · Upcoming · bookings · <p> paid seats · <o> owe R <amount> · <c> checked in'
6. Read Sipho's row out loud:
 - **Badge:** 'Owes R <amount> · EFT'
 - **Reference line:** 'ref <EFT reference> · Reminded <dd Mon>', or 'Not reminded yet'
 - **Grey text:** 'Attendance opens once the EFT is marked paid'
7. Click the "... " button at the end of the row and choose "View details".
8. In the sheet 'Payment, receipt and email details', read each line out loud:
 - **Amount / method**
 - **Payment reference**
 - **Invoice:** Waits for payment
 - **Receipt:** Waits for payment
 - **Email:** the status and type, then who it went to and when
 - **Next reminder:** a date, if the line is there
 - **Captured:** the date the booking was made
9. Before you close the sheet, name what is missing from your screen. There is no "Mark EFT paid", no "Remind" and no "Cancel booking" on the row. There is no "Correct payer email" and no Money history in the sheet. Those belong to Finance.
10. If a group ends in 'Show all <N>', click it to see every row. Then click 'Show fewer'. A group shows 8 rows until you open it.
11. Click 'Clear' on the 'Filtered:' line, so the next person does not get your filter.
12. Click the "Reminders" tab. It opens on "Reminder settings".
13. Read the notice: 'You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor.'
14. Under 'Waiting for an EFT', read the three rules:
 - **First:** 'First EFT reminder, 14 days before'
 - **Second:** 'Second EFT reminder, 7 days before'
 - **Final:** 'Final EFT reminder, 2 days before'
 - **The line under them:** 'Stops as soon as staff mark the booking paid, and never fires after the workshop.'
15. Under 'Card checkout abandoned', read 'Retry link, 30 minutes after stopping'. This one goes to someone who chose card, filled in their details, then stopped before paying.
16. Under 'Workshop starting soon', read the line 'Sent once, before the workshop, to each paid attendee's own email address. Never to a school's booking address.' Check that it is set to 1 day before and that the 'On' box is not ticked.
 - **Days before:** 1
17. Read the two attendance emails below it:

- **Thank you for attending:** 'Sent to a person once they are marked present, by staff or by checking themselves in.'
- **Sorry we missed you:** 'Sent to a person once staff mark their booking absent.'
- **Minutes after:** 10

18. Say in your own words: this is one schedule for every workshop in every province, and nobody changes it for one person.

19. Open Settings, then "Payment details".

20. Read the card 'What members see now': Bank, Account name, Account number and Branch code. Then read 'Only a super admin can change these details.' Never press a save button here.

How "Workshop starting soon" works:

- It is off until a super admin switches it on.
- Once it is on, each paid attendee gets one email before the workshop, for example 'Tomorrow: <workshop title> starts at <HH:MM>'.
- It goes to paid bookings only. Never to the waiting list, unpaid or cancelled people, and never to a school's booking address.
- Each address gets it once per workshop. Someone who books after the reminder moment does not get it.
- It can arrive up to 15 minutes late.
- On the workshop day itself, you can open the Check-in link and QR panel and use "Email check-in details to attendees" (the 'Workshop starts today' email), then 'Send to N attendees'. That one only works on the workshop's own day.
- The two attendance emails are also off until a super admin switches them on.

What you should see:

- A number badge on "More filters" and a line 'Filtered: Method EFT · Clear' that stays after the panel closes.
- Sipho's row in "Owes money" with 'Owes R <amount> · EFT' and 'Attendance opens once the EFT is marked paid'.
- In "View details": 'Invoice: Waits for payment', 'Receipt: Waits for payment', and the Email row as '<Status> · <Type>' (for example 'Sent · EFT instructions') followed by 'Email to <address> · Sent <date, time>'.
- In "Reminders": the three EFT rules, the card rule, 'Workshop starting soon', the two attendance emails, and the read-only notice.
- No 'Send an EFT payment reminder now' section at the top, and no "Save" you can use. That section belongs to Finance, so it is hidden from you. The tab is not broken.
- 'Workshop starting soon', 'Thank you for attending' and 'Sorry we missed you' with the 'On' box not ticked.
- In Settings: the 'What members see now' card and 'Only a super admin can change these details.'

The bank details on screen are for training only. Never pay them. Nobody pays for a TRAINING booking, so never send a real person to pay for one.

Good to know:

- The 'Reminded <dd Mon>' text on a row counts automatic reminders only. A reminder Finance sends by hand does not change it. That one only shows in the Email row of "View details".

- While one of your workshops is running right now, "Check in" comes before "Owes money" in the list. Picking a workshop in the "Workshop" box gives that workshop's own order.

If something goes wrong:

- 'Nobody matches these filters.' Click 'Clear' on the 'Filtered:' line, or "Reset" in the panel.
- 'Registrations could not be loaded. Use Retry workshops above.' Retry. If it keeps failing, tell your facilitator.
- 'Reminder settings could not be loaded. Check your connection and try again.' Click "Try again".
- 'No reminder rules are configured. Ask an administrator to check the workshop reminder setup.' Stop and make a note. Without rules, nobody is being chased.
- "Payment details" shows 'No bank account is saved yet.' Tell a super admin. Do not promise anyone an EFT payment.
- The card heading reads 'Saved, not confirmed yet' instead of 'What members see now'. Members are not shown that account until a super admin confirms it. Make a note to follow it up.
- You can tick 'On' or type a number in a rule. Your account has more than the Creator tick. Save nothing and tell your facilitator.

Notes:

Exercise 3: Role-play. Jaco says he already paid

What you will learn: You will learn that when someone says "I paid", your job is to find the booking, read it out honestly, explain the reminders and hand the payment to Finance with every detail Finance needs.

What is happening: It is Thursday 8 October 2026, about 10:15. Jaco van der Merwe, a non-member teacher at Kraaifontein High, phones you. He booked the Saturday workshop and chose EFT. He says he already paid and he is annoyed that he got another payment email this morning. You are the Workshop creator without the Finance tick. Find his booking, tell him what the system shows, and get his payment confirmed by the right person. When it is done, make sure he can get his receipt.

Your facilitator made Jaco's booking, so his emails go to loxly@lbtec.co.za. The times on screen show the real clock, not the time in the story.

The workshop:

- **Title:** TRAINING - Chasing the money - delete after
- **Short code:** TRC (it appears in EFT references and receipt numbers)
- **Date:** Saturday 10 October, 09:00 to 12:30, at the office in Rondebosch
- **Non-member price:** R 450

A few words you meet here:

- **Check in:** the group a booking moves to once it is paid.
- **Invoice and receipt numbers:** the invoice number starts with INV and the receipt number starts with RCT. The system issues both the moment Finance marks the booking paid.

Write these down as you go: the group the row moves to, the new badge, the invoice number, the receipt number, the exact message after "Resend receipt email", and the file name of the PDF.

Steps:

He wants to know where his money is.

1. In "All Registrations", open the "Workshop" box and pick the workshop.
 - **Workshop:** TRAINING - Chasing the money - delete after

2. Read the summary line.
3. Type in "Find a person, email or EFT reference".
 - **Search:** merwe
4. The "Owes money" group opens on Jaco van der Merwe's row. Read the row to him:
 - **Badge:** 'Owes R 450,00 · EFT'
 - **Reference line:** 'ref EFT-TRC-<NNN>-VANDE · Reminded 08 Oct'
 - **Grey text:** 'Attendance opens once the EFT is marked paid'
5. Tell Jaco in plain words that the system does not show his payment as received yet.

He asks why he got an email this morning.

6. Click the "... " button on his row and choose "View details".
7. Read the sheet:
 - **Amount / method:** R 450,00 · Standard rate · EFT
 - **Payment reference:** EFT-TRC-<NNN>-VANDE
 - **Invoice:** Waits for payment
 - **Receipt:** Waits for payment
 - **Email:** Sent · EFT reminder
 - **Captured:** 7 October
8. Explain three things. This morning's email was the system's scheduled 2-day reminder, not a person chasing him. Reminders stop the moment Finance marks the booking paid. Ignoring them does not cancel his booking.

He asks you to tick him off as paid.

9. Ask him for the date he paid, the amount, the bank and the reference he typed. Write them down.
10. Check the date he gives against 'Captured' in "View details". He cannot have paid before he booked.
11. Tell Jaco you cannot mark it paid yourself. Finance does it once the money is found on the bank statement.
12. Hand the job to Finance with every detail (see "When to hand it to Finance" below). In real life you use the office's usual channel, because the app has no hand-off message.
13. Your facilitator, acting as Finance, marks it paid.

He wants to know how he will know it is sorted.

14. Click "Refresh". Your screen does not update by itself.
15. Search again.

- **Search:** merwe

16. Find the row in "Check in", the group for paid bookings.
17. Click "... " and "View details" again and read:
 - **Invoice:** INV-2026-<NNNN>-TRC-JVANDERMERWE
 - **Receipt:** RCT-2026-<NNNN>-TRC-JVANDERMERWE
 - **Email:** Sent · Invoice and receipt
 - **Next reminder:** the line is gone

18. Click "Download receipt PDF" in the sheet.
19. Tell Jaco the invoice and receipt email with the PDF has been sent, and that the reminders have stopped.

20. If he cannot find the email, close the sheet, click "..." on the row and choose "Resend receipt email".

Read the message.

21. Click "..." and choose "Download receipt (PDF)". Offer Jaco the file. You can send it to him yourself.

What you should see:

- After "Refresh": the row in "Check in" with 'Paid R 450,00 · EFT'. The line 'Attendance opens once the EFT is marked paid' has gone.
- The workshop summary shows one more paid seat, and 'owe R' is down by R450.
- After "Resend receipt email": 'Invoice and receipt email was already delivered, so it was not sent again.' This is not an error.
- A downloaded file named '<RCT number> - <title> - <Initial Surname>.pdf', for example 'RCT-2026-<NNNN>-TRC-JVANDERMERWE - TRAINING - Chasing the money - delete - J van der Merwe.pdf'. File names cut the title to 40 characters at a word break.
- Jaco's email, in the facilitator's inbox at loxly@lbtec.co.za, has the subject 'Workshop invoice and receipt - TRAINING - Chasing the money - delete after', with the PDF attached.

When to hand it to Finance:

Say to Jaco: "I can see your booking, but I can't mark it paid myself. Finance checks the bank statement and marks it paid. I'm passing them your details now. The reminders stop as soon as they do, and ignoring them won't cancel your booking."

Say to Finance: "Please check the statement for Jaco van der Merwe on TRAINING - Chasing the money - delete after. EFT reference EFT-TRC-<NNN>-VANDE. R 450,00, paid on <date he paid> from <his bank>. He typed <the reference he used> on the transfer, not the EFT reference."

The details Finance needs, every time:

- **Name:** Jaco van der Merwe
- **Workshop:** TRAINING - Chasing the money - delete after
- **EFT reference:** EFT-TRC-<NNN>-VANDE
- **Amount:** R 450,00
- **Date paid:** <the date he gives you>
- **Bank:** <the bank he gives you>
- **Reference he typed:** <what he typed>

If he did not use the EFT reference, Finance has to search the statement by amount and date instead. That is why the date, amount and bank matter.

Good to know:

- Before the morning's automatic reminder goes out, the row reads 'Not reminded yet'. A reminder sent by hand does not change this text.
- With 'All current workshops' selected, read the workshop title on the row, or you can land on the wrong person with the same name.
- A paid mark cannot be undone. Invoice and receipt numbers are issued and the receipt is emailed at once.

Notes:

Exercise 4: Role-play. Nomvula wants the reminders stopped

What you will learn: You will learn that you cannot switch reminders off for one person, that a member who is not coming needs Finance to cancel the unpaid booking, and that a booking cannot be handed to a colleague.

What is happening: It is Thursday 8 October 2026, 14:05. Nomvula Dlamini, a NAPTOSA member and senior teacher at Rondebosch Primary, contacts you. She booked the same workshop at the member rate, chose EFT and is irritated by the payment emails. She wants them stopped. You are the Workshop creator without the Finance tick. Work out what she really needs, what you can and cannot do, and who has to act. Your facilitator made Nomvula's booking, so her emails go to loxly@lbtec.co.za.

The workshop:

- **Title:** TRAINING - Chasing the money - delete after
- **Date:** Saturday 10 October
- **Member price:** R 350

Keep "All Registrations" open in one browser tab and the "Reminders" tab open in a second one.

Steps:

She wants the reminders switched off until the 25th.

1. In "All Registrations", open the "Workshop" box and pick the workshop.
 - **Workshop:** TRAINING - Chasing the money - delete after
2. Type in "Find a person, email or EFT reference".
 - **Search:** dlamini
3. Read the row:
 - **Badge:** 'Owes R 350,00 · EFT'
 - **Reference line:** 'ref EFT-TRC-<NNN>-DLAMI · Reminded 08 Oct' (or 'Not reminded yet' before the morning reminder)
4. Click "...". on the row and choose "View details". Read:
 - **Amount / method:** R 350,00 · Member rate · EFT
 - **Email:** Sent · EFT reminder
 - There is no 'Next reminder' line, because the 2-day reminder was the last one on the schedule.
5. Switch to the "Reminders" tab. It is one schedule for everyone, it is read-only for you, and there is no switch for one person.
6. Ask her whether she has paid anything, and whether she can still come on the day.
7. Tell her three things. There is no switch for one person. Reminders stop when the booking is paid or cancelled, or when the workshop starts. And the workshop is on 10 October, before the 25th.

She says she is not coming and wants to be deleted.

8. Tell her you cannot cancel the booking yourself. Finance does it. Her booking is unpaid (it sits in "Owes money"), so Finance can cancel it.
9. Tell her a booking cannot move to another person. Her colleague books her own place on the same link and pays herself. You find the link in Published Links, then "Application link", then "Copy link".
10. Ask her for the reason, so Finance can record it.
11. Hand the job to Finance (see "When to hand it to Finance" below).
12. Your facilitator, acting as Finance, cancels the booking.

She asks about more paperwork.

13. Click "Refresh".
14. Check that her row has gone from "Owes money" and that 'owe R' is down by R350.
15. Tell her she gets one last email confirming the cancellation, and then no more reminders. If she changes her mind, she can book again from the workshop page.

What you should see:

- No Dlamini row in "Owes money".
- The "Cancelled" group stays hidden at 0, because the row was deleted, not moved.
- Her cancellation email has the subject 'Booking cancelled - TRAINING - Chasing the money - delete after' and the line 'No payment is due and you will not receive further payment reminders for this booking.'
- If she opens her old booking page, it now says 'We can't find this booking' and 'It may have been cancelled. Contact NAPTOSA on 021 686 8521, or book again from the workshop page.'

When to hand it to Finance:

Say to Nomvula: "I can't switch the reminders off for one person, and I can't cancel a booking myself. Finance cancels unpaid bookings. I'm asking them now. You'll get one email confirming the cancellation, and then no more reminders."

Say to Finance: "Please cancel the unpaid booking for Nomvula Dlamini on TRAINING - Chasing the money - delete after. EFT reference EFT-TRC-<NNN>-DLAMI. Reason: <the reason she gives>."

The details Finance needs:

- **Name:** Nomvula Dlamini
- **Workshop:** TRAINING - Chasing the money - delete after
- **EFT reference:** EFT-TRC-<NNN>-DLAMI
- **Reason:** <the reason she gives, for example Can no longer attend>

Good to know:

- Do not untick 'On' on a rule to help one member. It would change reminders for every workshop in every province, and you cannot save it anyway.
- "You will get nothing more" is not true. The cancellation itself sends one email.
- If the booking is already paid (it sits in "Check in"), it cannot be cancelled in the system. Escalate the refund to Finance and the Provincial CEO.

Notes:

Exercise 5: Checkpoint. Do it, hand it to Finance, or stop

What you will learn: You will learn that most money calls end in one of three answers: you do it yourself, you hand it to Finance, or you stop and escalate.

What is happening: Your facilitator reads each situation out loud. You say what you would do: do it yourself, hand it to Finance, or stop and escalate. Write your answer next to each one.

- **Money history:** the record in "View details" of who did what with the money on a booking. Only Finance sees it.
1. A member phones: "I did the EFT yesterday, please confirm my place." The row is in "Owes money".
 2. Finance is about to click "Mark paid and send receipt". What can no longer be reversed after the click?

3. It is 16:30 and the super admin who does Finance has gone home. A colleague says: "Just log in as me, my account has the money buttons. Mark that EFT paid just this once, the member is upset."
4. A non-member emails: "Please send me the banking details again, I deleted the email." Her row is in "Owes money" and the EFT instructions email shows 'Sent'.
5. A member who is still coming says: "Stop these reminders. I will pay when I am ready."
6. A colleague says: "Switch on 'Workshop starting soon' so everyone who paid gets reminded on Friday."
7. A school bursar emails: "We will pay half of our booking now and the rest next month. Please record the first half."
8. Finance marked a member's EFT paid this morning. She phones: "I never got my receipt." Her row is in "Check in" and "View details" shows 'Sent · Invoice and receipt' to her correct address.
9. A member with an unpaid EFT booking phones: "Your email has a 'Pay by card instead' button. I clicked it and the page said 'Welcome back. Your details are still saved, so you only need to pay.' Did I make a second booking? Should I just pay by card?"

Notes:

What the system cannot do yet, and what to do instead

- **Mark a booking paid.** Only Finance can. The button is not on your screen, and the system refuses anyone else. **Instead:** take the name, workshop, EFT reference, amount, date, bank and the reference they typed, and hand it to Finance.
- **Send a hand-off message from the app.** There is no hand-off message in the app. **Instead:** use the office's usual channel to pass the details to Finance.
- **Switch on 'Workshop starting soon' or the two attendance emails.** A super admin, case admin, admin, supervisor or Finance switches them on in "Reminder settings". In the Western Cape that means the super admins. All three are off until someone switches them on. **Instead:** ask a super admin. On the workshop day you can also use "Email check-in details to attendees" in the Check-in link and QR panel, then 'Send to N attendees'.
- **Send a payment reminder by hand.** "Remind" on the row and 'Send an EFT payment reminder now' are for Finance only. Each person can get one reminder by hand per day. A second try that day says the person 'already had a reminder sent today. Nobody was emailed again.' **Instead:** ask Finance to send one. Meanwhile give the member the EFT reference and the details from 'Preview <type> email' in the Email row of "View details".
- **Send a reminder to a different email, or stop reminders for one person.** A reminder always goes to the booking's email. There is no switch per person or per workshop. **Instead:** for a wrong address, Finance uses "Correct payer email". Reminders stop when Finance marks it paid, when Finance cancels the unpaid booking, when registrations close, or when the workshop starts.
- **Undo a "Mark EFT paid" done by mistake.** No button reverses it. **Instead:** never mark paid until the bank statement shows the money. If a mistake happens, stop and escalate to the super admin and the Provincial CEO. Do not try to fix it in the app.
- **Record a part payment.** A booking is only paid for the full amount it was booked at, in one go. **Instead:** the booking stays in "Owes money" and reminders continue. Pass the details to Finance and escalate if the payer insists.
- **Refund a member, or cancel a paid booking.** There is no refund in the system. A paid row has no "Cancel booking", and the system says 'This booking is paid. Paid bookings need a refund and cannot

be cancelled here.' **Instead:** escalate to Finance and the Provincial CEO. A refund is a bank transfer made outside the app.

- **Move a booking to another person.** Once EFT instructions have gone out, nobody can change the name, the number of places or the payer type. Only Finance can correct the email. **Instead:** Finance cancels the unpaid booking, and the new person books her own place on the same link and pays herself.
- **Re-send an email that was already delivered.** You get '<Type> email was already delivered, so it was not sent again.' **Instead:** for a receipt, use "Download receipt (PDF)" and send the file yourself. For bank details, read them from 'Preview <type> email', or ask Finance for a reminder by hand.
- **Send the cancellation email when it fails.** Sometimes Finance sees 'Booking cancelled, but the confirmation email could not be sent. The booking was kept and marked cancelled. Tell the person yourself, then use Remove to delete it.' **Instead:** you tell the person yourself. Finance then removes the booking from the "Cancelled" group in "All Registrations". A cancelled booking with any payment history is never removed. It shows 'Kept for the money record: this booking has a payment history.'

Check yourself

1. Which group holds a booking that is not paid yet, and which group does it move to once Finance marks it paid?
2. Name three things that stop the automatic EFT reminders.
3. List every detail Finance needs to find a payment on the bank statement.
4. A receipt was already delivered and the member cannot find it. What two things can you do yourself?
5. Why can you not switch the reminders off for one member?

Notes:

Answers

Check yourself

1. "Owes money" while unpaid. "Check in" once Finance marks it paid.
2. Any three of: Finance marks it paid, the booking is cancelled, registrations close, the workshop starts.
3. Name, workshop, EFT reference, amount, date paid, bank, and the reference they typed.
4. Ask them to check spam and use "Resend receipt email". If it was already delivered, send them the file from "Download receipt (PDF)".
5. It is one schedule for every workshop in every province. There is no per-person switch, and you cannot save it.

Checkpoint

1. Hand it to Finance. Read the row, take the date, amount, bank and reference, and pass them on.
2. All of it. The booking is paid, invoice and receipt numbers are issued, and the receipt is emailed at once.
3. Stop. Never use someone else's login. Tell the member Finance will confirm after checking the statement, and pass the details on.
4. Do it yourself. Read the details from 'Preview eft instructions email' and give the EFT reference exactly. Ask Finance for one reminder by hand if she wants the full email.
5. Do it yourself. Explain there is no switch for one person, and that reminders stop when she pays or the workshop starts.

6. Hand it on. Ask a super admin to switch it on, 1 day before. On the day you can also use "Email check-in details to attendees".
7. Hand it to Finance. There are no part payments, so the booking stays unpaid until the full amount is in.
8. Do it yourself. Ask her to check spam, use "Resend receipt email", and if it was already delivered send her the PDF.
9. Do it yourself. It is the same booking, and the card option is only a demonstration. She pays once by EFT with her EFT reference.

Changes, problems and what to escalate

Once a workshop is live, things change. Venues fall through. Dates move. Prices go up. Members type their email wrong, or find they can't come.

Most of these calls reach you first. About half of the fixes are yours. The other half belong to Finance.

So keep one question in your head for this whole chapter: is this mine to do, or do I spot it and hand it to Finance?

"Finance" means anyone with the Finance tick, the auditor role or a super admin. In the Western Cape nobody has the Finance tick and there is no auditor. So in the Western Cape, Finance is the super admins.

Change a live workshop, then close and reopen it

What you will learn: You will learn that you can change a workshop's price after people have booked, and that the people already booked keep the amount they booked at. You will also learn that closing a workshop is safe. It switches off the booking link, deletes nothing, and you can reopen it.

What is happening: You work on the workshop you created this morning. Earlier you booked Sipho Ndlovu on it, as a non-member paying by EFT, with your own email. His EFT instructions have gone to your inbox.

- **Title:** TRAINING - Classroom Discipline - delete after
- **Short code:** TCDDA2
- **Email on Sipho's booking:** <Trainee work email>

Leave "TRAINING - Conflict Resolution Skills - delete after" and "TRAINING - Positive Discipline Follow-up - delete after" alone. The next two exercises need them exactly as they are. If your own workshop has no booking with EFT instructions sent, tell your facilitator.

Two words you need here:

- **EFT instructions:** the email with NAPTOSA's bank details and a payment reference. Once someone presses "Send EFT instructions", the amount they owe is fixed. A later price change only affects new bookings.
- **Short code:** the code of up to 6 letters the system built from the title. It goes into every EFT payment reference and receipt number. So Sipho's reference looks like EFT-TCDDA2-<number>-NDLOV.

Your steps:

1. Go to the staff workshop page and open "Published Links".
2. Under "Current & upcoming", pick the workshop.
 - **Workshop:** TRAINING - Classroom Discipline - delete after
3. Before you click anything, write down what you think Sipho will owe if you raise the price now.
4. Click "Edit details". The form opens with the heading "Edit Workshop".
5. Read the band that starts "Changing a price or a date affects future registrations only". Notice there is no Status field in this form.
6. In section "2. Delivery & Pricing", raise the non-member price by R 50.
 - **Field:** Non-member price in ZAR
 - **Old value:** 450
 - **New value:** 500

7. Click "Save changes" and read the toast. A toast is the short message that pops up on screen after a click.
8. Open the "Registrations, coupons and documents" section.
9. Click "Open this workshop's registration desk".
10. Find Sipho's row, click the "..." button on that row and choose "View details".
11. Read "Amount / method" and compare it with what you wrote down.
12. Go back to "Published Links". With the workshop still selected, click "Close registrations". There is no "are you sure" question. One click closes it.
13. Open the "Closed archive" group and find the workshop.
14. Read the "Application link" field. The Application link is the public link people use to book.
15. Click "Reopen registrations".
16. Confirm the question that pops up.
17. Write down: the toast after saving, which group the workshop sat in, Sipho's "Amount / method", the closing toast word for word, and what the "Application link" field said while it was closed. Don't edit or close the workshop a second time to do this.

What you should see:

- After saving: the toast "Workshop updated." You are back on "Published Links" on the same workshop, still under "Current & upcoming", with the new price on the card.
- In "View details": "Amount / method" still shows the amount Sipho booked at, R 450,00.
- Sipho's row still reads "Owes R 450,00 · EFT ref EFT-TCDDA2-<number>-NDLOV", with the same reference as before.
- After closing: the toast "Registrations closed. The application link is inactive." The workshop now sits under "Closed archive".
- The "Application link" field reads "Reopen registrations to activate the application link."
- The reopen question reads: 'Reopen registrations for "TRAINING - Classroom Discipline - delete after"? The public application link will become active and people can register again.'
- After reopening: the toast "Workshop link is active. Registrations are open." The workshop is back under "Current & upcoming" and "Copy link" works again.

Good to know: reopening sticks here because this workshop's dates are still in the future. On a workshop whose dates have passed, the nightly run at 00:05 closes it again. For an event that moved, edit the dates instead.

If something goes wrong:

- "Member price cannot be more than the standard (non-member) price.": make "Member price in ZAR" the same as or lower than "Non-member price in ZAR". Then click "Save changes" again.
- "Use a valid date range where the end is after the start.": fix the End date so it is after the Start.
- The workshop jumped to "Needs closure", and "Copy link" and "Open link" are greyed out: you saved an End date in the past. "Needs closure" is the group for workshops whose end date has passed but whose booking link is still open. Click "Edit details", fix the dates and save. Do it before 00:05, or the nightly run closes the workshop.
- "Workshop changes could not be saved." followed by a reason: nothing was saved. Read the reason, fix it and click "Save changes" again.
- You clicked "Cancel edit": nothing was saved. Open "Edit details" again.
- You pressed Enter in the venue box: that only adds a new line. It does not save.

- Don't use the red "Delete workshop" button to take a workshop off sale. It deletes the workshop, its link, its files and every booking on it for good, and emails nobody. It only works while nobody has paid. To take a workshop off sale, click "Close registrations".

Can't be undone: Nothing in this exercise. You can edit the price back. You can reverse closing and reopening. No email goes out. Leave the workshop reopened at the end. It stays open until the clean-up at the end of the day.

Notes:

The phone call from the Rietvlei bursar

What you will learn: You will learn that you can move a workshop's date, venue and price after people have booked, and that anyone who already got EFT instructions keeps their old amount. You will learn that saving a change tells nobody, so you email people yourself. And you will learn that you can't change the number of people on a booking. Finance cancels it and the school books again.

What is happening: The Provincial CEO has asked you to move a workshop to Bellville, change its date and raise the non-member price. Members stay at R 250. There is a new poster on your desktop. While you work, Mrs Fatima Salie, the bursar at Rietvlei Primary School, phones you. She booked 5 places by EFT last week and hasn't paid yet. Work in the app while you talk to her.

You are the Workshop creator. You do not have the Finance tick. The Finance tick is the setting that gives a staff account the money buttons: mark paid, cancel, remind and correct an email.

Before the call, the workshop looks like this:

- **Title:** TRAINING - Conflict Resolution Skills - delete after
- **Venue and address:** TRAINING ONLY, not a real event (Training Room 1)
- **Start:** 14 Nov 2026 08:30
- **End:** 14 Nov 2026 12:30
- **Non-member price:** R 350
- **Member price:** R 250
- **Capacity:** 30
- **CPTD points:** 5
- **Short code:** TCRSDA (check yours, it may differ)

Two unpaid EFT bookings sit on it. Your facilitator made both, so their emails go to loxly@lbtec.co.za. Both have had their EFT instructions sent, so their amounts are fixed.

- Booking 1:
 - **Booked by:** Rietvlei Primary School, 3 members and 2 non-members
 - **Owes:** R 1 450,00, reference ending RIETV
- Booking 2:
 - **Booked by:** Lungile Mkhize, member
 - **Owes:** R 250,00, reference ending MKHIZ

Warning: When you save, the old poster is gone for good.

Your steps:

Part 1: Mrs Salie asks where and when the workshop is now.

1. Put Mrs Salie on hold while you work.

2. Click "Edit details" and read the band at the top.
3. In section "1. Details & Scheduling", move the date.
 - **Start, old:** 14 Nov 2026 08:30
 - **Start, new:** 21 Nov 2026 09:00
 - **End, old:** 14 Nov 2026 12:30
 - **End, new:** 21 Nov 2026 13:00
4. In section "2. Delivery & Pricing", change the venue. Pressing Enter in this box only adds a line. It does not save.
 - **Venue and address, old:** TRAINING ONLY, not a real event (Training Room 1)
 - **Venue and address, new:** Bellville Teachers' Centre, 12 Voortrekker Road, Bellville, 7530
5. In the same section, raise the non-member price. Leave the member price alone.
 - **Non-member price in ZAR, old:** 350
 - **Non-member price in ZAR, new:** 400
 - **Member price in ZAR:** stays 250
6. In section "4. Documents & Media", click "Browse files" and pick the Bellville poster from your desktop.
 - **Poster, old:** the original Conflict Resolution poster
 - **Poster, new:** the Bellville poster (its file name has "bellville" in it)
7. Check that the saved poster now reads "Public poster · replaced when you save changes".
8. Click "Preview". Check that the card shows the new venue, date and price.
9. Close the preview with "Hide preview", the X ("Close preview") or Escape.
10. Click "Save changes" and read the toast.
11. Check that the card is still under "Current & upcoming" with the 21 Nov dates.
12. Open "Workshop files" and check the new poster is there. "Workshop files" is the list of every picture and document saved on this workshop.
13. Tell Mrs Salie the new venue and date. Read them off the saved card, not from memory.

Part 2: Mrs Salie asks if her two non-members now owe R 400 each.

14. Open "Registrations, coupons and documents" and click "Open this workshop's registration desk".
15. Find the Rietvlei Primary School row, click the "..." button and choose "View details".
16. Read "Amount / method".
17. Tell Mrs Salie the amount and the reference haven't changed, because the amount was fixed when her EFT instructions went out.
18. Do the same "View details" check on Lungile Mkhize's row.

Part 3: Mrs Salie asks for the change in writing for her principal.

19. Tell her the system doesn't email anyone about the change, and that you will email her yourself from the office mailbox.
20. Go to "All Registrations" and click "Export <N> (CSV)", where N is the number of bookings shown. This downloads a spreadsheet of the bookings. Your copy has no money columns, but it has the Email column. Reading her email in "View details" works too.
21. Remember the other person on this workshop. Lungile Mkhize also needs to hear about the change.

Part 4: Mrs Salie asks to make her booking 6 people instead of 5.

22. Tell her you can't change the number of people on a booking once the EFT instructions have gone out.
No staff screen has a headcount field, so don't go looking for one.
23. Tell her Finance will cancel the unpaid booking.
24. Tell her to book again for 6 people on the same link, and that a new reference will come in the new EFT instructions email.
25. Your facilitator, acting as Finance, may cancel the Rietvlei booking while you watch. The row disappears.
 - **Reason:** Booked by mistake

What you should see:

- The toast "Workshop updated." The card under "Current & upcoming" shows the 21 Nov 2026 dates, "R 400,00" and the line "Members R 250,00".
- "Workshop files" lists the new picture as "Public poster · shown on the booking page". The old poster is gone.
- Above the list, the note "The poster shows on the booking page only. To take a workshop off the website's Events page, use Close registrations."
- Each file has "Download" and "Remove". Don't click "Remove".
- "Open link" shows the public booking page with the Bellville venue, "R 400,00" and "NAPTOSA members R 250,00".
- The Rietvlei row still starts "Owes R 1 450,00 · EFT ref", with the same reference ending RIETV.
- In its "View details", "Amount / method" shows "R 1 450,00" with "3 members, 2 non-members (5 total) · EFT" under it.
- Lungile's row still starts "Owes R 250,00 · EFT ref", with the reference ending MKHIZ.
- Her "Amount / method" shows "R 250,00" with "Member rate · EFT" under it.
- After the export, a spreadsheet downloads with "no-financial-data" in its name. No toast appears.

If something goes wrong:

- You clicked "Cancel edit" after dropping in the new picture: nothing saved and the old poster stays. Always click "Save changes", then check "Workshop files".
- The toast says "Workshop updated and the new picture saved, but the previous poster could not be removed, so it is still the public poster. Check Workshop files under Published Links.":
 1. Tell your facilitator.
 2. Open "Workshop files" and click "Remove" next to the old poster.
 3. The box reads 'Remove the public poster "<file name>"?' and names the picture that becomes the poster next. Check that it names the Bellville poster.
 4. Click "Remove file".
 5. The toast reads 'Poster removed. The booking page now shows "<Bellville file name>'. Removing a file can't be undone, so check the file name before you click.
- The toast says "Workshop details saved, but some files did not upload. Open this workshop's Documents section to upload the remaining files.": upload the poster again through "Edit details" and save.
- "Member price cannot be more than the standard (non-member) price.": make the member price the same as or lower than the non-member price, then save again.
- The workshop jumped to "Needs closure": you saved an End date in the past. Click "Edit details", fix the dates and save. Do it before 00:05, or the nightly run closes the workshop.

- Mrs Salie says the public booking page refused her change with "EFT instructions have already been issued. Contact staff to change this booking.": that is expected. Only Finance can cancel the booking so the school can book again.

Can't be undone:

- The old poster is removed for good when you save.
- If you click "Remove" on any file in "Workshop files", that file is gone for good.
- If Finance cancels the Rietvlei booking, it is deleted and a cancellation email goes out.

Notes:

From the member's chair: a wrong email, a reminder and a cancellation

What you will learn: You will learn what Finance's fixes look like when they land in a member's inbox. You will learn that correcting an email address only moves emails that haven't gone out yet, so the first EFT instructions never reach the new address. And you will learn that a cancelled unpaid booking is deleted for good, the member gets one cancellation email, and nobody can put it back.

What is happening: You are Busisiwe Nkosi, a NAPTOSA member. You book a training workshop by EFT but type your email wrong, so nothing arrives. Later your principal won't release you. Your facilitator plays the office and does every Finance click on their screen. You need no staff rights for this.

- **Title:** TRAINING - Positive Discipline Follow-up - delete after
- **Date:** 21 Nov 2026, 09:00 to 13:00
- **Short code:** DISC21
- **Wrong address (the typo):** wrong.address@example.com
- **Right address:** <Trainee personal email>

The wrong address is not a real mailbox, so nobody ever receives what goes there.

Warnings: The EFT email to the wrong address can never be moved. The reminder is really sent. The cancel deletes the booking for good and sends an email.

Your steps:

Part 1: The email that never came.

1. Open the Application link and click "Continue".
2. Choose "Individual".
 - **Who should be invoiced?:** Individual
3. Choose the member rate.
 - **Are you booking as a NAPTOSA member?:** the option that starts "Yes, member rate"
4. In the box "NAP number (preferred) or SA ID number", type the test NAP number your facilitator gives you. A test number the system doesn't know still books at the member rate.
 - **NAP number (preferred) or SA ID number:** the test NAP number from your facilitator
5. Click "Continue".
6. Fill in your details, with the wrong email on purpose. Leave PERSAL number empty. It is optional.
 - **Name:** Busisiwe
 - **Surname:** Nkosi
 - **Email address:** wrong.address@example.com
 - **Cell phone number:** the test cell number from your facilitator

7. Click "Save details and continue". The toast reads "Invoice and receipt details saved. Continue to payment."
 8. On the payment step you see "Coupon code", "Card (demonstration)" and "EFT". Click "EFT".
 - **Payment method:** EFT
 9. Click "Send EFT instructions". The email goes out the moment you click, to the address you typed.
 10. Write down the line "REFERENCE (USE THIS EXACTLY)". The reference is the code a payer puts on the bank transfer so Finance can match the money.
 - **Reference:** EFT-DISC21-<number>-NKOSI
 11. Keep this tab open.
 12. Phone the office. Tell them your email was wrong and give the right one.
 - **Correct email:** <Trainee personal email>
 13. Your facilitator, acting as Finance, clicks "Correct payer email" and reads you the toast.
 14. Open the inbox for <Trainee personal email> and check the To line on each email.
 15. Say out loud whether anything new has arrived there.
 16. Your facilitator, acting as Finance, tries "Resend eft instructions email" and reads you the result.
- "Correct payer email" is a Finance-only button that changes the email address on a booking. It only moves emails that haven't been sent yet.

Part 2: Send it to my husband.

17. Ask the office to send the bank details to your husband's email.
18. Listen to what the office can and can't do.
19. Your facilitator, acting as Finance, clicks "Remind" on your booking. "Remind" sends an EFT payment reminder by hand. It works once per person per South African day.
20. Open the reminder in the <Trainee personal email> inbox.
21. Read out the amount and the reference.
22. Find the bank details block and the "Pay by card instead" link.
23. Compare the reference with the one you wrote down.
24. Don't pay and don't click "Pay by card instead". The bank details are for training only. Never pay them.

Part 3: My principal won't release me.

25. Phone the office again. Ask to cancel because you can no longer attend.
26. Your facilitator, acting as Finance, cancels the booking and reads you the toast.
 - **Reason:** Can no longer attend
27. Open the cancellation email in the <Trainee personal email> inbox and read it.
28. Go back to the booking tab you kept open from the start and refresh it.

Part 4: Can you just put it back?

29. Ask the office whether the booking can be put back.
30. Now switch chairs. You are the Workshop creator taking this call. Say, in your own words, what you would tell Busisiwe.

What you should see:

- The page after "Send EFT instructions": "EFT INSTRUCTIONS SENT", "Workshop registration pending EFT", the bank details, "PAYMENT STATUS Awaiting EFT" and "EMAIL STATUS Sent".

- The toast after the correction: "Email corrected to <Trainee personal email>. No unsent emails needed to change."
- Nothing new addressed to <Trainee personal email> after the correction.
- The resend result: "EFT instructions email was already delivered, so it was not sent again." Emails that already went out are never moved.
- Before the reminder, your row reads "Not reminded yet". The box asks "Send an EFT reminder to Busisiwe Nkosi?" and says "Each person can get at most one manual reminder per day."
- The toast after the reminder: "Reminder sent to Busisiwe Nkosi."
- In your inbox: a reminder whose subject starts "<N> days left before", then the workshop title, and ends "EFT payment reminder". It carries the same reference, EFT-DISC21-<number>-NKOSI.
- The toast after the cancel: "Booking removed for Busisiwe Nkosi. The confirmation email was sent."
- In your inbox: an email whose subject starts "Booking cancelled - TRAINING". It says "No payment is due and you will not receive further payment reminders for this booking."
- The old booking tab now shows "We can't find this booking" and "It may have been cancelled. Contact NAPTOSA on 021 686 8521, or book again from the workshop page."
- In "All Registrations", after "Refresh", the Nkosi row is gone from "Owes money". "Owes money" is the group that lists unpaid bookings.

If something goes wrong:

- "Busisiwe Nkosi already had a reminder sent today. Nobody was emailed again.": only one manual reminder per person per day. Read the earlier reminder instead.
- The correction is refused because another booking on this workshop already uses that address: Finance corrects it to your other email instead, and you check that inbox from then on.
 - **Correct email, second choice:** <Trainee work email>
- The correction toast says "Email corrected. 1 unsent email will now go to <Trainee personal email>." (or a different number): an email was still waiting and will now go to the corrected address. Carry on.
- The cancel says "Booking cancelled, but the confirmation email could not be sent. The booking was kept and marked cancelled. Tell the person yourself, then use Remove to delete it.": the booking now sits in the "Cancelled" group. Finance opens "All Registrations", chooses "Cancelled", clicks "Remove" on the row, picks a reason and clicks "Remove booking". The toast reads "Booking removed for Busisiwe Nkosi."

Can't be undone:

- The EFT instructions email went to wrong.address@example.com and is never moved.
- The reminder is really sent, and that person can't get another one today.
- The booking is deleted for good and a cancellation email is sent.

Notes:

Go or stop? Four tricky requests

What you will learn: You will learn which requests are yours and which you stop and hand on. Refunds, calling off a whole workshop, fixing a wrong coupon and removing a cancelled booking are not things you can do in the app. You will know who to pass each one to.

What is happening: Your facilitator reads out four situations. For each one, decide: can I go ahead myself, or must I stop and hand it on? Answer on your own. Circle one letter. The answers are at the end of this chapter.

Words you will need:

- **Finance:** anyone with the Finance tick, the auditor role or a super admin. In the Western Cape that means the super admins.
- **EFT instructions:** the email with NAPTOSA's bank details and a payment reference. Once it goes out, the amount on that booking is fixed.
- **Export <N> (CSV):** the button in "All Registrations" that downloads a spreadsheet of the bookings. Your copy has no money columns, but it has every email address.
- **Coupon:** a discount code that only Finance can create or change.

1. The wrong coupon. Finance tells you they made a coupon for this workshop with the wrong price, and it was already shared with a school. What happens now?

- **A.** You open the Coupons panel and switch the coupon off yourself.
- **B.** Finance clicks "Edit" on the coupon and fixes the price.
- **C.** You stop sharing the code and hand it to Finance. They click "Switch off" on the coupon and create a new one with the right price.

2. The paid refund. A paid attendee emails the day before: "I can't come, please cancel and refund me." What can you and the system do?

- **A.** Ask Finance to press "Cancel booking". The refund then goes back automatically.
- **B.** The system can't do this. Pass it to Finance, who arrange any refund outside the system with the Provincial CEO's approval.
- **C.** Mark them absent after the workshop. The system refunds absent people overnight.
- **D.** Open "Payments needing a decision" and choose Refunded.

3. The cancelled booking that needs removing. A booking's cancellation email failed, so the booking sits in the "Cancelled" group in "All Registrations". It needs to be removed. Who does it, and where?

- **A.** Finance, from "All Registrations" > the group "Cancelled" > "Remove" on that row > pick a reason > "Remove booking".
- **B.** You, from the cancelled row in "All Registrations" > "Remove".
- **C.** Nobody. Cancelled bookings delete themselves overnight.
- **D.** You press "Close registrations", which clears out cancelled bookings.

4. The whole workshop is called off. The venue fell through. 12 people have paid and 3 have not. What do you do?

- **A.** Press "Cancel workshop". It emails and refunds every payer.
- **B.** Press "Delete workshop" so nobody can book.
- **C.** Press "Close registrations". Export the payers with "Export <N> (CSV)" and contact each person yourself. Hand the 3 unpaid bookings to Finance to cancel. Escalate the 12 refunds to Finance and the Provincial CEO.
- **D.** Use "Edit details" to move the date to next year so the reminders stop.

Extra practice, if there is time:

5. You raise the non-member price from R 300 to R 350, three weeks before the workshop. Mpho booked at R 300 last week, got EFT instructions and hasn't paid. What does she owe now?
6. A workshop has 9 bookings, 4 paid. You moved the venue and saw "Workshop updated." What do you do so people know?

7. A school wants a different contact email. EFT instructions were already sent and you don't have the Finance tick. What do you do?
8. A paid non-member wants to move to next month's workshop. What do you do?
9. The workshop is full. An unpaid teacher has an email titled "Capacity reached - <title> - please do not pay", and her booking page says "Please do not send payment". She still wants to come. What do you do?

What you should know about "Payments needing a decision":

- It sits on "Published Links", just above "Registrations, coupons and documents", for the selected workshop. It only appears when something needs a decision. On most workshops you won't see it.
- Each line shows the person's name, the amount and the reason, for example "Paid after available seats filled. Open another seat or arrange a refund."
- As a creator you see "Only a super admin or the finance (auditor) role can close this." There's no note box and no button for you.
- In "All Registrations", the same person shows a badge "Paid R <amount> · seat needs review".
- Your job: send Finance a short message with the workshop title, the person's name, the amount and what you saw. Then tell the person only what's true: NAPTOSA has their payment and will contact them to confirm a seat or arrange a refund.
- When Finance clicks "Mark resolved", no email goes out. Finance or the office must contact the person.
- If you promised a refund on the spot, call back and correct it. Refunds happen outside the system and need Finance and the Provincial CEO.

Notes:

When to hand it to Finance

Hand it to Finance, the super admins in the Western Cape, whenever someone asks you to:

- change an email address on a booking
- send a payment reminder
- cancel an unpaid booking, or remove a cancelled one
- change the number of people, the name or the coupon on a booking after EFT instructions went out
- refund anyone, or deal with a paid booking that must change
- fix, switch off or change a coupon
- decide on a line in "Payments needing a decision"

What you say to a school that wants more people on its booking:

"Mrs Salie, I can't change the number of people on a booking once the EFT instructions have gone out. I'll ask our Finance colleague to cancel this booking today. You'll get a cancellation email saying no payment is due, and then please book again for 6 people on the same link. Your new EFT reference will be in the new EFT instructions email."

What you say to a member with a wrong email, who then cancels:

"Only our Finance person can change the address on a booking and send the reminder. The original email can't be re-sent, so the reminder will carry the same reference and bank details to your correct address. If you cancel, Finance deletes the unpaid booking, you get one cancellation email, and no further reminders."

What you say to someone who has paid and wants a refund or a move:

"I'm passing this to our Finance team. They will contact you." Don't promise a refund, an amount or a date.

What the system cannot do yet, and what to do instead

- **Close a finished workshop the moment it ends.** From the night of 8 to 9 October 2026, a nightly run at 00:05 closes every published workshop whose end time was before midnight. The website's Events page drops a workshop once its end time passes. But until the 00:05 run, the booking link still takes bookings from anyone with the link or the QR code. To stop bookings sooner, open "Needs closure", select the workshop and click "Close registrations". If the event moved, edit the dates. Pressing "Reopen registrations" on a workshop whose dates have passed is undone at the next 00:05 run.
- **Email everyone about a change.** Saving "Edit details" sends nothing. Use "Export <N> (CSV)" to get every email address and write to people yourself from the office mailbox.
- **Call off a whole workshop and tell everyone.** There is no "Cancel workshop" button. Click "Close registrations". Contact everyone yourself first. Hand the unpaid bookings to Finance to cancel. Each person then gets a "Booking cancelled" email that says it was cancelled as requested, so write to them before that happens. Hand paid people to Finance and the Provincial CEO for refunds.
- **Delete a workshop that someone has paid for.** "Delete workshop" only works while nobody has paid. It asks for a reason and a tick on "I understand this cannot be undone.", then deletes the workshop, its link, its files and every unpaid booking for good, and emails nobody. Once any payment exists it refuses. Click "Close registrations" instead. A closed workshop sits in "Closed archive" with all its records.
- **Refund someone, or cancel a paid booking.** There's no refund button, and "Cancel booking" refuses a paid booking. Pass it to Finance. Finance arranges the refund by bank transfer outside the system, with the Provincial CEO's approval.
- **Take a part payment, a deposit, or cash or card at the door.** Every payment is for the full amount. The person pays the full amount by EFT. A walk-in books on the public page like anyone else, and Finance marks the EFT paid when it arrives.
- **Remove a cancelled booking that has a payment history.** Its row reads "Kept for the money record: this booking has a payment history." Money records are never destroyed. A cancelled booking with no payment history can go: Finance removes it from "All Registrations" > "Cancelled".
- **Change a coupon's price or code.** Finance can only change how many people may use a coupon and its note, or switch it off and on. For a wrong price, Finance switches the coupon off and creates a new one. Don't share the code in the meantime.
- **Change a booking after EFT instructions went out, or move it to another workshop.** The booking is locked ("EFT instructions have already been issued. Contact staff to change this booking."). Unpaid: Finance cancels it and the person books again on the right link. Paid: hand it to Finance and the Provincial CEO.
- **Send the original EFT instructions or receipt to a new address, or to someone else.** "Correct payer email" only moves emails that haven't been sent. Every email goes only to the booking's own address. Finance corrects the address and sends a reminder, which carries the same reference and bank details. If someone else is paying, the person forwards it themselves.

Check yourself

1. You raise a workshop's price. What happens to a booking whose EFT instructions already went out?
2. You save a new date and venue. Who gets an email from the system?
3. Finance corrects a member's email address. Which emails go to the new address, and which don't?

4. A workshop ended at 15:00 today. At 17:00 someone books on its link. How is that possible, and what do you do?
5. Who is Finance in the Western Cape?

Answers

Check yourself

1. Nothing changes. It keeps the amount and the reference it had.
2. Nobody. You email people yourself.
3. Only emails not yet sent go to the new address. Emails already sent are never moved or re-sent.
4. The link keeps taking bookings until the nightly run closes it at 00:05. To stop bookings now, open "Needs closure" and click "Close registrations".
5. The super admins.

Go or stop

1. C. You can't switch it off yourself, and "Edit" can't change a price.
2. B. "Cancel booking" refuses a paid booking, and nothing in the system moves money.
3. A. "Remove" is Finance-only and only shows when there is no payment history.
4. C. There is no "Cancel workshop" button, and "Delete workshop" refuses once anyone has paid.
5. R 300. Her amount was fixed when her EFT instructions went out.
6. Export the emails with "Export <N> (CSV)" and write to everyone yourself.
7. Hand it to Finance for "Correct payer email". Tell the school emails already sent won't be re-sent.
8. Tell her the system can't move a paid booking, and hand it to Finance and the Provincial CEO.
9. Ask management about more seats. If yes, raise "Capacity" and tell her she may pay. If no, tell her not to pay and hand the booking to Finance to cancel.

On the day: check-in, attendance, certificates, exports

This is the workshop day itself. Members judge NAPTOSA on this day. Their CPTD points depend on two things: being marked present, and getting the certificate.

You use two training workshops in this chapter.

- **Today's workshop:** TRAINING - Classroom Management Essentials - delete after
- **Date and time:** Thu 08 Oct 2026, 08:00 to 16:30
- **Venue:** Silvertree Primary School hall (in person)
- **Presenter:** Mrs Charmaine Adonis
- **CPTD points:** 5
- **Tomorrow's workshop:** TRAINING - Reading Recovery - delete after
- **Date and time:** Fri 09 Oct 2026, 09:00 to 12:00
- **Bookings:** none

Your facilitator made every booking on today's workshop, so they all use loxly@lbtec.co.za. Every email they get lands in the facilitator's inbox, and you will look at it there. Your own bookings from earlier used <Trainee work email> or <Trainee personal email>. None of them is on this workshop.

Money is still not your job today. An unpaid person at the door goes to Finance. In the Western Cape, Finance means the super admins. Nobody here has the Finance tick.

Find today's workshop and read the day at a glance

What you will learn: You will learn that one screen shows everyone who booked, sorted by what still has to happen to them.

What is happening: It is the morning of the workshop. Before anyone arrives, you open the register and see who you are waiting for.

1. Click the "All Registrations" tab.
2. Open the "Workshop" select and pick:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
3. Read the summary line. It gives the date, "In progress", the number of bookings, the paid seats, who still owes, and how many are checked in.
4. Look at the groups:
 - **Owes money:** anyone who has not paid.
 - **Check in:** paid people you are still waiting for.
 - **Certificate to send:** people marked present.
 - **Done:** people who have their certificate, or were marked absent.
 - **Cancelled:** cancelled bookings.
5. Find the paid bookings in "Check in". Today it is the first group.

What you should see:

- In "Check in": Thandi Mokoena, Hennie Steyn, Palesa Khoza, Naledi and Xolani Ngcobo. Xolani is a teacher on a school place.

- In "Done": the Silvertree Primary School row, with 1 of its 2 places used.
- In "Owes money": Aisha Abrahams.

Notes:

Get the door ready and send the morning email

What you will learn: You will learn that the door QR lets paid people check themselves in, that you can open check-in early to test it, and that the "Workshop starts today" email only goes on the workshop day and only to paid people.

What is happening: You test the door QR on tomorrow's workshop, then send today's attendees their morning email.

You need the Workshop creator tick to open check-in early and to send the email. You have it.

Test the door QR on tomorrow's workshop

1. Open Workshops and click the "Published Links" tab.
2. Under "Workshop list" > "Current & upcoming", click the card for:
 - **Workshop:** TRAINING - Reading Recovery - delete after
3. In its link box, click "Check-in link & QR".
4. Read the sentence in the box. People with a paid booking find their own booking and press "I'm present".
5. Click "Download QR".
6. Click "Copy" next to the check-in link.
7. In the "Open check-in early" section, click "Open check-in now".
8. Read the confirm text:
 - **Confirm text:** Open check-in now? Attendees with a paid booking can check themselves in from now until the end of the workshop's last day.
9. Click "Yes, open check-in".
10. Turn your screen to your facilitator, or open the QR file you downloaded. Your facilitator scans it with a phone.
11. Click "Close check-in". Always close it again after a test.

The door QR is not the same as the "Booking link QR". The booking QR goes on posters and emails and opens the booking and payment page. The door QR goes on the hall door and opens check-in.

What you should see:

- After "Copy": the button reads "Copied" and the message "Check-in link copied."
- After "Download QR": a PNG file starting with check-in-qr in your Downloads.
- After "Yes, open check-in": the message "Check-in is open. Attendees can check in now." and the line "Opened early by <your name> at <date time> (SAST). Attendees can check in now, until the end of the workshop's last day." with a "Close check-in" button.
- On the phone: "NAPTOSA workshop / Check in" and "Check-in was opened early by the organiser."
- After "Close check-in": the message "Check-in is closed until the workshop day."

Send today's morning email

1. Close the box.
2. Click the card for:

- **Workshop:** TRAINING - Classroom Management Essentials - delete after
3. Click "Check-in link & QR". Read the line "Check-in is open now (workshop day)."
 4. In the "Email attendees on the day" section, click "Email check-in details to attendees".
 5. Wait for "Counting attendees..." to finish. Then read three lines:
 - **Count line:** This will email N paid attendees.
 - **Subject line:** the email's subject.
 - **Format line:** how the workshop runs.
 6. Before you press anything, say who is in that number and who is not.
 7. Click "Send to N attendees".
 8. Watch "Sending 1 of N...", read the result line and click "Done".
 9. Click "Email check-in details to attendees" once more. This shows you that nothing new goes out.
 10. Click "Close".
 11. Open the facilitator's inbox:
 - **Inbox:** loxly@lbtec.co.za
 12. Count the new "Today: ..." emails. The number must match the count line. None of them is for Aisha. Only paid people get this email. The unpaid person in "Owes money" is left out. The school's row is left out too, because a school row is a payment for places, not a person. A teacher on a school place does get it, on his own row. Always read the count line before you send.

Careful: this email cannot be called back once it goes.

What you should see:

- After sending: a result like "Sent N, failed 0."
- On the second try: "Already sent to all N attendees today. Nothing new to send."
- In loxly@lbtec.co.za, one email each for Thandi, Hennie, Palesa, Naledi and Xolani:
 - **Subject:** Today: TRAINING - Classroom Management Essentials - delete after starts at <start time>
 - **What it says:** When you arrive, scan the QR code at the door to check in.
 - **Link:** none, because this workshop is in person.
- No email for Aisha.

If something goes wrong:

- "This email says the workshop starts today, so it can only be sent on the workshop day (<day>).": You opened the wrong workshop. Send it on the workshop's own morning.
- "Set the workshop format (online, in person or hybrid) before emailing check-in details.": Click "Edit details", go to "2. Delivery & Pricing", set "How it runs", click "Save changes", then send.
- "There are no paid attendees to email yet.": Nobody has paid. Payment is Finance's job.
- Names listed under "Not sent.": Press the button again. It only retries the ones that failed.
- "Copy failed. Select the link and copy it by hand.": Select the link text in the box and copy it yourself.
- "This check-in link isn't valid" on a phone: The code scanned is not this workshop's check-in code. Download the QR again from this box.

When to hand it to Finance: a name under "Not sent." because the email address is wrong. Fixing it is "Correct payer email", which only Finance can do. You say: "The email address on this booking looks wrong. Please can you correct the payer email so I can resend?"

What the system cannot do yet, and what to do instead:

- **You cannot switch on the "Workshop starting soon" reminder.** Your screen says "You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor." In the Western Cape, ask a super admin. It stays off until a super admin switches it on. When it is on, it emails each paid person once before the workshop, and it can be up to 15 minutes late. For today, send the morning email.
- **The morning email cannot go the night before or the day after.** It only goes on the workshop's own day. The day before, you can open check-in early to test the door QR, then close it again.
- **The in-person email has no check-in link.** That is on purpose. It tells people to scan the QR at the door. Print the door QR from "Download QR".

Notes:

A WhatsApp call from the hall door

What you will learn: You will learn to keep the register right from the office: mark one person present and undo it, mark exactly two people at once, mark a no-show absent, and send an unpaid person to Finance.

What is happening: You are at the office. Mrs Charmaine Adonis, the presenter, phones you on WhatsApp from the hall door while people arrive. Keep the register right from "All Registrations". For every request, ask yourself: is this mine to do, or do I hand it to Finance?

Before the call starts:

- "All Registrations" is open, with today's workshop picked:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
- Your facilitator checks one person in on a phone, with the door QR.

Watch a self check-in arrive

1. Watch Palesa Khoza's row move from "Check in" to "Certificate to send", marked "Self check-in".
2. If it has not moved after about 15 seconds, click "Refresh".

Mark one person present, and undo it

1. Click "Present" on the person's row in "Check in". The row moves to "Certificate to send".
2. If the mark was wrong, click "Undo" on the message straight away. The row goes back to "Check in".

"Undo" only shows for a few seconds after "Present" or "Mark absent".

Mark exactly two people present

1. Tick the checkboxes on the two rows only. A dark bar shows "2 selected".
2. Click "Mark 2 present".
3. Read "Update the 2 selected attendees?" in the confirm panel.
4. Click "Mark 2 attended".

Careful: marking several people at once has no Undo. Do not use "Mark all N present" unless everyone in "Check in" is really in the room. It marks everyone still in "Check in" for that workshop. If you click it by mistake, a confirm panel opens first, so click "Cancel".

Someone has not paid

1. Find the person's row in "Owes money".
2. Look at what the row offers. There is no "Present" button, only "Attendance opens once the EFT is marked paid".

3. Tell the caller you cannot mark them present, and why.
4. Do not take cash. There is no cash, card or door payment in the system.

A teacher on a school's place who never registered

1. Find the school's row in "Done". It says "Teachers check in on their own places".
2. Click the underlined school name. "Teachers on Silvertree Primary School's places" opens.
3. Read how many places are used:
 - **Places used:** 1 of 2
4. Tell the caller what the teacher does: she registers herself on her phone with the school's "Register a teacher" link, or with the school code on the booking page. Then she scans the door QR.
5. Do not try to mark the school row present. A school row is money, not a person. Each teacher gets her own row.
6. Click "Refresh" to see the teacher's own "Paid by school" row appear in "Check in".

Mark a no-show absent

1. On the person's row in "Check in", click the "..." menu.
2. Click "Mark absent".
3. Tell the caller whether the person gets an email. If "Sorry we missed you" is on, they get "We missed you at TRAINING - Classroom Management Essentials - delete after" 10 to 25 minutes later. If it is off, they get nothing. It is off unless a super admin switched it on.

If the person walks in late, they can scan the door QR before 23:59 today. That changes "Absent" to attended.

Fix a mark after the Undo has gone (look only today)

1. Click "Published Links" and select today's workshop.
2. Expand "Registrations, coupons and documents".
3. Find the row in the "Attendee ledger".
4. Point to its "Attendance" select. It offers "Not checked in", "Attended" or "Absent".
5. Change nothing today.

What you should see:

- Palesa's row in "Certificate to send": "Checked in <date and time> · Self check-in".
- After "Present": the message "<name> in <workshop>, ref <EFT reference>: marked attended." with "Undo". A teacher on a school place shows "booked <date>" instead of the reference.
- After "Undo": "...: marked not checked in."
- After "Mark 2 attended": the message "2 attendees marked attended." with no Undo, and both rows in "Certificate to send" marked "Staff".
- After "Mark absent": the message "...: marked absent." with "Undo", and the row in "Done" as "Absent (Staff)".
- The unpaid row unchanged in "Owes money".
- If the attendance emails are on: 10 to 25 minutes after each mark, "Thank you for attending TRAINING - Classroom Management Essentials - delete after" or "We missed you at TRAINING - Classroom Management Essentials - delete after" in loxly@lbttec.co.za. A mark you undid within seconds sends nothing.
- If they are off: no email goes to anyone when you mark present or absent.

If something goes wrong:

- "Could not save. Choose a status again to retry." in red on the row: try the row again. If it says the booking is not paid or is cancelled, it is not yours to fix.
- "Mark all N present" is greyed out with "Bulk check-in works one workshop at a time. Select a workshop above, or use Present on each row.": pick one workshop in the "Workshop" select first.
- The caller says a phone shows "We found your booking, but it isn't paid yet. Please see the NAPTOSA staff at the registration desk.": the booking is unpaid. Hand it to Finance.
- The caller says a phone shows "That doesn't match this booking." or "Too many tries for that booking.": mark the person "Present" yourself.

When to hand it to Finance: an unpaid person at the door. Only Finance can click "Mark EFT paid", and only once the money shows on the bank statement. Then attendance opens and you mark them present. You say to the caller: "I can't mark her present until Finance has marked her EFT paid. Please ask her to email her proof of payment to the office. She can sit in meanwhile."

What the system cannot do yet, and what to do instead:

- **You cannot switch on the attendance emails.** "Thank you for attending" and "Sorry we missed you" are reminder settings. Your screen says "You can see these settings but not change them. Ask a super admin, Finance, case admin or supervisor." In the Western Cape, ask a super admin. While they are off and someone needs to know, contact the person yourself.
- **You cannot fix a wrong "Absent" from the "Done" row.** Once the Undo has gone, use the "Attendance" select in the Attendee ledger.
- **You cannot mark an unpaid person present, or take cash or card at the door.** Hand it to Finance.

Notes:

A member phones about her certificate

What you will learn: You will learn that certificates go out by themselves at 08:00 the morning after the workshop, that you can send one straight away, and that an issued certificate is final.

What is happening: It is after the workshop. Thandi Mokoena phones. Her colleague already has a certificate and she has nothing yet. Issue certificates, prove what was sent, and be honest about what a certificate cannot do once it is issued.

Your facilitator has already sent Palesa's certificate.

What you need to know first:

- A certificate copies the name as booked, the workshop title, the dates, the facilitator, the CPTD points and the SACE number, with a certificate number. Editing the workshop later never changes it. It cannot be withdrawn.
- Certificates also go out by themselves at 08:00 the morning after a workshop's last day. They go to everyone who paid, was marked present and has no certificate yet. Each person gets one, once.
- Any staff member except read-only accounts may click "Send certificate". You do not need the Finance tick.

Open the people waiting for a certificate

1. Click "All Registrations".
2. Pick today's workshop in the "Workshop" select. After 16:30 it sits under "Closed archive". Before that it is under current workshops.

3. Open the "Certificate to send" group.

If someone asks you to change the name first

1. Check the name on the row before you click anything.
2. Tell the caller three things. The certificate prints the name exactly as it was booked. Nobody can edit a booked name on screen. An issued certificate cannot be changed.
3. Offer two choices:
 - Log it with the system administrator and issue it once the name is fixed. Say plainly that this only works if the name is fixed before 08:00 tomorrow, because the automatic run sends it then with the name as booked.
 - Issue it now with the name as booked.
4. Let the caller choose.

Send one certificate

1. Click "Send certificate" on the person's row.
2. Read the box:
 - **Title:** Issue and email a certificate for Thandi Mokoena?
 - **Line:** Thandi Mokoena will be emailed a certificate for TRAINING - Classroom Management Essentials - delete after. This cannot be undone.
3. Click "Send certificate" in the box.
4. Watch the button read "Sending...", then read the message. The row moves to "Done".

If someone unpaid needs a certificate

1. Search for the person:
 - **Search:** Abrahams
2. Find the row in "Owes money".
3. Tell the caller no certificate is possible yet. Name the order: first Finance confirms the EFT and marks it paid, then attendance is marked, then the certificate is sent.
4. Promise no date.

Send the rest with "Send all"

1. Check who is left in "Certificate to send". If anyone other than the person you expect is there, do not use "Send all". Click "Send certificate" on the one row instead.
2. Click "Send all 1" in the group header. The button shows the count.
3. Read the two lines in the confirm panel. The second must name only this workshop.
 - **Title:** Issue and email 1 certificate?
 - **Covers line:** This covers TRAINING - Classroom Management Essentials - delete after.
4. Click "Send 1".

Check the email

1. Open the facilitator's inbox:
 - **Inbox:** loxly@lbtec.co.za
2. Find Thandi's certificate email. Other people's are there too, so check the attachment name ends with her initial and surname.

3. Open the PDF and read what is printed on it.

Send it again when asked

1. In "Done", on the person's row, click the "... " menu.
2. Click "Resend certificate email".
3. Read the message.
4. Tell the caller to keep the email and to check Spam if it goes missing. It is also under Workshops in the member portal when she signs in with her booking email.

If the caller asks about her SACE points, use the "CPTD points" tab. You practise it in the next exercise. Say only what the screen shows. The SACE number is the one staff typed on the workshop. It is not a check with SACE.

What you should see:

- After one certificate: the message "Certificate CERT-WS-<date>-<short code>-<initial and surname> issued. Emailed to the attendee." and the row in "Done".
- After "Send 1": the message "1 certificate issued." It says "certificates" when more than one goes.
- "Certificate to send" reads "No certificates waiting to be sent."
- Rows in "Done" read "Attended (Staff) · Certificate CERT-WS-... issued".
- In loxly@lbtec.co.za, Thandi's email:
 - **Subject:** Certificate of Achievement - TRAINING - Classroom Management Essentials - delete after
 - **What it says:** Your Certificate of Achievement is attached to this email as a PDF.
 - **Attachment:** Certificate - TRAINING - Classroom Management Essentials - delete after - <Initial Surname>.pdf
 - **On the PDF:** her name, the workshop title, the dates, the facilitator, the CPTD points and the SACE number.
- After the resend: "Certificate email was already delivered, so it was not sent again."

If something goes wrong:

- A warning stays on screen saying the certificate was issued but the email did not send: go to "Done", open the row's "... " menu and choose "Resend certificate email".
- "Certificate email could not be sent. <reason>": read the reason. A bad address needs Finance.
- An error starting "certificate: ... has not paid for this workshop": the person is unpaid. Finance first, then attendance, then the certificate.
- An error starting "certificate: ... is not marked as attended": mark them "Present" first.
- The "This covers ..." line names more than one workshop: click "Cancel", pick this workshop in the "Workshop" select and try again.
- You cannot find a person in "Certificate to send": they are unpaid, not marked present, absent, already sent, or it is a school row. Schools never get certificates. Teachers get them in their own names.

Careful: the Attendee ledger in "Published Links" has an "Issue & email certificate" button. It sends straight away, with no "This cannot be undone" box. Check the name first.

When to hand it to Finance: an unpaid person asks for a certificate, or a certificate email fails because the address is wrong. You say: "This booking still shows as unpaid. Please can you check the EFT against the bank statement and mark it paid if the money is there?" Or: "The certificate email bounced. Please can you correct the payer email so I can resend?"

What the system cannot do yet, and what to do instead:

- **Nobody can change the 08:00 time or send the automatic certificates tonight.** To send tonight, use "Send certificate" on each row or "Send all" for the workshop. "Run now" on the "Certificates" panel is for a super admin only, after the workshop has ended.
- **Nobody can withdraw a certificate or change the name, points, SACE number or dates on one that is issued.** Check the name before issuing. If it is wrong, do not issue. Log it with the system administrator, and issue once it is fixed.
- **Registration does not close the moment the workshop ends.** The website's Events page drops the workshop on its own after 16:30, and the nightly run at 00:05 closes its registrations. Until then, the booking link and its QR code still take bookings. To stop them sooner:
 1. Open Workshops > "Published Links".
 2. Click the group "Needs closure". It shows "N past dates still open".
 3. Select the ended workshop.
 4. Click "Close registrations".
 5. The workshop moves to "Closed archive". Every booking, payment, attendance mark and certificate stays.
- **You cannot link a portal account to a booking made with another email.** Find the person in "All Registrations", use "Resend certificate email" to the booking address, and help them by phone or email.
- **Online and hybrid joining links were not practised today.** A later self-paced lesson covers them. Until then, ask your facilitator before you set up an online or hybrid workshop.

Notes:

Export the register and read someone's points

What you will learn: You will learn that you can export the register yourself, that your file never has money in it, and where a person's CPTD points show.

What is happening: The workshop is done. You download the register and look up one person's points.

1. In "All Registrations", click "Export Excel" in the toolbar.
2. In the "Export Excel" box, type the workshop name in "Find a workshop" and tick only:
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
3. Leave "Member type" as it is:
 - **Member type:** All registrations
4. Notice there is no "Payment" filter on your screen.
5. Read the note. It says "A school booking is one row, with every teacher who used its code listed beneath it." It ends "This file has no financial data: no amounts, payment details, invoice or receipt numbers. A Finance user can export the full report."
6. Read "<n> registrations match these filters".
7. Click "Download Excel".
8. Open the file and name the sheets: About this report, Summary, Registrations, Attendance register, CPTD points.
9. Check that Amount, Payment status, invoice numbers and receipt numbers are not there. The Registrations sheet has "Booking status" instead.
10. Optional: back in "All Registrations", click "More filters" and set:
 - **Attendance:** Attended

11. Check the "Filtered:" line and click "Export N (CSV)".
12. Click the "CPTD points" tab.
13. In "Search", type a surname from today:
 - **Search:** Mokoena
14. Click the person's row. Read the date, the points, the SACE number and the certificate number.

What you should see:

- The button reads "Preparing Excel...", then the message "Excel download started."
- **Excel file name ends:** -no-financial-data-<date>.xlsx
- **CSV file name:** registrations-<workshop>-no-financial-data-<date>.csv, with only the attended rows.
- In "CPTD points": "<n> attendees. Select a person to see each workshop." After you open a row, one line per workshop with "CPTD points", "SACE number" and "Certificate number".

If something goes wrong:

- "Choose at least one workshop.": tick a workshop in the list.
- "Workshop data could not be loaded. No file was exported.": click "Retry loading".
- "Excel export failed. Please retry the download.": click "Download Excel" again.
- The CSV has other workshops' people in it: the CSV exports exactly the rows on screen. Set the "Workshop" select and the filters first.
- "No CPTD points yet. A workshop counts once the attendee is marked attended and their certificate is issued.": the person is not marked attended, or has no certificate yet. Go back to the register.

When to hand it to Finance: someone asks you for amounts, payment status or receipt numbers. Never type them in by hand from the screen. You say: "My export has no amounts in it. I can send you the attendance register now. Please can Finance run Export Excel from their own login for the full report?" In the Western Cape, that is a super admin.

What the system cannot do yet, and what to do instead:

- **Your export cannot include money.** Only Finance gets the full version. Send your attendance register if it helps, say it has no amounts, and ask Finance to run the full export.

Notes:

Check yourself

1. The preview says "This will email 4 paid attendees." but the workshop shows 6 bookings. Who is left out, and why?
2. A teacher at the door says she paid by EFT last night. Her row is in "Owes money" and she offers R250 cash. What do you do?
3. You marked someone "Absent" by mistake and the Undo has gone. Where do you fix it?
4. A colleague who is a case manager, not read-only and without the Finance tick, asks if she may send two certificates. What is true?
5. A workshop ended at 16:30 today. At 17:00 its booking link still works. Why, and what do you do?

Answers

1. The unpaid booking in "Owes money" and the school's row are left out. A teacher on a school place still gets it, on his own row.

2. Say no to the cash and hand it to Finance. She emails proof of payment, Finance marks the EFT paid, then you mark her present. She can sit in meanwhile.
3. "Published Links" > the workshop > "Registrations, coupons and documents" > "Attendee ledger" > the row's "Attendance" select.
4. She may send them. She must check the names first, because an issued certificate is final and cannot be withdrawn.
5. The nightly run only closes it at 00:05. To stop bookings now, open "Published Links" > "Needs closure", select the workshop and click "Close registrations".

Your first workshop end to end

This is the last part of the day. You run one brand-new workshop by yourself, from your own planning sheet to a closed record. You do every step on your own laptop, on your own Western Cape staff account.

Your facilitator plays three people and says out loud who is talking:

- **The Provincial CEO:** your senior manager. Busy, short on time, wants results and numbers.
- **The Narrator:** short scene lines, like "A booking comes in on the link you sent."
- **Finance:** your facilitator says "Finance:" out loud before doing anything as Finance.

Keep one question in your head the whole time: "Is this mine to do, or do I recognise it and hand it to Finance?"

Before you start: your brief and your checklist

What you will learn: You will learn what the whole job looks like, from planning sheet to closed record, before you touch the app.

What is happening: Your facilitator hands you a one-page brief, a completion checklist and your printed "Workshop planning sheet". Today you are the Workshop creator. You do not have the Finance tick.

The Finance tick is an extra permission on a staff account. Without it you cannot see money buttons like "Mark EFT paid". In the Western Cape nobody has the Finance tick today and there is no auditor. So Finance here means the super admins.

What done looks like: the workshop is published and shared, one booking is followed, the payment is handed to Finance, the "Workshop starts today" email is sent, attendance is marked, a certificate is issued, an export is downloaded, management questions are answered, and registrations are closed on this workshop and on every other TRAINING workshop.

1. Read the completion checklist below.
2. Write "mine" or "Finance" next to each line. Do not look anything up. Go with your first answer.
3. Turn the sheet face down. You will look at it again at the end.
4. Sign in on your own Western Cape staff account.
5. Open the Workshops page.
6. Check the tab bar.

What you should see: six tabs.

- "Create Workshop"
- "Published Links"
- "All Registrations"
- "Analytics"
- "Reminders"
- "CPTD points"

Only workshop creators see "Create Workshop". If it is missing, tell your facilitator. If you see workshops from other provinces, you are on the wrong account. Sign out and sign in with your own Western Cape login.

Your completion checklist. Tick a line only when you can see the result on screen. Thinking you clicked it does not count.

| # | What you must see on screen | Mine or Finance? | Done | |---|---|---|---| | 1 | Toast "Workshop created." and the workshop under "Drafts" | | | | 2 | Toast "Workshop link is active. Registrations are open." | | | | 3 | Toast "Application link copied." | | | | 4 | The booking row in "Owes money" | | | | 5 | The hand-off sentence said, and Finance's toast seen | | | | 6 | The row in "Check in" showing "Paid R 250,00 · EFT" | | | | 7 | The check-in email result line starts with "Sent 1" | | | | 8 | A toast ending "marked attended." | | | | 9 | Toast "Certificate CERT-WS-... issued. Emailed to the attendee." | | | | 10 | Toast "Excel download started." | | | | 11 | Management questions answered from the right screens | | | | 12 | Toast "Registrations closed. The application link is inactive." on this workshop, on "TRAINING - Term 3 Curriculum Planning - delete after" and on every other open TRAINING workshop, all now in "Closed archive" | | |

A few words you will meet:

- **Toast:** the short message that pops up after a click.
- **Drafts:** workshops that are not published yet.
- **Owes money:** bookings that are not paid yet.
- **Check in:** paid bookings waiting for the day.
- **Certificate to send:** people marked present who still need their certificate.
- **Done:** people who attended and got their certificate.
- **Needs closure:** workshops whose dates have passed but whose booking link is still open.
- **Closed archive:** closed workshops, with all their records kept.

Exercise 1: Set it up from your planning sheet

What you will learn: You will learn that you can create, publish and share a workshop from your own planning sheet with no help.

What is happening: This afternoon's workshop is on your planning sheet. Nobody phones you about it. You plan it and you set it up. Then the Provincial CEO asks for the link.

Your planning sheet says:

- **Title:** TRAINING - Capstone Run - delete after
- **Member price:** R 250
- **Non-member price:** R 400
- **Capacity:** 5
- **How it runs:** In person
- **Venue and address:** the training venue address on your sheet
- **Start:** today, 08 Oct 2026, 13:00
- **End:** today, 08 Oct 2026, 16:00
- **CPTD points:** 2
- **SACE endorsement number:** none

Every value you type comes from this sheet. The only thing you write yourself is the description.

1. Read your planning sheet line by line. Check for anything missing before you start.
2. Click the "Create Workshop" tab.
3. In "1. Details & Scheduling", fill in:
 - **Title:** TRAINING - Capstone Run - delete after
 - **Short code:** accept the one the system suggests, or type your own of up to 6 letters or digits
 - **Description:** a short description in your own words

- **Start:** today, 08 Oct 2026, 13:00
 - **End:** today, 08 Oct 2026, 16:00
4. Wait for "Available" under "Short code" before you go on.
 5. In "2. Delivery & Pricing", fill in:
 - **Non-member price in ZAR:** 400
 - **Member price in ZAR:** 250
 - **How it runs:** In person
 - **Venue and address:** the training venue address on your sheet
 - **Capacity:** 5
 6. In "3. Certificate & SACE Accreditation", fill in:
 - **CPTD points:** 2
 - **SACE endorsement number:** leave it empty
 7. In "4. Documents & Media", add only files your planning sheet gives you. Never upload a test or placeholder picture.
 8. Read the footer note.
 9. Click "Create workshop".
 10. Click "Publish workshop" in the workshop header. There is no confirm box.
 11. The CEO asks for the link. Click "Copy link" next to "Application link".
 12. Send the link to your facilitator in a chat or an email.

The short code goes into the EFT payment reference people use when they pay. Each active workshop needs its own. CPTD points are the professional development points the attendee gets on the certificate.

What you should see:

- Before you submit, the footer note: "This workshop starts as a draft. Publish it from Published Links when you are ready for registrations."
- After "Create workshop": the toast "Workshop created." The page jumps to "Published Links" with your workshop selected under "Drafts".
- After "Publish workshop": the toast "Workshop link is active. Registrations are open." Your workshop is under "Current & upcoming" with a green status pill.
- After "Copy link": the toast "Application link copied."

If it goes wrong:

- The form says "Enter the CPTD points, or tick No CPTD points for this workshop.": you skipped the CPTD line. Fill it in from your sheet.
- A red banner "Workshop could not be created. ..." appears: fix the field it names and click "Create workshop" again. Your entries are still there.
- The short code line says "Already used by another active workshop. Try ...": click the "Use ..." button it offers, or type another code and wait for "Available".
- After publishing, the toast says "The workshop dates have passed. Review the dates or close registrations before sharing its link.": the dates are wrong. Click "Edit details", fix Start and End, and click "Save changes".
- "Clipboard access was blocked. ...": click in the "Application link" field and copy it by hand.
- You pressed Enter in a single-line field and the form saved too early: find the workshop under "Drafts", click "Edit details", finish the fields and click "Save changes".

Good to know: a file you upload can be taken off later with "Remove", but the removal cannot be undone. Until you remove it, the wrong picture sits on the booking page.

Exercise 2: "Just tick him off as paid"

What you will learn: You will learn that every money step stops with you and goes to Finance, and what Finance needs from you to act fast.

What is happening: A member called Sizwe Dube books on the link you sent and chooses EFT. Your facilitator makes this booking, so its emails go to loxly@lbtec.co.za. Then the CEO says: "One of my members has just booked. He says he's paid already. Just tick him off as paid so he gets his receipt."

1. Click the "All Registrations" tab.
2. Open the "Workshop" select and choose:
 - **Workshop:** TRAINING - Capstone Run - delete after
3. Find Sizwe Dube's row in the "Owes money" group.
4. Read the row. Note the amount and the EFT reference.
5. Tell the CEO you cannot mark an EFT paid yourself, and that Finance checks it against the bank statement first.
6. Say the hand-off sentence to Finance (see below).
7. Wait. Your facilitator, acting as Finance, marks it paid.
8. Click "Refresh" at the right of the tab bar. On a narrow screen only its icon shows.
9. Find Sizwe's row again, now in the "Check in" group.

What you should see:

- In "Owes money", on Sizwe's row:
 - **Badge:** Owes R 250,00 · EFT
 - **Line:** ref EFT-... · Not reminded yet
 - **Gate text:** Attendance opens once the EFT is marked paid
- No "Mark EFT paid" button on your screen. That is correct.
- After "Refresh": the row in "Check in" with "Paid R 250,00 · EFT".

The EFT reference looks like EFT, then the short code, then a number, then the start of the surname. This one ends in -DUBE. The bank details on the booking page are for training only. Never pay them.

When to hand it to Finance: the moment anyone asks you to mark a payment as paid. Your sentence must have four things in it: the name, the workshop, the amount and the EFT reference.

> "Finance, Sizwe Dube booked TRAINING - Capstone Run - delete after for R 250,00 by EFT, reference EFT-...-DUBE. Please check the bank and mark it paid."

Read the real reference off his row. Do not guess it.

If it goes wrong:

- There is no row in "Owes money": click "Refresh" and check the "Workshop" select is on the capstone workshop. A row only appears once the booker has clicked "Save details and continue".
- You see "Mark EFT paid", "Remind" or "Cancel booking" on your own screen: stop. Do not click anything. Your account has the Finance tick by mistake. Tell your facilitator.

Exercise 3: "Get them in and certified today"

What you will learn: You will learn which things happen only when you press a button, and which the system does by itself and when.

What is happening: The CEO says: "The facilitator starts soon. Do people know where to go? And I want certificates out today, not next week. Also send me a list of who came."

Send the check-in email

1. Go to the "Published Links" tab.
2. Select the workshop.
 - **Workshop:** TRAINING - Capstone Run - delete after
3. Click "Check-in link & QR".
4. Under "Email attendees on the day", click "Email check-in details to attendees".
5. Read the count line and the Subject line.
6. Click "Send to 1 attendee".
7. Wait for the result line.
8. Click "Done".

Mark attendance

9. Before you mark anyone present, make sure the person is in the room.
10. Go to "All Registrations" and open the "Check in" group.
11. Click "Present" on Sizwe's row.

Send the certificate

12. Open the "Certificate to send" group.
13. Click "Send certificate" on Sizwe's row.
14. Read the dialog. Check that his name is spelt right.
15. Click "Send certificate" in the dialog.

Certificates also go out by themselves at 08:00 the morning after the workshop, to everyone who paid and was marked present. The CEO wants it today, so you send this one now. Tomorrow's automatic run skips Sizwe, because nobody gets a second one. To show the CEO, open the workshop in "Published Links" and point at the "Certificates" panel.

Export the list

16. In "All Registrations", click "Export Excel".
17. Click "Clear" in the export dialog.
18. Tick one workshop and leave the member filter as it is:
 - **Workshop:** TRAINING - Capstone Run - delete after
 - **Member type:** All registrations
19. Read the note in the dialog.
20. Click "Download Excel".

What you should see:

- In the check-in email dialog: "This will email 1 paid attendee." and the Subject "Today: TRAINING - Capstone Run - delete after starts at 13:00". Then a result line starting "Sent 1".

- The email tells the attendee to scan the QR code at the door. It has no joining link, because the workshop is in person.
- After "Present": a toast ending "marked attended." with an "Undo" action. The row moves to "Certificate to send" with "Checked in ... · Staff".
- The certificate dialog asks "Issue and email a certificate for ...?" with his name and warns "This cannot be undone."
- After "Send certificate": the toast "Certificate CERT-WS-... issued. Emailed to the attendee." The row moves to "Done" with "Attended (Staff) · Certificate CERT-WS-... issued".
- On the "Certificates" panel: "Automatic certificates, all provinces: On since 08 Oct 2026".
- The export note ends: "This file has no financial data: no amounts, payment details, invoice or receipt numbers. A Finance user can export the full report."
- After "Download Excel": the toast "Excel download started." and this file:
 - **File:** naptosa-workshop-report-1-workshop-all-members-no-financial-data-2026-10-08.xlsx

When to hand it to Finance: if anyone wants the list with money in it. Say: "The version with amounts and payment details is a Finance export. I will ask Finance to run it for you."

If it goes wrong:

- "This email says the workshop starts today, so it can only be sent on the workshop day ...": the dates are not today. Fix them in "Edit details".
- "Set the workshop format (online, in person or hybrid) before emailing check-in details.": set "How it runs" in "Edit details".
- "There are no paid attendees to email yet.": Finance has not marked the EFT paid yet, or you need to click "Refresh".
- No "Present" button on the row: the booking is still unpaid. Go back to the hand-off.
- "Could not save. Choose a status again to retry.": click "Present" again.
- You marked the wrong person: click "Undo" on the toast.
- A warning that the certificate email did not send: open the row's "..." menu in "Done" and choose "Resend certificate email". Do not click "Send certificate" again.
- "Choose at least one workshop.": tick the capstone workshop.
- "Excel export failed. Please retry the download.": click "Download Excel" again.

Exercise 4: Numbers, then "get rid of it"

What you will learn: You will learn to answer management from the right screen, to say no to delete and refund, and that closing is the answer because it keeps every record.

What is happening: The CEO has an exco call. He asks three quick questions, one at a time. Then he wants the TRAINING workshops gone.

"How many people actually came, and how many paid?"

1. Go to "All Registrations".
2. Choose the workshop in the "Workshop" select.
 - **Workshop:** TRAINING - Capstone Run - delete after
3. Read him the summary line and the summary of the "Done" group.

"Were we near full?"

4. Click the "Analytics" tab.

5. Read "Workshop trends": the "Attendance", "Payment completion" and "Revenue collected" cards and the "Capacity pressure" list.
6. Tell him these cards add up every workshop in the province. The answer for this one workshop comes from the summary line. Money figures are confirmed by Finance.

"How many CPTD points has that member got with us now?"

7. Click the "CPTD points" tab.
8. Type in "Search":
 - **Search:** Dube
9. Click Sizwe's row.
10. Read "Total points" and the table below it.

"Delete those TRAINING workshops so they're not on the website. And cancel the Term 3 one and refund everyone who paid."

11. Check whether anyone booked or paid before you promise anything.
 12. Tell him the system cannot cancel a whole workshop and has no refunds. Refunds are bank transfers Finance makes outside the app, with the Provincial CEO's approval.
 13. Tell him "Delete workshop" only works while nobody has paid. The capstone has a paid booking now, so it cannot be deleted. "Close registrations" does what he really wants: it takes the workshop off the website and keeps every record.
 14. Go to "Published Links", open "Current & upcoming" and select "TRAINING - Capstone Run - delete after". If its end time has passed, find it under "Needs closure" instead.
 15. Click "Close registrations". There is no confirm box.
 16. Click the "Needs closure" group and read the helper text.
 17. Select the Term 3 workshop.
 - **Workshop:** TRAINING - Term 3 Curriculum Planning - delete after
 18. Click "Close registrations".
 19. Clean up. For each workshop below that still sits in "Current & upcoming" or "Needs closure": select it, read the title out loud, click "Close registrations" and wait for the toast before you move on.
 - **Workshop:** TRAINING - Classroom Discipline - delete after
 - **Workshop:** TRAINING - Chasing the money - delete after
 - **Workshop:** TRAINING - Conflict Resolution Skills - delete after
 - **Workshop:** TRAINING - Positive Discipline Follow-up - delete after
 - **Workshop:** TRAINING - Classroom Management Essentials - delete after
 - **Workshop:** TRAINING - Reading Recovery - delete after
 20. Check that "Current & upcoming" and "Needs closure" hold no TRAINING workshop.
- Never close a workshop whose title does not start with "TRAINING -".

What you should see:

- The summary line for one workshop, like this: "... · ... · 1 booking · 1 paid seat · 0 owe R 0,00 · 1 checked in".
- On "Analytics": the header "Workshop trends" and the "Attendance" card "... of ... paid registrations attended", for the whole province.
- On "CPTD points": "... attendees. Select a person to see each workshop." Sizwe's table shows the capstone line with its certificate number and 2 CPTD points.

- The toast "Registrations closed. The application link is inactive." once for every workshop you close.
- Each closed workshop under "Closed archive" with a grey "Closed" pill. Its link field reads "Reopen registrations to activate the application link."
- The "Needs closure" helper: "These workshop dates have passed but their registration links are still open. Close registrations to archive them, or edit the dates if the event moved." Once the Term 3 workshop is closed it reads: "No past workshops with open links."
- The "Closed archive" helper: "Closed and cancelled workshops stay here with their registrations, payments, attendance and files."

When to hand it to Finance: any refund, and any money figure the CEO will quote. Say: "Refunds are a bank transfer Finance makes outside the app, with your approval. I will pass it to Finance once you say yes. Finance confirms the money figure too."

If it goes wrong:

- You click "Delete workshop" on the capstone and see "A payment has been recorded for this workshop, so it cannot be deleted. Payment records are always kept. Cancel the workshop instead. To stop new bookings now, use Close registrations.": click "Close" and use "Close registrations".
- You closed a workshop that is not a TRAINING one: open "Closed archive", select it and click "Reopen registrations". Confirm the box. You should see "Workshop link is active. Registrations are open." Tell your facilitator straight away. Reopening only sticks while a workshop's dates are still in the future. The nightly run at 00:05 closes any workshop whose dates have passed.
- "Status update failed." stays on screen: click "Close registrations" again. If it fails twice, tell your facilitator.
- "Workshop trends could not be loaded. Check your connection and try again.": click "Retry trends".
- "No CPTD points yet. ...": the certificate was not issued. Go back to "Certificate to send".
- "Nobody matches ...": check the spelling of the surname on the booking. The CPTD tab files people under the NAP number they booked with.
- The CPTD total is more than 2: other TRAINING bookings today used the same test NAP number. Read only the capstone line.

After the run: what closing really does

What you will learn: You will learn that closing kills the old link and keeps every record.

1. Go to "Published Links" > "Closed archive".
2. Select the workshop.
 - **Workshop:** TRAINING - Capstone Run - delete after
3. Read the "Application link" field out loud.
4. Look at the buttons in the header.
5. Watch your facilitator open the old booking link and the website Events page.
6. Go to "All Registrations" and choose the capstone workshop under "Closed archive" in the "Workshop" select.
7. Find Sizwe Dube's row in "Done".

What you should see:

- The link field reads "Reopen registrations to activate the application link."
- "Copy link" is greyed out. There is no "Booking link QR" button. "Check-in link & QR" is still there.

- The old booking link shows "This workshop can't be opened" and "This workshop is not available for payment."
- The Events page no longer lists any TRAINING workshop you closed.
- Sizwe's row is still in "Done" with "Attended (Staff) · Certificate CERT-WS-... issued". Nothing was lost.

What the system cannot do yet, and what to do instead

- **Registration does not close the moment a workshop ends.** The website's Events page drops a workshop as soon as its end time passes, and a nightly run at 00:05 closes its registrations. Until that run, the booking link and its QR code still take bookings. Instead: to stop bookings sooner, open "Published Links" > "Needs closure" and click "Close registrations" on each workshop that is done. If an event moved, edit its dates. "Reopen registrations" on a workshop whose dates have passed is undone at the next 00:05 run.
- **No refunds.** Instead: a refund is a bank transfer Finance makes outside the app, with the Provincial CEO's approval. Pass it to Finance.
- **No way to cancel a whole workshop.** Instead: click "Close registrations" and contact the people who booked yourself.
- **"Delete workshop" only works while nobody has paid.** Instead: once anyone has paid, close registrations. Deleting cannot be undone. Closing keeps the record and can be reopened.
- **You cannot mark an EFT paid, send a payment reminder or cancel a booking.** Instead: say the hand-off sentence to Finance.
- **No staff screen can fix a person's name.** A certificate freezes the name, points, SACE number and dates when it is issued. Instead: before the certificate goes out, stop and ask the super admin to fix the name. Remember the automatic run sends it at 08:00 the morning after the workshop.
- **No automatic "details changed" email.** If you move a workshop, nobody is told. Instead: change the dates in "Edit details", then contact the paid people yourself. Their emails are in your export.
- **The "Workshop starting soon" email is switched off.** In the Western Cape only a super admin can switch it on. Even when it is on, it never reaches someone who booked after the reminder moment. Instead: on the day, use "Email check-in details to attendees".
- **Marking someone present or absent sends no email** while the attendance emails are switched off.
- **A sent email cannot be called back.** That covers EFT instructions, receipts, check-in emails and certificates.

Your learning record

Write this in your own words.

- **What I can now do:**
- **Where I got stuck:**
- **What I still cannot do:**
- **When I will practise again:** (a date)

Now turn over your checklist with your "mine or Finance" marks. Compare them with what really happened. Write one example of "mine" and one of "Finance" from today.

- **Mine:**
- **Finance:**

Check yourself

1. Whose job is "Mark EFT paid", and what four things do you give the person who does it?
2. A workshop ended yesterday at 15:00 and nobody has touched it since. Is it still on the Events page? Can people still book on its link? What do you do?
3. A workshop was published yesterday and three people have booked. The presenter emails a new poster and asks you to take the old one down. Do you do it yourself, hand it to Finance, or stop and escalate?
4. After a workshop, a paid member who attended phones. Her surname is misspelt on her booking and she wants it right on her certificate. What do you do, and by when?
5. The presenter falls ill and the workshop moves two weeks later. Four people have already paid. What do you do?

Notes:

Answers

1. Finance's. Give Finance the name, the workshop, the amount and the EFT reference, then check the row moved to "Check in".
2. No to both, now that the nightly run is live (its first run was the night of 8 to 9 October 2026). The Events page dropped it when it ended, and the 00:05 run closed its registrations overnight. It sits in "Closed archive" with every record kept, so there is nothing to do. If the event moved, edit the dates rather than pressing "Reopen registrations".
3. Do it yourself: "Edit details" > "4. Documents & Media" > choose the new picture > "Save changes". Look for "Workshop updated."
4. Stop and do not click "Send certificate". Ask the super admin to fix the name before 08:00 the morning after the workshop.
5. Change the dates in "Edit details" > "Save changes". Contact the four paid people yourself. Send anyone who cannot come to Finance as a refund request.
